JUNE 6TH
BENSON POLYTECHNIC SCHOOL
MARCH 28 — APRIL 2
OREGON

Do you mean I have to fit this whole big school—students, faculty members, activities, and sports—into these pages of the 1961 Blueprint?

"Here I was, a happy-go-lucky Techman

When suddenly this frightening theme problem grabbed me.

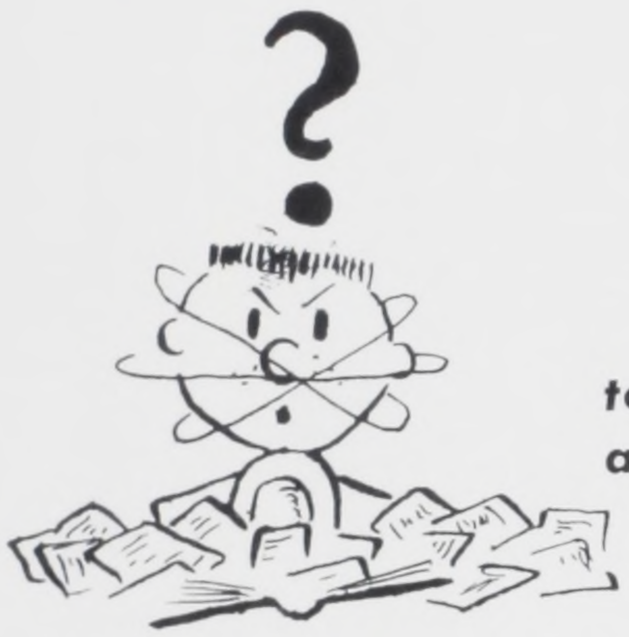

Now, let's see: terrific, thaumaturge, ah . . . theme.

"a theme is an idea worked out or developed . . ."

Say, I have plenty of ideas. How's this — or this — or better still — no, this is it —

Well, what are you going to do? Nothing seems to fit. But, I'll keep trying, stiff upper lip and all that —

I suppose I should start at the beginning, so let's turn the page and see what I have to work with."

A "Techman" Salute

To.....

The Administration

And Faculty!!!

William Oetinger, Class of 1911

The 1961 *Blueprint* is dedicated to a man, William Oetinger, who in many ways has shown himself to be one of Benson's outstanding friends and supporters.

Mr. Oetinger's close association with Benson began shortly after the school was opened. While still an elementary school student he was hired to help in the setting up of Benson's first machine shop. Mr. Oetinger entered Benson as a freshman and after a highly successful high school career, graduated with the Class of 1911. After leaving Benson, he spent some time working in the machine trade but before too long he returned to the school, this time as a shop instructor.

Following military service in World War I, Mr. Oetinger became owner of a small machine shop. This shop grew and soon became one of the most widely known machine works in the Northwest. He continued as operator of the Oetinger Machine Works until his recent retirement.

Mr. Oetinger has been especially active in the promotion of vocational education in Oregon. He is a long-term member of the State Apprentice Council and was instrumental in the establishment of the Portland Apprentice School. Perhaps Mr. Oetinger's most well known contribution, in the interest of Benson, was his leadership in the drive which made the shop construction and rebuilding program possible. Largely through the efforts of this man the school district approved a building program which has given Benson the center automotive shop area, the north shop wing which was opened in 1959, and the newly opened south shop wing.

Surely William Oetinger deserves the appreciation of all Bensonites, past, present, and future, and must be gratefully acknowledged as one of Benson's outstanding graduates.

'61 blueprint dedicated to outstanding leader . . .

Mr. J. W. Edwards

Recognized throughout the nation for his outstanding contributions to American youth, Mr. Jonathan Edwards this year ends his tenure as superintendent of Portland schools.

Coming to the Portland school system in 1927, Mr. Edwards taught history and was a member of the coaching staff at Lincoln High. He later transferred to Grant High and served as a department head until becoming assistant superintendent of District No. 1 schools in 1944. Mr. Edwards held this post until assuming his present responsibilities as superintendent in 1953.

Mr. and Mrs. Edwards plan quite a bit of traveling for the next few years before returning to Portland to enter private business. Benson extends its best wishes to Mr. Edwards with the hope that his future ventures will prove as successful as those of the past.

Dr. Leon P. Minear

Shortly after school resumed following the Christmas holidays, Bensonites were both shocked and extremely pleased by the announcement that their principal, Dr. Leon Minear, had resigned his post in order to accept the appointment of Governor Hatfield to the position of State Superintendent of Schools.

In accepting the new job, Dr. Minear assumed responsibility for the direction and supervision of all Oregon public schools, a task which presents a constant challenge to his organizational and administrative abilities.

Under the guiding hand of the former principal, Benson Polytechnic school achieved national prominence and acclaim for its comprehensive programs in both technical and vocational education. All friends of education throughout the state, particularly "his boys from Benson" regard Dr. Minear highly and look upon him as a man who, with determination and hard work, brought honor and recognition to Benson and who, with the same effectiveness, will undoubtedly provide outstanding leadership as our State Superintendent.

portland schools lose two fine administrators...

interim principal assumes benson leadership . . .

Mr. Marvin R. Rasmussen

Appointed in early January, Mr. Marvin Rasmussen officially took over leadership of Benson on February 1, 1961. As acting Principal Mr. Rasmussen succeeds Dr. Leon Minear, currently State Superintendent of Public Instruction.

Born and raised in Portland, Mr. Rasmussen attended Franklin High. While at the Quaker school he demonstrated many of the qualities which are so important in all administrative positions. After serving as sophomore and junior class president, he was elected student body president during his senior year. He was also prominent as a city leader of the Hi-Y program, and won All-City recognition for his basketball playing.

Leaving Franklin, Mr. Rasmussen attended the University of Oregon and prepared for a career in education. He was a three-year performer on the Oregon basketball team and also won recognition as a baseball varsity player. In addition to his bachelor's degree, Mr. Rasmussen also holds a Master's degree, earned while specializing in counseling and guidance.

His first association with the Portland schools came when he was named to the staff of Roosevelt High. In addition to teaching social studies and science, he coached both the Teddy basketball and baseball squads. After six years at Roosevelt he was transferred to Benson to fill the position of vice-principal.

Recognized as an expert in the field of school counseling techniques, Mr. Rasmussen has been an instructor in counseling and guidance on the summer staff of the University of Portland. His appointment assures continued Benson leadership of the highest possible caliber, leadership worthy of "The Nation's Finest Technical School".

Mr. George Brown, Vice-Principal

Mr. George Brown has been with Benson for 32 years. He has been serving as Vice Principal for the last 18 years.

Mr. Brown attended high school in eastern Oregon and then went on to Oregon State College.

In 1928 he came to Benson and taught science and math for 14 years. He coached basketball, assisted in baseball, football, and soccer. Then in 1942 he became Vice Principal of Benson. Some of the duties of his job are: charge of all shops and drawing classes, including the personnel in these areas, responsibility for the entire school budget and inventory, all student finances, all maintenance and replacement of equipment, all club activities at Benson and General Chairman of the Tech Show.

Mr. H. Max Murray, Vice-Principal

Mr. Max Murray attended the University of Oregon and Michigan's Alma college, has been working actively with Benson students for seven years as a teacher and coach and, more currently, as Benson's curriculum vice principal.

A former math instructor, Mr. Murray is well suited for his exacting job. His reputation for planning and precision is well borne out by the facility with which he handles the multitudes of problems involved in uniting teachers, classrooms, books, supplies, and students harmoniously as a smoothly functioning educational unit.

Mr. Harold Andersen, Acting Vice-Principal

One of the major personnel changes which resulted from Dr. Minear's resignation came with Mr. Harold Andersen's assumption of duties as Benson's acting administrative vice-principal. In his new position Mr. Andersen coordinates all counseling activities as well as supervising student attendance and discipline.

Mr. Andersen, who came to Benson from Grant four years ago, had previously taught English and choral music and served as a sophomore counselor. In addition to an undergraduate degree in music, he holds a Master of Education degree which he earned at Portland University while specializing in counseling and guidance.

Pattern and Drawing

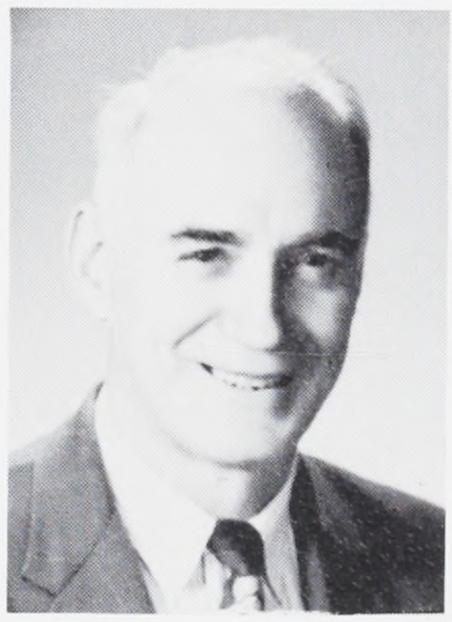

If Benson may be compared with a radio, the students become the dial, seen by everyone. But the faculty represents the intricate wiring of that radio with the principal, Mr. Rasmussen, as that indispensable power supply.

Without its carefully selected and coordinated staff of educators, Benson could not exist as "The Nation's Finest Technical School." Each time the dial of this "radio" moves, it marks a perhaps small, but noteworthy, task completed by a teacher to help Benson "tune in on the beam."

MAIN OFFICE: 7:45

First stop of the day for all teachers is the main office where they sign in and check their mail boxes. These smiling individuals are the faculty members who patiently subject each bewildered Bensonite to his daily quota of declensions, angles, tools, and grammar — masters of the thundering voice and withering glance.

Science maintains that they, too, were once children; but that does not prevent our sudden lost feelings when caught hurling a paperwad or lacking an assignment. Yet, somehow, despite the aggravations we supply, the faculty musters up courage enough to educate the next generation.

counselors advise and encourage...

Benson's counseling staff has the task of assuring each student a balanced program of courses selected according to his interests, needs, and abilities. Among the many duties of the counselors, the most important is placement of students in the proper classes and determining the major best suited to the student, either pre-engineering or vocational training. Personal problems are observed by the counselors and the necessary adjustments are made. To perform their duty to the full extent the counselors must have a thorough knowledge of the students, the curriculum, and the community.

Most successful organizations depend on key personnel to keep them operating smoothly. Benson is no exception. A careful examination of every-day Benson activity will show that in one way or another practically every person connected with the school depends upon these specially skilled workers for some service.

Too often the importance of this vital group is overlooked and, with this in mind, the 1961 *Blueprint* staff wish to offer special thanks for the help and consideration received while producing the yearbook.

exchange student from germany attends benson . . .

The American Field Service exchange student program has been instrumental in bringing boys from foreign countries to Benson since 1956. The Class of 1961, therefore, looked forward to the arrival of Hans Surmann, the latest exchange student, when school began in September.

Hans, who has become a great favorite with his classmates, comes from Cologne, Germany. One of the most important qualifications for A.F.S. candidates is superior scholarship and Hans, despite the obvious language handicap, demonstrated his academic ability by compiling an outstanding record at Benson. Enrolled in some of the more difficult courses, such as Aviation and E.E. Math, he has earned a place on the Tech honor roll.

The second German student to attend Benson, Hans has represented the school while appearing throughout the state with other A.F.S. students. While at Benson, he has lived with the family of another senior, Jim Allyn. Jim claims that his buddy, despite a late start, is rapidly learning the ways of the American teen-age boy, especially those related to the American teen-age girl.

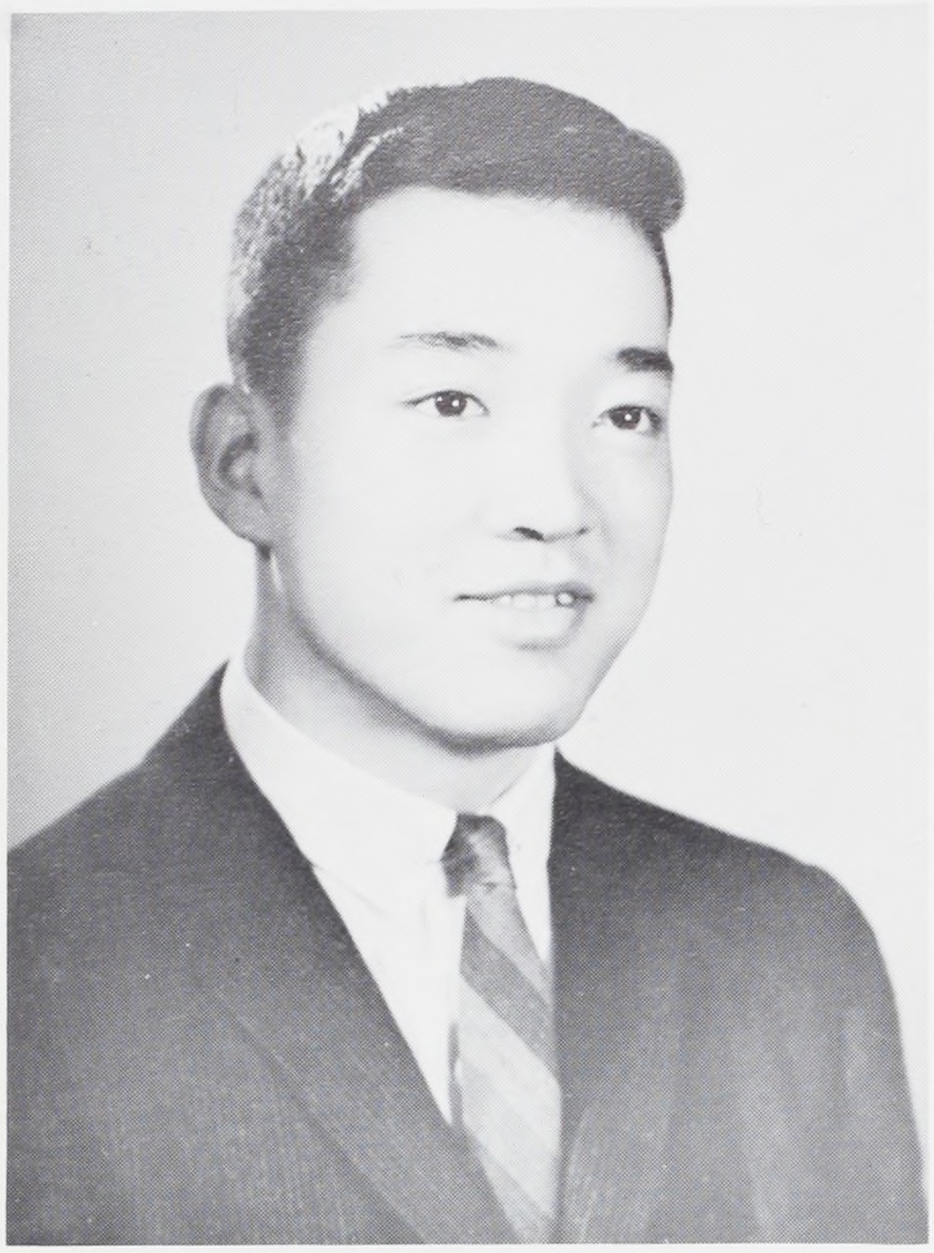

The Blueprint speaks for the entire student body when saluting this young man. Thanks, Hans, for your contributions and greatest success in the future. Always think of Benson as "your" school.

CLASS OF 1961

Proud Benson graduates, young and full of spirit, are prepared to meet the problems of our unsettled world. International unrest casts a shadow on their plans, but, with confidence in their capacities and training, they will initiate careers and lives of their own making. At last their long awaited year. Places to go, people to meet, plans to make—every hour is overflowing. So they will leave us, but memories of their years at Benson will linger always.

S. B. PRESIDENT

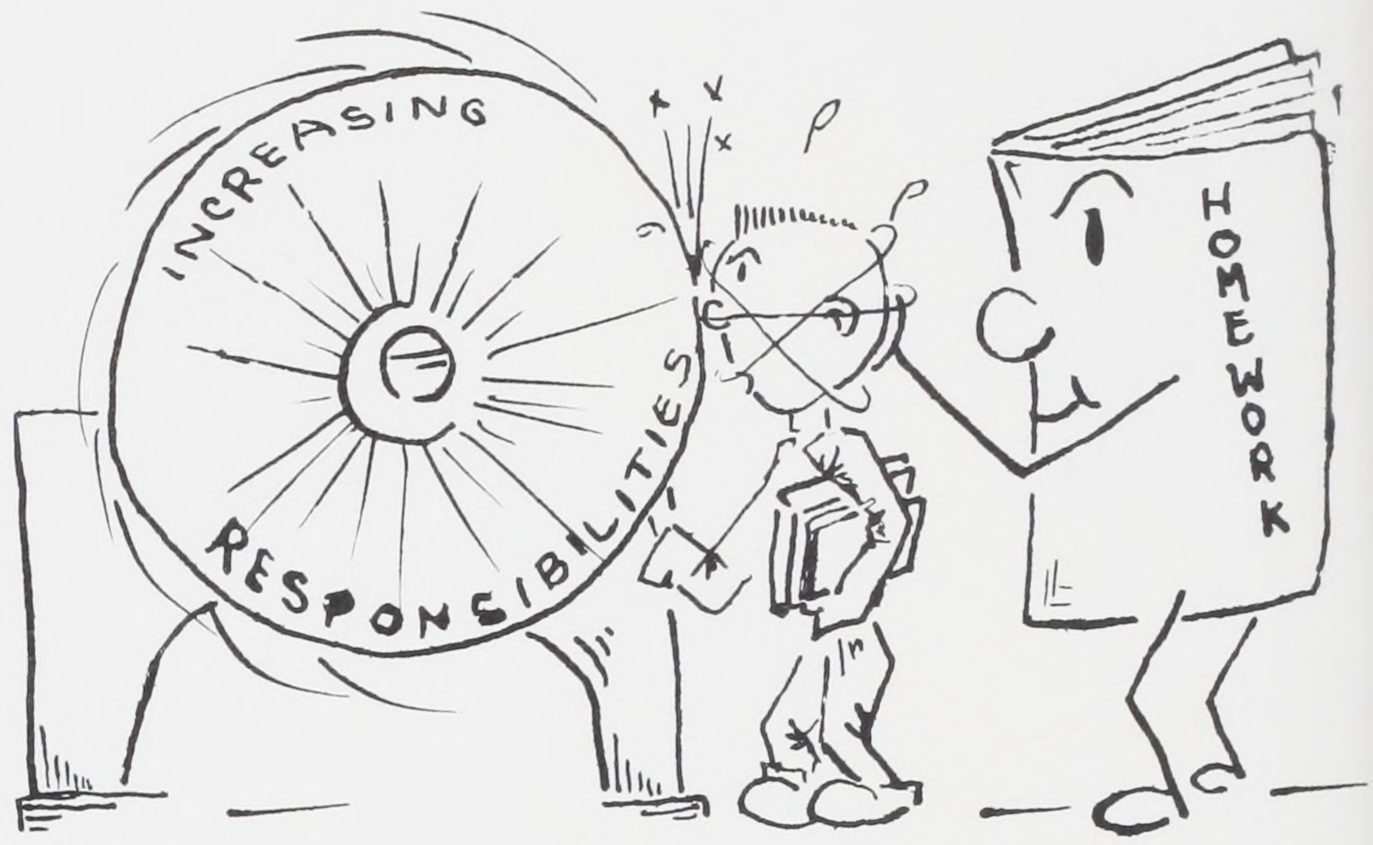

Wheels turn and gears mesh as Mike Kelly, typical of the self-assured junior, grinds through an American history assignment. The junior class found 1960-61 a year of constant challenge—autobiographies, P.S.A.T. tests, term papers—a preview of future responsibilities. Next year they will be the leaders, a role which they are ready to assume with zeal and competence.

With the security of a year in high school behind, sleek sophomores blossom out in loud plaids and highly polished shoes. Although they still flinch at *A Tale of Two Cities,* puzzle over the complications of binominal expansions, and groan about the rigors of physical education, these second-year Techmen are well on their way toward successful manhood.

As a kitten paws at its image in the mirror, so the freshman fumbles to establish himself in Benson's ever-changing scene. Classes, tests, sports, clubs, and service organizations provide the background as they begin to expand their social and mental horizons. The yearly transfusion of "new blood" is vital as Benson strives to continue as *The Nation's Finest Technical School.*

ACADEMICS

Mr. Bajema, Chairman
Science

chem, physics, and bio challenge benson minds . . .

Struggling with theories and special equipment presents a real challenge to Benson science students. Laboratory periods, lecture classes, and weekly tests are very exacting. Mixing chemicals, analyzing unknown solutions, writing equations, and classifying natural phenomena are all part of the day's work in physics, chemistry, biology, and vocational technology classes.

Discovering for themselves the amazing secrets of the world of atoms, molecules, and reactions keeps chemistry students aware of how little man really knows of his environment and how much opportunity there is for an alert and probing mind. Bunsen burners, florence flasks, ring stands, and the ever-present periodic chart of atoms become old friends to Bensonites during the challenging year spent in the chemistry class.

The complicated kingdoms, genii, filums, and specie of plants and animals offer themselves to the inquiries of freshman biology students. Observing one-celled animals under the powerful microscopes, classifying different types of plant life, examining the human body's amazing structures, and determining the relationships of plants and animals in their natural environments typify the activities which bring our budding naturalists to a better understanding of the world around them.

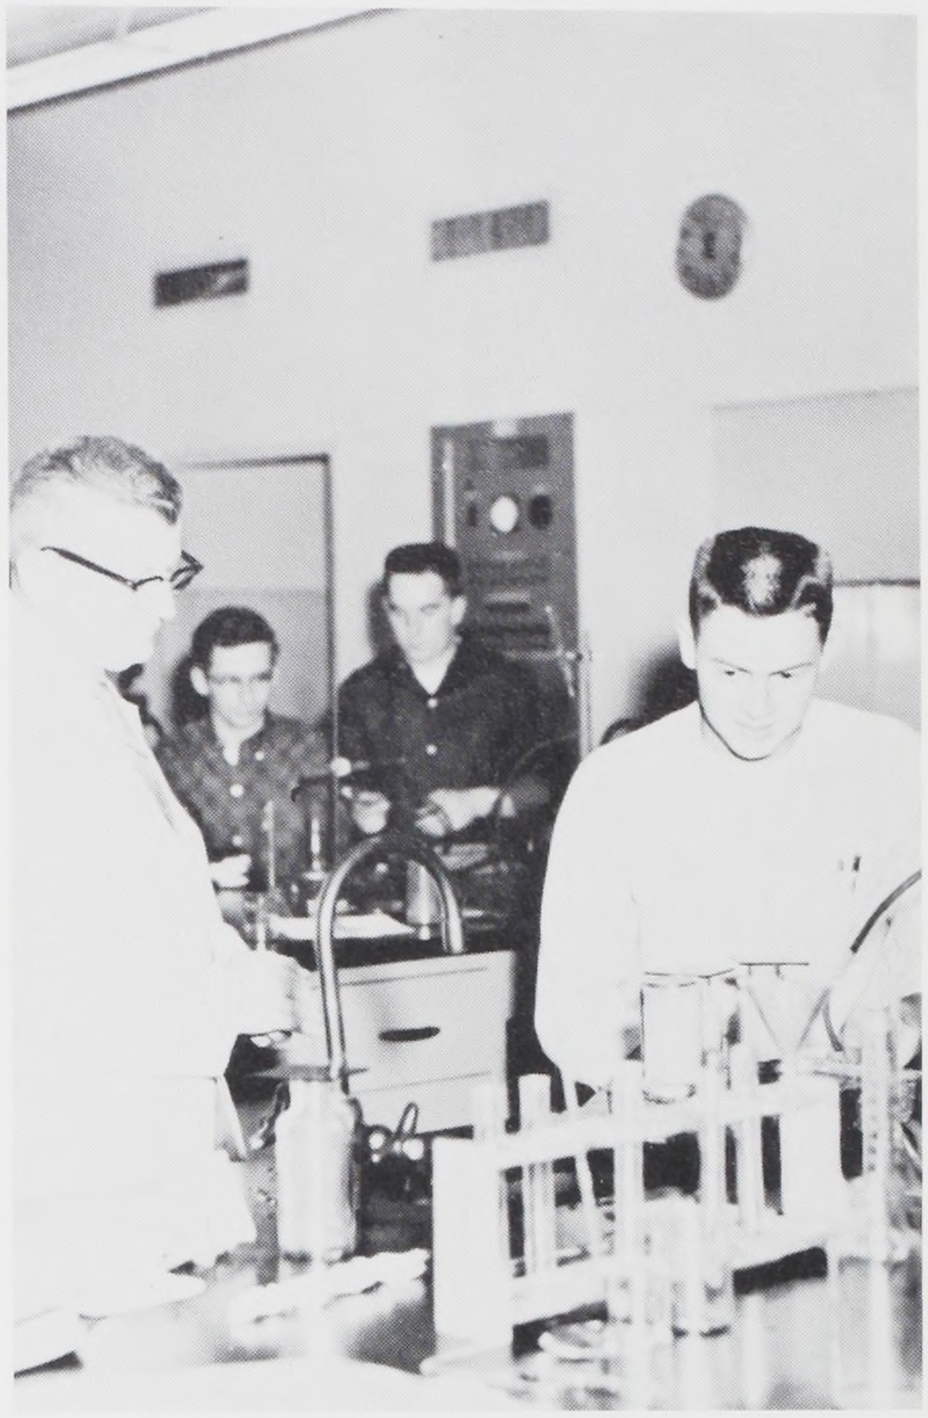

Explaining what makes a baseball curve, why the famous Italian tower of Piza doesn't fall, or why a big ball hits the ground the same time the small one does if dropped from a tower. These paradoxes and many more all confront the physics student during his year of inquiries into the realm of physics.

Larry was a chemist, but Larry is no more . . . What Larry thought was H-2-0 was H-2-SO-4.

Studying model of one-celled animal, fledgling biologist takes mental notes for coming test.

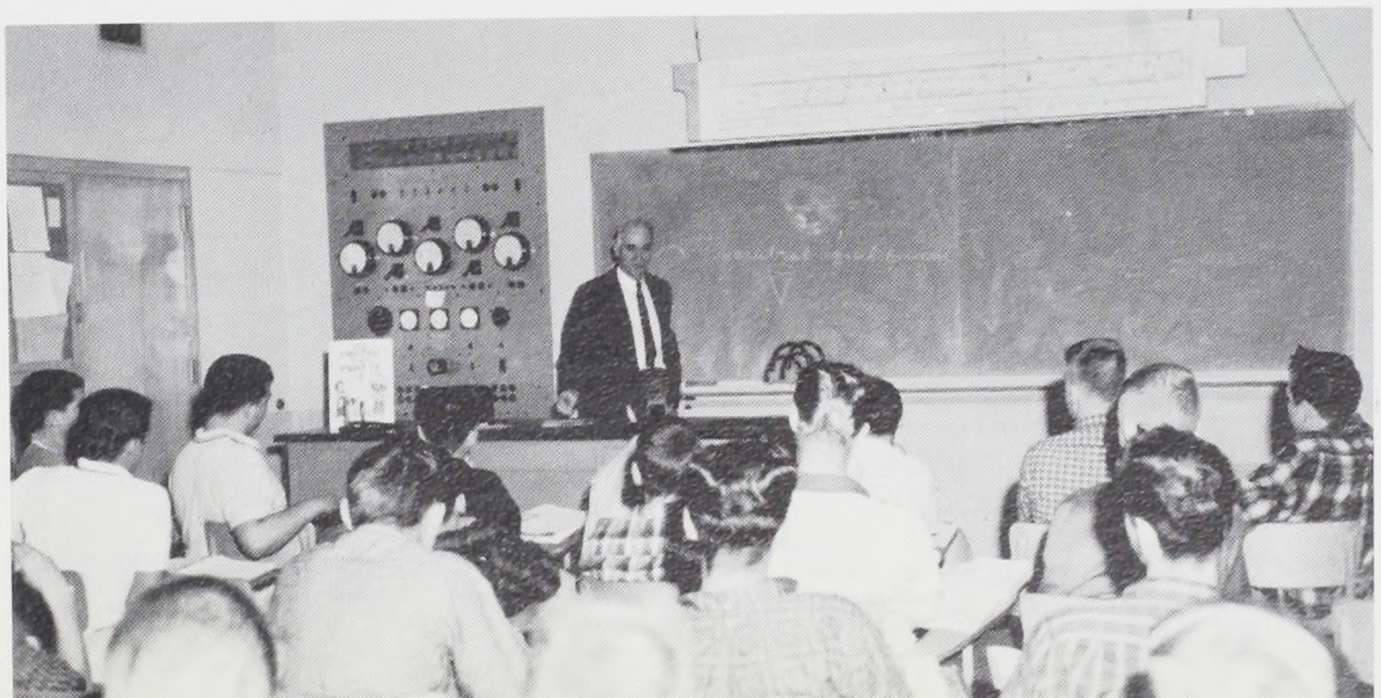

Wary instructor watches the experiment.

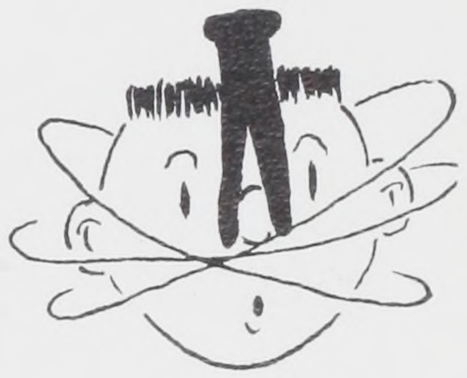

Impressive butterfly collection adds color to hallway.

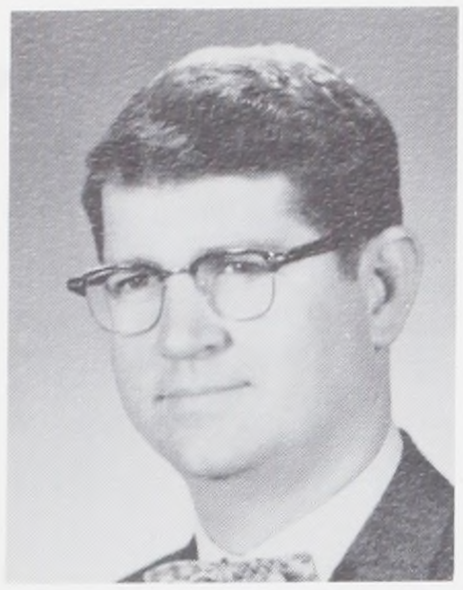

the world of nature attracts SCIENCE students . . .

Sophomores struggling with physics find Mr. Bajema's clear explanations very helpful.

human relations key to SOCIAL STUDIES . . .

Mr. Brewer, Chairman
Social Studies

Designed to bring the related areas of social science—history, geography, economics, political science, and psychology—into focus, the curriculum of the Social Studies department is as vital to future citizens as it is varied.

The study of the great American heritage is the main theme of the junior course. Constitutionalism, sectionalism, tariff, referendum, Manifest Destiny, and New Deal are typical of the terms which students encounter during the year as they develop broader understanding of the traditions, privileges, and obligations of citizenship.

Relizing that the complexities of modern living can prove to be a serious stumbling block to the unprepared, the department requires each senior student to take a course which examines the social forces of contemporary America and attempts to help each student ready himself to deal with these forces in a manner which will profit both him and society.

Also included among the courses offered by the Social Studies department, the elective class designated SS 3-4 examines the important and significant events in world history.

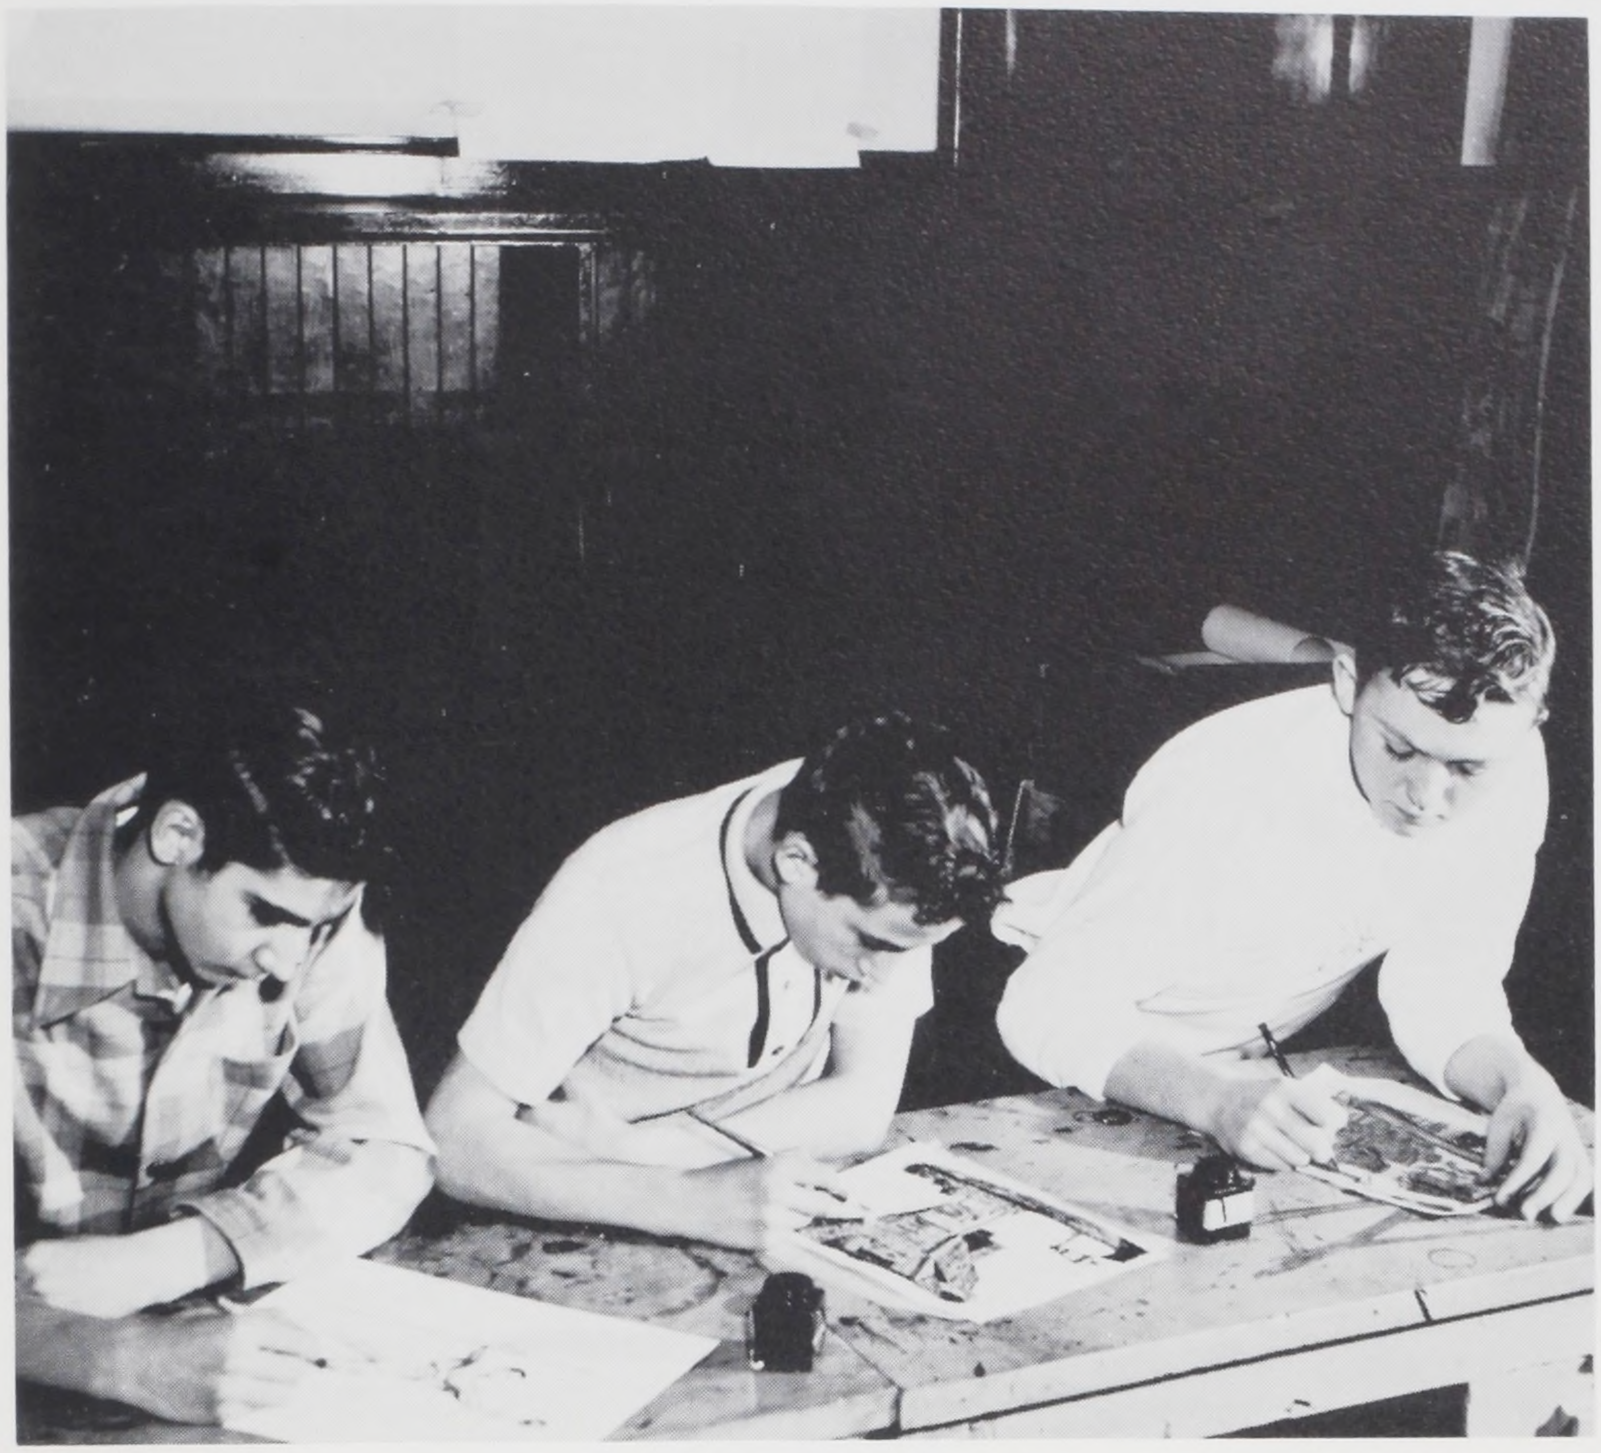

Seniors engage in discussion of project with Miss Franks.

"And so Jerimiah Sigafoos, boy patriot, met his sad end."

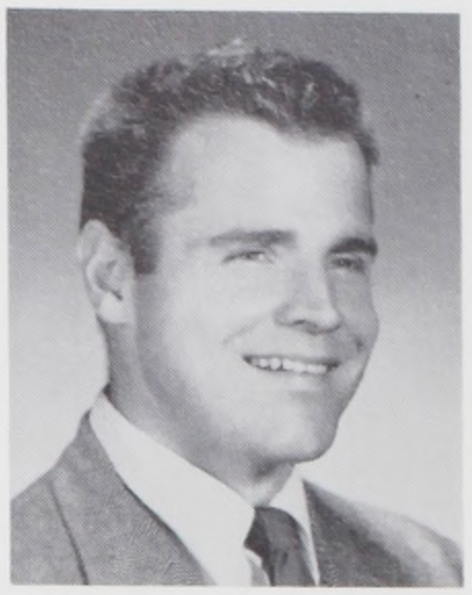

Mr. von Schmidt works with senior surveying propaganda techniques.

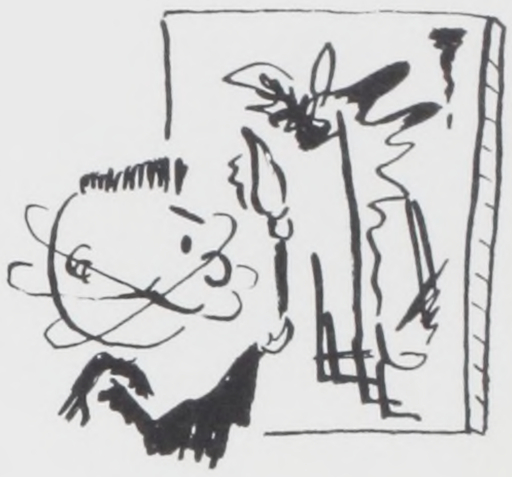

Busy trio of Art students follow through with sketches after lecture.

Mr. Richardson, Instructor
General Art

The Art department offers their course as an elective. At the beginning of the first unit, students learn the basics of art, including industrial design, block printing, silk screening, and building illustration. During the year the students receive extensive training in the use of pen and ink, charcoal, perspective, and folded and cut paper design. A second year in art is also available, which covers magazine cover and record jacket design, and art as it is used in graphic arts work. The art course is a very popular elective, as it is an enjoyable, as well as educational,subject.

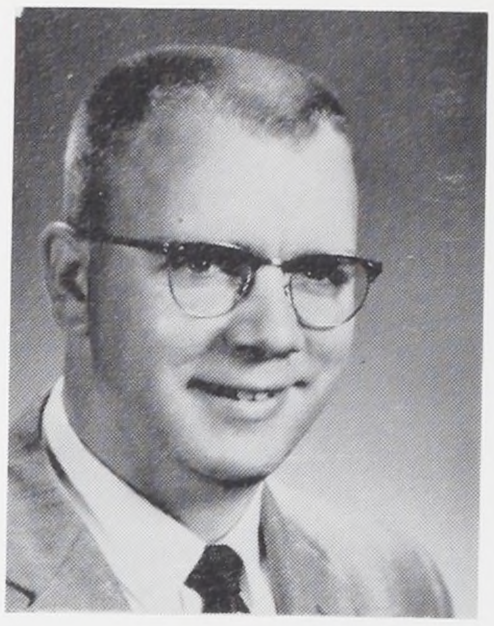

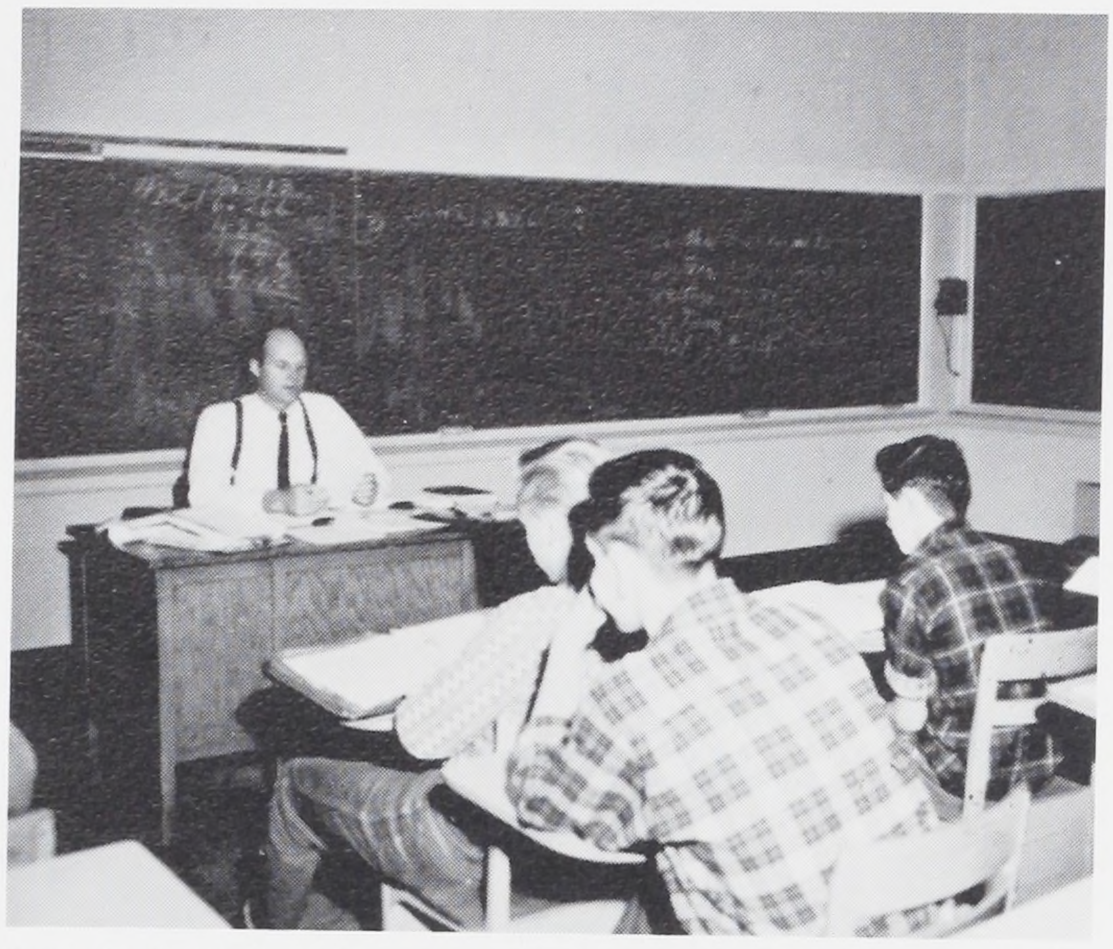

Sam Lyons and Lee Wright take pains inking in tiny details.

colors, forms feature ART work . . .

theorems and postulates spice MATH problems . . .

Mr. Bryson, Chairman
Mathematics

Frosh finally get problems right as Mr. Simmons reads from answer book.

High among the many outstanding features of Benson's academic program stands the activities of the particularly noteworthy mathematic's department.

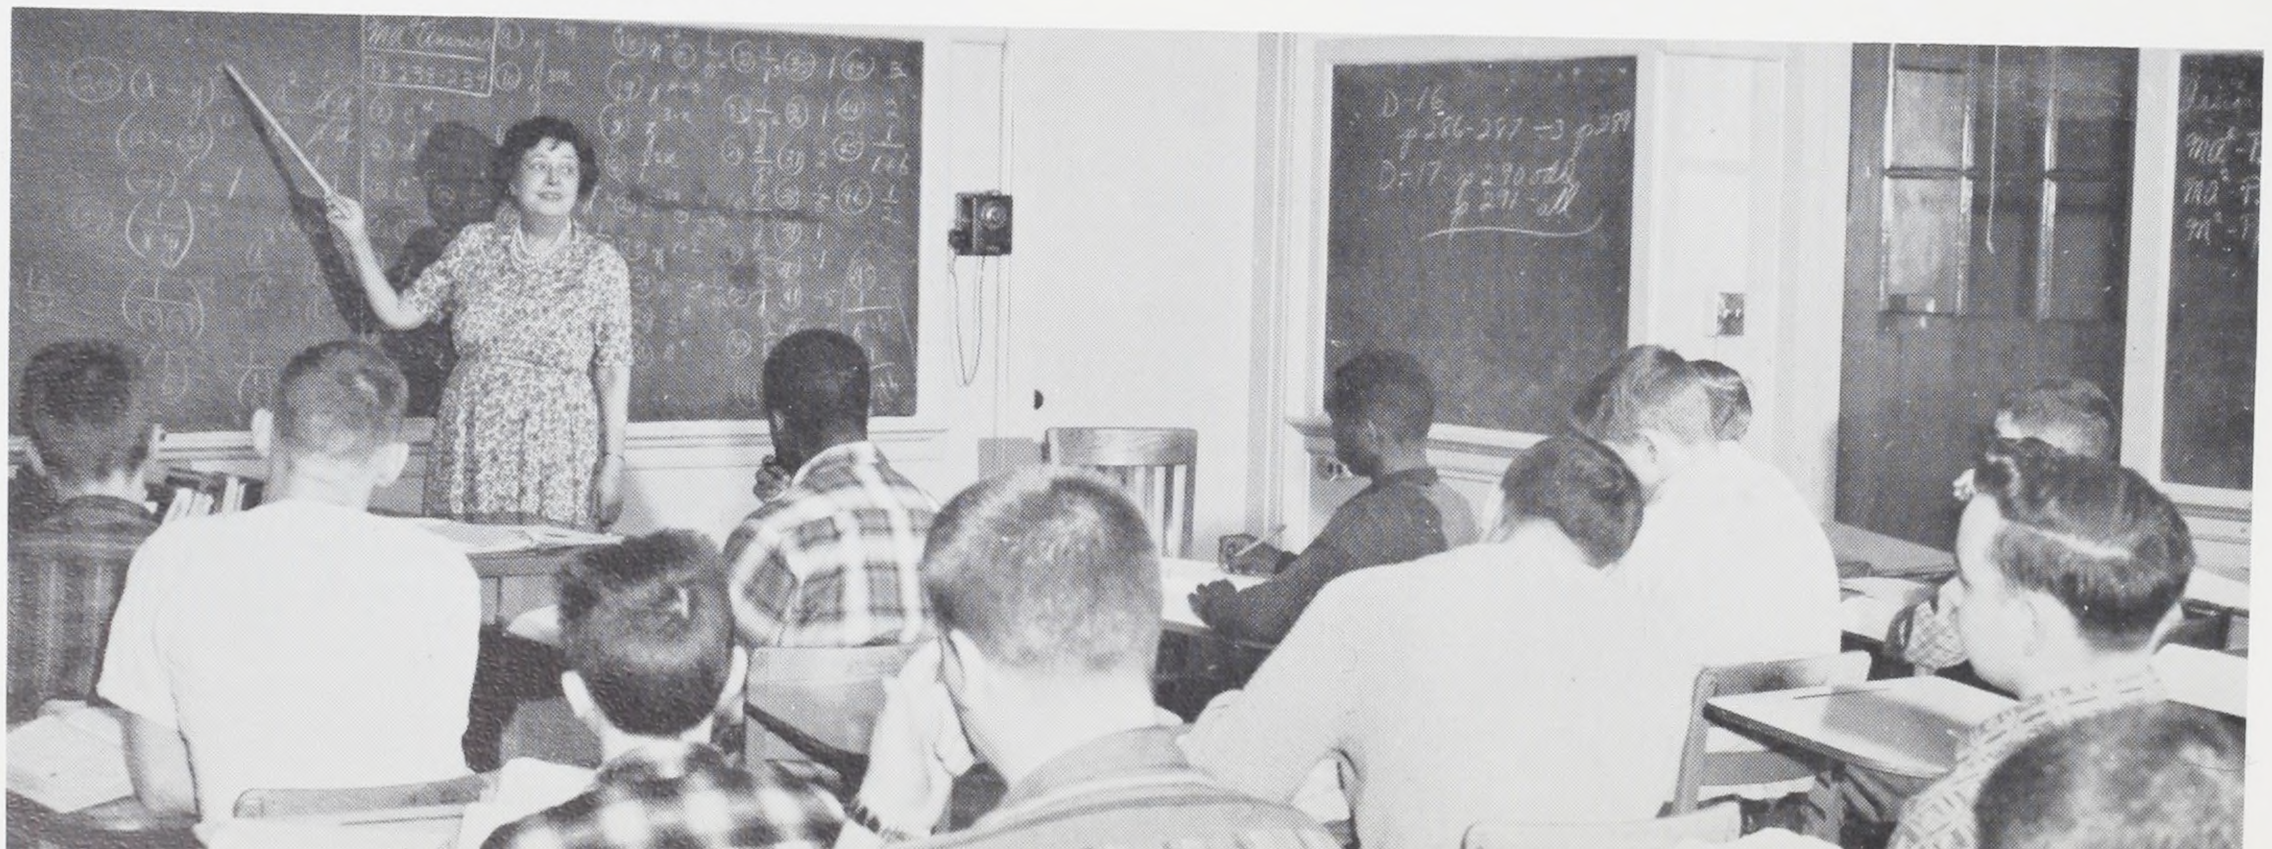

A good percentage of the students at Benson Polytechnic were undoubtedly first attracted to the school by this nationally recognized mathematic's program carried on through the mathematic's department. Benson's math department typifies the outstanding achievements of this school because of the fact that all freshmen must take math or algebra, and by requiring one full year more of math than the conventional high school.

A total of six separate courses, ranging from the basic classes of first year algebra and freshmen math to the complex and advanced classes of algebra, geometry, trigonometry, and consumer math, are maintained by the department.

On the basis of recent evaluation, and competition, both students and instructors involved in this department are ranked the finest in the entire United States.

"Aha, I fooled you again!" remarks Miss Hawkyard.

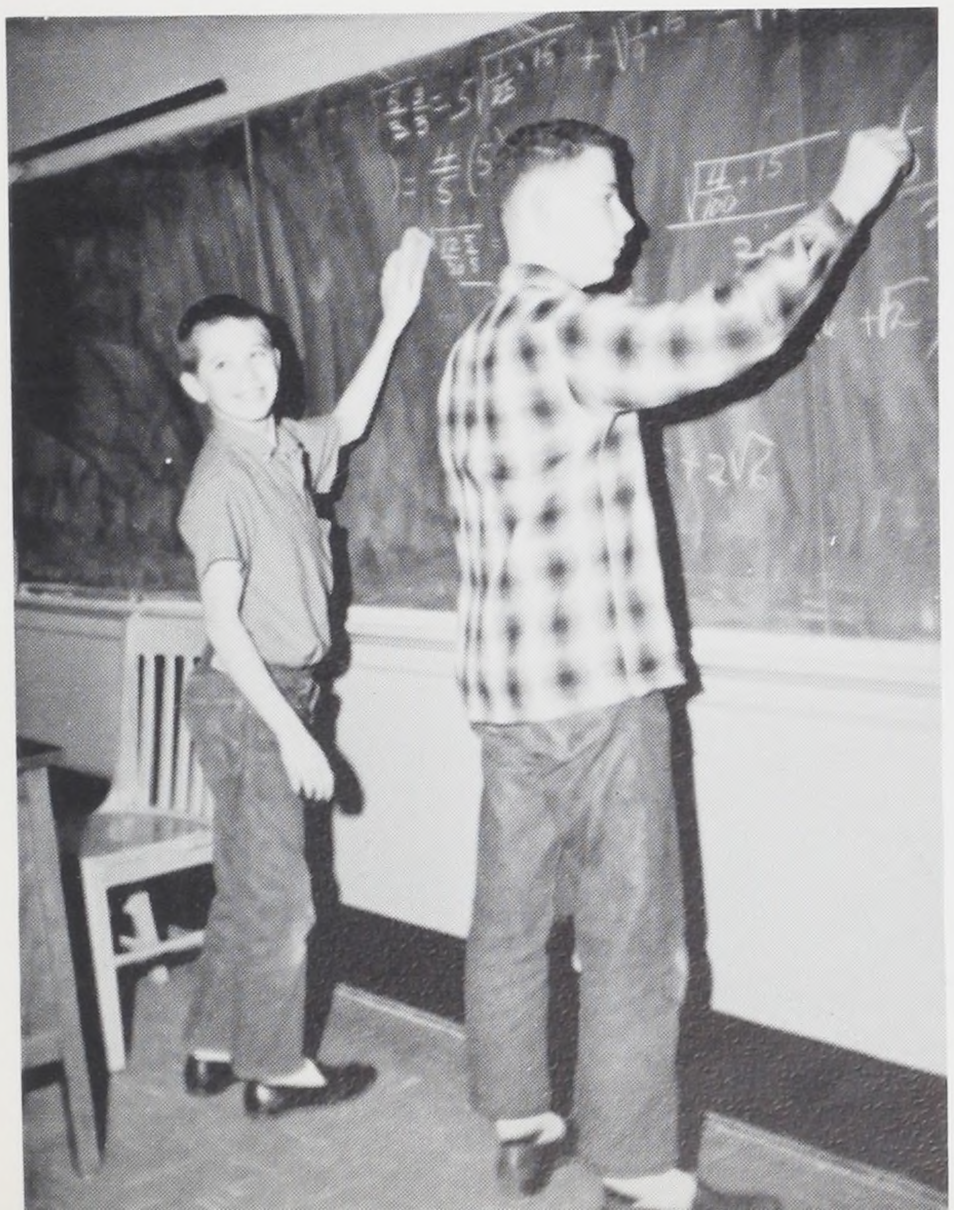

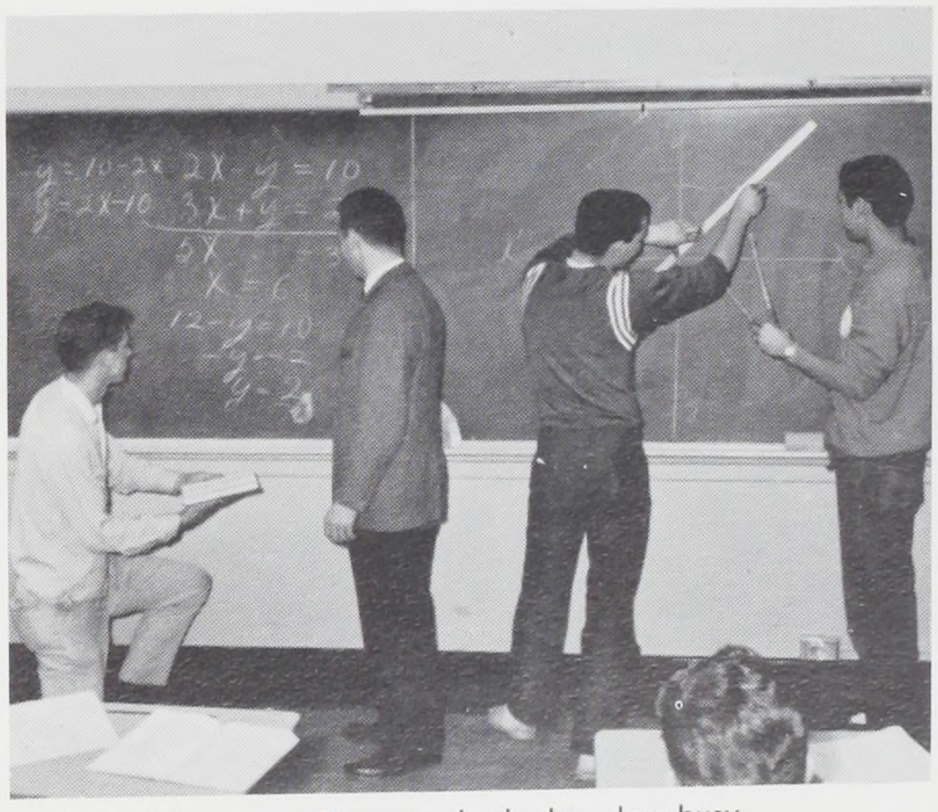

Mr. Morse is proud of his class—but one student goofs.

algebra, geometry, and trig under attack . . .

Four-point math student knows how to beat down competition.

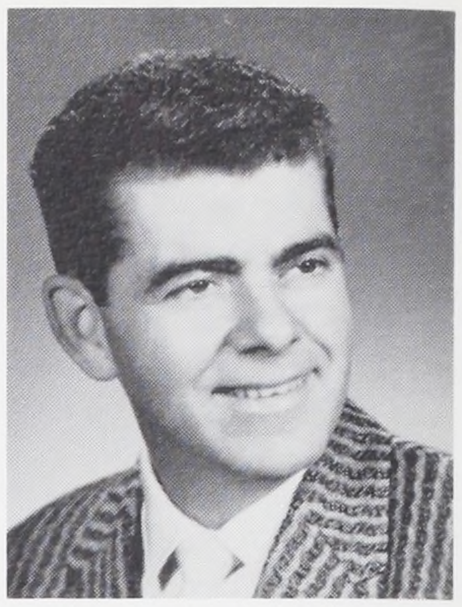

Board work keeps Mr. Thompson's algebra class busy.

communication skills feature ENGLISH program . . .

Mr. Foltz, Chairman
English

Of all Benson's academic divisions, the English department is possibly the most diverse in the areas made available to students. In addition to the familiar English classes required of all students each year, this department also offers special training in speech, journalism, publication editing, and effective reading.

The activities in all English courses revolve around what have often been called "communication skills." Writing, with its handmaidens spelling, grammar, and penmanship, is a major part of each program in the various English classrooms.

Training writers is, naturally, of little use unless intelligent readers are available to grasp and use the material set down by the writer.

So, using great literary works, the student gradually becomes more and more at ease with the techniques and skills of both reader and author. For those who desire greater reading capacity, the elective class in effective reading provides the springboard for many hours of rapid, but meaningful, reading enjoyment.

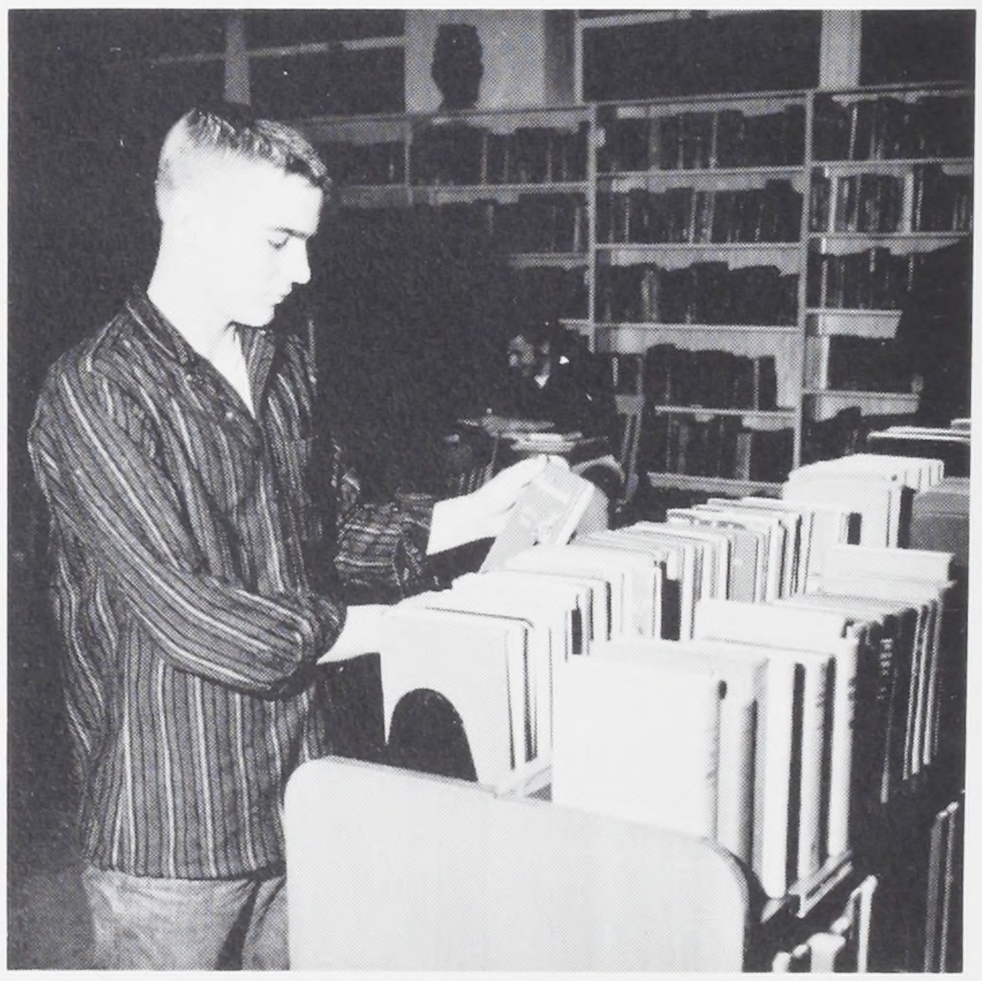

" 'Tis three weeks I have worked with you and can perceive no progress in your reports . . ." *the immortal Bonniwell.*

Extremely popular with Bensonites is the speech course offered by the English department. The spoken word is, of course, the very basic unit of communication and with the techniques and methods learned in this class, students become better able to express themselves and their ideas meaningfully and convincingly.

The most popular product of the department is probably the student newspaper, *The Tech Pep*. Under the guidance of a trained expert, the boys enrolled in this program learn how a newspaper is planned, produced, and perfected. In addition, the journalism class, through its paper, serves the very vital role of tying together the students of the school through their common interests.

Also related to the English department, the publications program is responsible for planning, development, distribution of the Benson *Blueprint*. Correct procedures in layout, photography, feature writing, printing, and advertising are vital in putting out a first-class annual and these skills are polished during the year's work in publications.

An honest book report is being born — *Highpockets* by John R. Tunis.

Book reports the easy way? Book jacket resumes can help.

Proper English distinguishes the real gentleman.

literature brings enjoyment, occasional frustration . . .

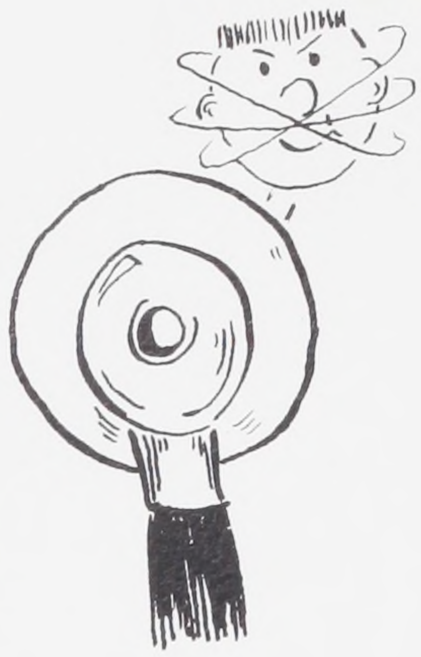

Theater display attracts potential Thespians in senior class.

Mr. Orr's leadership keeps discussion lively.

'asdfg' ' ; lkjh'—Budding typists pound the keys.

Mrs. Hamilton, Chairman
Business Education

BUSINESS EDUCATION classes keep active . . .

Dexterous fingers and alert minds play key rolls in Business Education classes. This department offers courses in typing, general business, and bookkeeping.

The first half of the typing course involves an introduction to the machines, learning the keyboard, and typing simple letter forms. More difficult techniques are presented during the second semester when students learn to type footnotes, bibliographies, title pages, and other details needed in their school and personal typing.

The complexities of mathematics in the business world are uncovered and explained in business classes. Problems in interest, budgeting, financial methods, and similar areas challenge the future millionaires and tycoons enrolled.

For those interested in the intricacies of recording business transactions, the Business Education department also offers a course in bookkeeping. Beginning with the basic principles of simple bookkeeping, students in this course advance through the year, handling such difficult procedures as the double entry, posting, and tax accounting.

Bob Wright starts off again . . . no errors this time.

COMBINED CLASSES introduce frosh to humanities . . .

World cultures, particularly those which developed around the Mediterranian Sea and in Western Europe provide the background for much of the work done in the Combined Classes. All freshmen are required to take this class which also involves the study of language skills such as spelling, dictionary usage, library techniques, and outlining.

The idea of uniting first-year English and Social Studies was pioneered by the Portland School System, and Benson, with its outstanding academic traditions, has been a leader in the advancement of the program.

Staffed by eight teachers, the department has arranged units which have proved to be very popular with Bensonites. The history of ancient civilizations—Egyptian, Roman, Hebrew, Greek—presents many mysteries upon which teachers base their lectures and study projects. Another series of units dealing with the Middle Ages has shown also itself to be a favorite with their stories of knights in armour with shining swords and noble ideals.

The practical applications of our English language are an important part of the Combined Class schedule. As future technicians and skilled craftsmen, Benson students will be called on to express themselves clearly, completely, and concisely. With this in mind, the language activities in "Combined" classrooms are designed to build and polish complete communication skills.

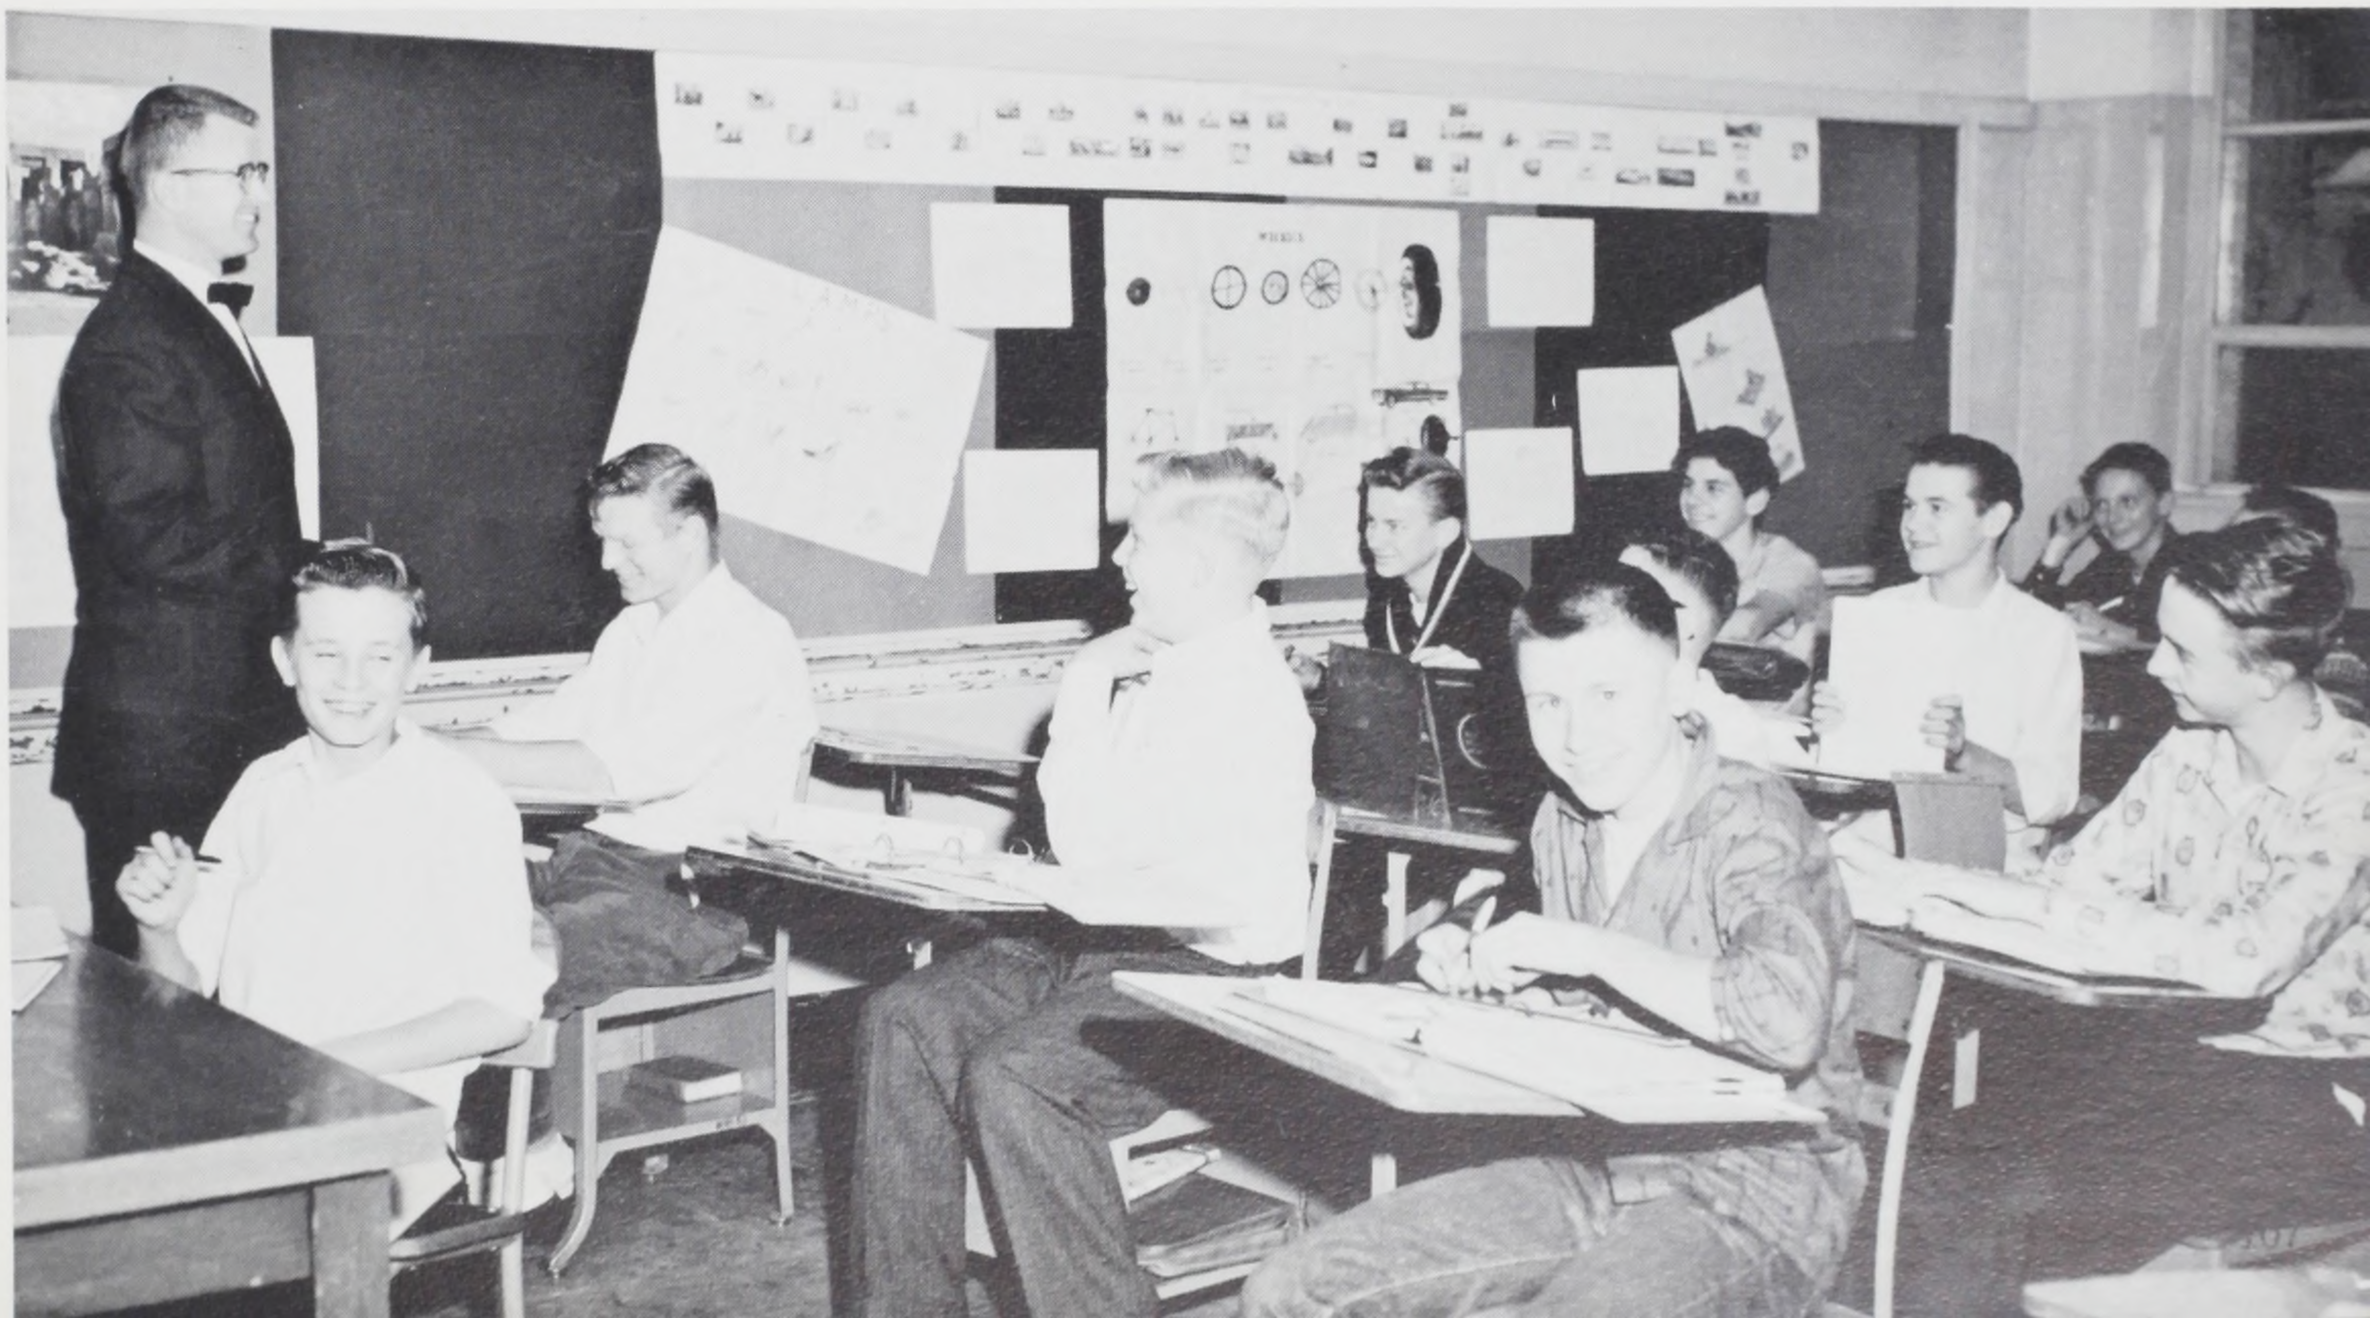

Mrs. Roy, Chairman
Combined Classes

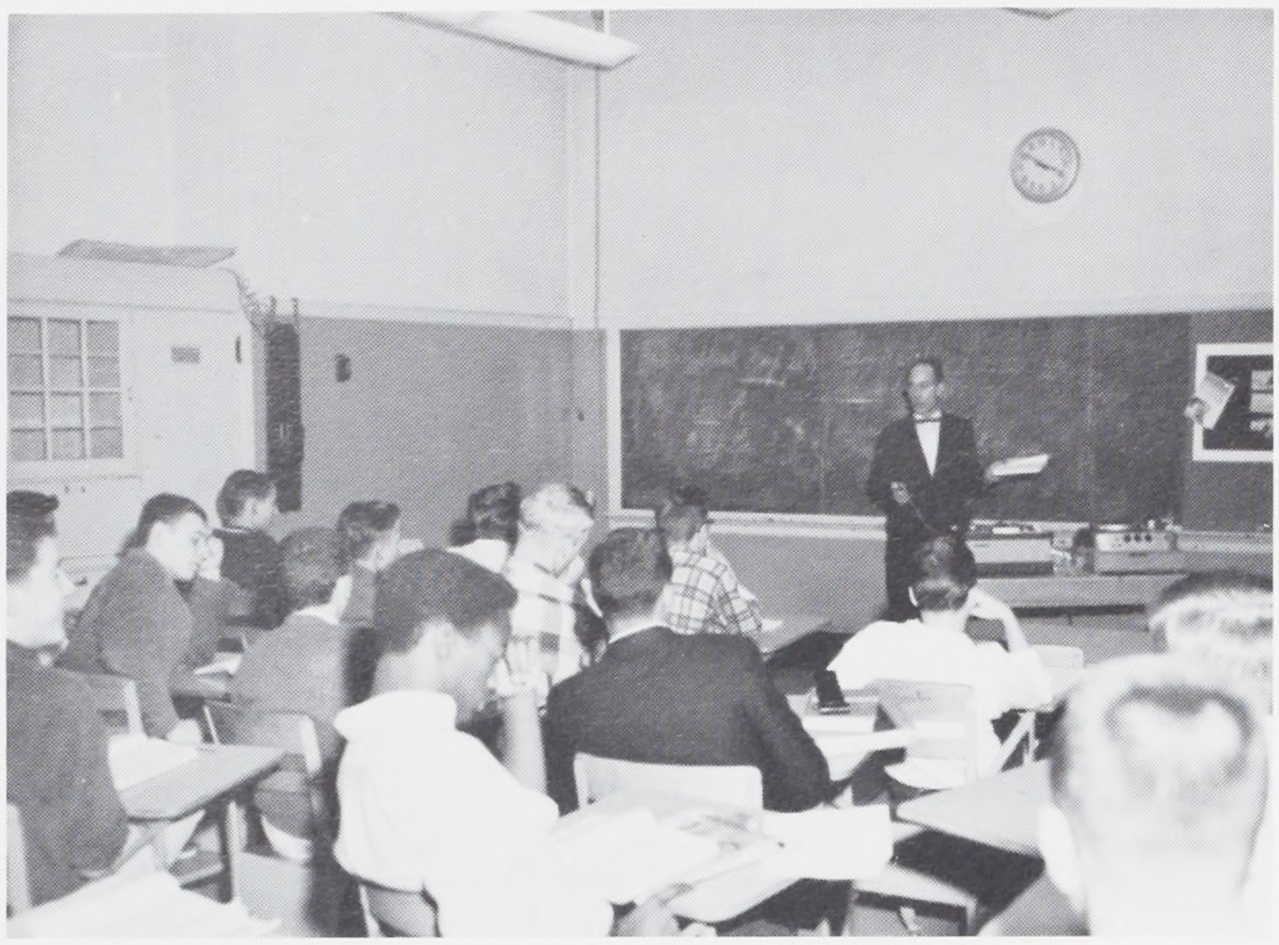

Mrs. Roy in action . . . Ahh, those ancient Greeks .

Mr. Richards discusses culture but cameraman detracts self-conscious freshman .

bi-lingual abilities acquired

Bob Miller makes last second survey of text material before recording.

Mrs. Holland, Chairman
Foreign Language

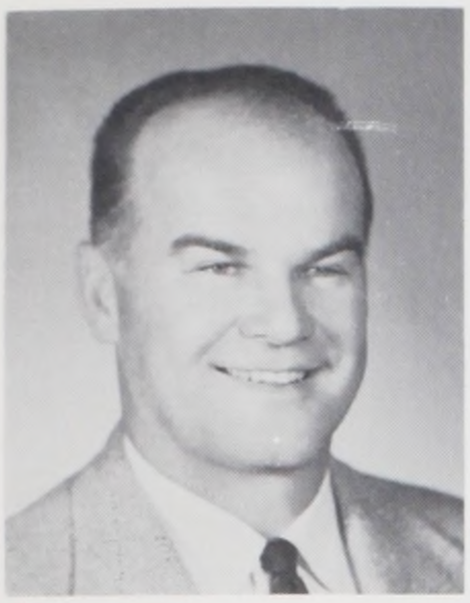

in GERMAN classes . . .

"Eins, zwei, drei, vier..." and so starts the first lesson in the German textbook used in Benson foreign language classes. Since many of the outstanding scientific references and technical journals are printed in German, it is not surprising that Benson students, scientists and technicians of the future, find classes in this language so challenging and useful.

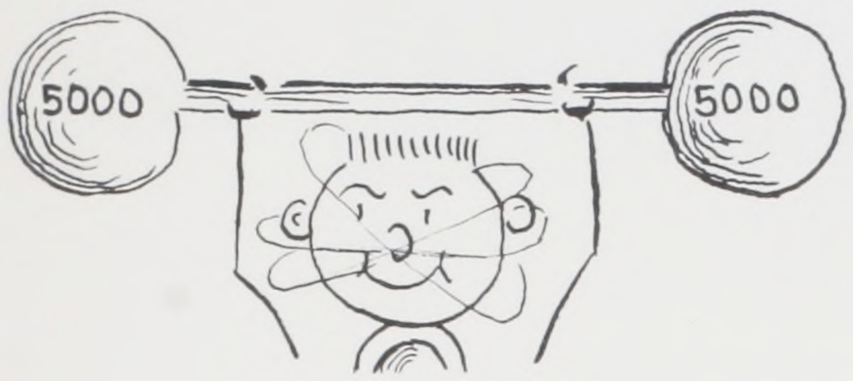

Most Bensonites begin their study of German during the junior year and the skills they develop may often be directly applied to research work in other classes. Throughout the junior and senior years they attack the difficult conjugations, grammatical rules, translations, and writing problems which lead, eventually, to a sound working knowledge of German.

Mr. Sienko, Chairman
Health and P.E.

Coach Sienko demonstrates proper form for one-hand set shot.

healthy bodies and minds developed in PE & HEALTH . . .

In a day and age when critics are accusing America of going "soft," the work and accomplishments of the Benson physical education and health department provide a very decisive denial of these charges.

Each boy at Benson can expect conscientious and expert instruction as he works to bring his body to peak condition. Deep-knee bends, jumping-jacks, hand stands, rope climbing, and push-ups are among the conditioning rigors which challenge each boy, while agility and coordination are developed playing games such as basketball, tennis, football, soccer, and softball.

Also connected with the department, although apart from gymnasium and field activities, are classes in health education. Involving such vital subjects as first aid, driver education, and personal hygiene, this course plays a very significant part in the total educational plan of each student.

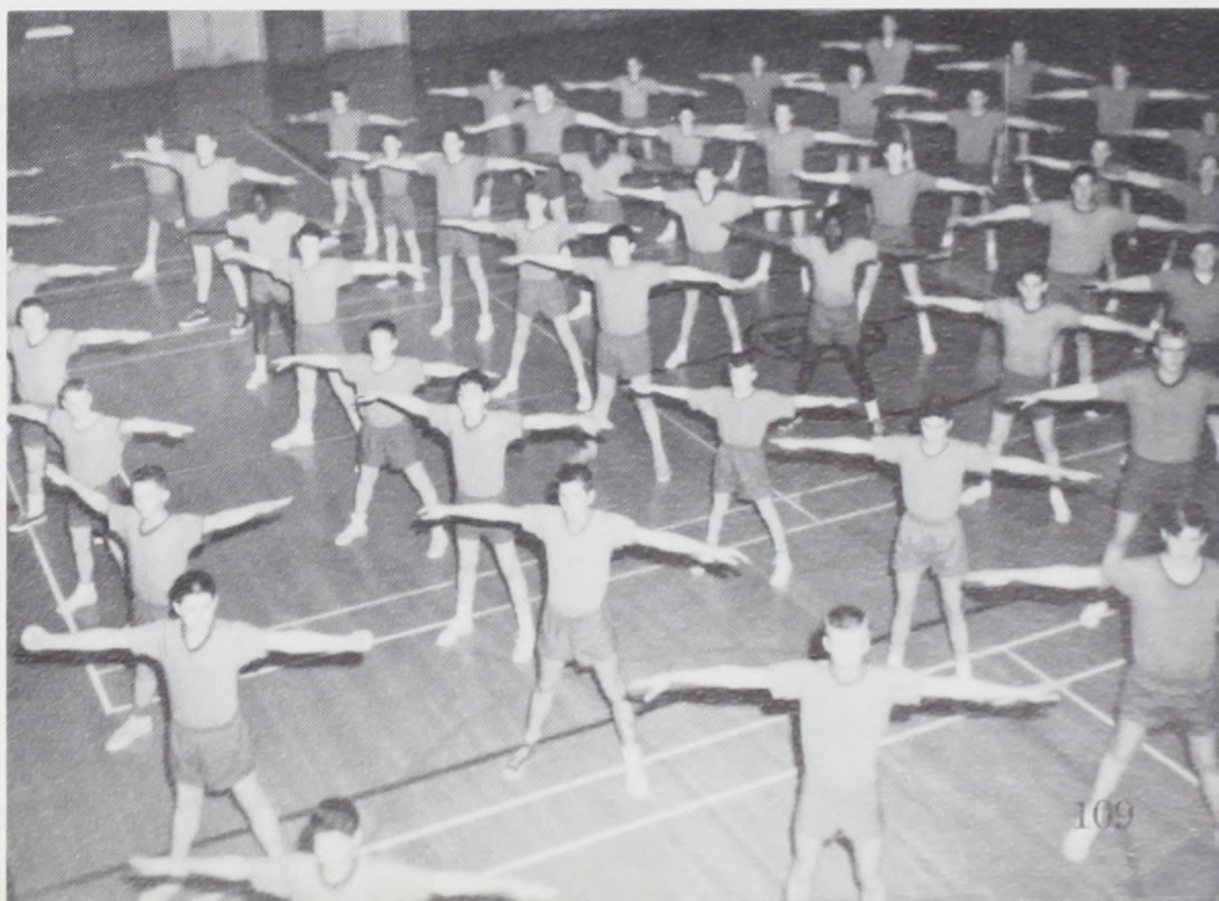

Engrossed in special project, class members need exercise.

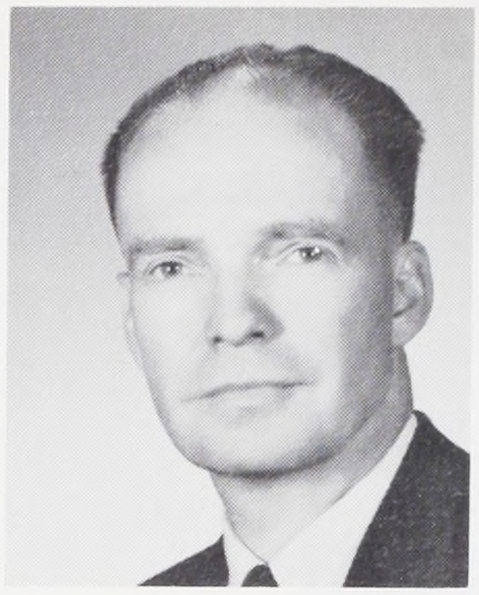

Give an athlete an inch and he'll take a foot . . .

Gym class members go through standard jumping-jack exercise.

Unidentified teacher discusses new projects with student.

MR. GERALD KIBLER
Drawing

t-squares and triangles standard DRAWING equipment . . .

Two different courses are offered in the drawing department, mechanical drawing and architectural drawing.

The mechanical drawing course starts in the sophomore year. First-year students cover the basic concepts of drawing, which include lettering, isometric drawing, orthographic projection, revolution drawing, sheet metal drawing, and screw threads. Areas covered in the second year are much the same as the first year, with the exception of more complex drawings and the introduction to oblique views, and spring drawings. The major project of second year drawing is a large assembly drawing, which takes approximately six weeks to complete. The senior year is spent perfecting drawing skills, preparing the student for future as a draftsman, or a continuation of his education in college.

Harold Johnson gets hint on better drawing technique while his buddy looks on with interest.

Reed Miller dreams of designing towering sky-scrapers but desk partner sees the reality of next report period.

Mr. Ehlen demonstrates proper use of drawing compass.

Architectural drawing also begins in the sophomore year with basic drawing techniques. Beginning students work on lettering, planes of projection, line types, and the symbols and methods used in drawing house plans. The sophomore course of study covers perspective and further work in the skills which were learned as freshmen. Sophomores draw up complete sets of house plans. Seniors learn design and planning, and build models of the homes that they design in water color and pencil.

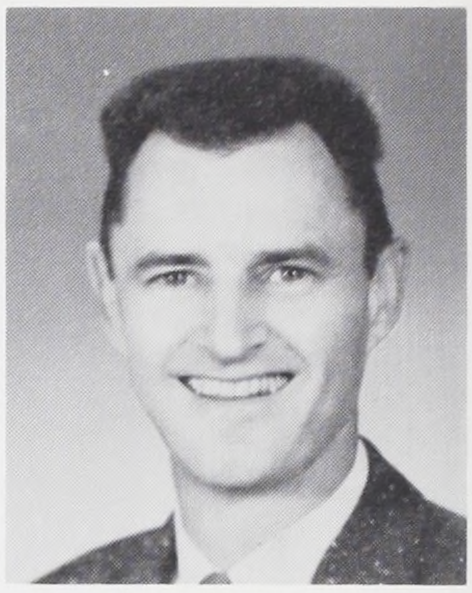

Outstanding drawing program brings post-grad student to Benson.

mechanical and architectural classes rate high . . .

Featured in many community events, Tech Band played at Naval ceremony.

Mr. Rowe, Chairman
Music

Benson's music department has built its reputation by combining outstanding vocal and instrumental instruction with an active program of public appearances.

The Ambassadors, a select group of Benson's finest singers, has created much goodwill for the school throughout Portland. The Gleemen, the largest choral organization, have also earned recognition for their fine performances.

Benson's band, resplendid in blue, orange, and white, is noted for its precision marching. Each year thousands of Portlanders admire the tight formations during various parades and civic functions. The instrumental music classes also provide members of the Pep Band which plays at all athletic contests, providing the music which keeps spirits high.

instruments, voices blend in MUSIC classes . . .

Brass section sounds great but a clarinet hit a clinker.

IMMACULATE IN THEIR FORMAL DRESS, the Gleemen, Benson's outstanding male choral group, perform under the direction of Harold Anderson, former music teacher, now acting as administrative vice principal. The Gleemen have performed throughout the Portland area and have been an important part of the school's program of public service.

Voices in harmony, the Gleemen are known for fine choral work and distinctive dress.

vocal groups and band earn community respect . . .

democracy practiced is democracy learned...

'61 TECH SHOW proves top portland attraction...

Mr. Rowe directs colorful Tech band.

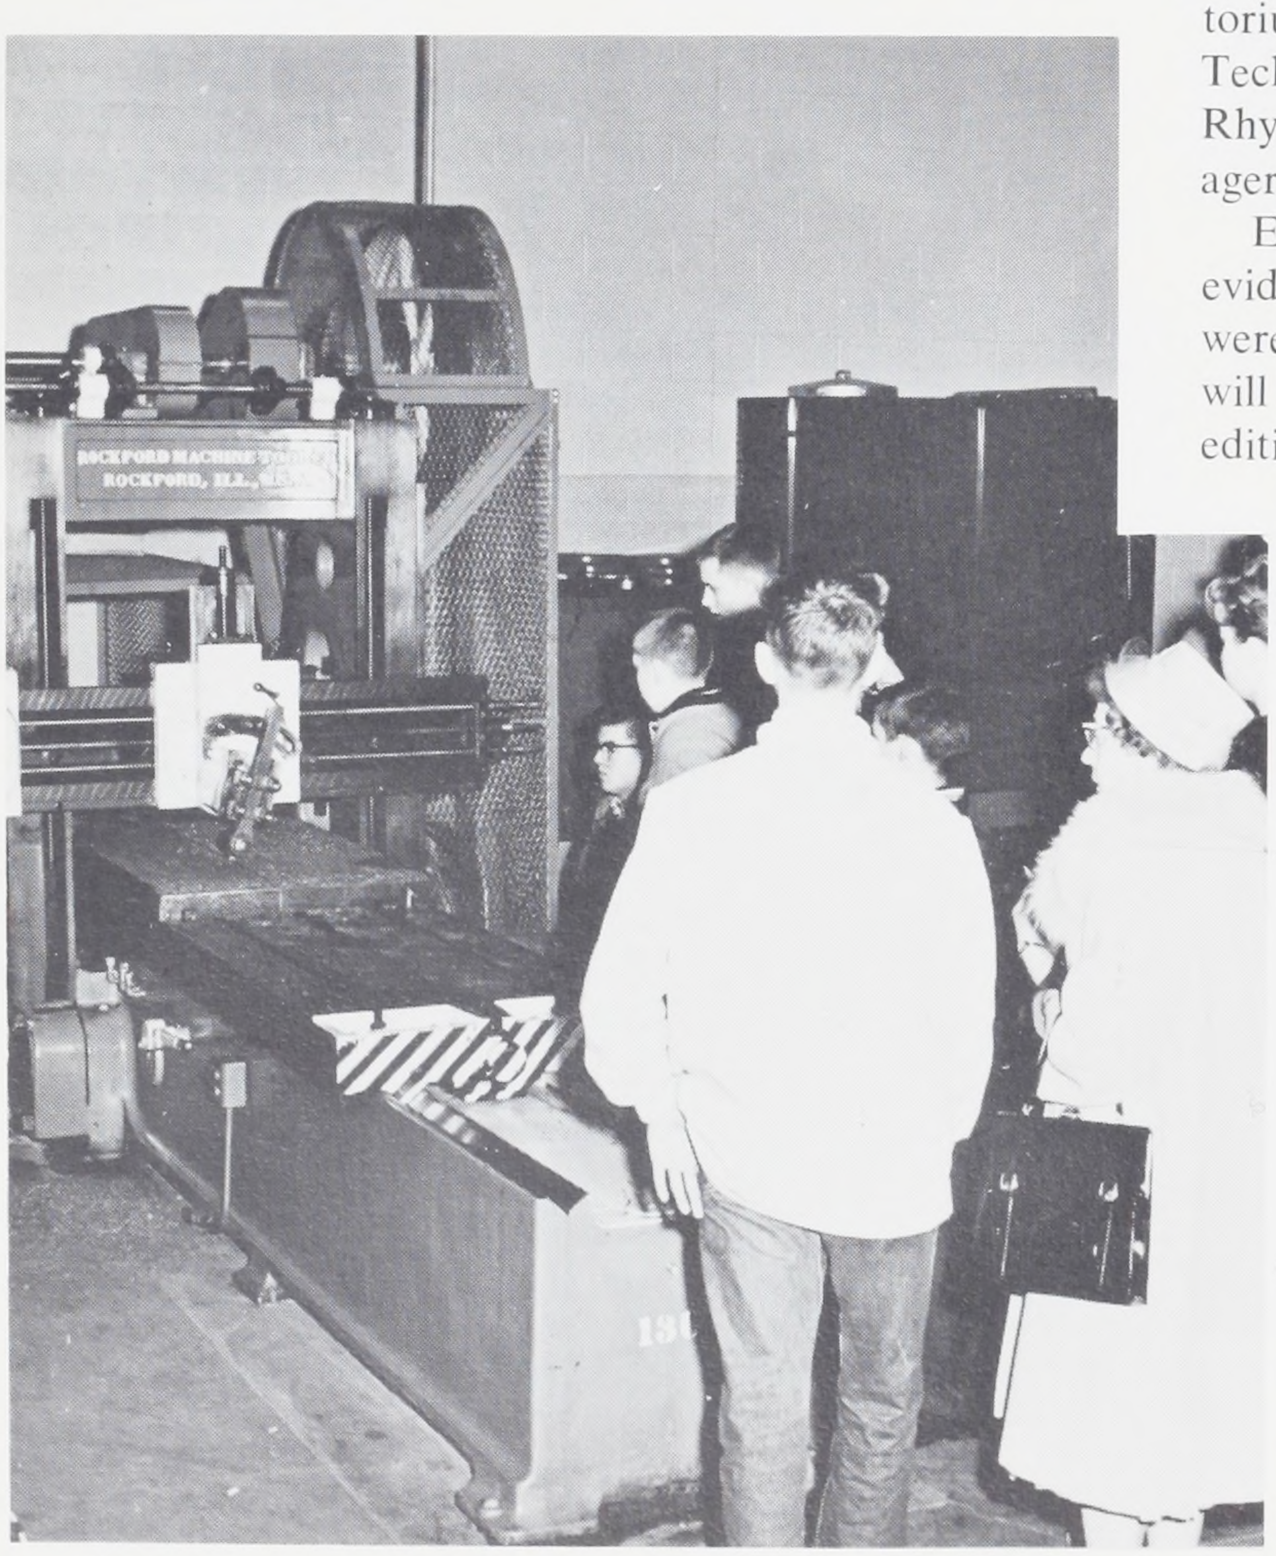

A record breaking crowd of more than 13,000 swarmed through the halls, classrooms, and shops of Benson as the student body and staff presented the 41st Annual Benson Tech Show, March 3 and 4, 1961. Highlighted by a stellar stage show and outstanding science and shop demonstrations, the Tech Show once more proved that it is one of Portland's top community events.

The science displays were very popular, especially those in the physics department which dramatized the applications of physical science in everyday life. The termite colonies set up by biology students also brought quite a bit of comment from the crowds.

Visitors coming away from the shop wings were impressed, not only by the machines and special equipment, but, by the technical abilities shown by student operators. As usual, the aviation area, featuring a jet plane and the famous engine run-up-room, was constantly packed with admiring spectators. The electric shop displays were also popular, especially the arc welder built by electric majors.

Four standing-room-only audiences jammed into the auditorium to see the stage production, a regular feature of every Tech Show. Response to all the acts was tremendous, but the Rhythm Masters, a group of jazz-playing, tap dancing teenagers, stopped the show each time they appeared.

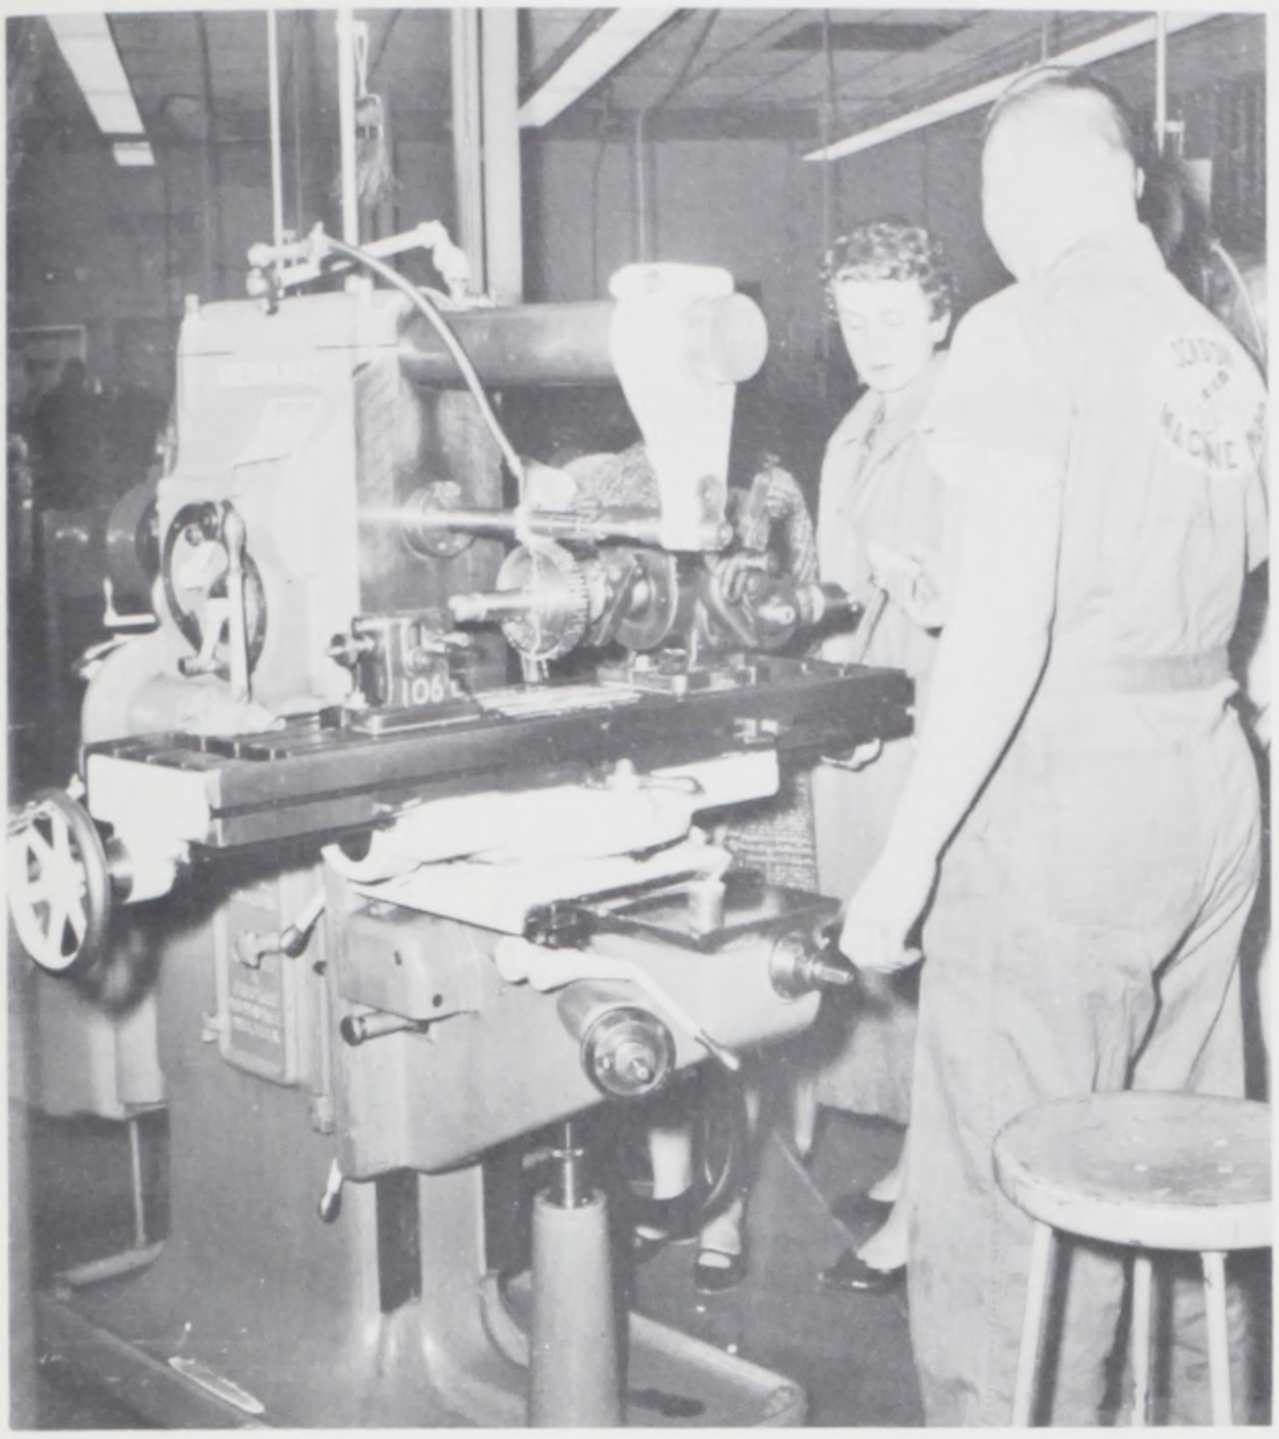

Even before the clean-up crews had finished removing the evidence of the huge crowds, students and faculty members were beginning to think ahead. However, future Tech Shows will have a long way to go before they can outshine the '61 edition, the all time champion.

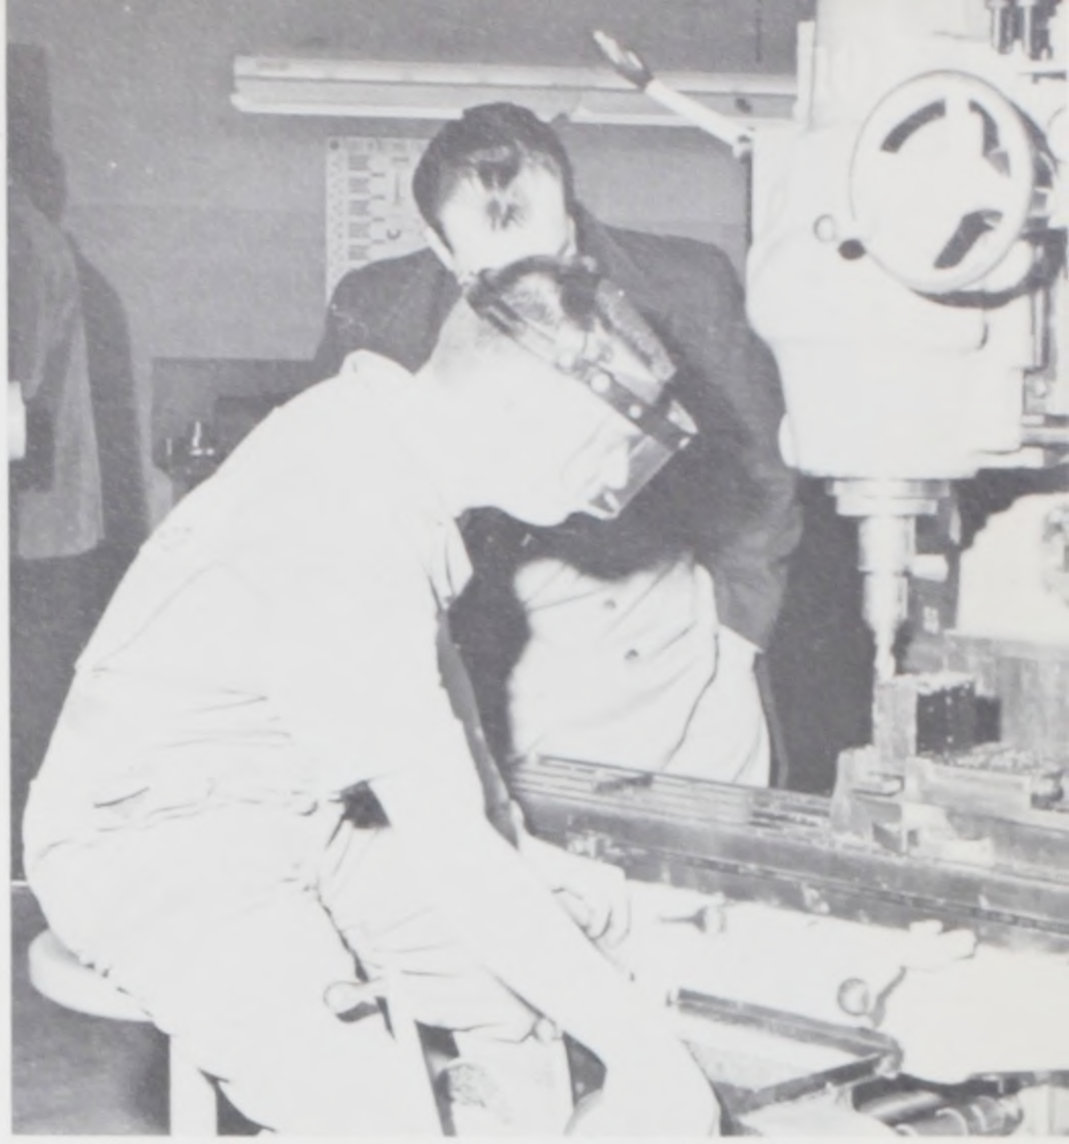

Machine shop equipment under inspection.

Gleemen take bow after popular number.

13,000 plus:

a new record . . .

fund raising 49'er show huge success . . .

Embarrassing moments ala Woody.

Gym converted for sock hop.

Jointly sponsored by the Parent-Teacher-Student Association and the Dad's Club, the annual 49'er production is one of the highlights of the school year. The main purpose of the big show is to raise funds for the two organizations. Service groups and other student organizations are also invited to participate and the game booths and concession areas bring in profits which fatten club accounts in the student body fund.

The visitors had a great time matching their skills against the tricky games and stunts along the "Midway". Particularly popular were the Key Club "Record Break", the Titans' "Tiger Toss" the Scientech "Atom Smash", and the "Ring-the-Duck" operated by the Engineering group.

Once again the 49'er was highlighted by the ever-popular stage show. M.C.'ed by Portland disk jockey Dick Novak, a Benson graduate, the 1960 auditorium show presented talent from many local high schools. With Novak providing between-the-acts humor, the many acts were well received by the overflow audience. Woody Woodward's comic monologue, the Monto-tays vocal group, Bill West's jazz piano, and the tuxedoed Ambassadors went over especially well.

Grant pair flash in dance routine.

THE TECH PEP

Guy Gutfliesch, Alan Brown, Larry Currier and Dave Hopkins.
Top Level Brass work on details for Easter issue.

Dave Wood sets Tech Pep copy on linotype.

The Benson student body newspaper, *Tech Pep,* is written, edited, and produced in the print shop by Graphic Arts majors. This popular bi-monthly paper plays an important role in the cycle of Benson activities, serving the students in the tradition of the American press. The *Tech Pep* is unique as it represents the only student publication in the area which is produced entirely by student personnel.

Under the leadership of Editor-in-Chief Alan Brown and the faculty advisors, Richard Johnson (journalism), and Howard Jones (printing), the paper came out with quite a few fine examples of high school journalism. The editorial and feature writing were especially noteworthy. Favorite features were the "Benson Buggy" column which was devoted to showing off prize automobiles owned by Tech students, "Straight From the Horse's Mouth", a top sports column, and the original cartooning of Jim Grimes.

The 1960-61 *Tech Pep* deserves recognition for a well-done job, a job worthy of Benson's traditionally high standards in all student activities.

Enthusiastic (?) editors hear another suggestion from advisor.

wes nelson — **literary editor-in-chief**

gary feeback — **production editor-in-chief**

Last minute preparations before staff meeting comes to order.

BLUEPRINT rates among top student publications . . .

The twenty-eight staff members who produced this 1961 *Blueprint* were technically enrolled in a little-known class entitled, English-Publications 1-2. Traditionally, however, E.P. class operates apart from the English department, more as a club than as a class.

Fitting nicely into the curriculum of a technical school, the publications course might be descriptively named, "Industrial Editing." In this class fundamentals of layout, design, advertising, photography, composing, and feature writing are learned and applied. An understanding of at least the basic elements of these skills is frequently demanded of those desiring leadership positions in industry and business.

The staff which "built" this yearbook was headed by Wes Nelson, literary editor-in-chief, and Gary Feeback, production editor-in-chief. Their associate editors were Jim Allyn, Bob Stephenson, and Russ Hague. Although Wes and Gary had the final responsibility for meeting deadlines and directing staff members, the associate editors were charged with the specific details which kept production wheels turning.

Jim supervised layout and design for the 216 pages, Bob handled all writing assignments and copyreading, and Russ kept careful watch on all business and financial activities.

TECHNICAL AND

VOCATIONAL

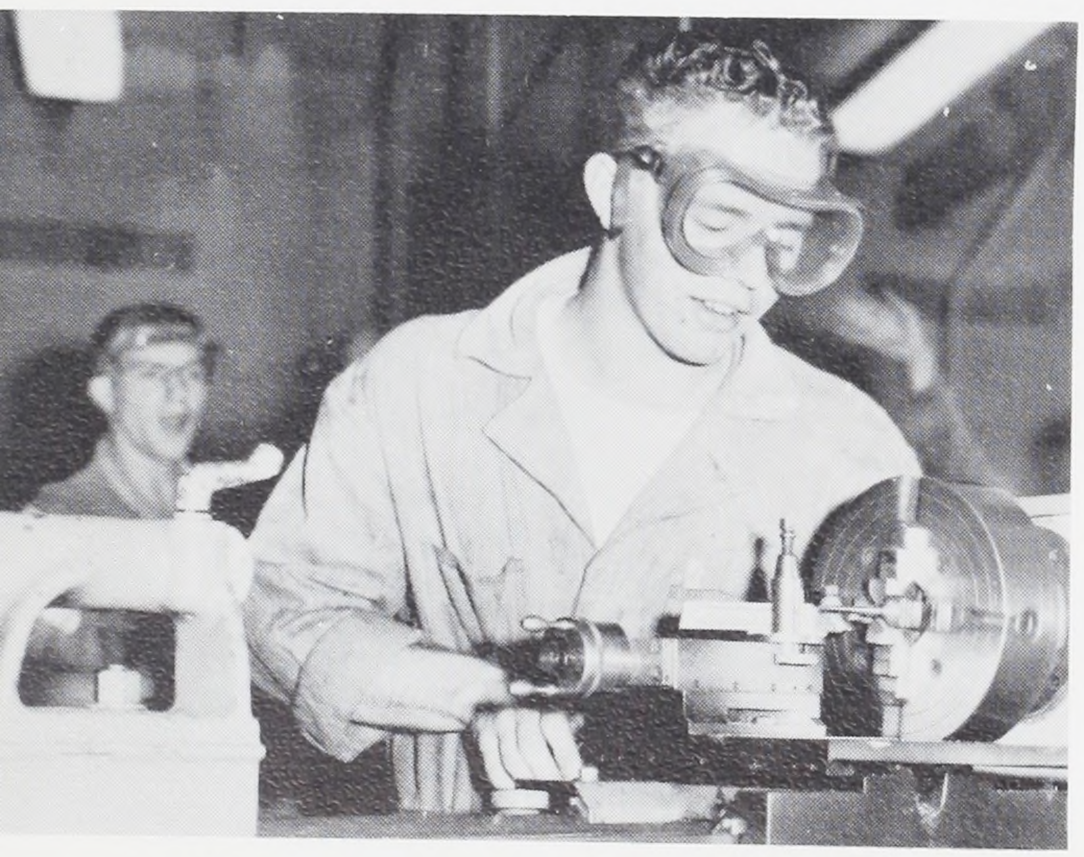

Senior machinists learn their business on the finest equipment available . . .

keeping outstanding reputation of benson

Mr. Matheson, Foreman
Machine

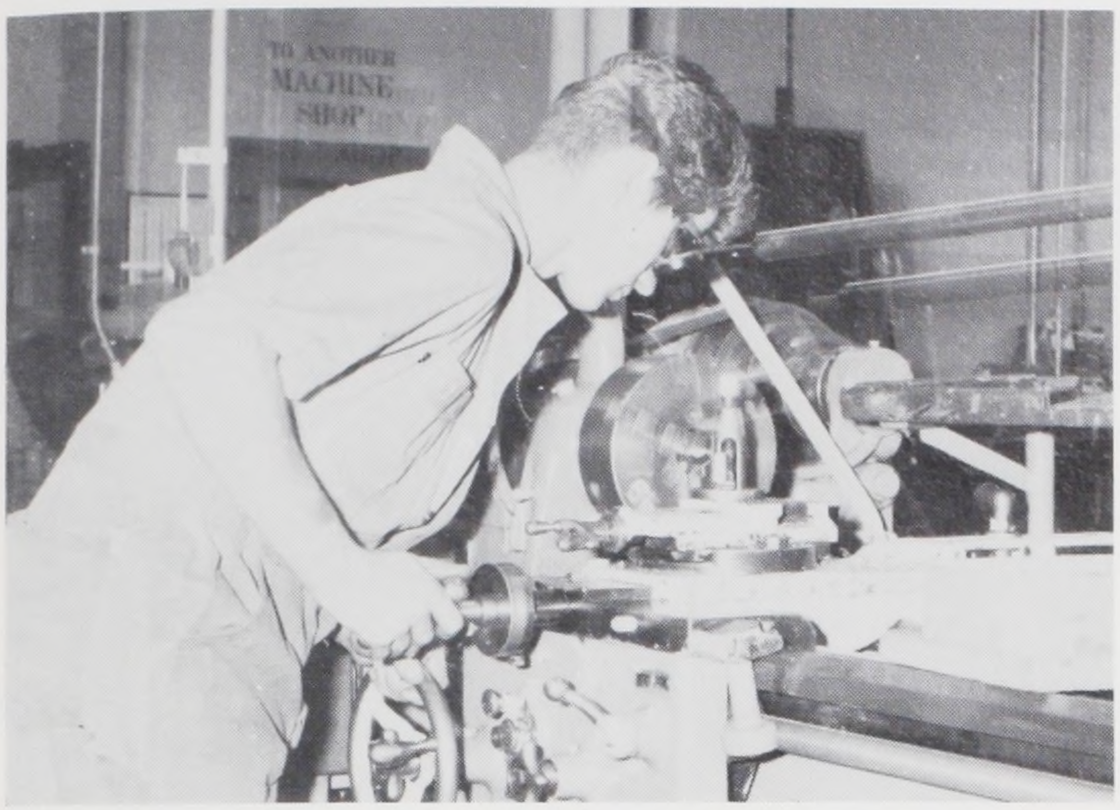

Lee Bauer, behind the goggles, takes final cut on punch project.

With four well equipped, modern shops running at full speed throughout the day, the Machine Technology department is one of Benson's busiest technical divisions. This department is widely recognized as a superior training ground for machinists.

All students are introduced to Machine as part of the underclass orientation program. Those who show interest and ability may elect to major, or specialize, in machine skills during the junior and senior years. Beginning students must complete a series of simple projects. These elementary projects are designed to teach principles, uses, types, maintenance, and safety procedure for all common shop machines.

Machine majors often work on very difficult projects. Frequently, the machine shops receive requests for special jobs from other parts of the school. Students are able to turn out most of these jobs, saving the school both time and money.

Close settings and near perfect tolerances require patience and skill.

Of course all machine majors are perfect gentlemen!

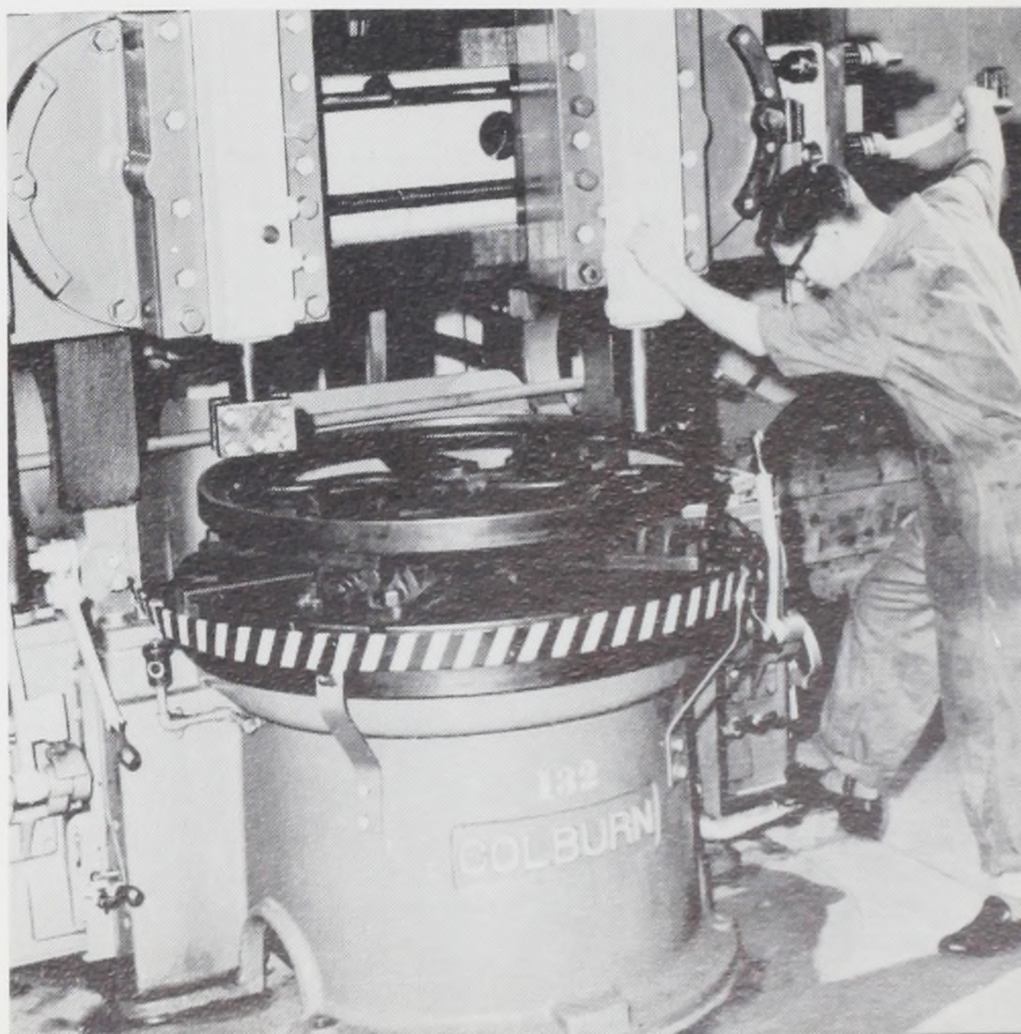

MACHINE graduates means hard work...

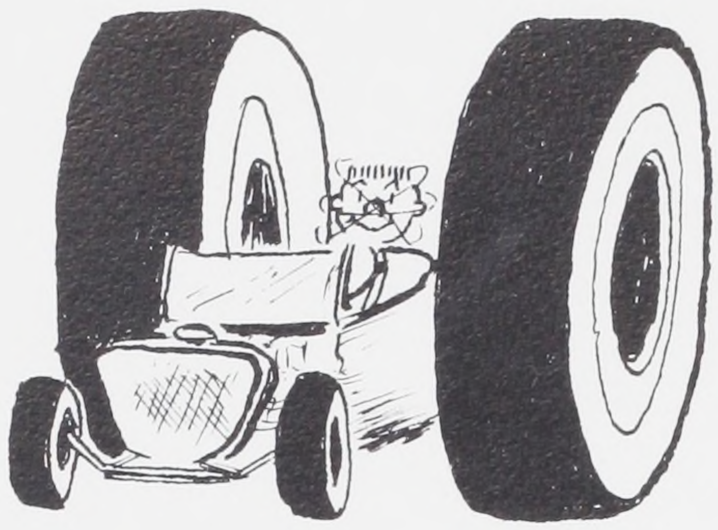

Darryl Lloyd checks measurements before going on with project.

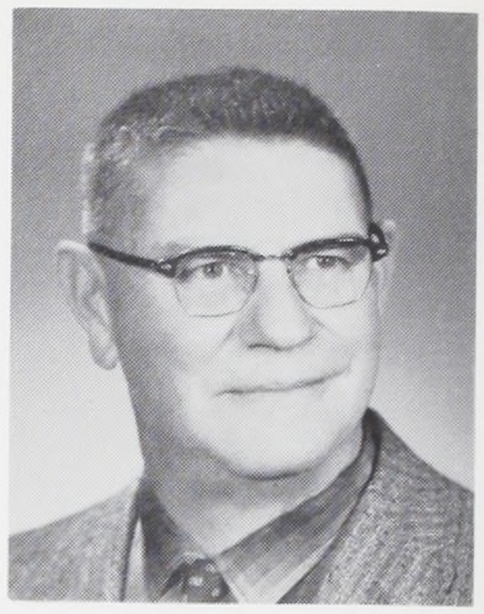

Ray Wolf operates complicated vertical boring drill.

Never force a machine, Pruitt, get a bigger hammer.

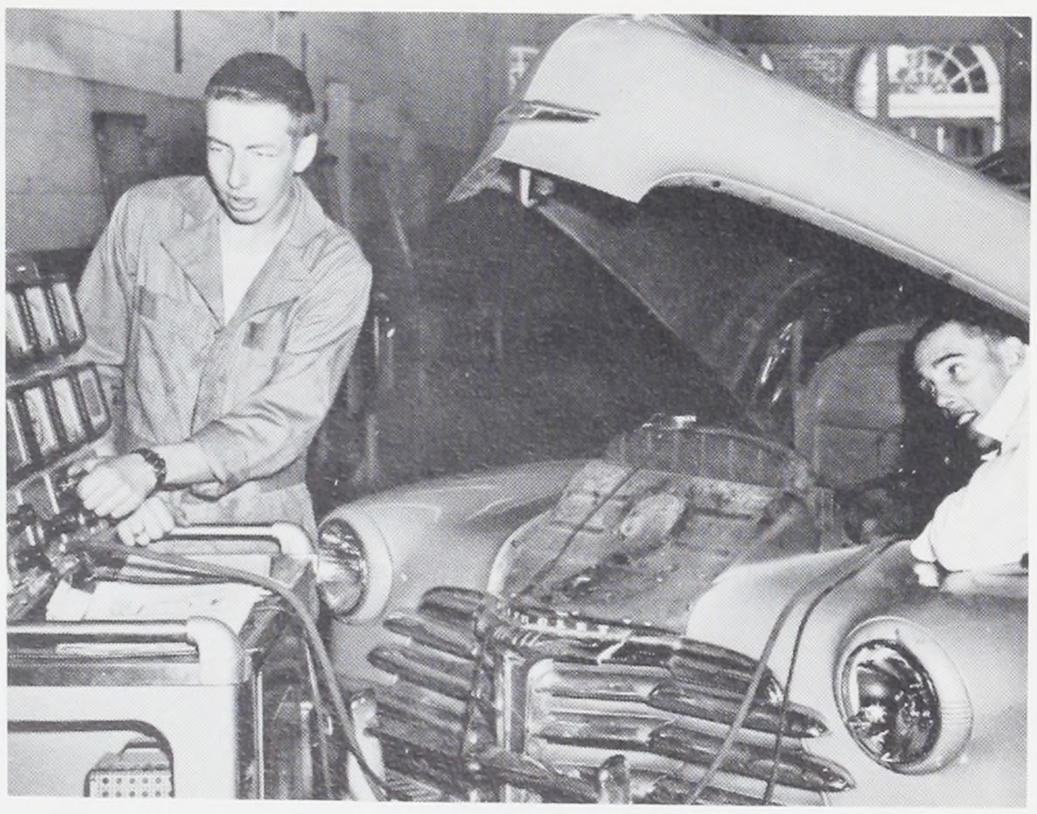

Mr. Bell, Foreman
Automotive and Aviation

body and fender, ignition, and overhaul

"Looks like the distributor isn't distributing the gas evenly."

Can't you hear Harper saying, "Come on, Eaton, I can't hold this forever"?

The automotive and aviation shops, which are located between the north and south shop wings, are two of the better-known shops at Benson.

All freshmen take twelve weeks of basic auto, which covers study and work with Clinton internal combustion engines. Those who major in auto go on in their junior year to take one semester of body and fender repair techniques, and spend one semester solving practical carburetion, ignition, and tune-up problems. Seniors work one semester in Automotive Machine where they learn to operate the machine tools used in engine rebuilding. The rest of the year they spend on repair and maintenance work in the senior auto shop.

Sophomores who have elected to major in aviation, study basic aircraft structure and terminology. Juniors work with aircraft electronics and sheet metal construction, which is closely related to aviation drawing projects that they work on. They also cover meteorology as it pertains to aviation. Seniors learn navigation and work with aircraft engines and airframe construction and repair. They also have a yearly project, usually the rebuilding of a damaged airplane.

Expensive equipment is handled expertly by auto trainee.

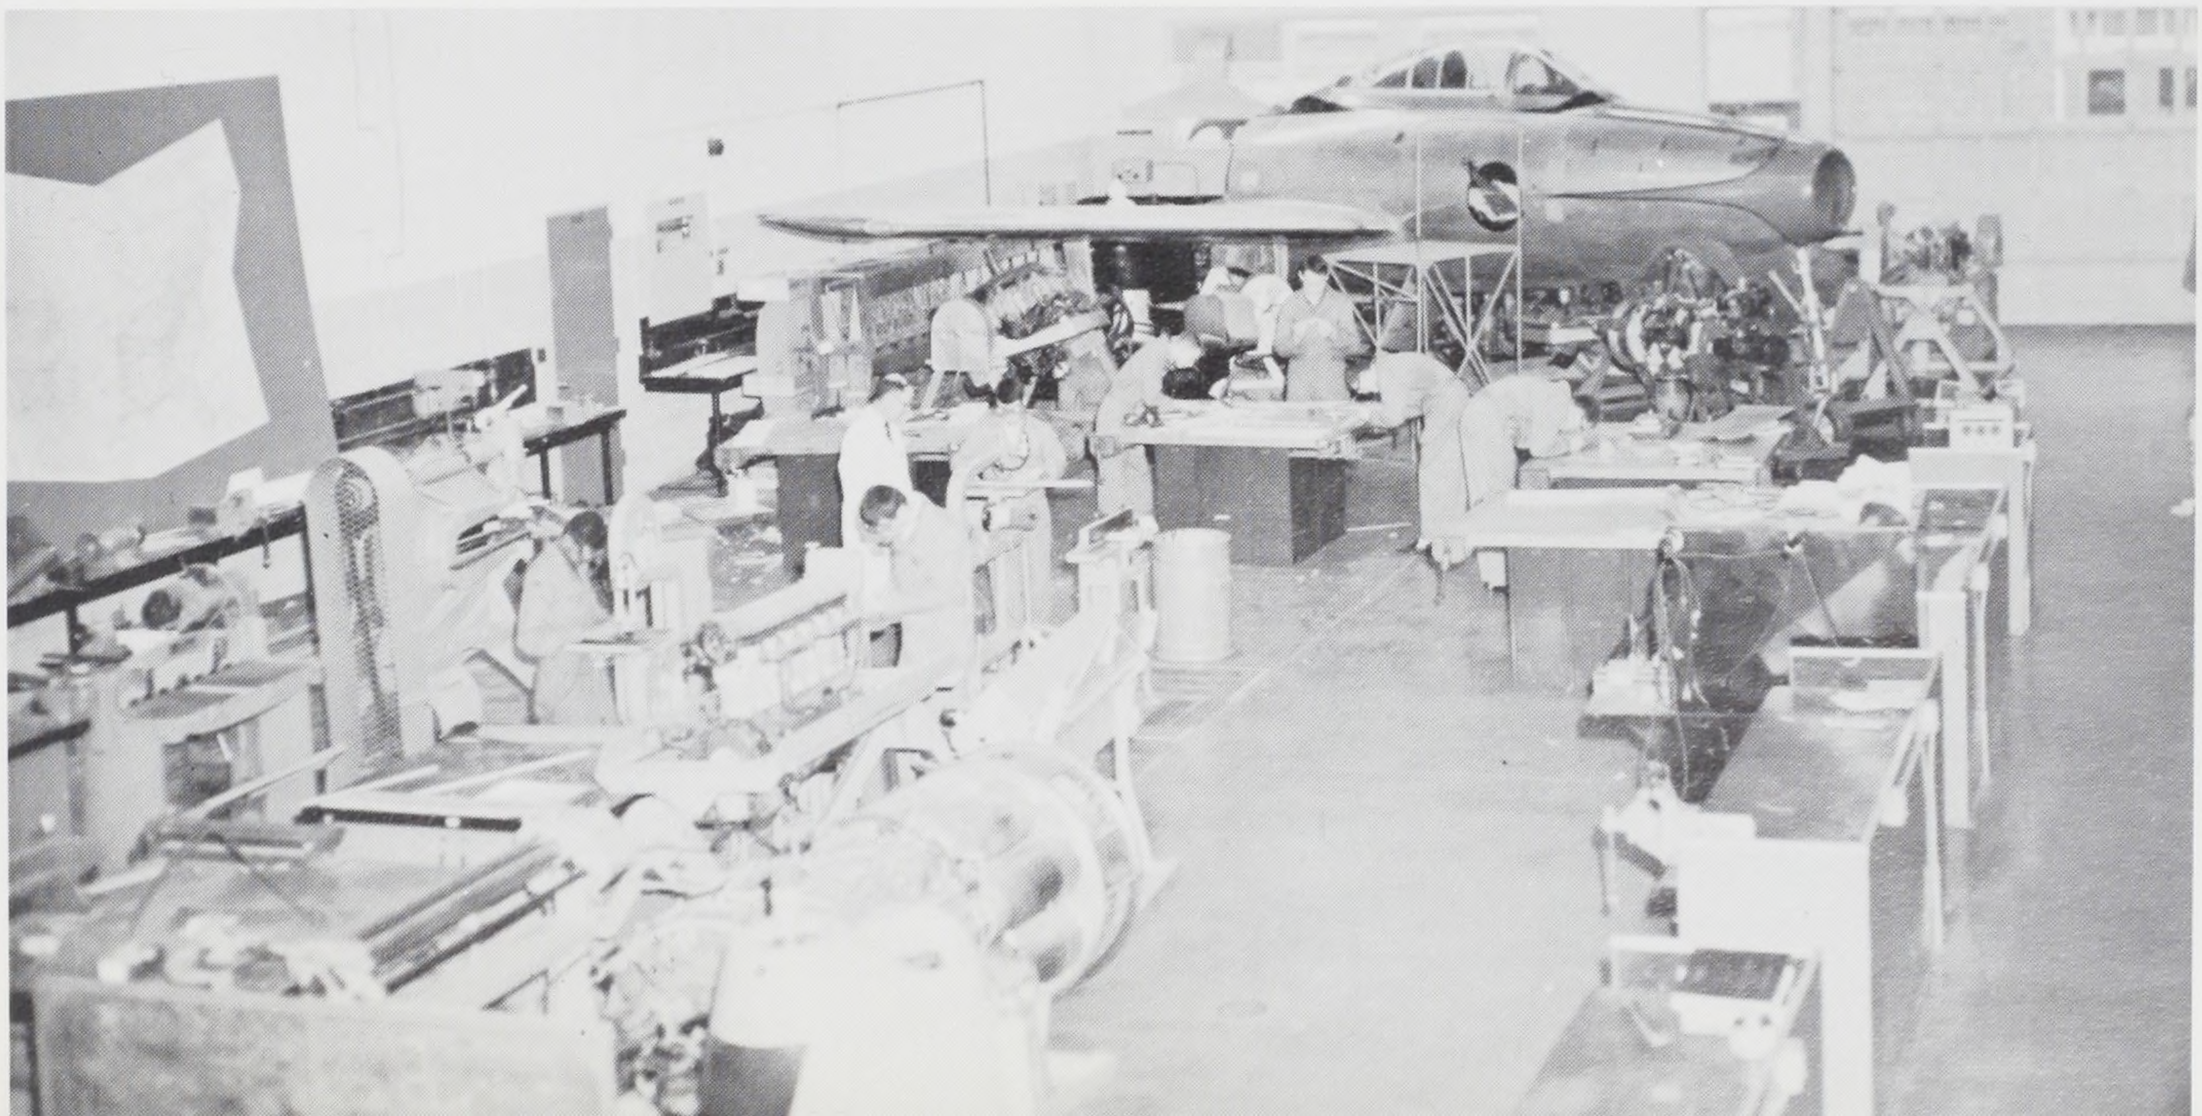

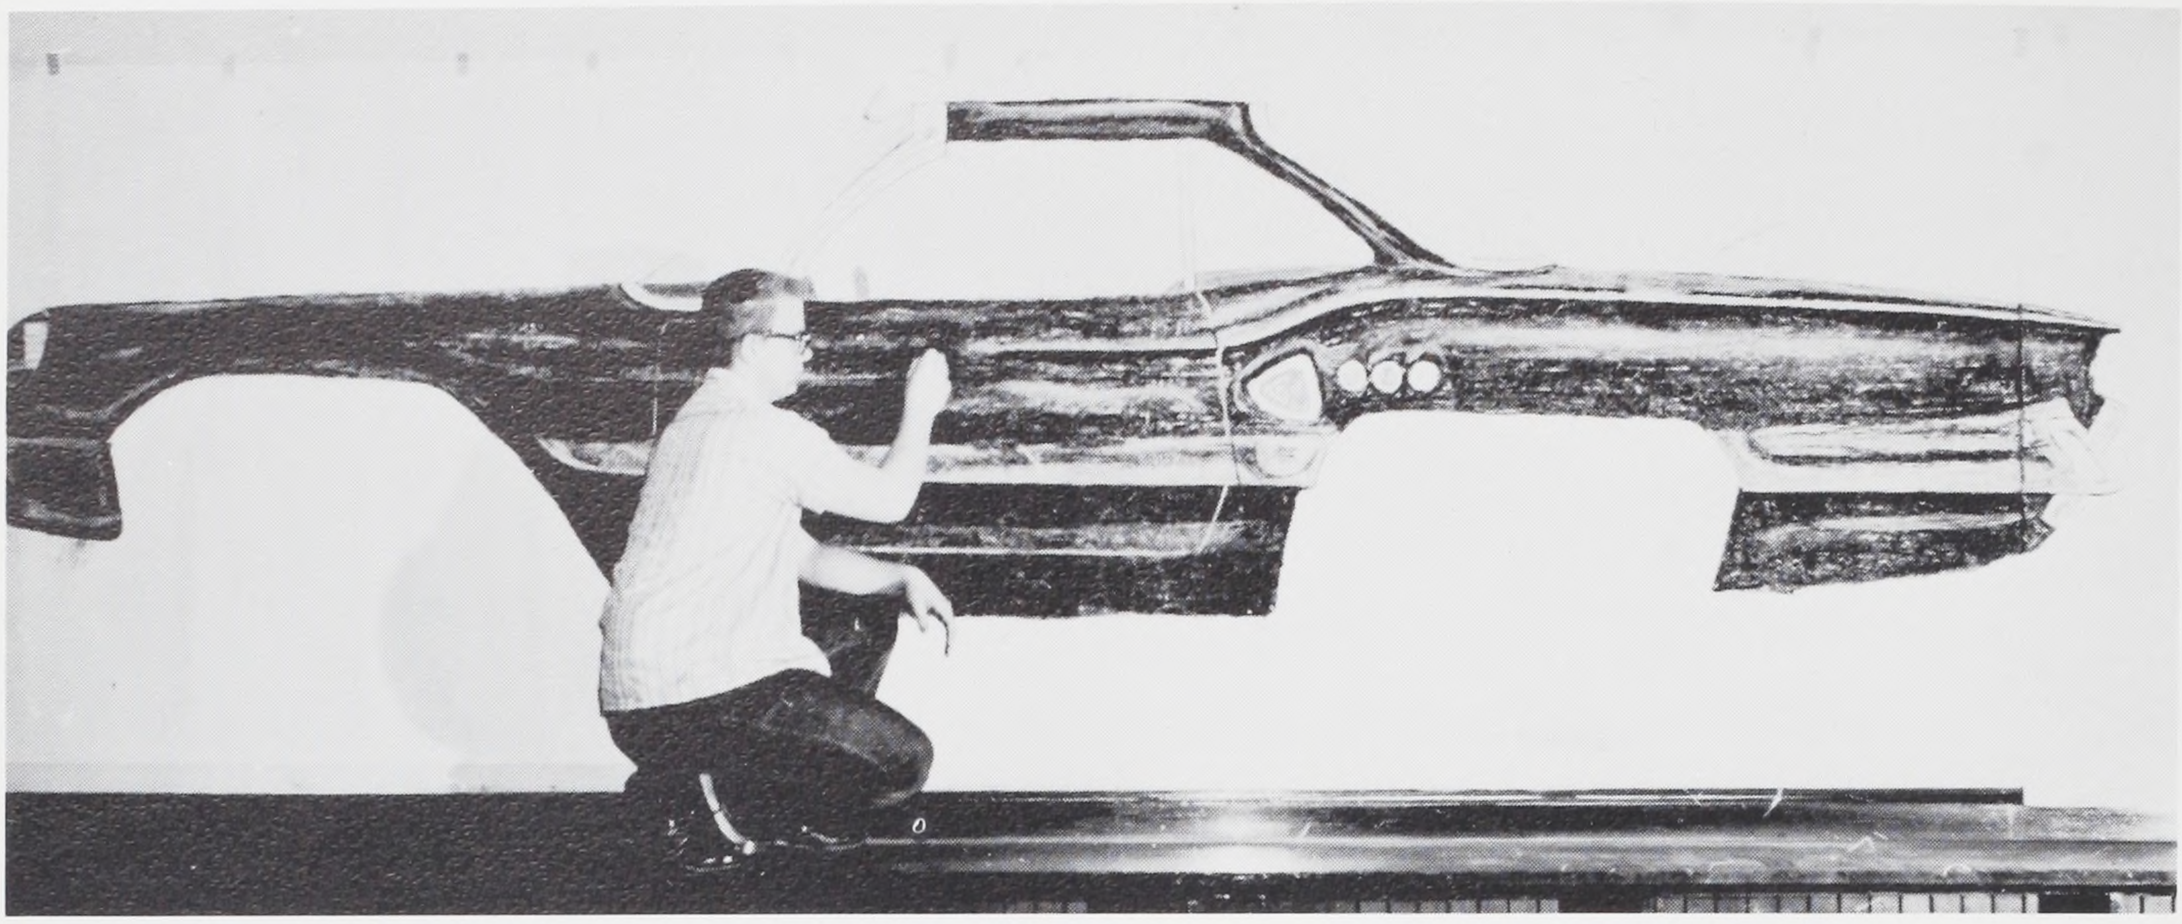

'Show Me the Way to Go Home," hums Hans Surman as he plots flight course.

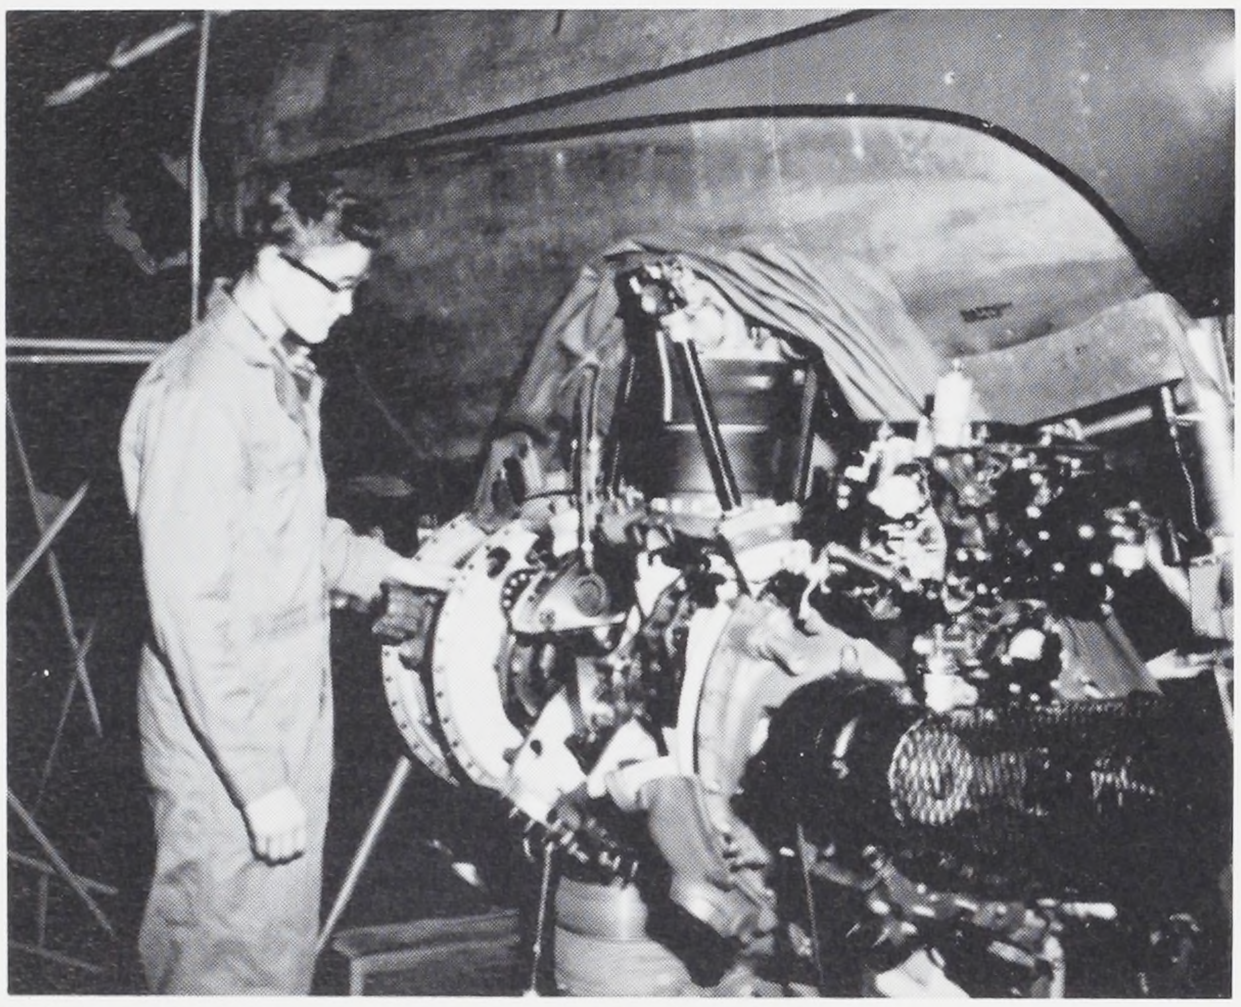

problems occupy AUTOMOTIVE majors . . .

printing, photography feature GRAPHIC ARTS ...

Cleaning press may be dirty work, but it sure is messy.

The Benson print and photo shops, the best equipped instructive shops in the West, are responsible for the technical activities involved in the production of the award winning paper THE TECH PEP.

Print and photo majors do all of the composition tasks necessary in the production of the popular school calendar.

Photo is a one period elective course that is available to Sophomores, Juniors and Seniors. The course teaches the fundamental principles of photography.

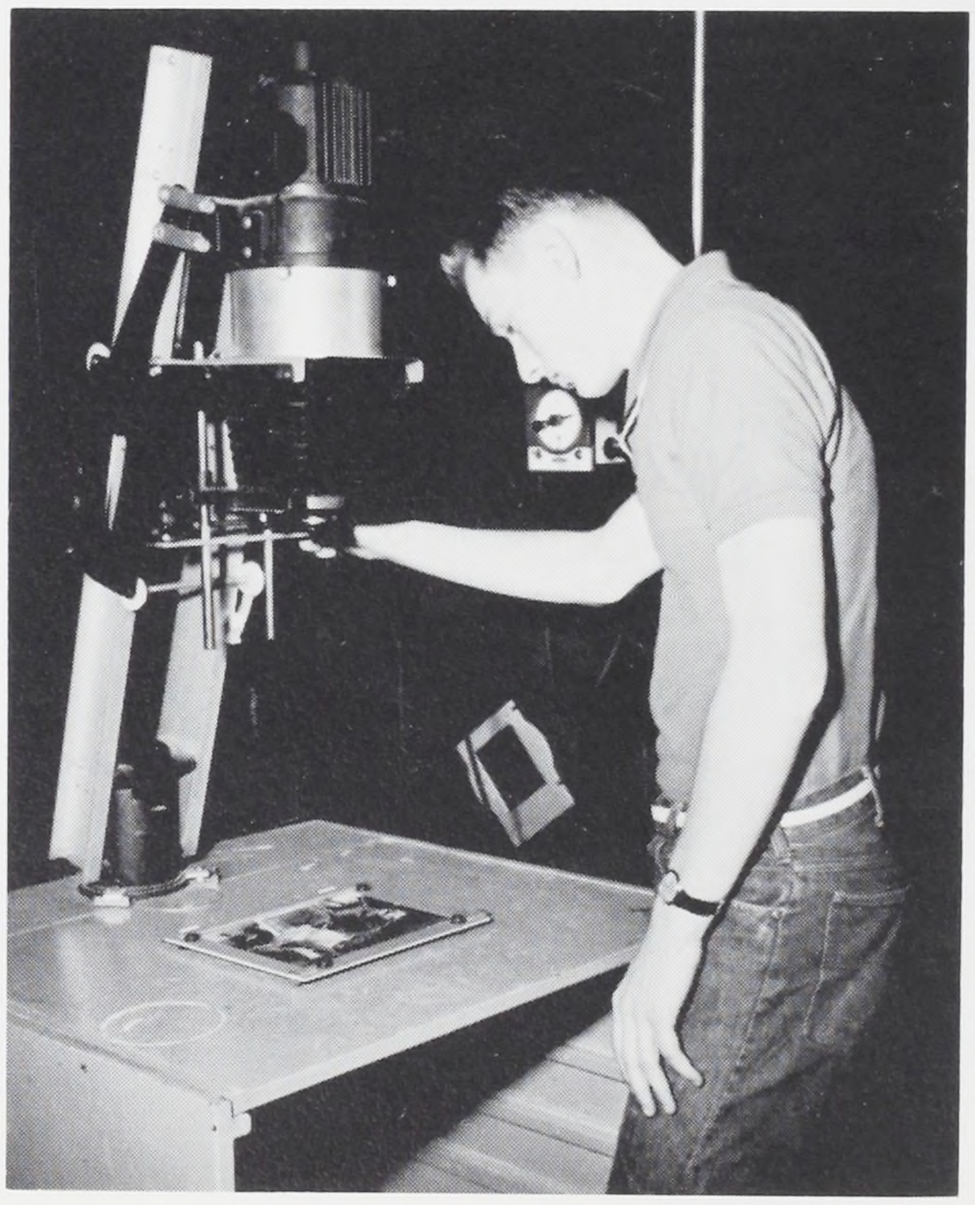

Almost all of the forms used throughout the school are put out by the print shop. A major in this field prepares for the future with specialized equipment. The linotype, offset press, cylinder press, and other similar machinery unique to the printing industry, are used in the print training program.

Whatever he's doing, it looks complicated.

The Electric and Radio shops of Benson, equipped with some of the most modern electrical equipment in the electronics trade, are well known for their highly trained graduates.

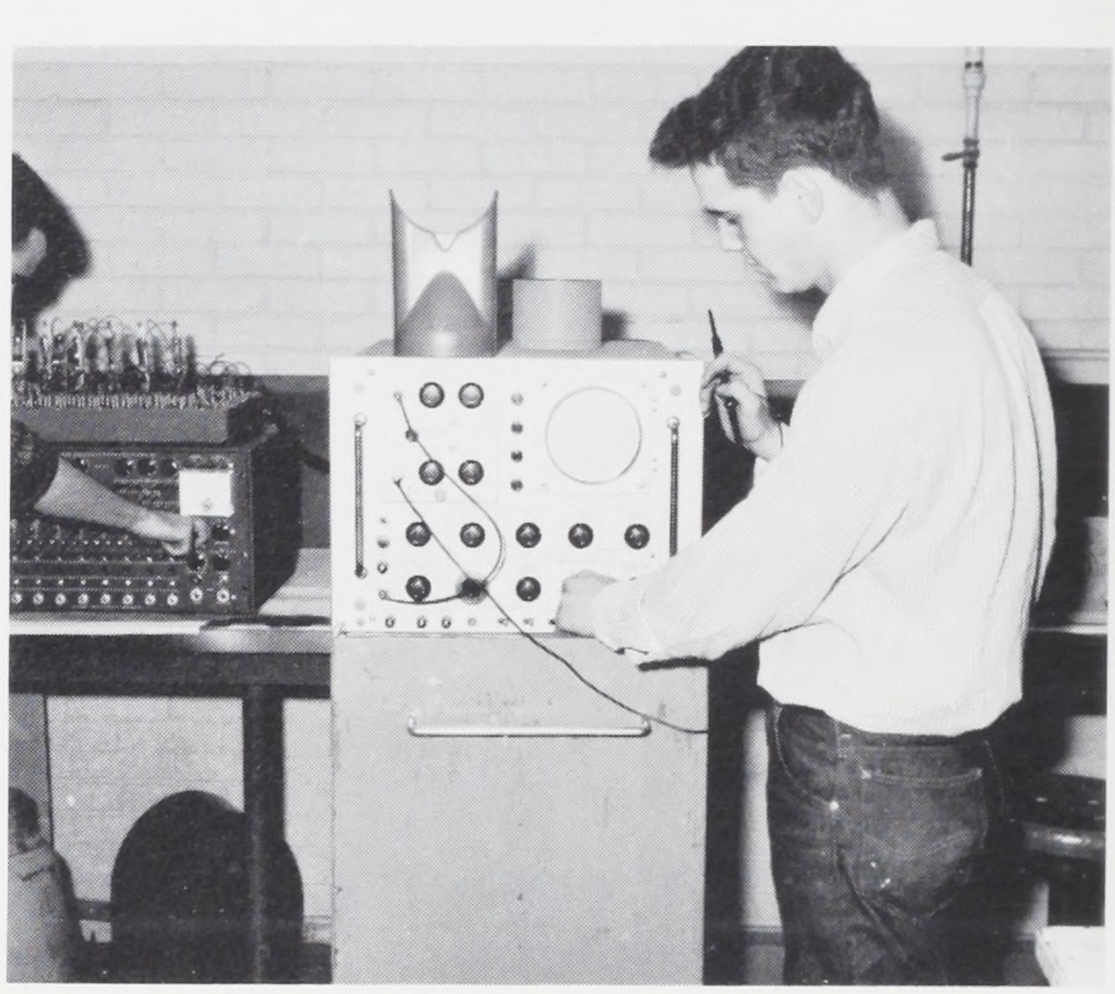

All freshmen are required to take twelve weeks of Basic Electric. This is a course dealing in the fundamentals of electricity such as simple electric theory, wire connections, wiring diagrams, and circiut hookups.

Radio and Electric theory classes are preparatory shops for college bound students. A two-year sequence, the Radio and Electric course requires the construction of a great many electronic projects. In this course the students also learn radio and electric theory.

The terminal Electric and Radio courses are designed for students planning to enter the trade directly after graduation. In these classes students learn applied electrical and radio wiring. They learn repair techniques and other general information needed on the job.

Mr. Hoffman, Foreman
Building Construction

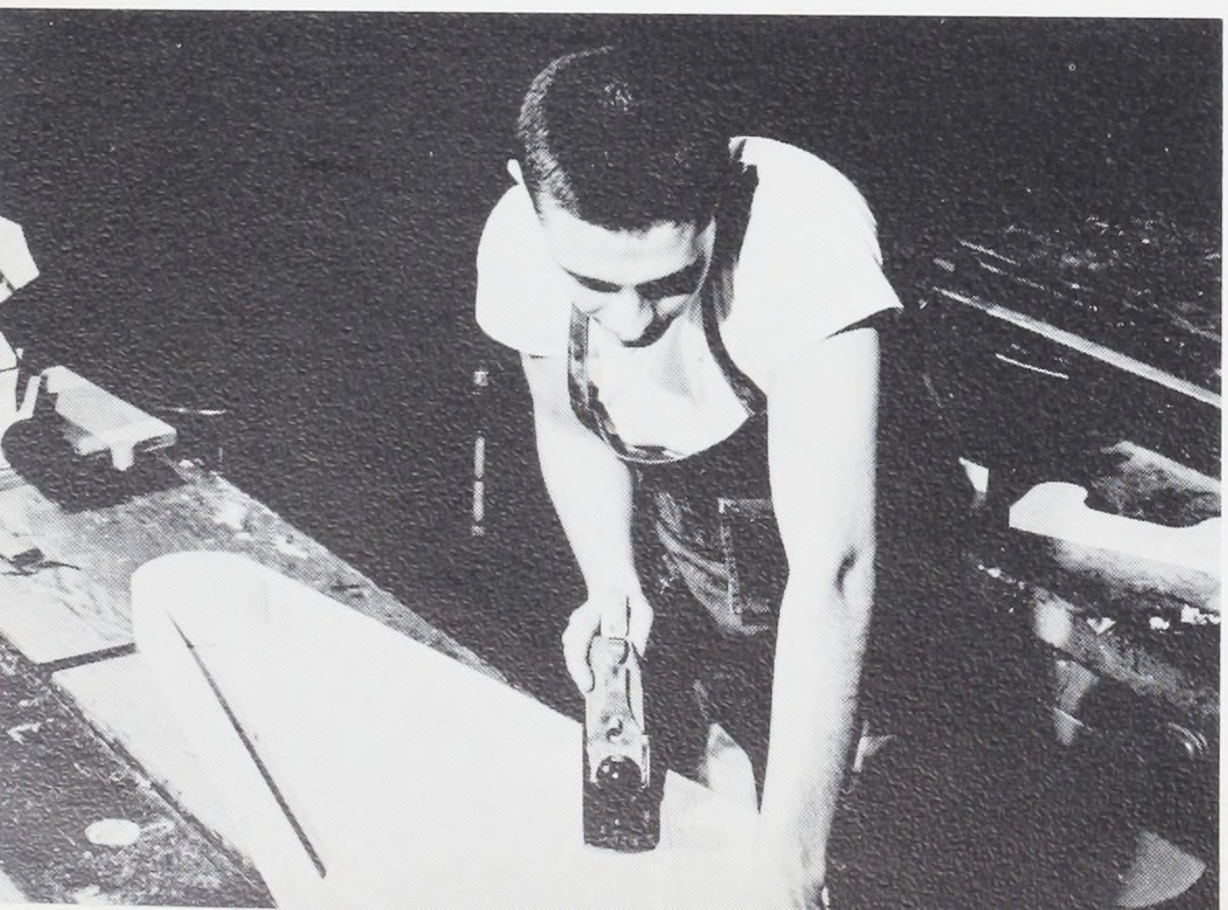

BUILDING CONSTRUCTION program . . .

Building construction is a two-year shop course which offers technical information and develops skills which are involved in construction trades. B.C. 5-6 is aimed toward the realization of skills and understandings pertinent to lot layout, building layout, concrete and form construction, and wall and roof framing. Students in the senior classes, B.C. 7-8, learn machine care and operation, cabinet making, wood finishing, and basic design procedures.

Dickenson and Gregory finish lectern for social studies department.

Doug Irons planes surface of a pattern for foundry shop.

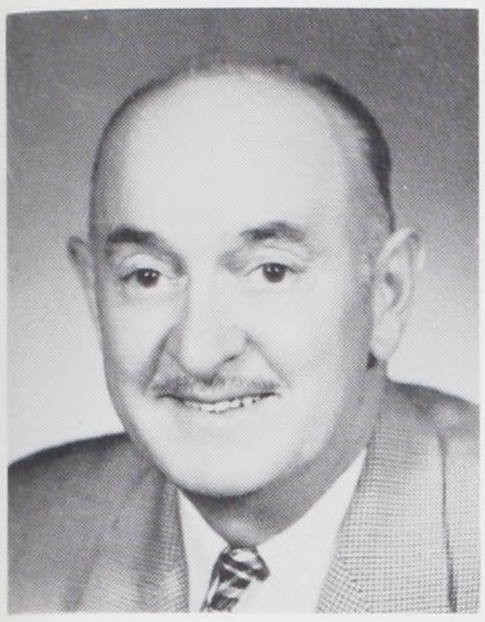

Mike Garner applies last touches to well constructed night stand.

WITH A SHOWER of sparks keeping them on their toes, Benson foundry trainees work in tandem on a difficult project. Although not one of Tech's largest shop programs, the foundry training program constantly develops quality students, capable of taking responsible positions in the trade after graduation.

Mr. Jones, Foreman
Welding and Foundry

Operating with facilities as up-to-date as any on the west coast, the Welding and Foundry department enjoys the reputation of having one of the outstanding training programs in the field.

Sophomores are required to take both welding and foundry classes as part of their shop orientation. In foundry, sophomores learn to use basic pouring molds and in the course of their work become familiar with the procedures used in pouring molten metal. In beginning welding classes, sophomores are introduced to both electric and oxygen-acetylene techniques.

Juniors and seniors who elect to major in welding work, attain competence in these skills of the welding field. Complicated projects call for expert arc welding.

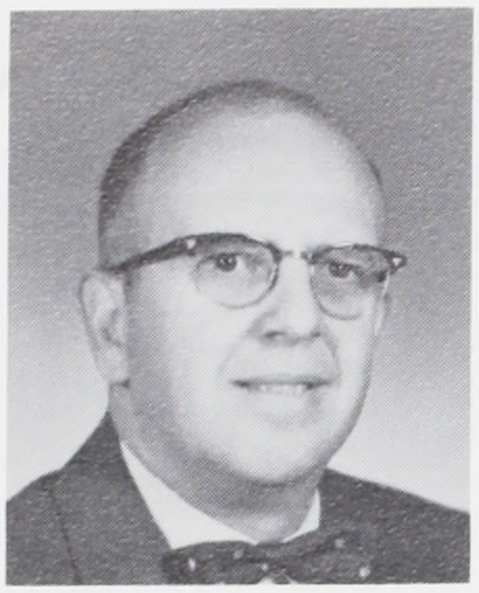

Typical Techman practices arc welding routine on scrap metal.

WELDING-FOUNDRY trainees have hot time...

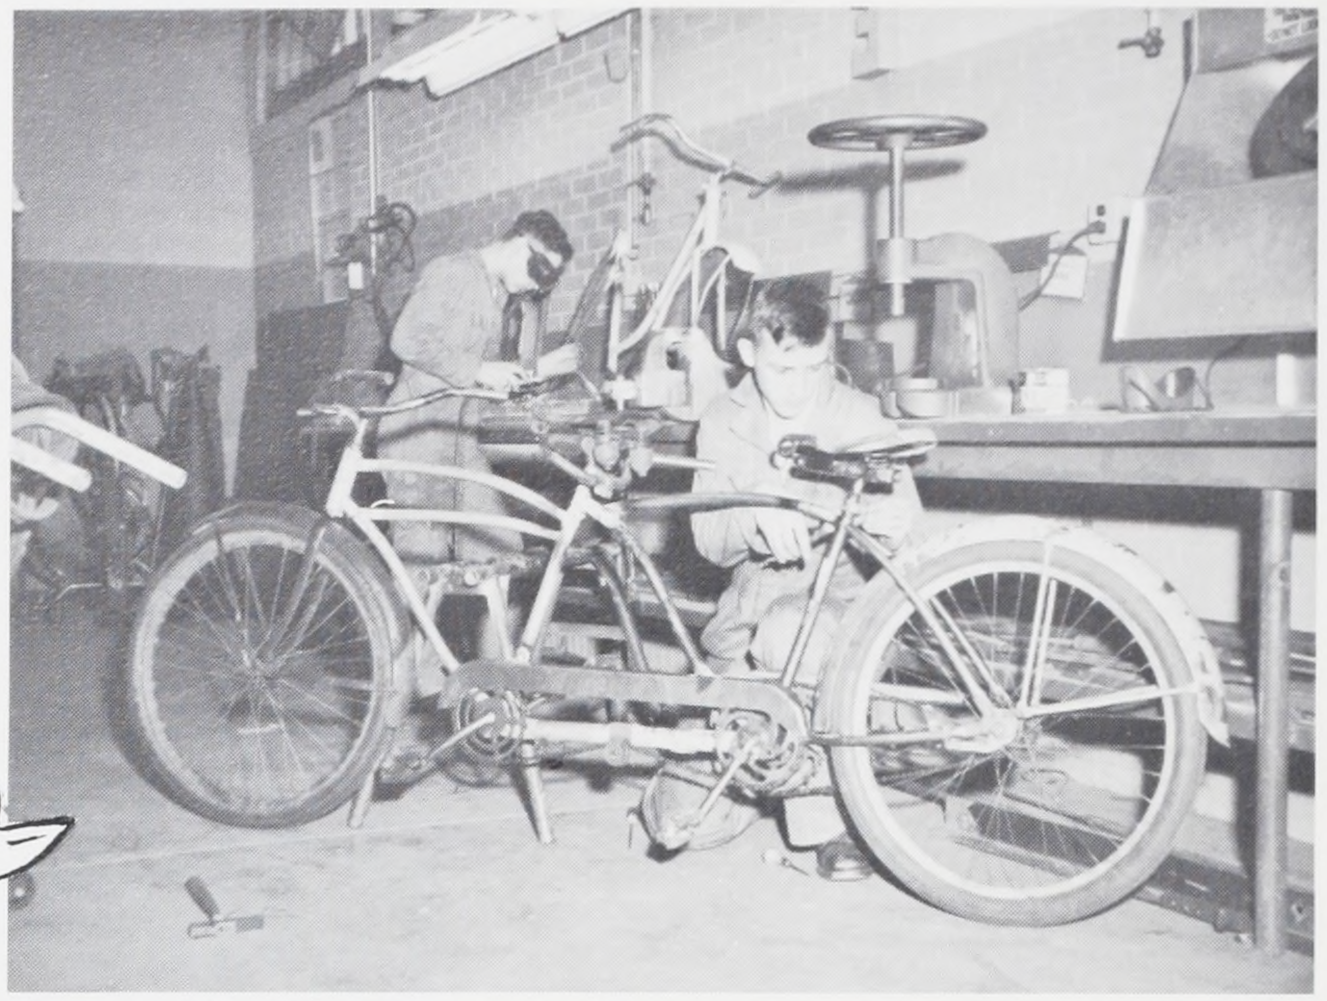

Benson graduates are in great demand by industry

Mr. Flumerfeltd, Foreman
Sheet Metal

Sheet metal students rebuild scrapped bicycles for distribution to civic charities.

products from SHEET METAL classes show skilled

Eeny, Meeny—Lou Schuyler faces big decision.

Benson's sheet metal department occupies three separate shop areas. Students in this field are taught to recognize and use tools and special equipment common to the sheet metal trade.

After the basic courses which are taken by all students, it is possible for an individual to choose to be a sheet metal major during the last two years. During the junior and senior years many special projects are turned out of the sheet metal shops. Parents and faculty members take pride in the well designed, skillfully worked articles which have been made for them in sheet metal classes.

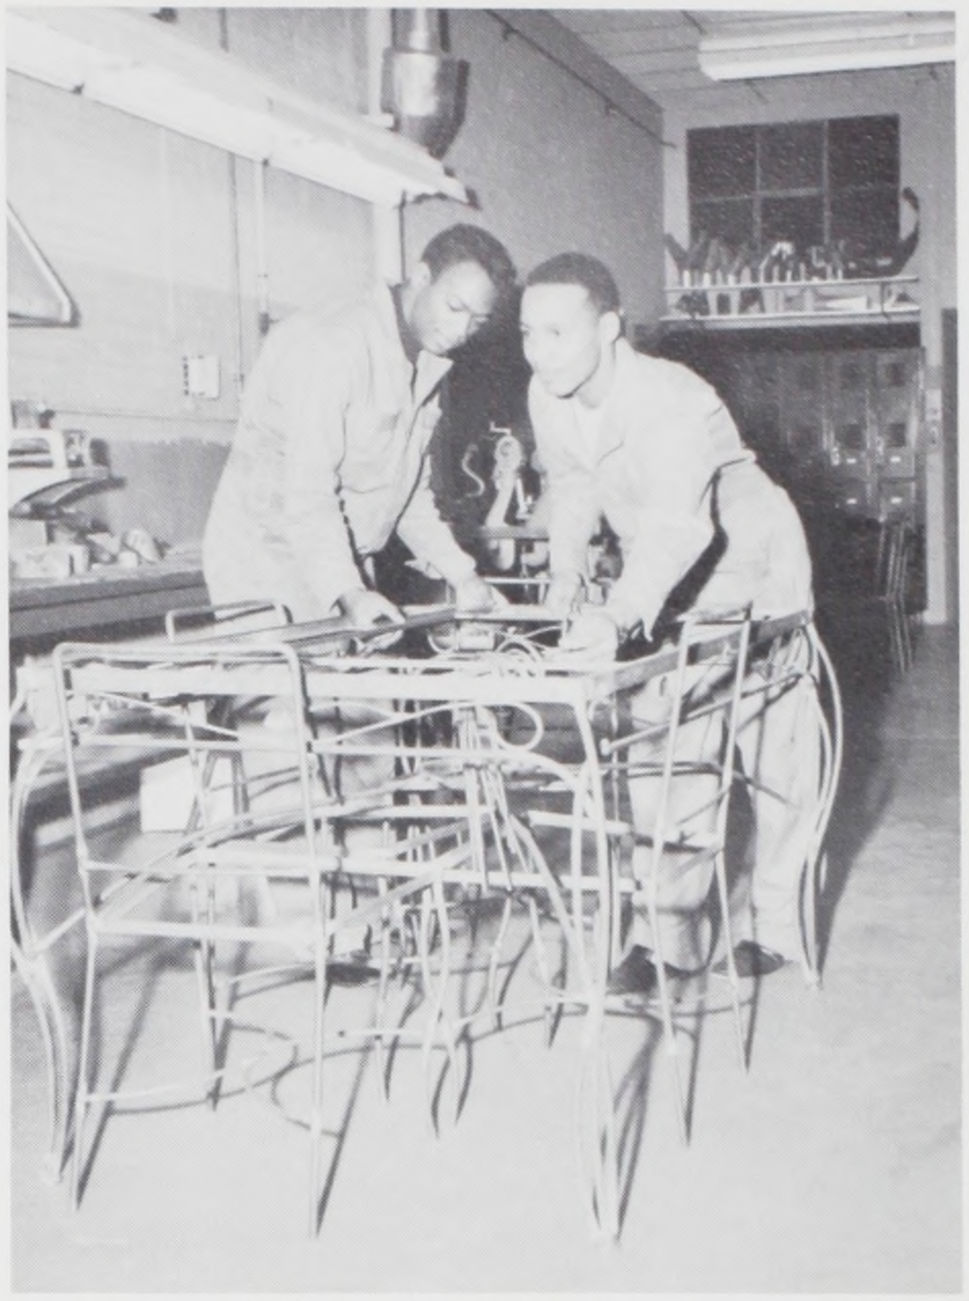

During 1960-61, sheet metal students took on an extra project. Under the leadership of Mr. Flumerfelt, sheet metal majors rebuilt bicycles which were turned over to the local Blind Children Association. This project was publicly recognized and brought great credit not only to the sheet metal students, but to the entire school.

Majors in sheet metal program can plan on future use of skills learned.

Under the leadership of Athletic Director Cliff Wise, the Benson athletic activities department ranks with the academic and technical faculty in the high degree of experience, training and accomplishment of its members. Just as the general faculty of Benson is reknowned for its excellence, so, too, is the Tech coaching staff recognized as one of the nation's finest.

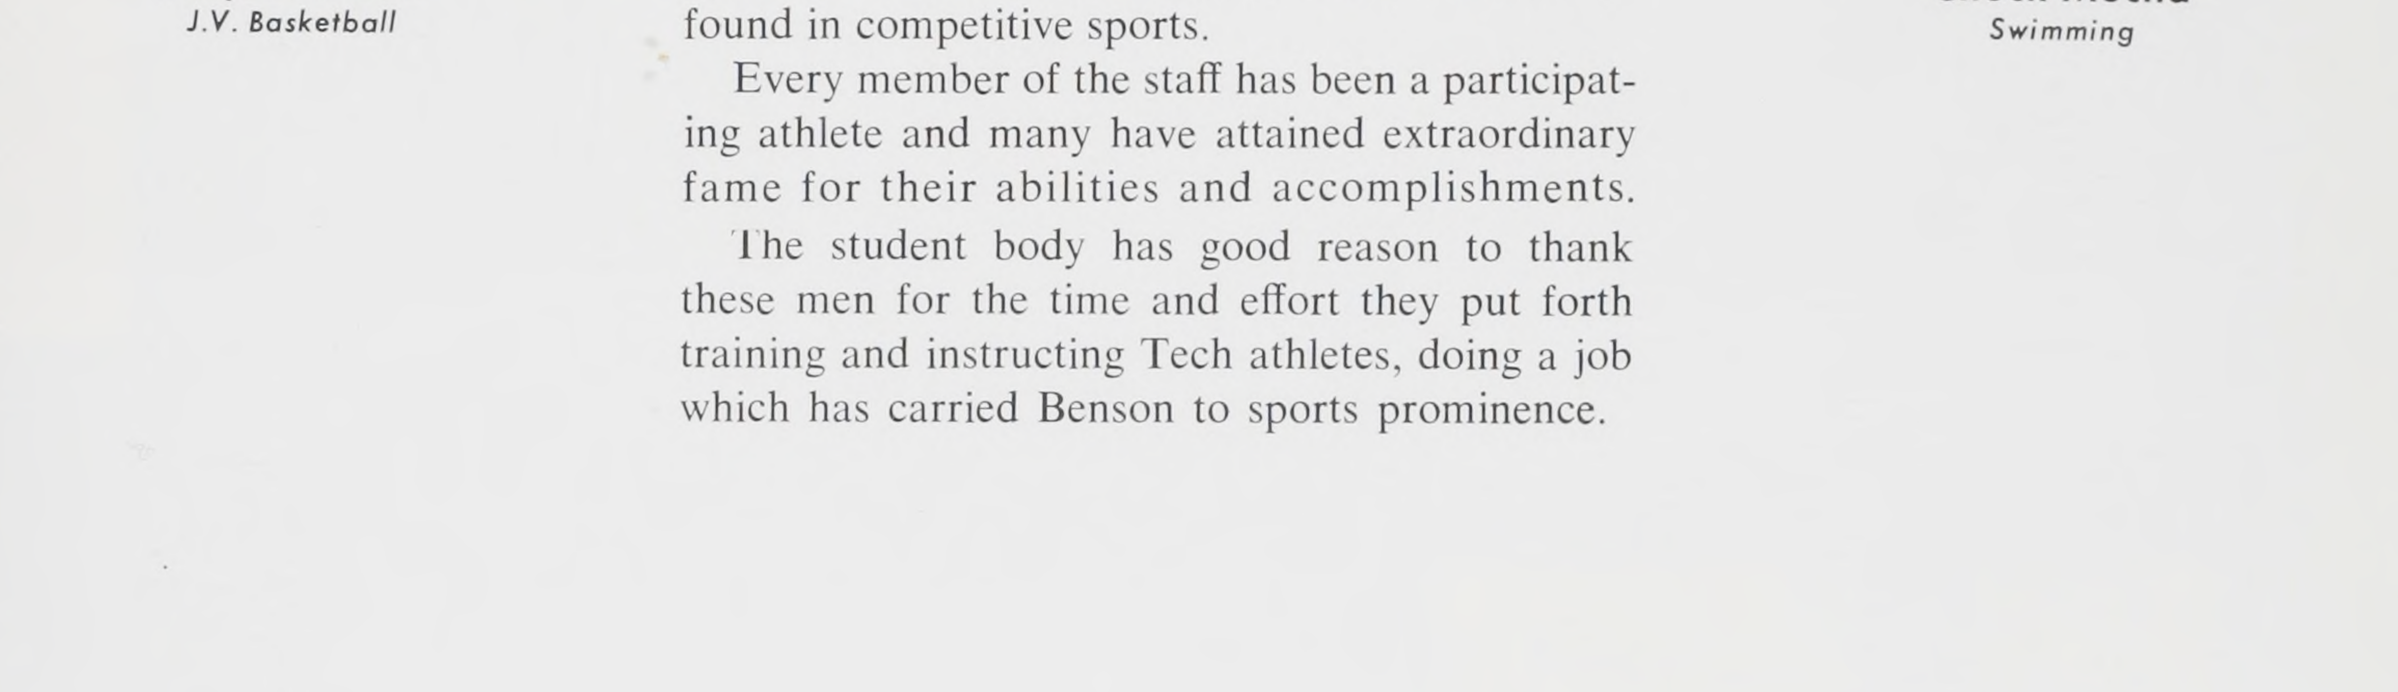

The three basic characteristics of a Benson coach are easily recognized — each has a sincere interest in the boys with which he works, each brings with him a sound background in the fundamentals of all sports, and each has a firm belief in the values to be found in competitive sports.

Every member of the staff has been a participating athlete and many have attained extraordinary fame for their abilities and accomplishments.

The student body has good reason to thank these men for the time and effort they put forth training and instructing Tech athletes, doing a job which has carried Benson to sports prominence.

fast, wide-open play...

Benson's sound defense and explosive offense proved to be too much for the Washington Colonials in the colorful P.I.L. opener played on the Wilson High field.

Benson struck suddenly through the air with only minutes remaining in the second period. A 40-yard "alley-oop" pass from Harry Cartales to flanker David Payne enabled Benson to leave the field with a 6-0 intermission advantage.

Taking the second half kick-off, the Techmen moved the length of the field paced by Ed White and Fred Dove. Cartales capped the drive, diving over from the Col seven-yard line.

Minutes later Ron Harper hit pay-dirt when he scooped up a Washington fumble and spurted 25 yards for the third Engineer tally. Halfback White completed a day which saw him pick up 80 yards on eight carries by bucking over the goal line for the last Orange T.D.

An 18-yard pass from Quarterback Cartales to End Gordon Ranta provided the winning margin as the Engineers edged the Grant Generals, 6-0.

The game was strictly a defensive battle, marked by outstanding punting by both teams. In addition to his vital T.D. catch, Ranta averaged better than 43 yards with long boots which kept Grant constantly in the hole.

The rugged Benson forward wall consisting of Frank Davis, Jack Campbell, Bill Mitchell, Ron Harper, and Dean Kutter proved to be too tough for the vaunted General offense.

One of the highlights of the evening occurred when the victorious Techmen helped Coach Pheister celebrate his first win over Grant by carrying him from the field on their shoulders.

Rich Payne drags Colonial defender for short yardage.

Warren rifles through General defense.

Dave Payne snags long pass against Trojans.

Ranked among the top ten teams in the state after whipping Grant, the surging Techmen traveled to the Wilson High field once more, this time to meet ever-dangerous Wilson Trojans.

Both teams turned in sparkling defensive performances and again the "foot" in football was the outstanding factor throughout most of the game.

The big break in the game occurred with less than a minute remaining on the scoreboard clock. Alert play by defenseman Dave Contreras put him in front of a dangerous Trojan pass which he snagged and ran back deep into enemy territory.

This key interception set the stage for the big Benson play of the afternoon, a wild pass maneuver which saw David Payne elude four Wilson backs and hook onto a perfectly thrown Cartales lob for the winning six pointer. Benson left the field with a hard-earned victory and remained the only unscored upon A-1 team in the state.

Contreras rides Quaker while Harper dives into the pile-up.

this sport is characterized by

The perfect defensive record maintained by the Techmen through their first four games was rudely shattered by an aroused Lincoln eleven. Meeting the Cards on their home field, the Engineers fell victim to equal quantities of rain, mud and first half jitters allowing two scores before the half-time horn.

Benson returned to dominate the second half, with an all-out attack featured by a daring 67-yard scamper to pay-dirt by "Flying" Freddy Dove and a perfectly executed Cartales to Ranta aerial for a 16-yard T.D. The Benson backs showed especially well in the final stanza, knifing through big holes in the Card line for consistent gains.

Despite the upset tie, the Engineers remained among the state's ten elite A-1 squads.

Riding the crest of a three-game winning streak, the Engineers traveled to Franklin for a night encounter with the maroon and gray Quakers.

The Techmen moved well following the kick-off, but penalties offset spectacular running by White and Dove. Not to be denied, the Techmen recouped their losses on a pass, Cartales to Howard Cash, which netted more than 50 yards. With the ball inside the Franklin ten-yard line three line smashes set up the defenders for a Cartales to Payne touchdown pass.

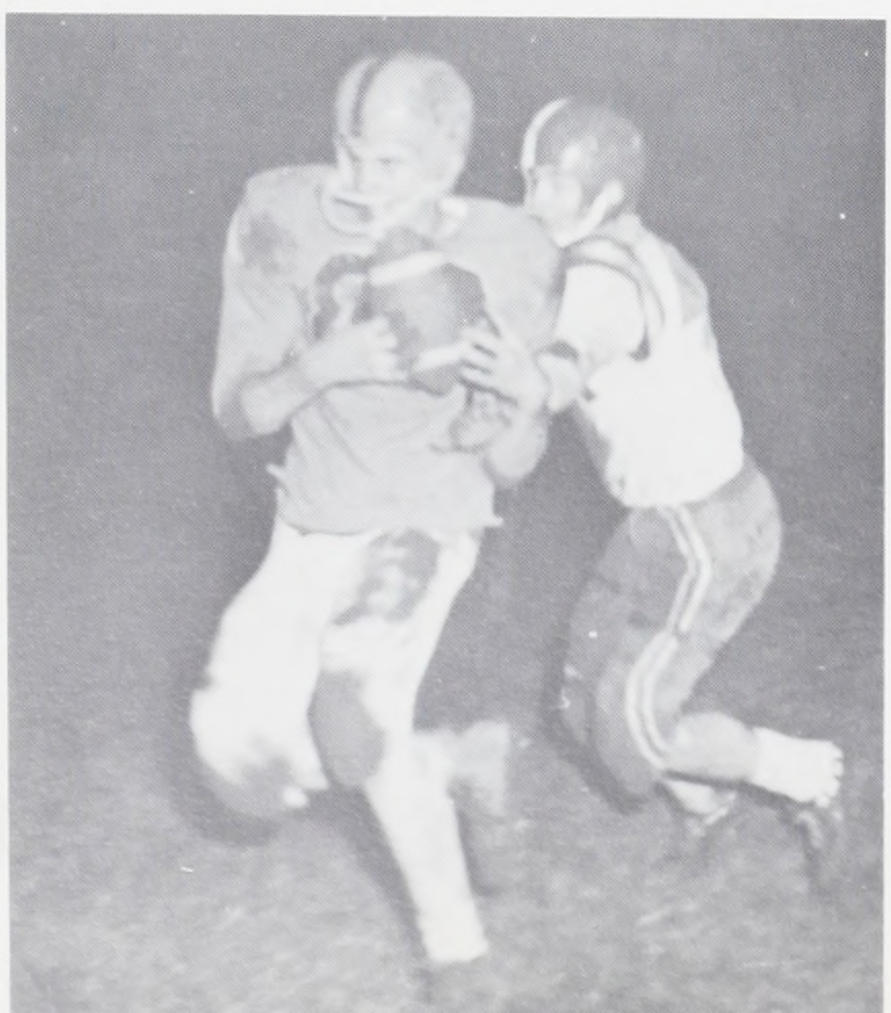

The powerful Quaker single wing gave the Orange squad all they could handle during the second half while the Tech offense stalled. Benson rooters remained anxious until "Roaring" Ron Harper crashed through the enemy line to block a punt and run it back 35 yards for the clinching score.

Thus, Benson remained unscored upon and knotted for the P.I.L. leadership. The win also vaulted the Engineers to the number four position among the state's top preppers.

Dove skirts end behind Grimes.

Ranta pulls in Cartales' aerial for vital T.D.

Sparked by the pinpoint passing of Quarterback Cartales, and the elusive running of Jimmy Warren and Ed White, the Techmen rolled over the outclassed Teddies.

Perhaps the most electrifying play of the game came when Warren gathered in the pitch-out from Cartales and rambled around right end for 35 yards and a spectacular T.D. The Benson line play during the game was typified on this play as all but three Teds watched Warren cross the goal from choice positions on the Teddie Stadium turf.

Standing only half a game behind league-leading Madison and holding tight to their number six ranking among state A-1 gridders, the Techmen left the field eagerly anticipating their coming face-to-face meeting with the powerful Senators.

physical and mental alertness . . .

Rich Payne outruns Madison defenders.

With an undercurrent of tension running through the packed stands of Senator Stadium, the surging Benson gridders took the field to face the Madison Senators in a face-to-face meeting looked upon by many as a battle for the P.I.L. championship. With the state's stoutest defense again outstanding, the mighty Techmen completely handcuffed the enemy, chalking up a decisive 6-0 victory.

With 7:14 remaining on the clock, the game's only touchdown was scored as Co-Captain Cartales averted a host of potential tacklers and skirted left end for a 17-yard pay-off romp. The fierce blocking on this play was characteristic of the all-out effort turned in by every squad member during the entire game.

The Engineers completely dominated the game, allowing just one brief Senator foray into Benson territory. The touted Madison passing attack fizzled before the determined rushing of the aroused Orange linemen and the blanket-like coverage of alert Tech secondary defensemen. The Techmen picked off three errant passes, allowing just one short completion.

With Madison unceremoniously dumped in the dust, the Engineers assumed undisputed possession of the P.I.L. throne and zoomed upward to second slot in state-wide prep ratings.

Moving on to their eighth game, the fighting Techman took on the lowly, but potentially explosive, Cleveland Indians. Following an electrifying kick-off return of 65 yards by Warren, Benson fans sat back and watched as once again the Orangemen combined stellar defense and hard-nosed attack to devastate their opponents.

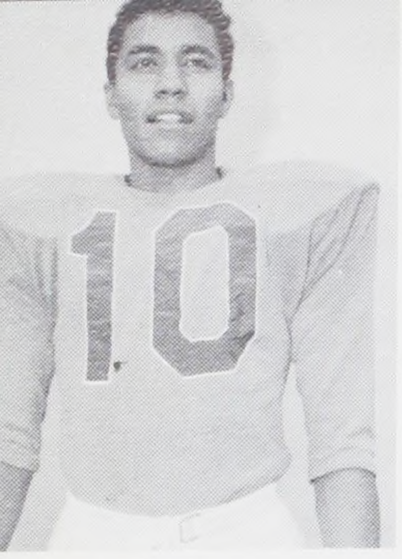

Warren's long scamper highlighted the first Tech scoring drive which was climaxed when alert Howard Cash fell on a fumble in the Cleveland end zone. Cartales, turning from his role as Benson's pass master, carried for the first of many neat gains as he ripped the Indian line for the seventh point.

Cartales also chalked up the second Tech T.D., blasting through the defense from three yards out. Fierce tackling and heads-up play on a Cleveland fumble paved the way for the final Benson push to pay-dirt. Grinding downfield with machine-like efficiency, the big Tech squad opened up the opposing line for pile-driving Richard Payne's burst across the goal.

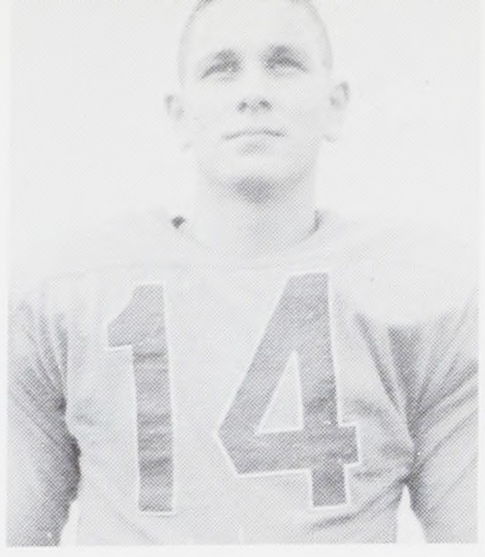

A two-point safety was scored by reserve tackle Cliff Freeman who nailed a frantic Indian runner within the end zone to close out Benson scoreboard activity.

With the P.I.L. championship hanging in the balance, the Benson gridders moved to Hopkins-Jenkins Field for their season finale with the Jefferson Democrats, perennial city leaders. The first half saw neither team able to move the ball consistently against determined defensive play. The opening half ended with many in the overflow crowd predicting a scoreless tie and a Benson championship.

However, a Tech fumble on the second half kick-off gave the Democrats possession of the ball on the Benson 30-yard stripe. Wasting little time, the Demos pushed over the only touchdown of the battle, moving downfield and across the goal in only eight plays. Ace Jeff quarterback Hergert followed the six pointer with a bold run around end for the point-after which gave Jeff its seventh counter and Hergert a slender one-point victory in the Portland individual scoring race.

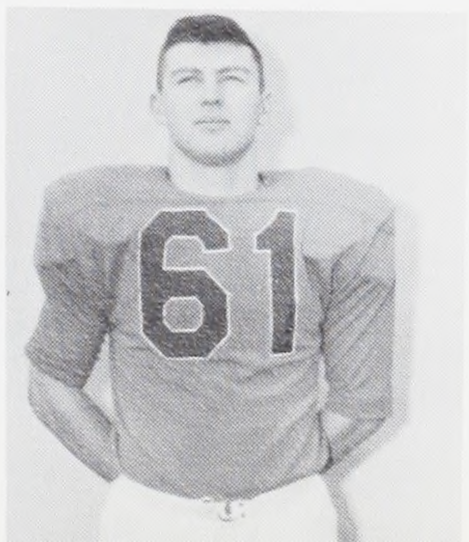

Benson launched two scoring threats following the Democrat tally but the stalwart Jefferson defense thwarted the Orange attempts to get back in the ball game. The first comeback drive by the Engineers ended with a heart-breaking fumble inside the enemy five-yard line. In the closing minutes Benson capitalized on a brilliant series of Cartales' passes to advance to the Jeff 29-yard marker, but time and luck ran out to jolt Tech hopes for a state tourney berth.

The loss to Jefferson ended the season for Benson's fine squad, but football enthusiasts throughout the state were in accord in praising the Techmen for their outstanding 7-1-1 record for the season. Ranked second in the city race, the Orange team also maintained recognition as one of the top ten prep units in Oregon.

j.v. gridders show future promise with strong finish . . .

Heartbreak and satisfaction were the keywords for the tough Benson J. V. gridders during the 1960 season. Stopped by a single point in three early contests, the young Engineers stiffened and bounced back with decisive wins over Lincoln, Madison and Cleveland to close the campaign on a happy note.

Led by Bill Coleman, Dave Steele, Jeff Marks, Richard Rider, and Mike Gustafson, the Techmen seemed happiest when meeting enemy rushes head on. Weakness in pass defense cost the team at least two games, but only Grant seemed able to stay with the big and surprisingly mobile Techmen on the ground.

Especially tough in the line, Coach Gray's squad gives every evidence of being able to supply very capable performers to replace the players leaving the varsity. The prospects uncovered seem to indicate that the future Benson squads can be expected to hold their own against all comers.

wins scarce but frosh players master fundamentals . . .

The freshman football squad had a rocky season but, despite a losing record, there were some bright spots. At the end of the season Coach Simmons felt that the Benson backfield men were as good as any in the frosh league. Al Williamson and the two Nate's, Young and Mays, were outstanding, even in defeat. Young, a hard-hitting fullback, was voted "Most Inspirational Player" by his teammates.

Coach Simmons reported that these boys have a really fine attitude and are very easy to work with. Coming from all areas of the city and meeting for the first time, Tech freshmen face an organizational handicap unknown to other schools. After the early strangeness wore off the boys played together well and the spirit they developed, even while dropping most of their games, was encouraging to the coaching staff.

Strahl, Slawson, Stansbury and Rotto champs in relay event...

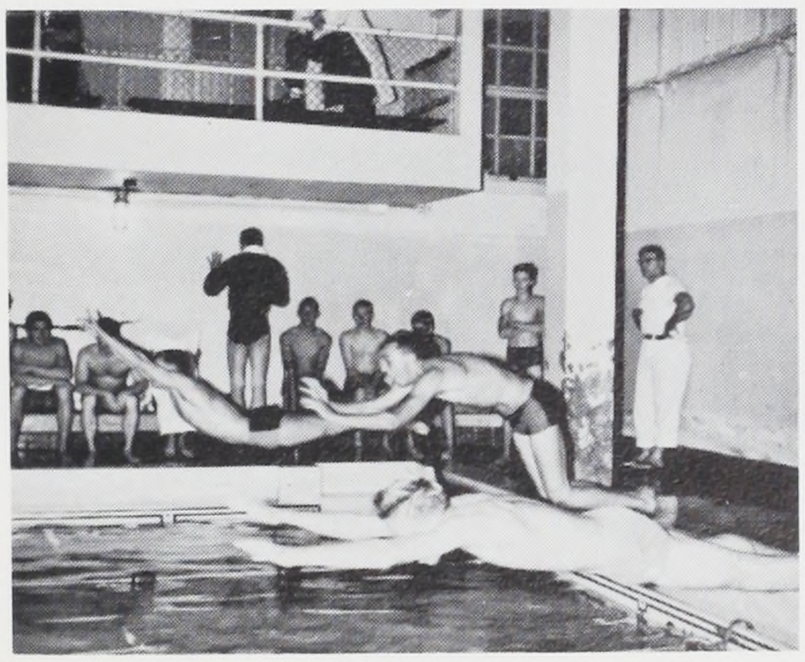

Swimming is an interscholastic sport that Bensonites may boast about, thanks to the 1960 swimming team. The Tech tankmen copped second place in the PIL race, losing only to Wilson High.

The 200 yard relay team, consisting of Bill Slawson, Doug Strahl, Dennis Rotto, and Jim Stansbury captured first place in the city meet. Slawson, captain and four year letterman, won first place in the 50 yard freestyle race and junior Stansbury finished first in the 100 yard freestyle.

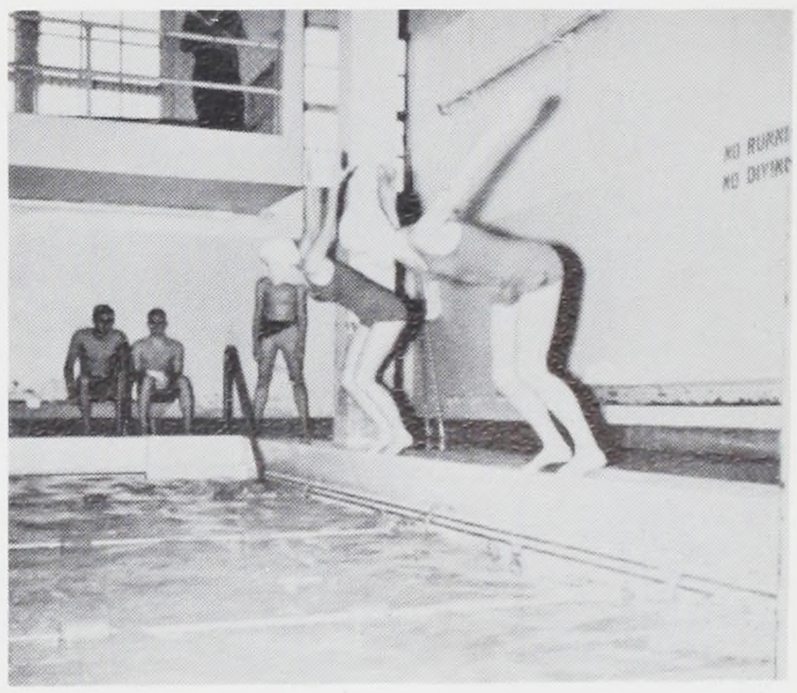

Strahl, another four year letterman, and Rotto, a promising sophomore, both took second place spots competing in the 200 and 400 yard freestyle events. Other top point makers for the swimmers were Ed Joste, Boss Schouten, and Bob Norris.

Helping Coach Mucha in the handling of the team were managers Lee Tint, a four year letterman, and Chuck Kuhne, both of whom provided invaluable assistance during the practice sessions and meets.

Beginning their preliminary training in early September, the Benson Cross Country runners prepared themselves for one of the most difficult seasons in recent years. With every squad in the city improved, the Tech harriers found gruelling competition in each meet.

Rising to the competition, however, the Engineer team proved to be hard to beat, failing to drop below second in any race. Senior runners Carl Foeste, Russ Hague, Gene Trobaugh, and John Ellet set the pace for Coach Lodwig's small outfit, but underclassmen Ed Del Sol, Richard Evans, Paul Norman, and Phil Norman also turned in performances which helped keep the Tech scores low.

Cross Country, unlike most sports, is scored on the basis of low total score. The winner of each race is awarded one point, the second place man gets two points, the third runner draws three, and each succeeding man collects points corresponding to his position as he crosses the finish line.

One of the highlights of the season occurred at Roosevelt High where the Engineers met the Teddy leather-lungers in a special match between halves of the football game. With every fan watching excitedly, the Benson team ran to the win, and demonstrated in the process that cross country is no soft touch and can't rightfully be thought of as a 'minor' sport.

They're off — Kelly and Holt dig out for J. V.'s.

End in sight, Techman pours on the coal.

Over the top — Wilson and Roosevelt eat Benson dust.

Del Sol and Evans sprint toward finish line.

City Meet

Benson . . . . . *second place*

In view of its 1960 showing, the junior varsity cross country team promises to provide top flight runners for future varsity competition. Although the team's several victories were not won by overwhelming margins, they were decisive.

Coach Lodwig, who works with both varsity and j.v. harriers, got top performances from Tom Weaver, Duffy Holt, Rich Perry, and Kent Wong. With material from this year's j.v. squad playing an important role, the coach looks ahead to making Benson a cross country power in the P.I.L.

What?

Why it's basketball, the fastest moving of all high school sports. Long before the first game, the Benson gym echoes with pounding feet and bouncing balls.

As the season opened, speed, agility, coordination, endurance, and quick thinking marked the '60-'61 Benson cage squad . . .

Front Row: H. Cartales, G. Randall, J. Warren, M. Kelly, J. McLacklan. Middle Row: R. Payne, B. Stephenson, M. Lockett, R. Nelson.

Top Row: G. Ranta, W. Nelson, D. Payne, D. Contreras, H. Cash.

BASKETBALL

Warren blasts through Generals to tally two pointer.

Opening their 1960-61 PIL basketball campaign, the ambitious Techmen squared off against the Generals of Grant High, pre-season favorites to capture the city crown. The first quarter saw the outsized Engineers take a slender lead but as the second quarter progressed, the Orange team was unable to contain the timber topping Grantmen.

Responding to Coach Gray's half-time talk, the fired-up Techmen roared back to regain the lead and held a five-point bulge as the two teams moved into the final stanza. The final minutes saw the lead see-saw with both teams straining for the lead. Last-second breaks seemed to favor the Generals and, staving off a desperation effort by Tech, the Grant team wound up with a 48-46 victory.

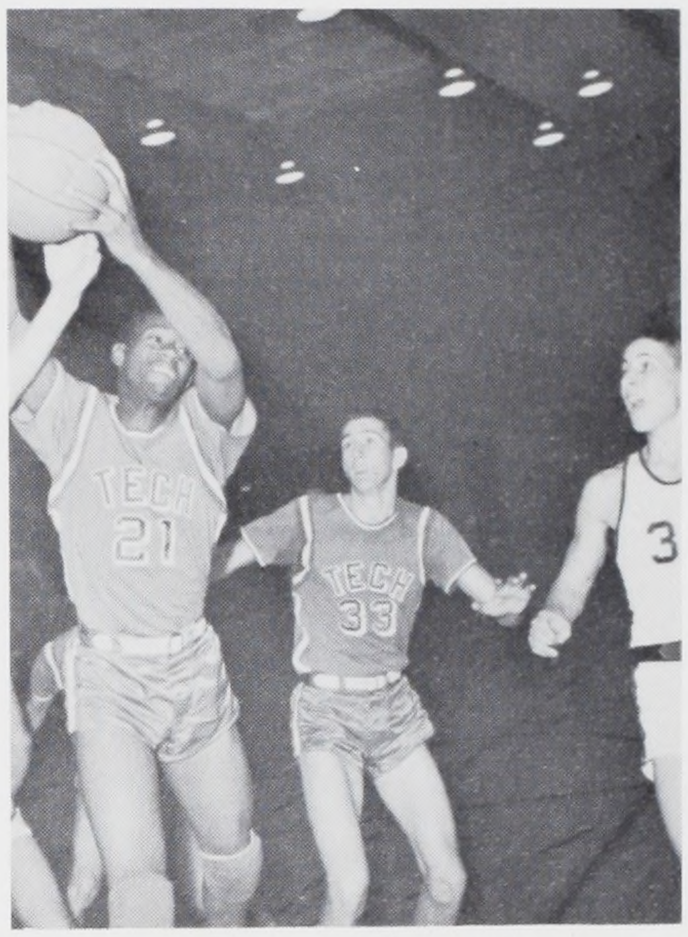

Ranta leads Tech rebounders to Jefferson boards.

color and spirit to spare...

Still in a state of shock after their rude treatment at the hands of Marshall, the Orangemen took on the Lincoln Cardinals determined to come home with their first PIL win. Again it seemed that the enemy was especially high for Tech and when the cries and cheers died out in the Card gym the Techmen were on the short end of a 41-30 score. The Benson offense seemed unable to generate any punch as three players, Wes Nelson, Mike Kelly and Dave Payne shared high-point honors with only six markers each.

Meeting the lightly regarded Minutemen of Portland's newest high school, John Marshall, the Benson quintet ran head-on into an unexpected whirlwind. Scrapping and hustling, the Minutemen, all sophomores and juniors, took the play away from the taller Tech squad and ran away with the game in the second half, chalking up a win in their first PIL varsity game.

Rich Nelson beats Marshall to ball while Contreras stands by to help.

Capitalizing on the strange whammy which hits Jefferson basketeers when they appear on the Engineer home court, the Techmen jumped into an early lead and held tight to eke out a narrow 52-50 win over the previously all-victorious Democrats.

Putting forth special effort in an attempt to avenge the bitter football loss to the Demos, the Orange five, led by forward Dave Payne, dominated the first half, constantly thwarting Jefferson field goal attempts with their fast moving 1-3-1 zone defense.

Jefferson's move toward victory came in the closing minutes of the final period, but key baskets by Payne and center Wes Nelson spelled doom for the Democrat surge. Payne turned in the finest individual game seen by Tech rooters in many games as he netted 22 markers and cleared 20 rebounds from the backboards.

Techmen won admiration of fans and opponents...

Paced once more by David Payne and Wes Nelson, the Techmen smashed the visiting Quakers of Franklin High, piling up a ten-point, 51-41, victory.

Payne and Nelson lofted shot after shot through the nets and combined to sweep both offensive and defensive backboards clean of vital rebounds, frequently zooming over the rims to grab off loose balls. The decisive win, the second in a row for the Engineers, lifted the spirits of Benson supporters, hungry for a PIL title and a state tourney berth.

Contreras wrestles for rebound while Randall and Ranta watch.

Determined to maintain their winning streak, the Tech five took the floor against the towering Wilson Trojans. Faced with red hot Wilson shooting and a backline trio of defenders averaging better than 6′-4″, the Engineers found it impossible to hoist enough good shots to keep pace with the rangy Trojans and lagged behind by as many as twenty-four points during the first half.

Regaining their shooting eyes, the Orange players came roaring back as the second half progressed, fighting the sky-scraping West Side outfit and actually gaining the edge in the hot rebounding competition. However, the comeback fell short as the Techmen were unable to overcome the early Trojan lead. The final whistle brought the game to a close with Wilson on top, 58-40.

As the PIL campaign rolled into its seventh round, the Cleveland Indians, defending city titlists, arrived at Benson.

After a slow start, the scrappy Techman began to pull away from the big Indian team and, paced by Jim Warren and Wes Nelson, built up a nine point halftime margin.

The sticky full court press employed by the Engineers during the second half paid handsome dividends. Time and time again the close checking Benson players forced Cleveland into bad passes and mental errors. Many of these miscues led directly to Tech goals.

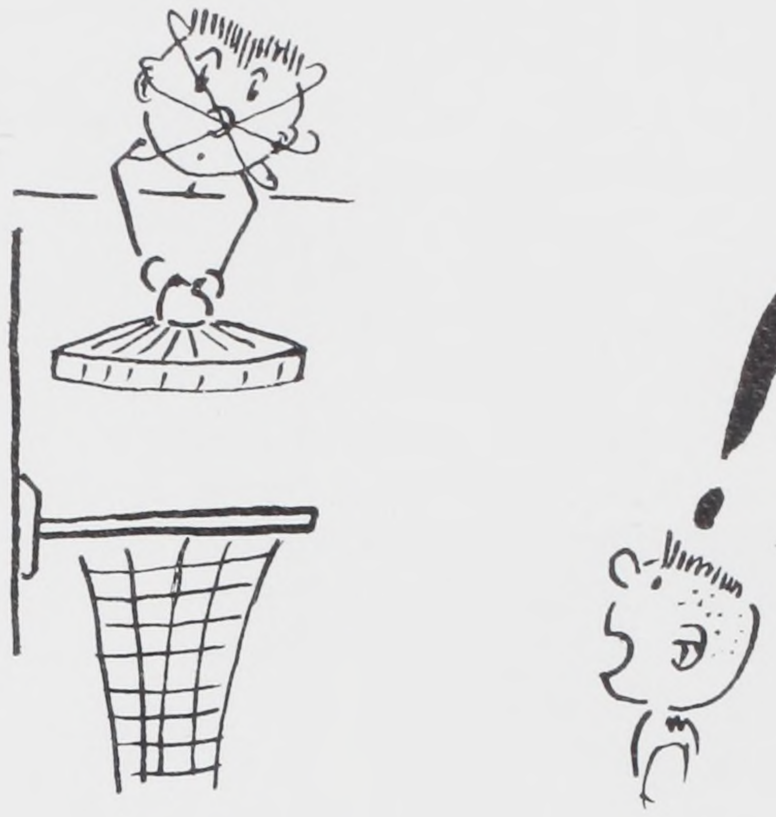

Warren topped the Orange scorers with fifteen markers while Nelson provided the backboard defense with 21 rebounds. Benson ran away with the final stages of the game, sweeping by the favored Indians with an easy 48-31 win.

Cameraman catches all ten players waiting for the ball.

orange five proved hard to beat on their own floor...

As the Techmen faced the hot and cold Madison Senators, most Benson rooters felt this game would be the make-or-break game of the season. Falling behind early in the first quarter, the Orange team was unable to contain the hot-handed Mads. Led by P.I.L. scoring champ, Terry Lawrence, who netted 21 points, the Senators raced through a disorganized Tech defense to rack up an overwhelming 75-50 win. Dave Payne and McLockett each collected 10 points for Benson.

Hustling behind the leadership of forward Jim Warren, the Techmen faced off against the Washington Colonials. With Warren collecting 18 counters with a red-hot demonstration of jump shooting, the Benson five surged into an early lead and held tight throughout the game.

Washington threatened during the second period but a Tech surge stopped the move and the Engineers grabbed the halftime advantage, 23-16. Completely dominating the backboards, the brother combination of Rich and David Payne were outstanding. Also playing a fine game was Harry Cartales, whose slick fakes under the basket cleared the way for several easy goals. Moving away from the Col's, the Benson team carried off the win by a decisive 13 point margin, 53-40.

Lockett and D. Payne snare rebound.

With the friendly Benson gym as a background, the Engineers took on Roosevelt's tail-end Teddies. Scraping behind Jim Warren and Dave Payne, the Tech squad moved into an early lead, building up a safe 12-point span. Starting the final period, however, the Roosevelt team took advantage of several Tech fouls and, outshooting Benson from the foul line, eked out a narrow victory, 59-58.

Warren and D. Payne crash boards after shot by Ranta.

Starting the second round of P.I.L. play, the Techmen faced the unbeaten Grant Generals. Many felt the Bensonites had a good chance of upsetting the league leaders, but, despite a fine individual performance by Wes Nelson, the Generals steamrollered the undermanned Techmen.

Ten Grant players hit the scorebook as the Generals piled up 52 points to only 47 for Benson. Nelson, with 14, and Lockett, with 11, were top point makers in the Orange effort.

classy moves, instant reactions spell top quality play...

Still smarting from the merciless first round beating received at the hands of Marshall High's Minutemen, the Tech players licked their chops as the visiting M-Men lined up for the second meeting between the schools. Putting the pressure on the young Marshallites, the Techmen zoomed to a 33-18 halftime lead, scoring 18 points in a row at one point. Again Dave Payne led the Tech scorers, this time with 16 points. Other top shooters for Benson were Jim Warren, 10, and Rich Nelson, 11. Most Bensonites felt the 59-36 whomping evened the score with Marshall.

With the sweet taste of revenge still fresh in their memories, Coach Gray's basketeers prepared to take on the Lincoln Cardinals. Remembering the first contest, Benson players anticipated a tough, close game. However, with Jim Warren and Wes Nelson topping the eight Techmen who found the basket during the game, Benson ran roughshod over the astounded Cards. Using a full court press to stymie the Lincoln offense, the Engineers chalked up a wild 52-33 win.

Led by Jim Warren and Dave Payne, Benson made a terrific effort to sweep the second Jefferson battle. After taking a good lead in the first half, Tech slipped behind the fast and tricky Demos. Turning the tables on Benson, the Jefferson team used a sticky full court press and, with this favorite Engineer tactic, forced too many Orange errors to allow a Benson win. Jefferson's 61-57 win gave the two teams an even split for the season.

Contreras attempts to block Franklin shot.

Randall hooks in two against Cleveland.

The second Benson-Franklin meeting was highlighted by a display of deadly jump shooting by Dave Contreras. Hitting ten out of sixteen tries from the floor, Contreras netted an even 20 points. Engineer fans went wild when the hustling Tech squad, led by the reserves, ran the Quakers off the floor and held a comfortable lead at the game's midpoint. Franklin came back strong, however, and the tiring Orangemen were unable to keep pace. Even Coach Gray's substitutes couldn't stem the Franklin surge and, following a series of successful fast breaks, the Quaker team man-handled their way to a 61-45 win.

Wilson's Trojans crossed the river to tangle with the Benson five, needing a win to cement a state tournament berth. With the security of their home court backing them up, the Techmen rushed to an early lead, outplaying the lanky Wilsonites. The superior fire-power of the Trojan eventually paid off, however, and although the Orangemen were able to stay close, the visitors went home with a 64-55 victory. Leading the Tech offense was Wes Nelson, who pumped in 12 points.

Jimmy Warren's steaming foul shooting, eleven for eleven, highlighted an otherwise routine battle between Benson and the Cleveland Indians. Having whipped the Warriors in the first round of play, the Engineers went all out to make it a series sweep. Although Cleveland pulled ahead and held the lead throughout most of the game, the determined Techmen evened the count mid-way through the final stanza and swept on to a come-from-behind conquest. Warren's 19 points were tops for Benson while Wes Nelson chalked up 12 for second honors.

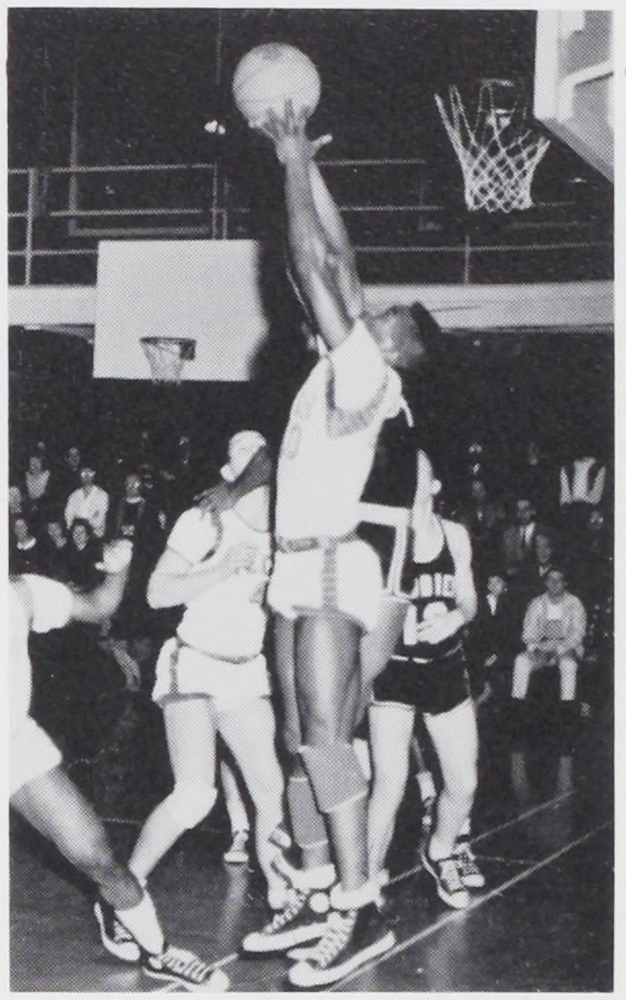

"wait till next year," say fans, "six juniors returning..."

Failure to contain the P.I.L.'s leading scorer, Terry Lawrence, prevented the Techmen from evening the season record with Madison. In a high scoring game which saw seven players hit double figures in the point column, the Senators eked out a hard-fought 68-63 win.

Defense was practically non-existent as both teams poured shot after shot through the nets. Lawrence, a unanimous All-City choice, tallied 31, high in the league for the year. Mac Lockett scored 15 points for Benson, followed by Jim Warren and Dave Contreras, each with 13.

Wes Nelson and Warren mix it up.

Warren stretches to limit.

Jim Warren again held a hot hand against Washington as the two squads met the second time. With eight first period counters from Warren, the Engineers waltzed through a weak Colonial defense, gaining a 31-24 halftime lead. Great defense work by Mac Lockett held Col scoring ace, Odell Watson, to a meager five points during the first half.

Benson continued to pour it on during the third and fourth periods, running the Washington players into the floor. Warren, with 13, and Dave Payne, with 11, were high scorers as Tech swept to a 56-38 win.

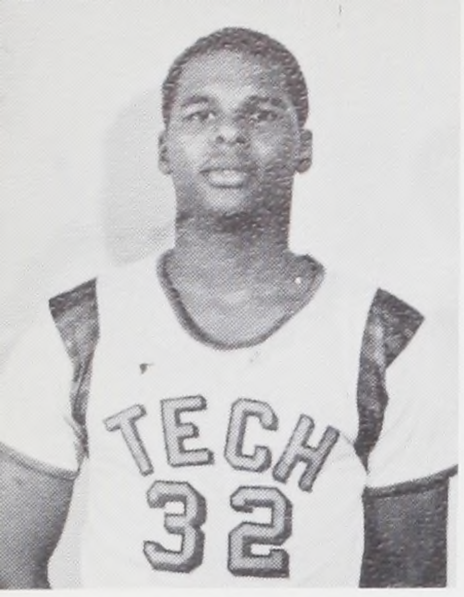

Defensive play . . . Randall trys for check, Contreras blocks Quaker.

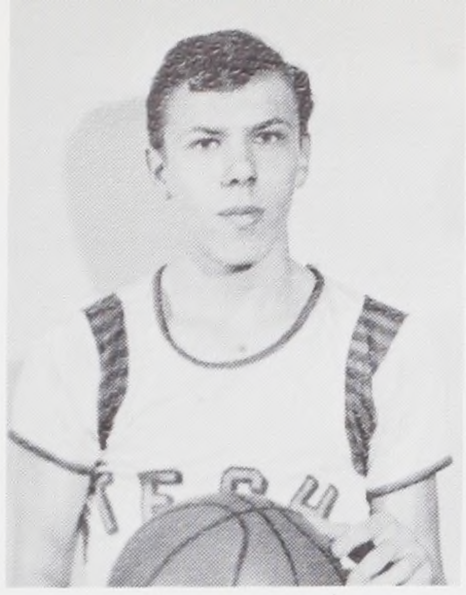

The Teddies from Roosevelt dropped the Techmen by one point for the second time this year. This game, like the first one, was a thriller as the lead traded hands frequently in the first half with the Roughriders leading at intermission,19-18. A rout seemed in the making as the Teds grabbed a ten-point lead at the end of the third quarter, but the Techmen, aided by the hot hand of Jim Warren, who collected 12 markers in the final period, gave their opponents a scare, closing the final margin to a mere point,44-43.

Tense teammates eye Ranta as he leaps for tip-off against Jeff.

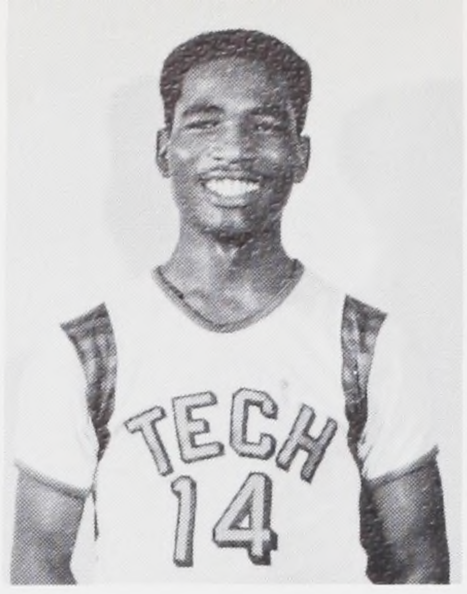

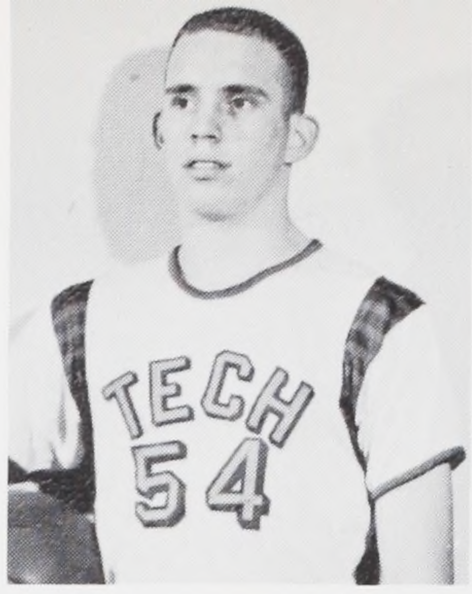

David Payne
F, Sr., top rebounder, good shot in close, offensive leader.

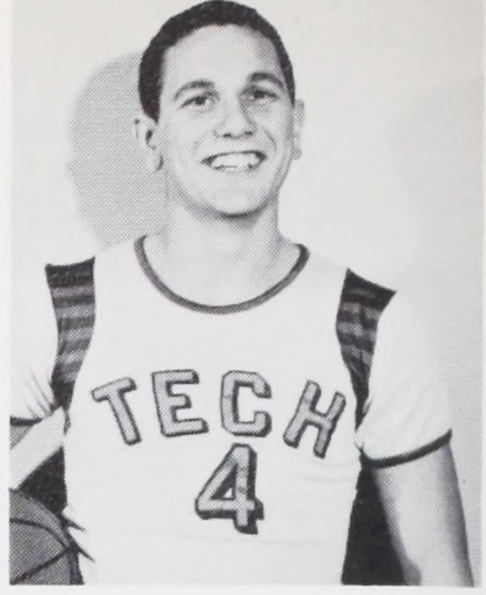

Wes Nelson
C, Sr., tallest player, can score well from any area of court.

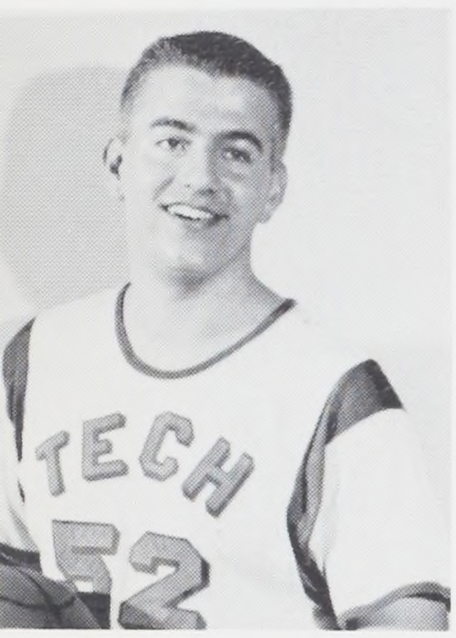

Mac Lockett
G, Sr., deadly left hand jump shot, speed to burn, hardest man on team to guard.

Gordon Ranta
C, Sr., all hustle, real competitor, steady rebounder.

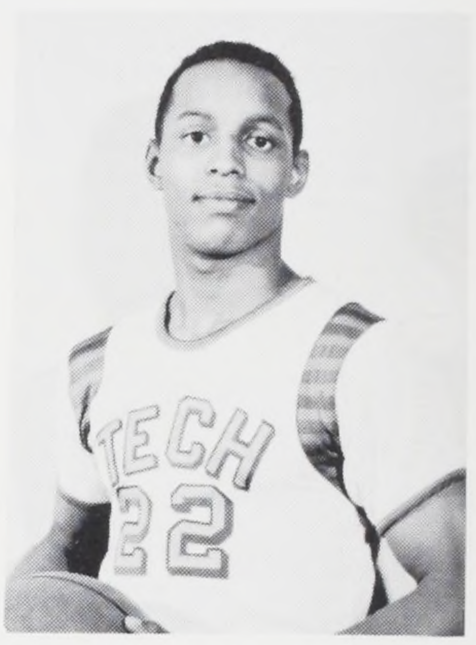

Harry Cartales
F, Sr., great deception near basket, feeds well but prefers shooting.

Gary Randall
G, Sr., good fast break man, hurt opponents with quick jump shot.

Richard Payne
G, Jr., dependable floor leader, improved with each game, good future.

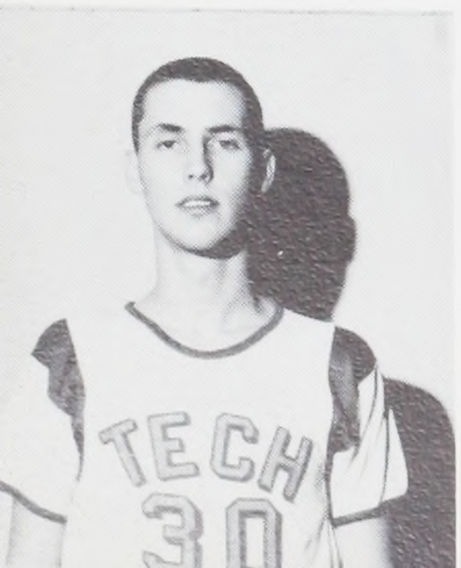

Howard Cash
C, Sr., first year player, good improvement as season progressed.

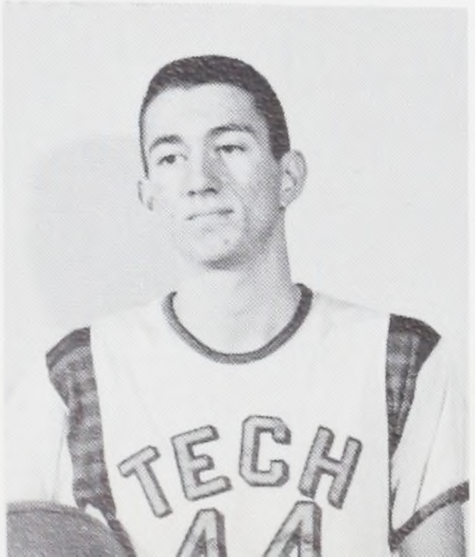

Bob Stephenson
G, Jr., scrappy, best leading the fast break, lots of hustle on defense.

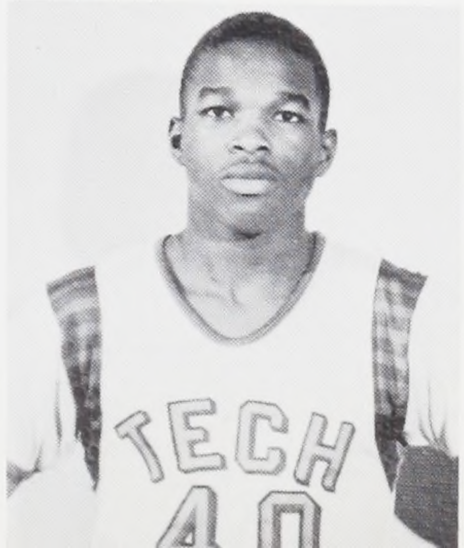

Jon McLachlan
F, Sr., dependable team man, good scoring punch from baseline.

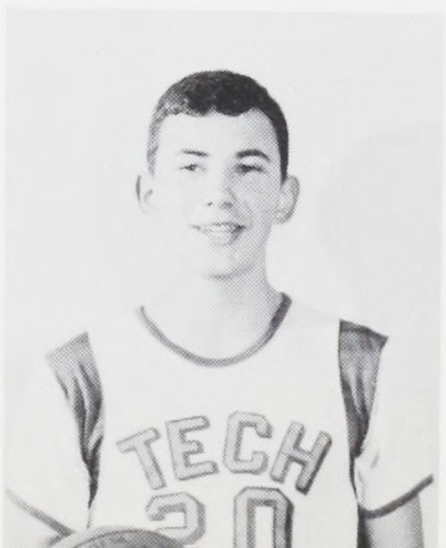

Dave Contreras
F, Jr., best feeder on team, sees openings for good shots, fine prospect.

Jim Warren
F, Jr., consistent performances, scoring threat, aggressive team man.

Mike Kelly
G, Jr., outside shooter, steady team player, likes to drive on basket.

Richard Nelson
G, Jr., tricky moves, good ball handler, top prospect.

future looks bright as talented J.V's develop skills . . .

Front Row: Robert Miller, Al Leake, Tom Miller, Bill Coleman, W. C. Callier, Dave Steele, George Milne.
Top Row: Ron Izatt, Don Williams, Bob Eaton, Dick Mostul, John Rocheleau, Bob Marsden, Jeff Marks, Harold Johnson, Mat Boljat.

With the finest group of sophomores in recent years, the Tech junior varsity basketball squad developed into one of Portland's finest "B" squads. With the exception of a tough Grant team, Benson mastered every club in the league.

Offensively, the J.V.'s indicated they had plenty of scoring punch, averaging over fifty points a contest. A sophomore foursome of John Rocheleau, Bob Eaton, Jeff Marks, and Washington Callier teamed with junior Bob Miller to form a high powered scoring group. Callier and Miller dominated the close-in play, giving the team many vital points on difficult rebound tips and hook shots.

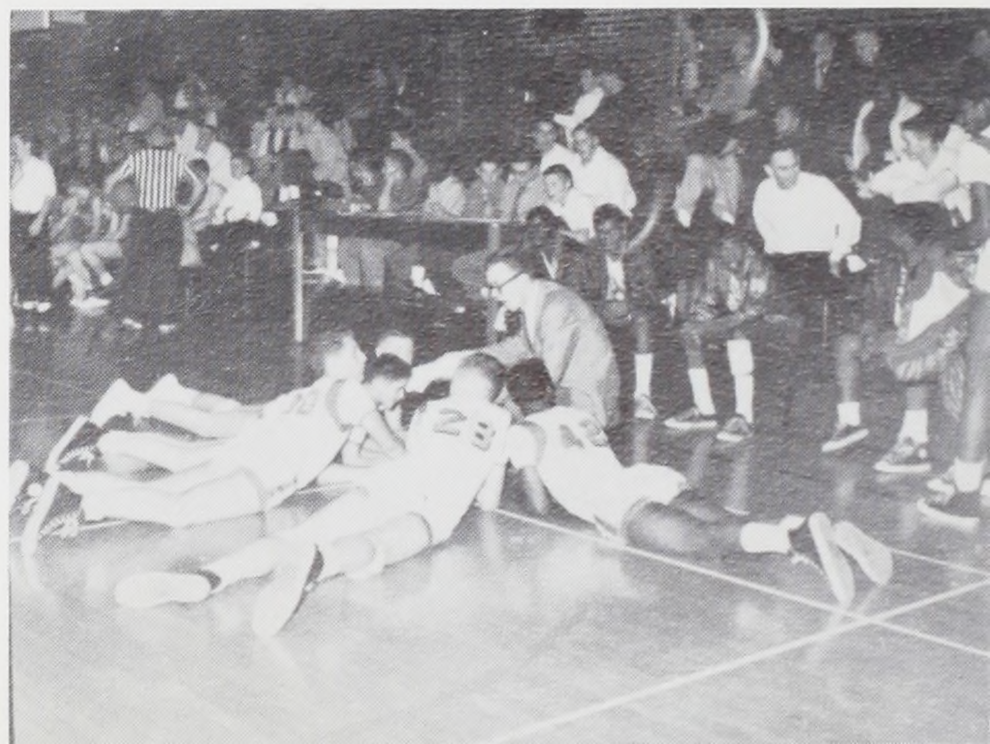

Rocheleau and Eaton hit consistently with twenty and thirty footers and Marks kept the opposing defenses loose with his tricky drives and twisting jumpers near the keyhole area.

The junior Techmen also proved themselves capable of playing a sound defense game. Tom Weaver, Dave Steele, and Don Williams were especially adept in stopping enemy scoring threats.

Coach Nelsen predicts that the boys from this team will make a lot more progress during the next two years and will be instrumental in bringing a P.I.L. championship to Benson before they graduate.

J.V's plan strategy with Coach Nelsen during short break from action.

Front Row: H. Hildebrand, G. Tracewell, J. Hanna, L. Tracewell, D. Moxley, W. Strickland, mgr.
Second Row: F. Johnson, J. Mays, A. Williamson, M. Belaski, D. Thoreson, D. Foeckler.

Unlike the varsity and junior varsity, the freshman squad plays just one round against each of the other Portland high school teams.

Since most freshmen have had very limited basketball experience, the major problem of the freshman coach is to acquaint the players with the basic elements of the game. Starting with such fundamentals as screening, pivoting, accurate passing, and shooting form, Coach Sienko has quite a job before a well organized quintet evolves.

The purpose of the freshman program in all Portland schools is to provide the opportunities through which boys may develop into competent varsity players. With this objective, emphasis for freshman players is on participation rather than winning, although Coach Sienko's teams always take their share of the victories.

freshmen got first taste of p.i.l. competition...

Grunts and groans . . . smells and moans . . .

Welcome to the wrestling room!!!

Here, deep within the lower levels of the athletic plant, the rugged Tech grapplers train as they set their sights on a winning campaign. Directed by Coaches Bill Hryciw and Gene Barrett, the matmen practice the secret holds and lightning maneuvers which bewilder rivals . . .

tough matmen grab second in p.i.l. campaign...

The Tech wrestlers opened up the 1960-61 campaign with a strong 25-19 victory over a highly regarded Wilson squad. Jim Blunk, Bob Bailey, Ray Wolfe, Larry Grimes, Alden Jencks, and Dean Kutter posted wins over their westside opponents. Richard Green scored the only pin for the Engineers.

The Orange and Blue loaded their bus to travel to Cleveland to face the Indians. The Braves were on the warpath and added Benson's scalp to their totem, bringing down the Techmen, 26-18. Only four Bensonites returned home unmarked: Jim Blunk, Rich Green, Ray Wolf, and Bill Gentle.

Jim Milner's five-point pin provided the winning margin as Benson edged Madison, 25-20. Equally important were wins turned in by Blunk, Green, Gentle, Jencks, and Frank Davis. This win over a team touted as potential city champion gave the Engineers a shot of all-important confidence, vital in any winning season.

Alley oop!! Head over heels go Techman and foe.

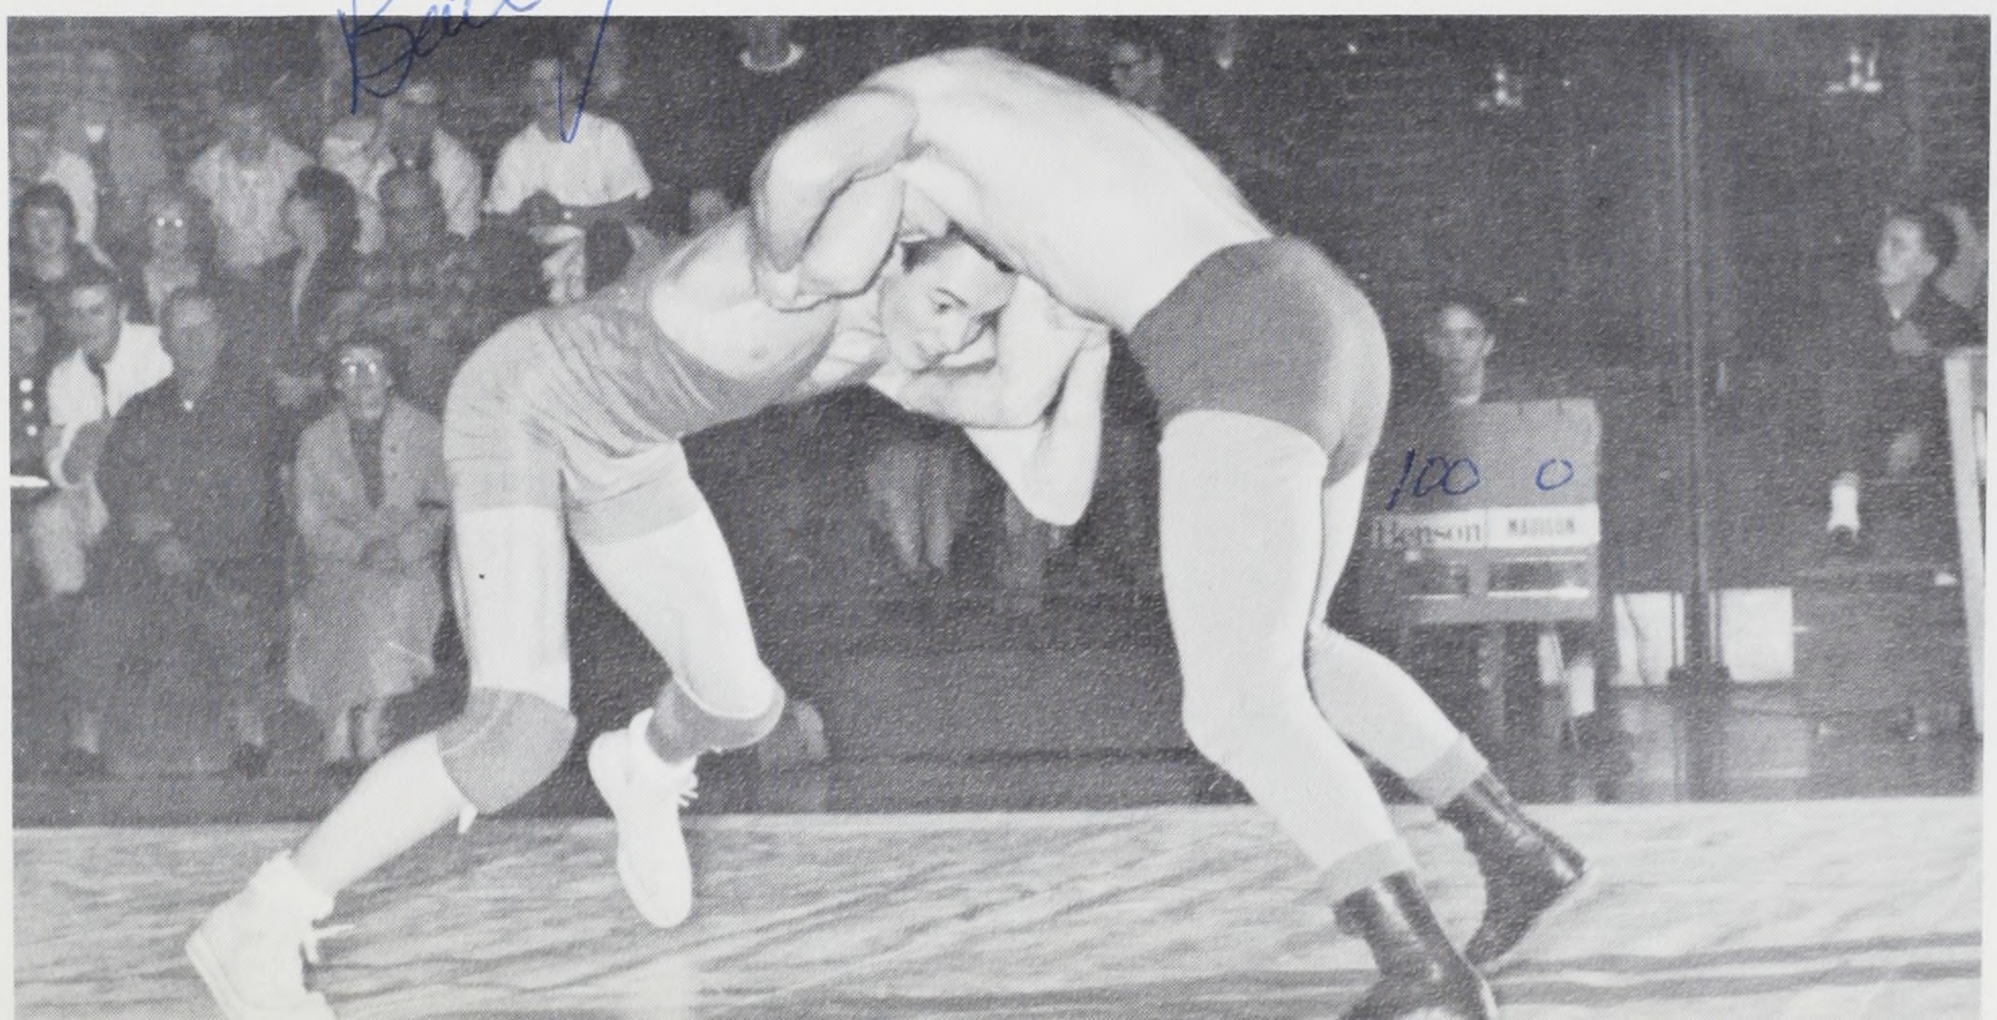

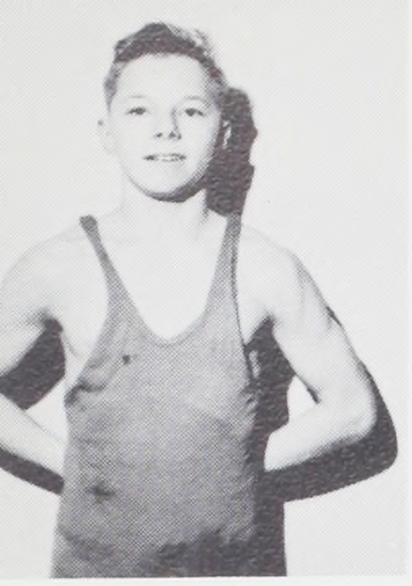

Benson grappler takes the high road to make escape.

The grapplers, aided by seven pins, mercilessly trounced Roosevelt, 49-7. Mike Sprague snapped a losing streak with a hard fought 2-2 tie with the top Teddy matman. It was easy pickings for Tech as almost every man chipped in with team points.

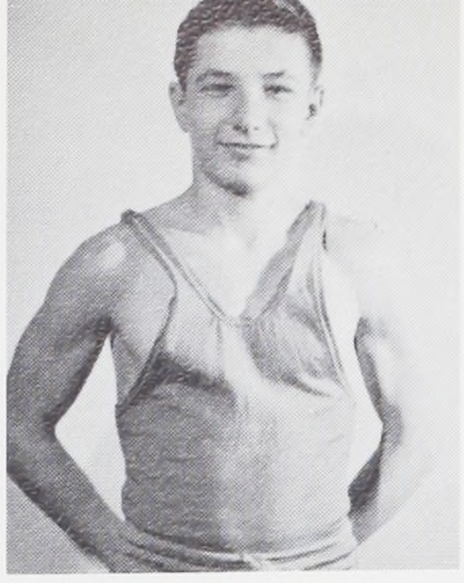

The Grant Generals invaded the Benson arena in hopes of turning in an upset win over the Engineer team. But, the Techmen put them in place, handing the G-men a solid 27-17 licking. The first two men on the Benson score sheet, Blunk and Green, remained undefeated.

~~Gentle~~ darts under Senator in take-down try.

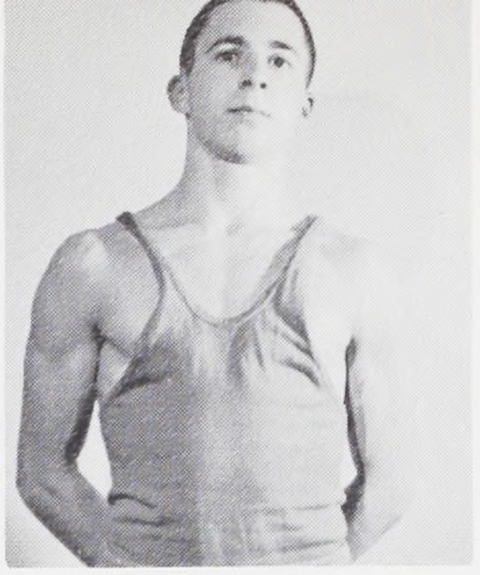

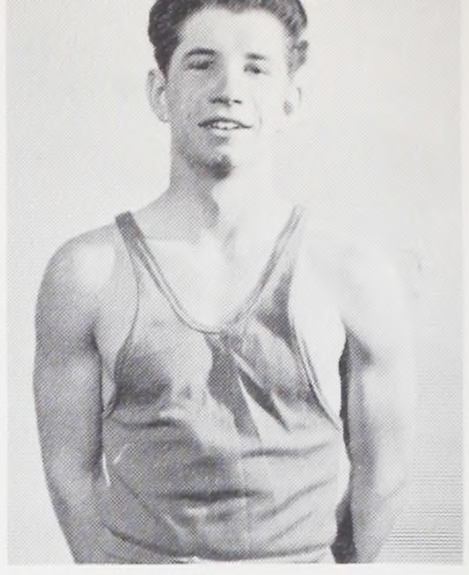

Blunk, Jim
Fr., consistent winner
great future.

Green, Richard
Soph., hard worker
regular winner
good potential

Sprague, Mike
Jr., big improvement
will help next year

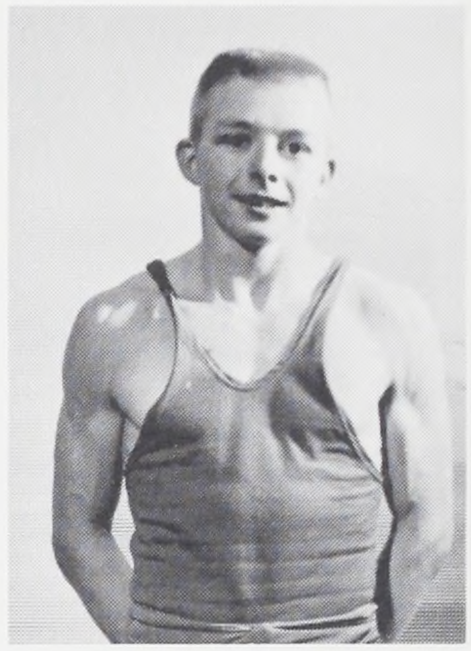

Kopczak, Bill
Jr., hampered by injuries
trains hard

Davis, Frank
Sr., one of most improved
regular point winner

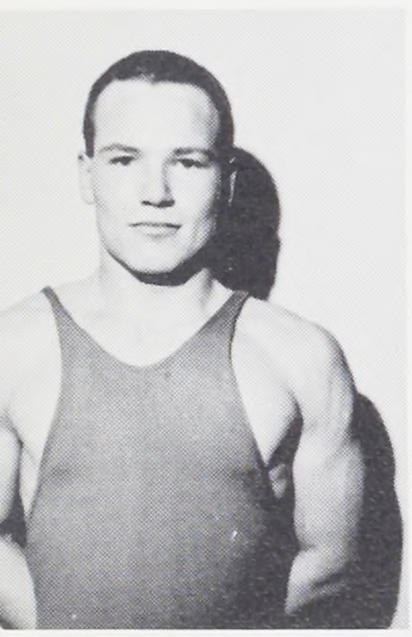

Lincoln High, home of the colorful Cardinals, was the site of the next Tech match. The Engineers made themselves at home, clipping the Red Bird wings to a 26-19 tune. Blunk and Kutter collected ten points between them as they each pinned their opponents.

The Benson squad completely devastated the Marshall Minutemen, running up a one-sided 48-2 landslide. The only Minutemen points came on a tied match. Blunk, Green, Wolfe, Davis, and Kutter all pinned their inexperienced foes. This easy match gave the Engineers a breather before meeting Franklin, the defending city champs.

Foeste, Karl
Sr., proved hard work pays
off — constant hustler

Blunk and Green again started the Techmen off on the right foot by sweeping their matches from Quaker lightweights, but the next two Bensonites went down to strong Franklin opponents. The Orange matmen found it rough going during the rest of the matches and trailed by three points as the final heavyweight contest came up. Dean Kutter provided a storybook ending by pinning his man and Tech squeezed through with a win, 24-22.

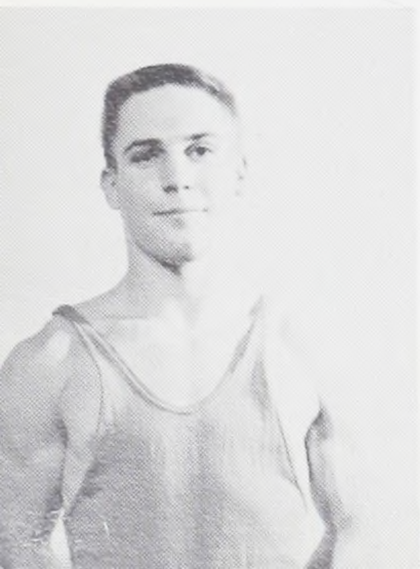

Jencks, Alden
Sr., wrestling behind
former champ paid off
solid point winner

Breathing down the necks of the front running Cleveland team, the Engineers finished up their dual competition by rapping Jefferson, 27-24. Rich Green completed an undefeated season by pinning his man and Alden Jencks raised Tech hopes for an All-City meet championship by also taking a five-point fall. The Jeff win gave Benson a 9-1 season record, good for a solid second place finish in the Portland league.

Wolf strains to bring tough opponent to the mat.

varsity sweeps to second . . .

The climax of the 1960-61 wrestling season came with the city meet which drew the top grapplers from each school in Portland. Going into the all-star matches with one of the top P.I.L. squads, the Benson matmen started off with a bang, grabbing seventeen first-round wins and placing nine men in the semi-final sessions. The strong start in the two preliminary rounds gave the Techmen the highest team score when the wrestlers arrived at the halfway mark in the meet.

Going into the semi-finals, Richard Green, 106 pounder, Ray Wolf, 148, and Frank Davis, 178, won tough matches to gain entry to the finals. Only Green, however, was able to come through with a win in the last round. His city championship highlighted the Engineer effort and was instrumental in giving Benson a fine second place finish. The Cleveland Indians, undefeated in regular league competition, came on strong in the last two rounds to post a narrow 95-86 victory.

'61 squad outstanding . . .

Joyful teammates mob Milner after a key win.

TENSE SPECTATORS stay on edge as Tech wrestling match hits all-important stage. Benson's powerhouse mat squad provided many thrills during its fine season, adding much to the growing reputation of wrestling as a colorful, crowd pleasing sport.

Shot, hurdle, starting block, tape . . . these are terms of the trade for another large group of Techmen.

Competing against the weatherman as well as opponents, orange-clad runners and weightmen turned out in hordes to meet the challenge of one of the world's oldest sports, track. Getting their pointers and tips from coaches Simmons and Sienko, Benson's cindermen worked hard to keep the Tech winning tradition intact.

TRACK

Front Row: Johnson, Slutz, Wright, Heintz, Milner, Hague, Clapp, Wellman, Wilgus.
Second Row: Norman, Tymchuck, Kelly, Lewis, Rowe, Williams, Gisellman, Nelson, Sherman.
Back Row: Hagist, Harper, Mitchell.

Greg Wilgus shows good form. This Techman scored high for team.

With only a small nucleus of returning lettermen returning, Coach Simmons faced the 1960-61 track season with understandable apprehension. Although strong in the relay events. Veterans Ron Harper, Greg Wilgus, Jerry Heintz, and Buzz Williams teamed to give Benson powerful entries in both the 880 and 440 relays and Elliot Lewis, Ken Williams, and Richard Nelson contributed a steady flow of points in the high jump relays. The Orange thinclads also picked up points from Harper in the javelin throw and Bill Mitchell in the discus event. Lewis ,Williams and Ken Wellman proved to be a fine combo in the shuttle hurdles. Broad jumper Bob Wright also picked up points in his specialty.

Although weak in the distance events this year, Coach Simmons is carefully grooming underclassmen for future competition. The Norman brothers, Phil and Paul, are expected to develop into top milers and Doug Kelly, Ed Del Sol, and Don Tymchuck show promise in the 880 run.

(See spring-summer supplement for varsity season summary.)

Tense, but ready to move, Benson runner waits for hand-off in relay.

techmen strongest in relay events...

Kicking up sand, Ron Harper turns in 20-foot jump.

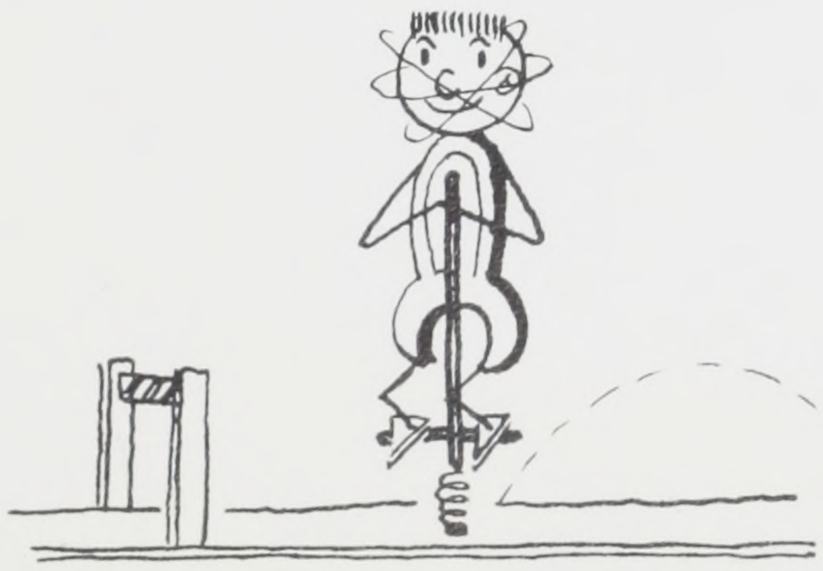

Practice makes perfect .

On your mark—get set—go!!! Techmen line up for dash.

Over the bar without displacing it!

Chappel works with shot.

"B" squad manned by future aces...

Coach Simmons takes special pains with youthful sprint hopetuls.

880 Dash: Doug Kelly, Don Tymchuck, Phil Norman.

440 Dash: Greg Wilgus, Doyle Williams, Doug Kelly.

100 Dash-220 Dash: Ron Harper, Doyle Williams, Jerry Heintz, Greg Wilgus.

Mile Run: Ed Del Sol, Russ Hague, Les Rowe, Paul Norman.

High Jump: Elliot Lewis, Mike Wellman, Rich Nelson, Jim Warren.

Broad Jump: Ron Harper, Doyle Williams, Bob Wright.

Pole Vault: Ron Giselman, Renny Slutz.

880 Relay: Ron Harper, Jerry Heintz, Greg Wilgus, Doyle Williams.

Shot Put: Bill Mitchell, Chuck King, Jim Milner, John Troutman.

Discus: Bill Mitchell, Dick Sherman, Chuck King, Jim Milner.

Javelin: Ron Harper, Jim Milner, Bill Mitchell.

Hurdles: Robert Hagist, Doyle Williams, Elliot Lewis, Mike Wellman, Jim Warren.

"B" Track Team

Front Row: Thomas, Tanner, Hedlund, James Houk, Dix, Del Sol, Beauman, Strong, Evans.
Second Row: Norman, Minner, Hannah, Detering, Smith, Bennett, Eyman, Melton, Draper, Powers, Patrick.
Top Row: Coleman, Lucas, Weaver, Simmons.

"C" Track Team

Front Row: Zavos, Gilham, Tevet, Ghost, Petty, Steeves, Wong, Meade, Hutchinson, Woodland, Mays.
Second Row: Minor, Miller, Vasilieff, Young, Stewart, Rogers, Smith, Malden, Spies, F. Johnson, Strickland.
Top Row: Chappel, McWilliams, Larsen, Henderson, Williamson, Cloutier, Mayes, Jenkins, Tribby, Hiltener, Louis, Weesner.

high benson hopes hinge on freshmen performers...

One step below the varsity level, Benson's junior varsity, or "B" squad, is made up of boys who have but one goal—to make the big jump to the "A" team.

Each day the "B" runners and weightmen swarm over Buckman field, practicing with the shot put, perfecting form for the hurdles, sprinting out of the starting blocks time, after time, straining over the high jump bar, and running endless laps around the track to improve wind.

These practice sessions are often small scale meets, for the j.v.'s work out alongside the varsity cindermen. This daily competition makes the track sessions a constant challenge to both "A" and "B" trackmen.

Part of the overall philosophy behind the Benson track program is the idea that all boys, regardless of size or body type, can find a place in this sport. With this in mind, the Tech coaching staff makes every possible effort to get members of the freshman class our for track. No other sport in the Benson interscholastic program attracts as many freshmen as does track, and few can offer the first year students as many opportunities for physical, emotional, and social development.

Although freshman cinder victories are usually the result of team depth, some of the boys on the team turned in spectacular individual performances. Competing in the All-City meet for freshman teams, the Orange entries in both the 880-yard relay and two-mile relay events set all-time frosh records while winning. The 880 foursome included Al Williamson, Nate Young, Bill Woodruft, and Craig Cloutier and the distance quarter had Tom Miller, Mike Buchanan, Louis Lewis, and Dick Spies running for Benson.

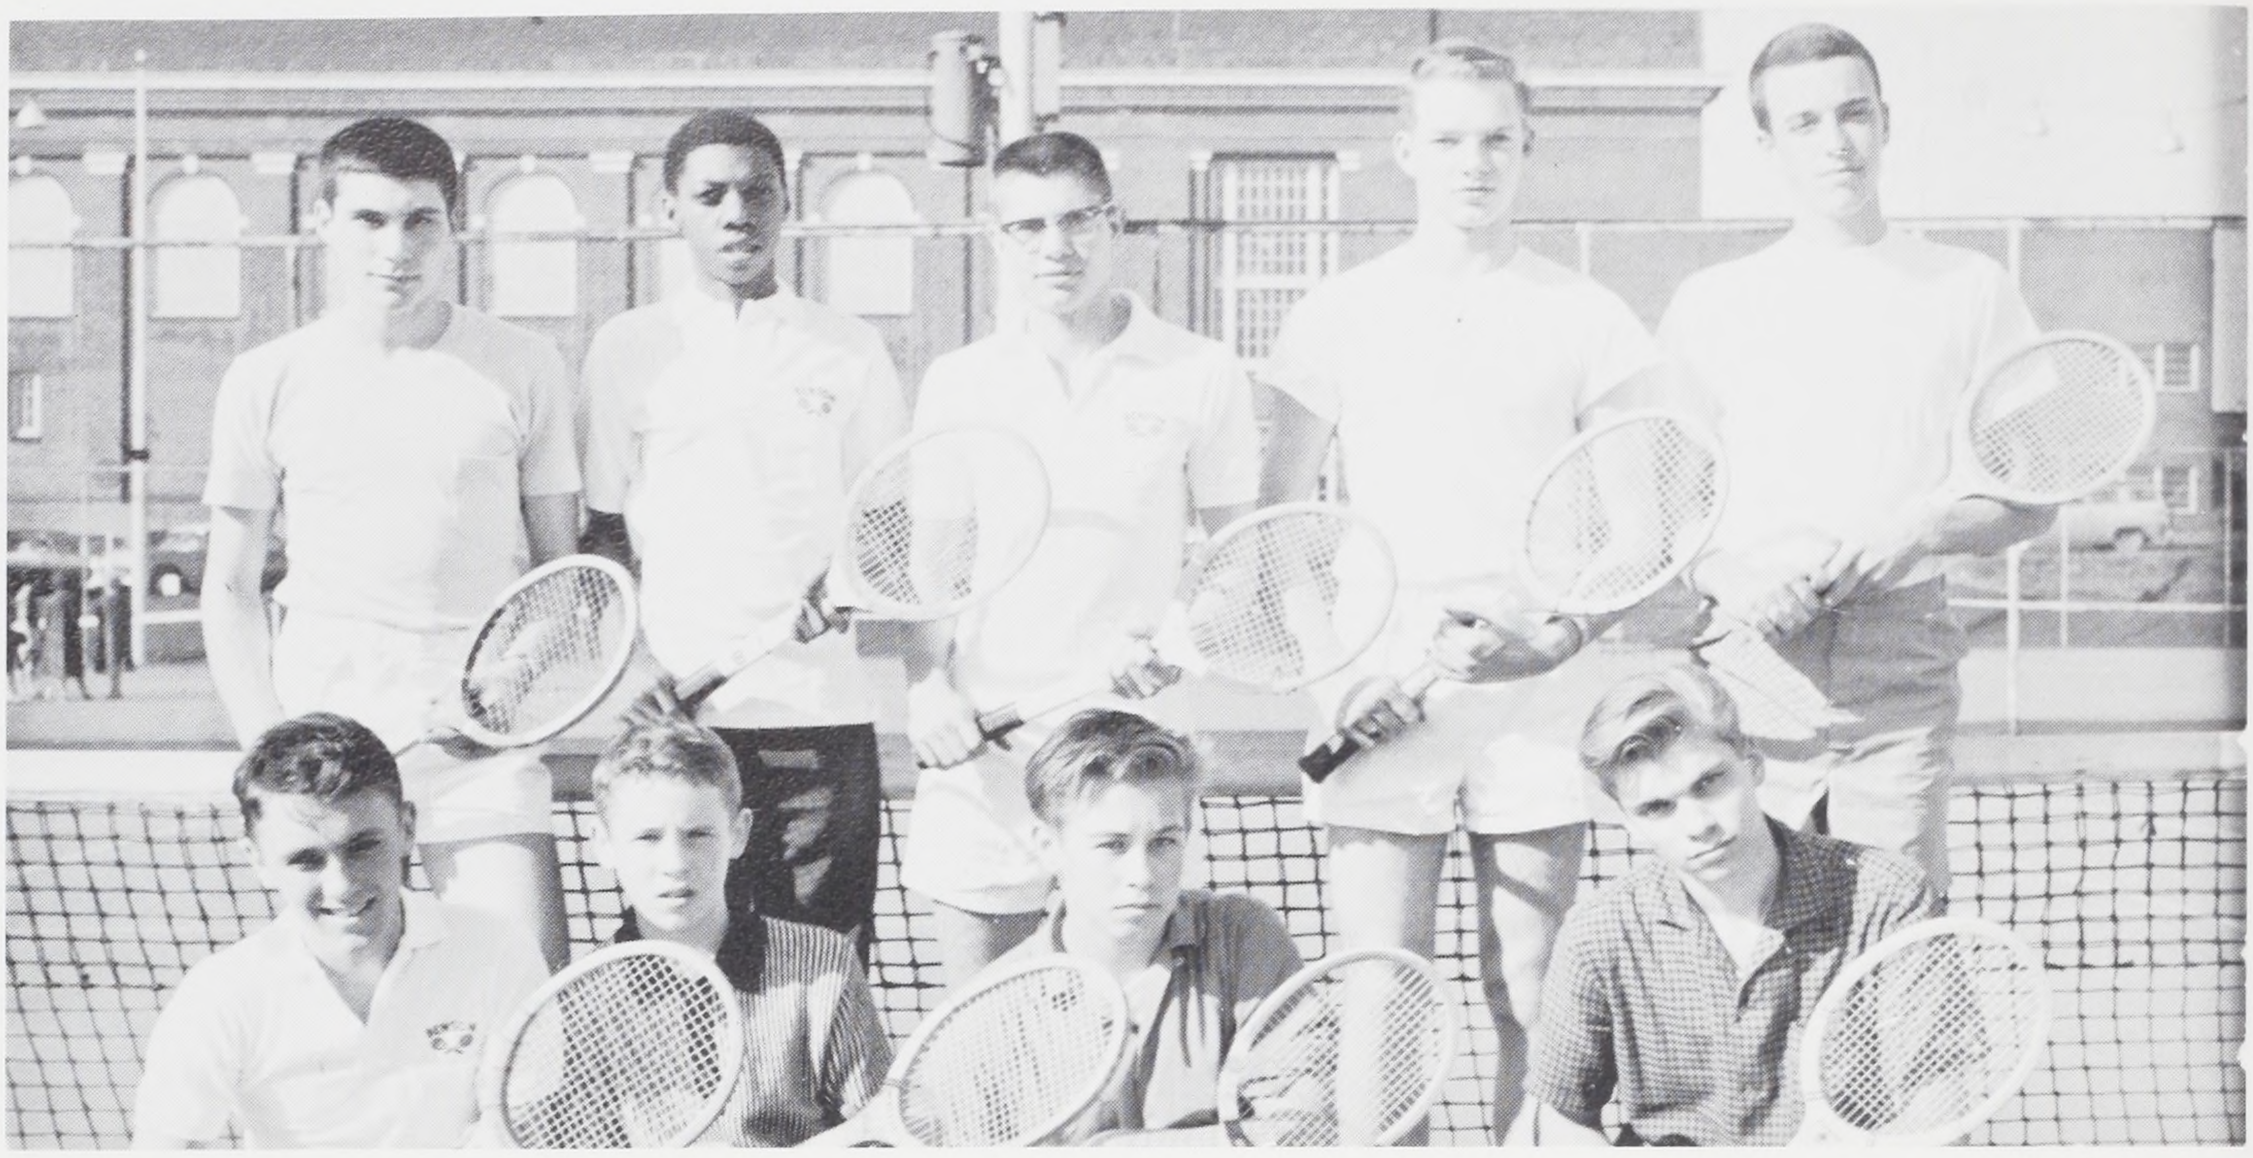

Milers Phil Norman, Paul Norman, and Les Rowe plan race strategy. Plans pay off as the foresighted trio comes down the stretch without a competitor in sight.

TENNIS

Front Row: Hendricks, Hansen, Haag, Rogers.
Back Row: O'Donnell, Williams, Streimer, Haecker, Anderson.

lob-volley-slam—orange and blue team proves tough...

Without a single senior to steady his squad, Coach Lodwig faces the unpleasant prospect of sending his netters into the toughest P.I.L. campaign in recent years.

Digging into the freshman and sophomore classes, Lodwig has filled four of the seven team slots with youngsters untried in varsity competition. Juniors Jim Grimes and Frank Hendricks, along with sophomore Don Riddle, are the only Techmen with enough court experience to brighten Tech hopes for a top season. However, with the many underclassmen being developed, prospects for coming years seem rosy. Sophomores Don Williams, John Baxter, and Phil Wood show signs of becoming really fine courtmen, and several freshmen look like sure-fire comers.

All considered, the Benson squad doesn't figure as a potential league champion, but, with a few breaks here and there, they could prove to be trouble for unsuspecting rivals.

(See spring-summer supplement for varsity tennis summary.)

Techmen counted on Frank Hendricks for difficult points.

Power service results in many aces.

"In the spring a young man's fancies gently turn to thoughts of . . ."

Baseball!!!

Even before Buckman Field had recovered from the constant soaking of early rains, the Benson baseballers gathered in the gym to discuss prospects for another successful season and to work out winter kinks.

Masterminded by Veteran Coach Don Holt, the Techmen earned many compliments for their clean, but aggressive demonstrations of how Benson men approach not just baseball, but all athletic activities.

Looks like a real pro, but Kelly is just posing..

BASEBALL

After losing most of last year's squad, Coach Don Holt found inexperience his main problem as he looked ahead to the '60-'61 campaign. With only five seniors reporting for duty, the Tech squad came up with an unusually great number of underclassmen in vital positions.

Hurlers Casey Spagle, Don Foster, and Dave Ferris formed a classy mill triumvirate while Bob Hufschmid and Lee Fetrow also saw mound duty. Gordon Ranta did most of the catching for the Techmen, backed up by Ernie Johnson. Infielders Dean Kutter (1B), Mike Kelly (2B), Rube Haberman (SS), and Jim Folkerts (3B) provided the first line of defense while flycatchers John Haberman, Harry Cartales, and Frank Davis roamed the outfield. Mat Boljat, pint sized utility man, gave the Orange team all-around bench support.

Pre-season action indicated that the ultimate success of Benson's season would hinge on the performance of the pitching staff. The hitters demonstrated that they could supply the necessary hits and runs and defensively the Techmen seemed more than adequate. Thus, at publication of the Blueprint, the baseball team seems to be well set, needing just a few breaks along the line to wind up among the league's top teams.

(see spring-summer supplement for season summary)

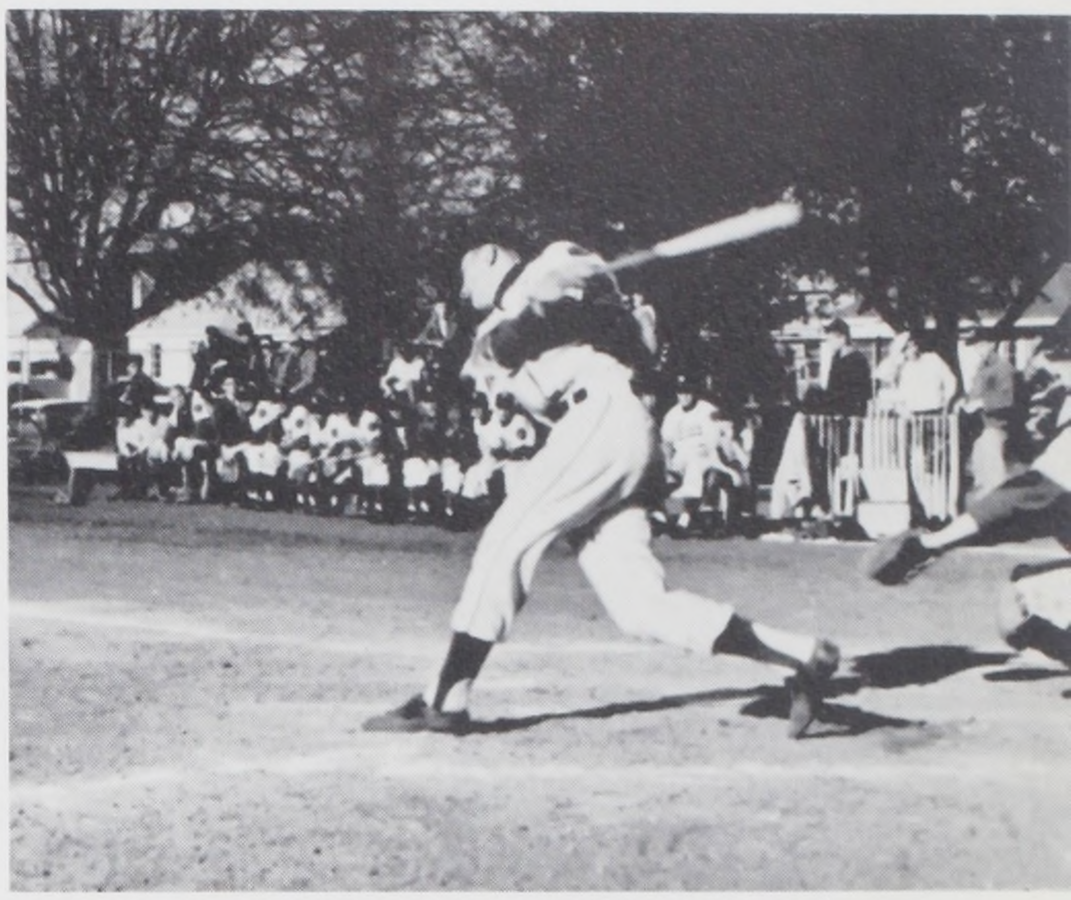

Front Row: Kelly, Johnson, Boljat, R. Haberman, J. Haberman, Hufschmid, Kutter.
Top Row: Fetrow, Foster, Folkert, Spagle, Cartales, Davis, Ferris, Ranta.

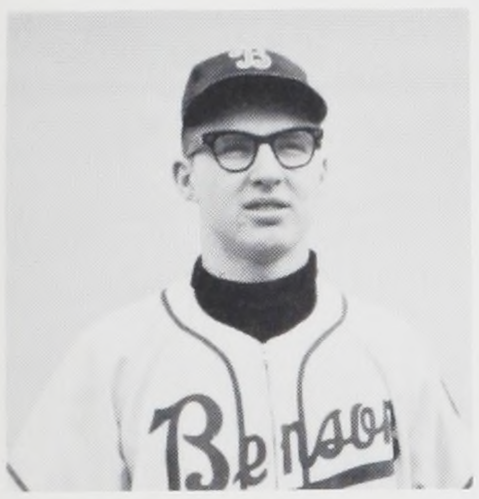

rebuilding benson nine looks to underclassmen...

A long stretch and Dean Kutter wraps up an infield out.

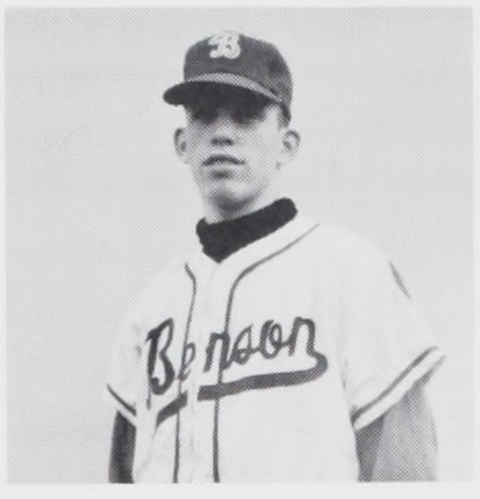

Mike Kelly cracks sharp curve for solid single to left.

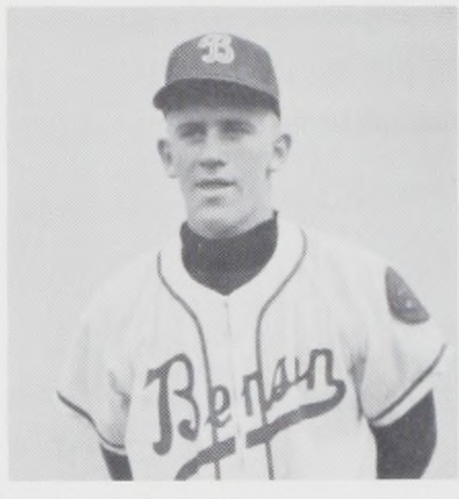

Frank Davis *OF, Sr., co-captain, high BA, lots of speed and power*

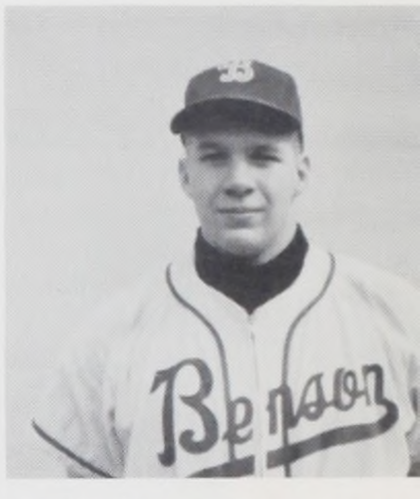

Harry Cartales *OF, Sr., co-captain, hard hitter, covers field well*

Gordon Ranta *C, Sr., good handling pitchers, aggressive, hits well*

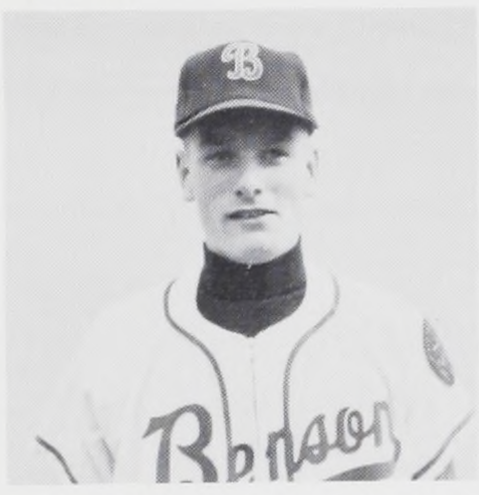

Casey Spagle *P, Sr., top chucker, snappy fast ball, three-year man*

Dean Kutter *1B, Sr., tear clutch slugger, moves like cat despite big frame*

Mike Kelly *2B, Jr., slick fielder, helps at plate, always thinking*

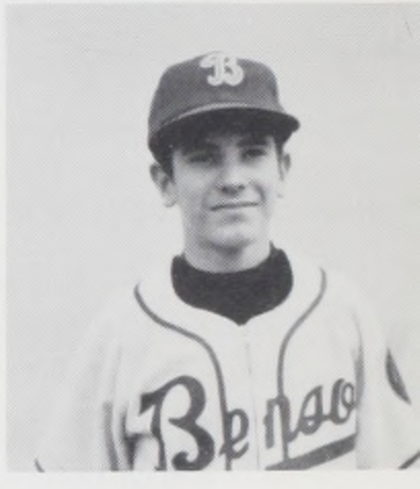

Dave Ferres *P, Jr., heady pitcher, smart on mound, good variety*

Bob Hufschmid *P, Jr., fine relief man, keeps ball away from batter's power*

John Haberman *OF, Jr., great form, hits well, cute tricks on base paths*

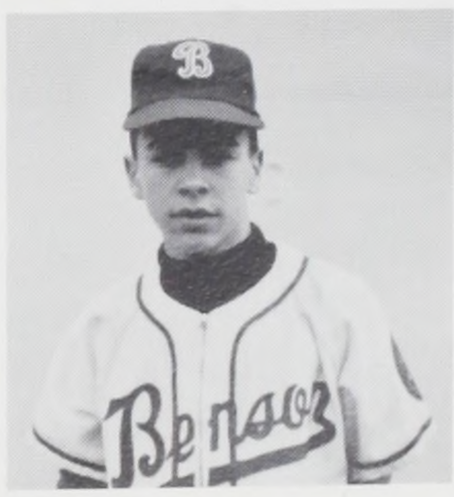

Mat Boljat *SS, Jr., scrapp little man, hard to pitch to, good fielder*

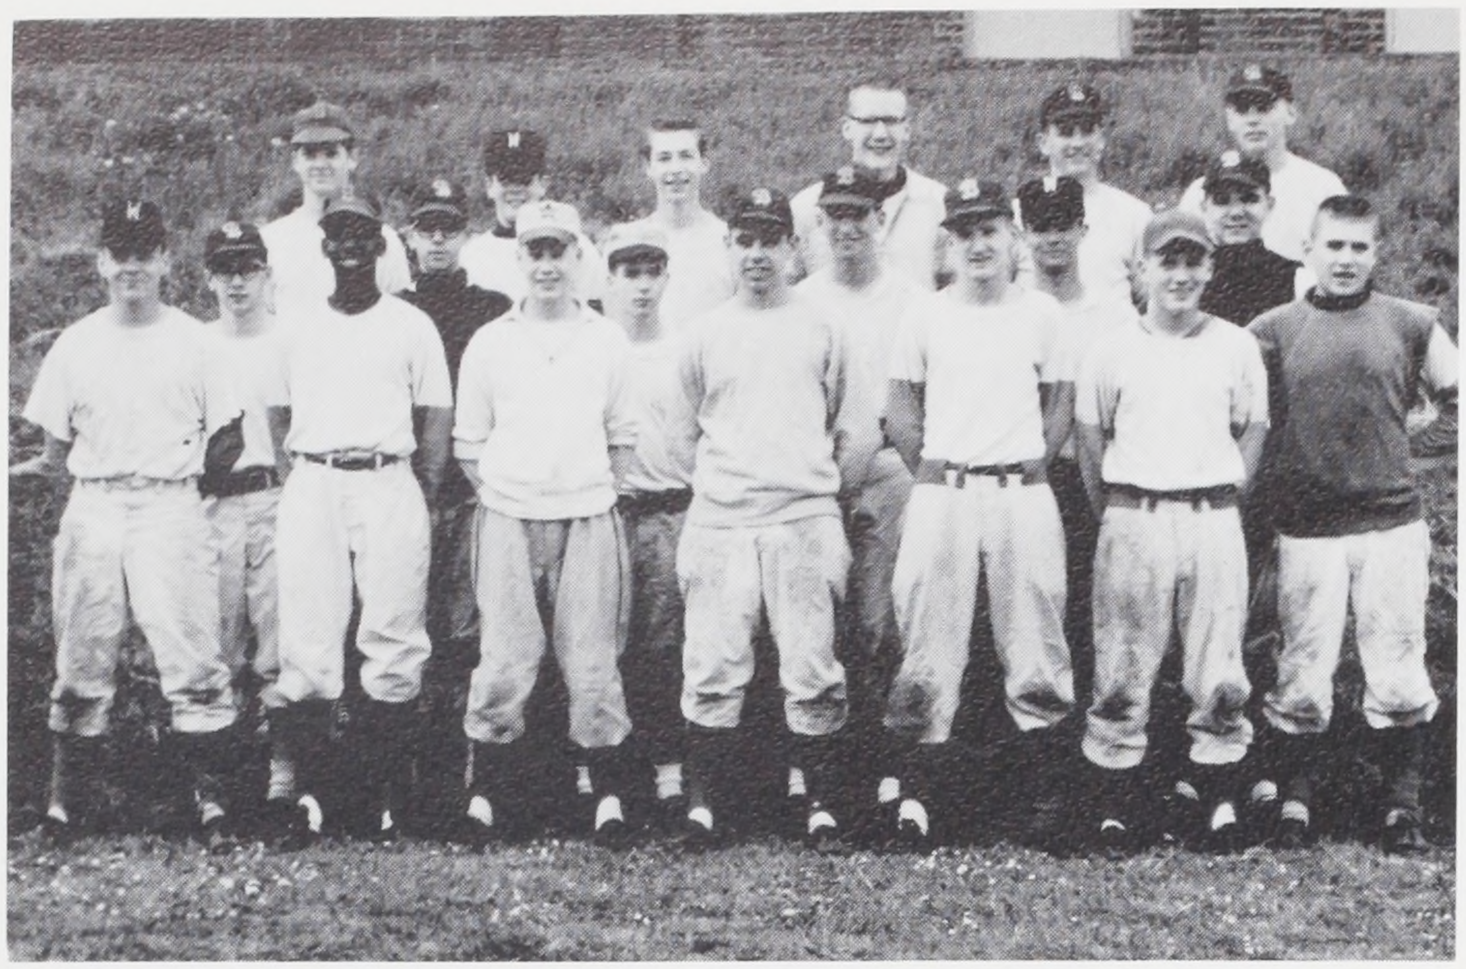

Don Foster *P, Jr., great curve baller, tricky moves*

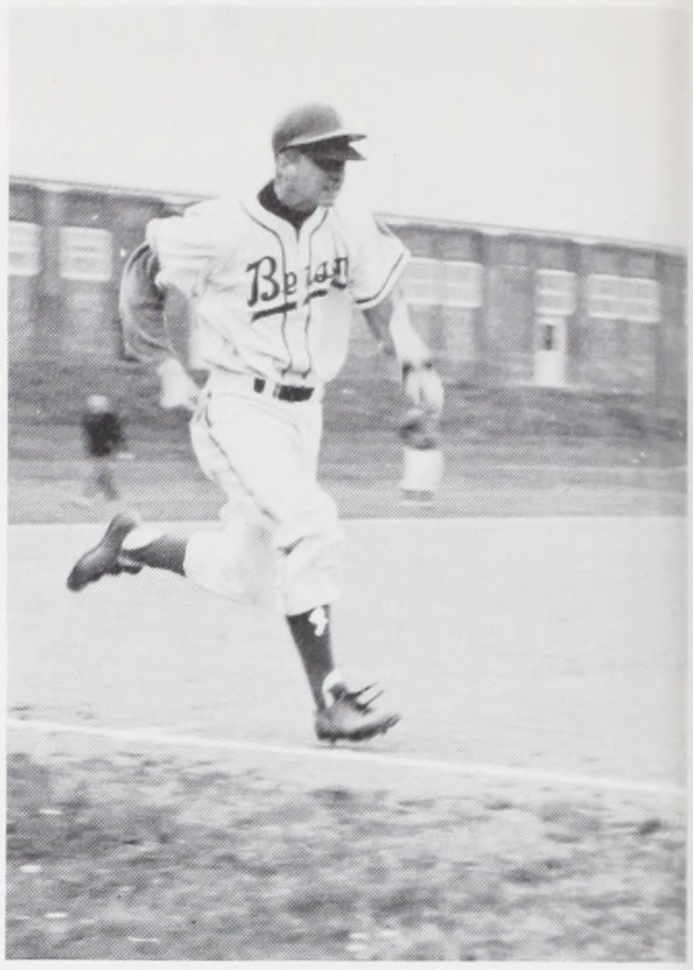

Rue Haberman *SS, Soph., letterman as frosh, great prospect, sparkplug*

Jim Folkerts *3B, Soph., a real comer, good sticker, snag anything in air*

THE BENSON junior varsity baseball team, coached by Ron Pheister, is the "farm" club for the varsity squad. Many of the players on the j.v. team are just one short step away from the varsity level and, with the seasoning they receive competing in the"B" league, will be tough men to beat in future seasons.

Sophomore shows great promise for future.

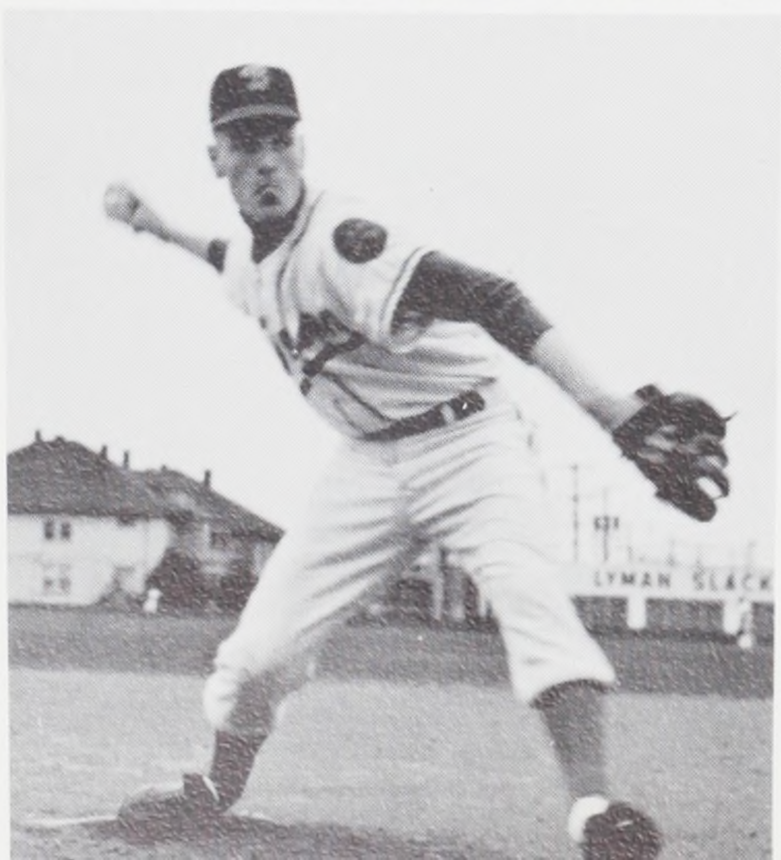

Camera catches Ranta an instant before belting a base hit.

Pinch hitter?

No, just Boljat and Cartales clowning.

Tongue waving, Dave Ferris concentrates on strike-out.

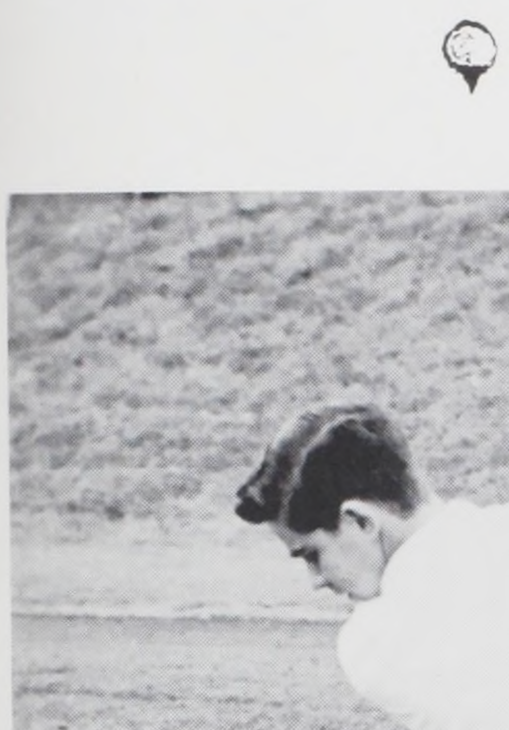

Pre-game pep talk includes last minute pointers from Coach Holt.

divot diggers assume "spoiler" role...

Captain Rich Fluter shows good form teeing off.

Front Row: D. Sirianni, B. Stephenson, R. Fluter, R. Ruetter, J. Erbele.
Back Row: T. BeLusko, F. Lum, L. Kretschmer, J. Herder, A. Leake.

GOLF

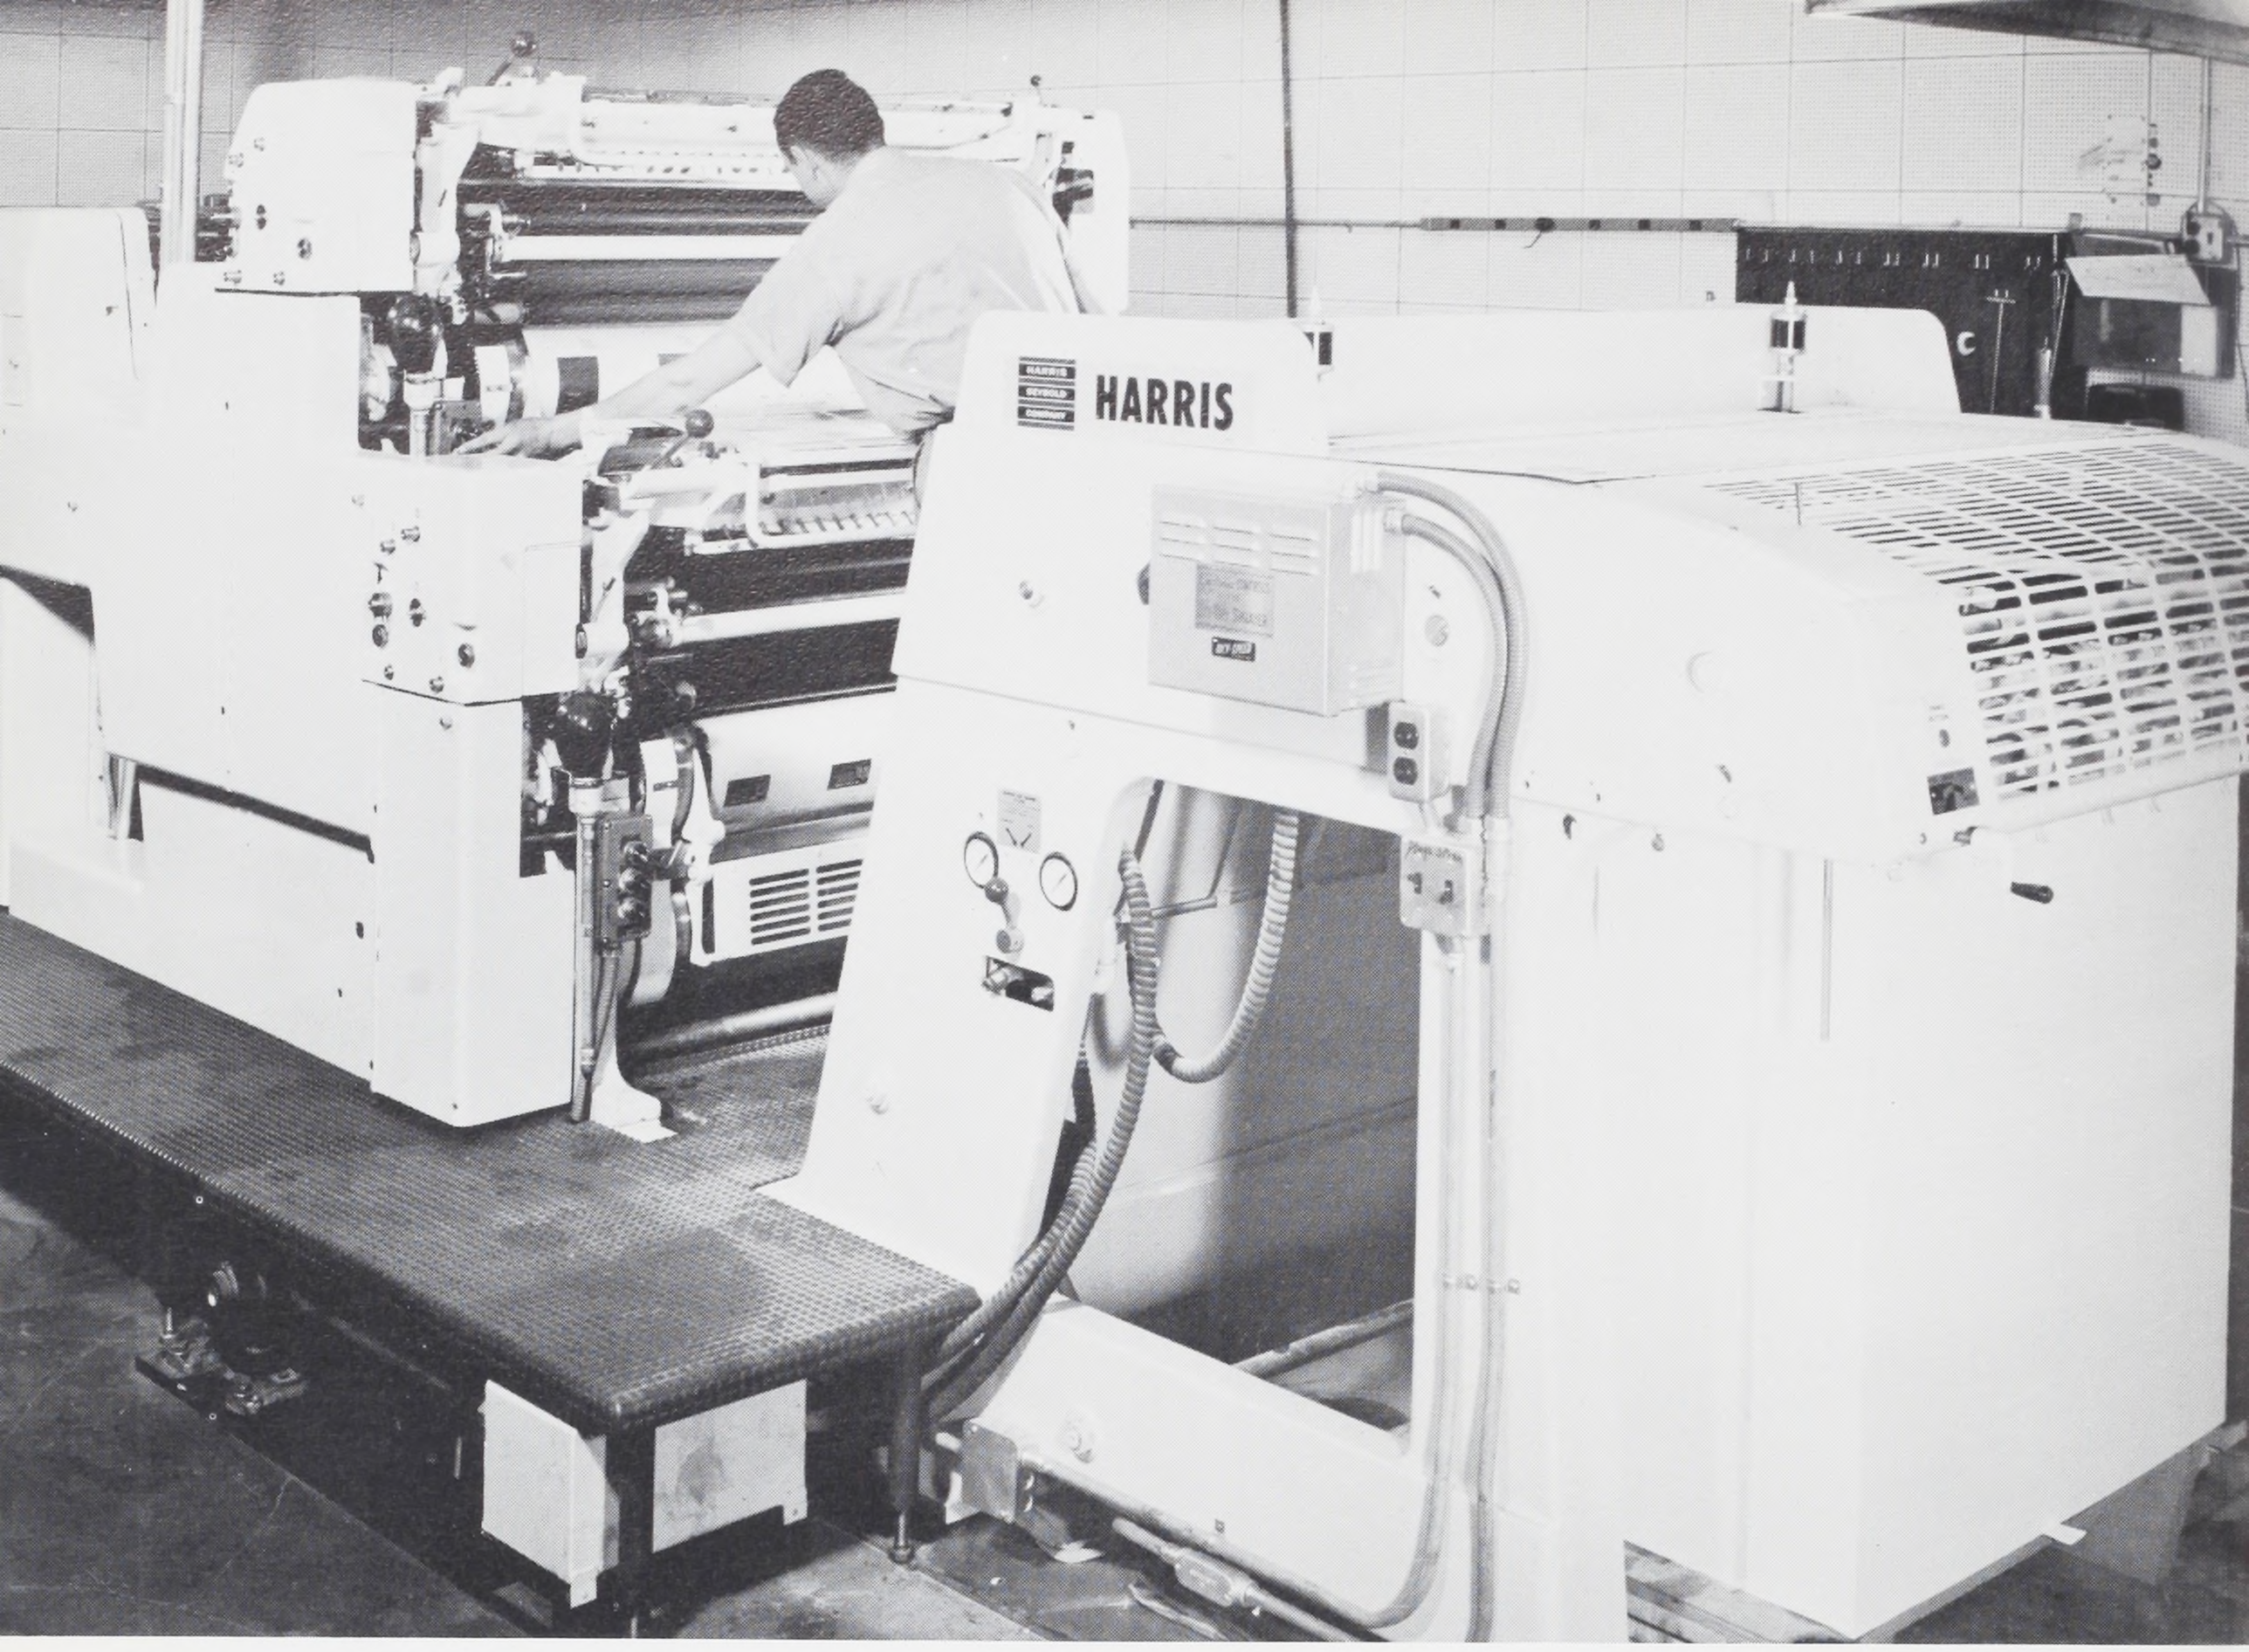

Paced by senior linksmen Rich Fluter and Feimum Lum, the Benson golf squad began turning in practice round scores early in March. Competing for the six spots in the "game" lineup, ten Techmen have been making the daily trek to the Rose City course, straightening their drives, perfecting their chip shots, and sharpening their putting eyes for the 1960-61 P.I.L. wars.

Although Lum and Fluter, co-captains of the team, have had a strong hold on the first two position, six juniors have been in hot battle for the remaining four slots. Team challenge rounds between Bob Stephenson, Al Leake, Dick Siriani, Jack Herder, Rog Ruetter, and Louis Kretschmer have been almost as tense and exciting as regular interscholastic matches. The top eight Tech golfers rarely have more than three or four strokes separating them when low scores are compared. Freshman Gary Wampler is also rated high on the team.

Coach Bill Hryciw, faced with outstanding competition from the Cleveland, Wilson, and defending champion Grant teams, is aiming for an even-steven campaign. Hryciw feels that if his squad can wind up with a .500 won-loss record, the season will be a success. With this year's squad made up mostly of juniors, prospects for the 1961-62 season look better than they have in many years.

(See spring-summer supplement for varsity golf summary.)

YOUR PRINTING IS IN CAPABLE HANDS

. . . AT **AGENCY** LITHOGRAPH

In addition to producing outstanding yearbooks, we are specialists in advertising literature . . . catalogs, annual reports, brochures, direct mail, etc., in black and white or many different color options.

We point with pride to our association with many of the Pacific Northwest's largest industries.

If you plan now...

You help yourself and your nation when you continue your technical education in the fields of metallurgy, chemistry, physics or mathematics. These are the occupational fields in which the demand is greater than the supply and where you can find a satisfying, well-paid career — if you plan now.

Scholarships are available in all the sciences as well as in the fields of economics and business administration. One of these could be the means to your attaining a degree—and an interesting livelihood — in the field of your choice.

The ESCO Corporation awards a $600 scholarship each year to an outstanding senior graduating from a secondary school in Multnomah, Clackamas or Washington county or Vancouver, Washington. The grant is made to a student majoring in engineering, metallurgy or business administration, and the recipient may attend any accredited college or university granting a degree in these courses.

For full information on this scholarship and others available to students of Benson Polytechnic school, see your student counselor. He'll help you pick the right road at this important turning point in your life.

Well Bill,

Most everybody is going to say goodbye (misspelled) to home or to college and forget about me. I am not as much looking forward to our trip to the beach next week. Like boring and the drinking should be not to mention the carwell breaking down. After we get back we should have a blast in our apartment & we ever get bullwinkle. I'm looking good luck to a full time job. I can't wait to see you guys. Good bye

Love,

NATIONAL SCHOLASTIC
Est. 1921
PRESS ASSOCIATION

THE DRAMATIC cover for the *'61 Blueprint* has been made available by the West Virginia Pulp and Paper Company. Bold, colorful, and suggesting science and technology, this outstanding illustration captures the dynamic spirit of Benson as the problems of a modern, complex world are challenged.
