A recent survey of last year's senior class indicated that all of our vocational students were gainfully employed at the time of the survey. The same study revealed that those students who entered college earned scholarships that totaled just short of one-third of a million dollars. The Portland School Board has indicated that Benson is to educate young men in these two broad areas. This survey indicates that these two objectives are being successfully achieved.

We have developed several advisory committees composed of leaders in business and industry to coordinate our curriculum with the changing needs of industry. We are attempting to correlate our vocational-technical offerings with the offerings of the Portland Community College so that our students may enter vocational-technical courses with the utmost efficiency.

Our entire faculty has been engaged during this past year in a cooperative study with Stanford University, seeking new ways to schedule and reorganize our curricular offerings. We have just signed an agreement with the State Department of Education to extend this investigation for the coming year. We trust that the efforts of the faculty will result in an even higher quality education for our young men.

We will perpetuate the factors that have made Benson the "Nation's Finest Technical High School" and make the necessary changes essential to insure continued leadership in the field of technical-vocational education by the faculty and student body of Benson Polytechnic.

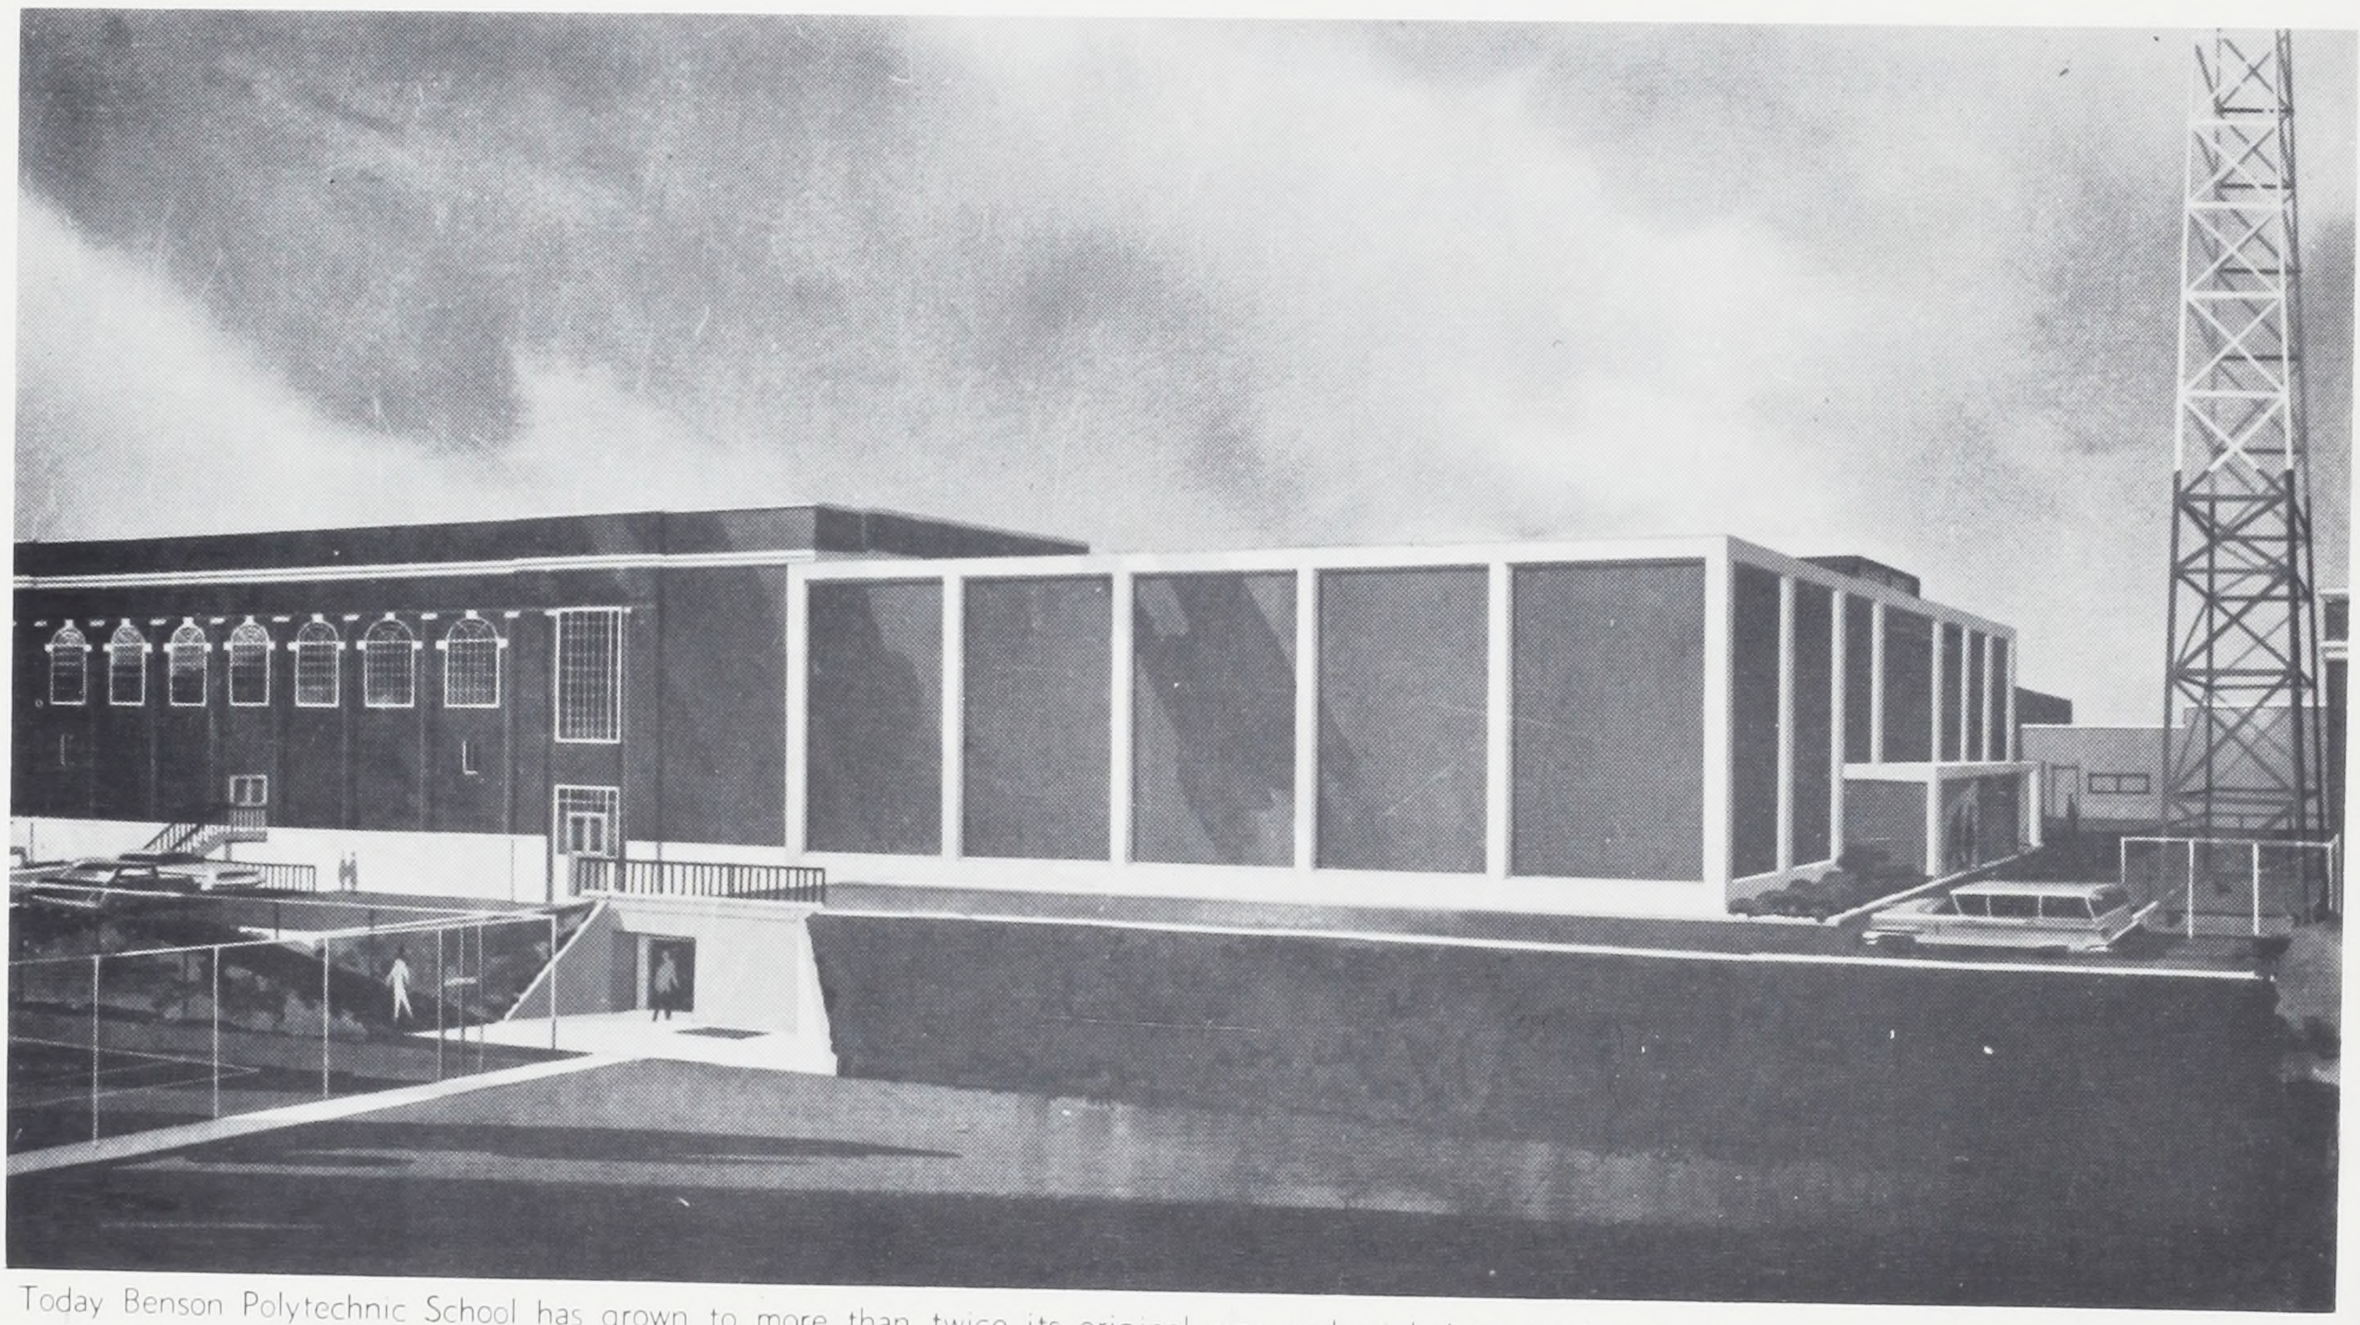
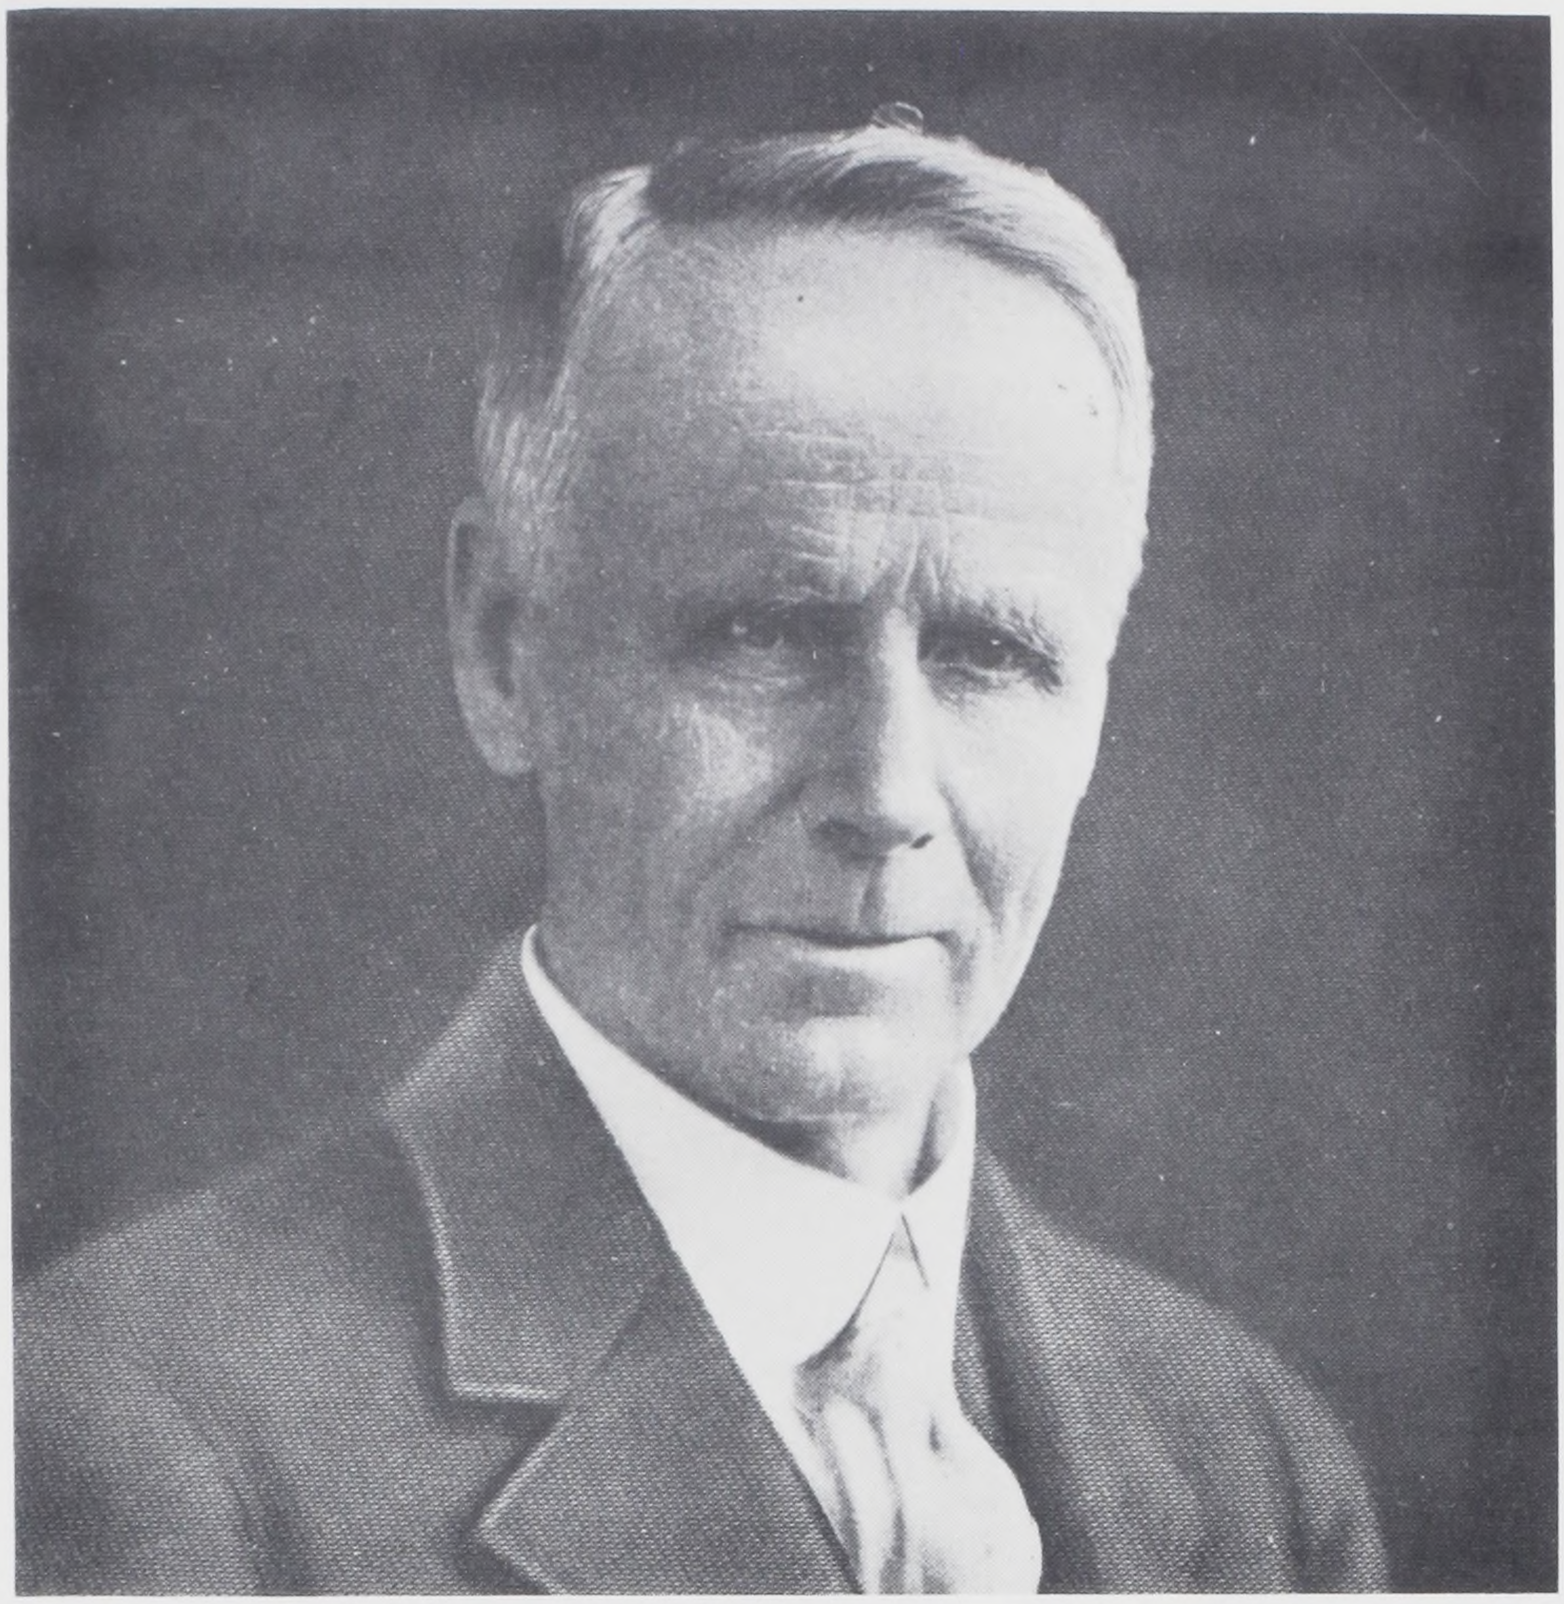
In 1916 Benson Polytechnic School consisted of what is now the front hall and the "C" wing.



Today Benson Polytechnic School has grown to more than twice its original size and tripled its student body.



Simon Benson

We of the class of 1966, as did the class of 1916 in the very first issue of the POLY TECH (forerunner of the BLUEPRINT), dedicate this 1966 BLUEPRINT to the man who is described in Volume I, Number 1, as "Oregon's First Citizen" . . . Mr. Simon Benson, the founder of Benson Polytechnic School.

The article in the first edition of the POLY TECH was written by L. R. Alderman, then superintendent of Portland Public Schools. We quote the following passages from the article:

"Mr. Simon Benson, for whom the Benson Polytechnic School is named, was born in the year 1855, in Gilbert Valley, Norway. When he was twelve years old he worked his passage to the United States, then worked his way westward, and spent several years on a farm in Wisconsin, working for his board. He worked several years in the lumber camps there and learned much about logging and lumbering and the control of men. When he was 25 he came West, and went to work in a logging camp at Deer Island on the Columbia River.

It was not long until he had his own logging camp; and by his grasp of every detail and by working from 5 o'clock in the morning until nine at night, he soon made his camp the most successful one on the River. Efficiency seemed to be the motto of the young Norwegian, and no detail was too small for him to take hold of and master.

Mr. Benson's advice to his workers was always for their welfare. He is described by those who knew him in those days as a most considerate husband and father. He was desolated with grief when his wife died in 1891. He took trips from his camp at Deer Island to all parts of the country, personally inspecting timber.

As his income permitted, he bought this piece and that piece of land until his holdings were very large. When the increased demand of the times brought a lumber boom, he decided it was time to sell. He sold for $4,000,000 and found himself a very wealthy man.

Mr. Benson's interest in a trade school came by observing the number of applicants for menial jobs who claimed to have college educations. The thought occurred to this systematic, fair-minded man that everyone should not have the same kind of training and that a man's education should have some bearing on his life's work.

He was appealed to for donations to all kinds of schools, but when he saw Portland's School of Trades he realized this was the real open door to success for many young people.

Realizing all this, he gladly donated $100,000 to the school that now bears his name."

Faculty and Administration

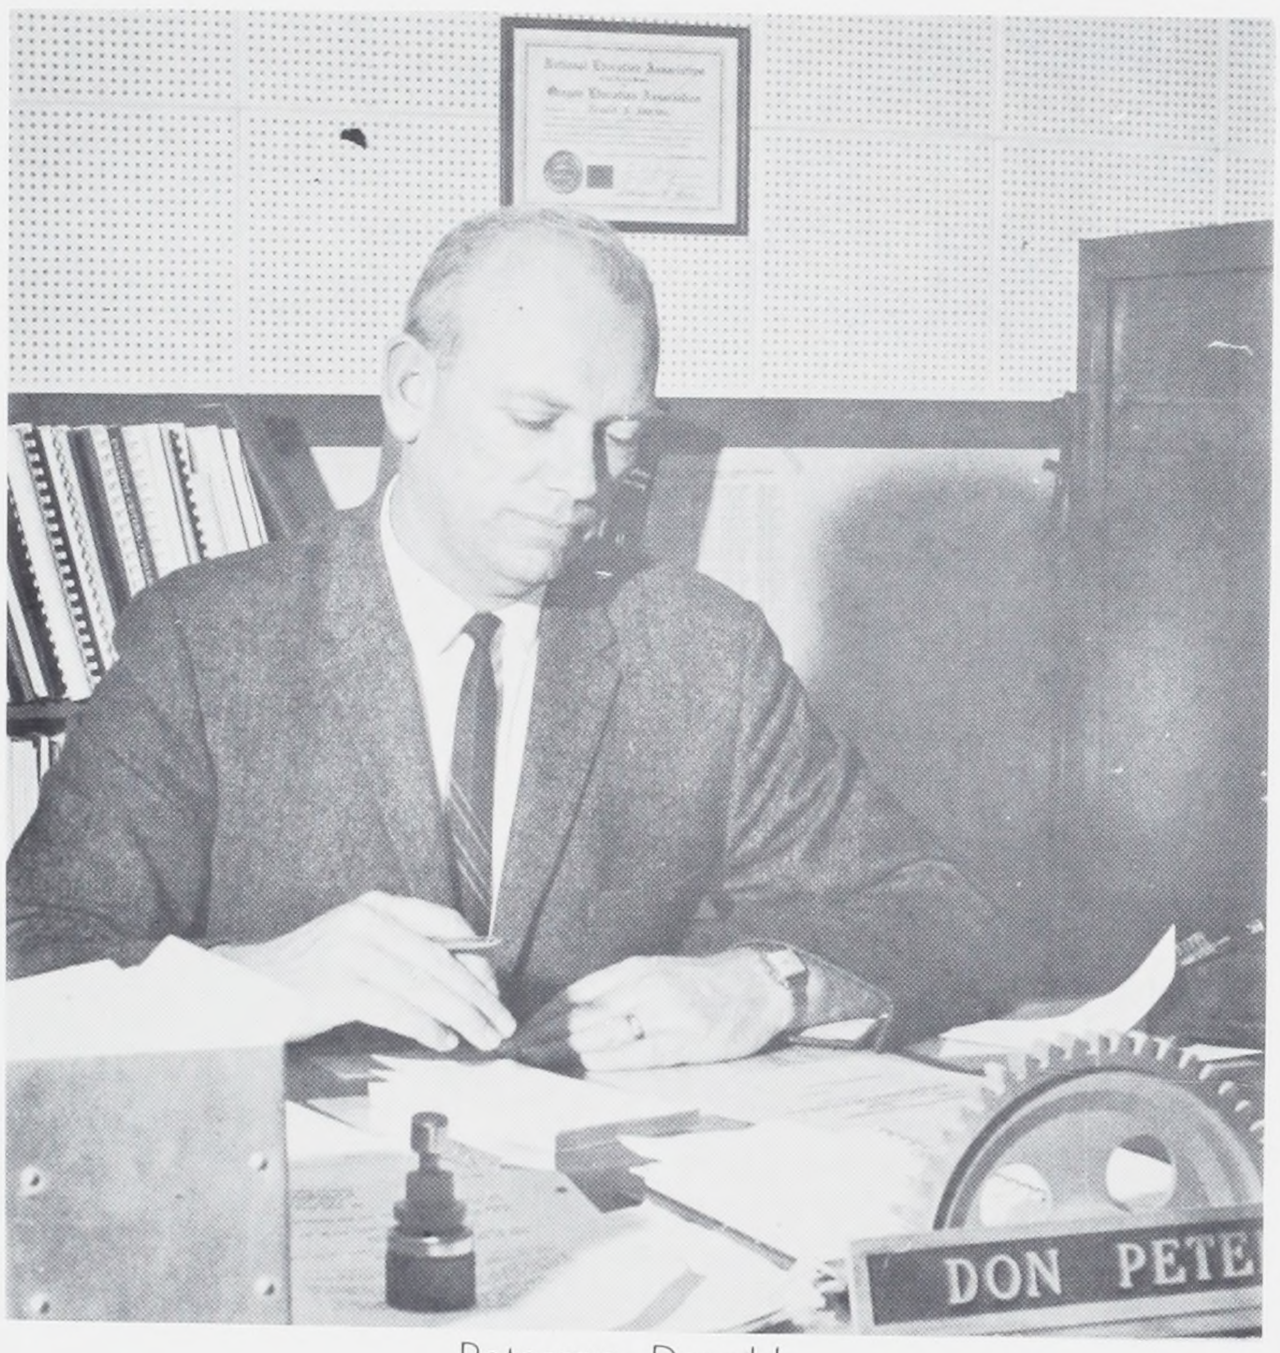
Benson Polytechnic School has the best faculty in the Nation . . . for it is the faculty which makes Benson "The Nation's Finest Technical School." In the technical field Benson has shop teachers who have had many years' experience in their particular field of industry and who are aware of all the latest advances on those fields. Many of these Benson teachers are themselves graduates of Benson Polytechnic.

In the academic field we also have many qualified teachers who have been here for several years or who have just gotten out of college and know all the latest techniques in education. Many of these instructors spend their evening hours in study in classes offered by any of the several colleges in the area in order to make their teaching better.

Rasmussen, Marvin R.
Principal

In 1955 Benson's principal, Mr. Marvin Rasmussen, came to Benson from the faculty of Roosevelt High School as a vice-principal. The eleven years since his arrival have been stimulating and exciting ones to all concerned. Many changes have come to Benson Polytechnic School since Mr. Rasmussen's arrival and, with the addition of a new South Shop Wing, the redesigning of the C Wing, and the addition of the new gym which was dedicated last fall, the school has an entirely new look.

Administration



Peterson, Donald
Vice-Principal

Mr. Donald Peterson, Benson's Curriculum Vice-principal since 1962, came to Tech from the head basketball coaching position at Franklin High School. Mr. Peterson has charge of class scheduling, curriculum development, is advisor to the PTA, and directs the academic program.

Mr. Harold Andersen, Administrative Vice-principal, came to Benson from a teaching position at Grant High School and was head of the vocal music department here for several years prior to being named to his present duties in 1961. Prior to being at Grant, Mr. Andersen had taught at St. Helens High School.

Andersen, Harold H.
Vice-Principal

Administration

Our newest Vice-principal, Mr. Aki Nishimura, has been on his job here for the past two years and may be said to have been thoroughly broken in now. Mr. Nishimura has charge of shops and replaced Mr. George Brown who held the post for some 36 years prior to retiring. Mr. Nishimura was in the Benson Biology Department here for six years and had previously taught at Homedale, Idaho, before being promoted to his present position.

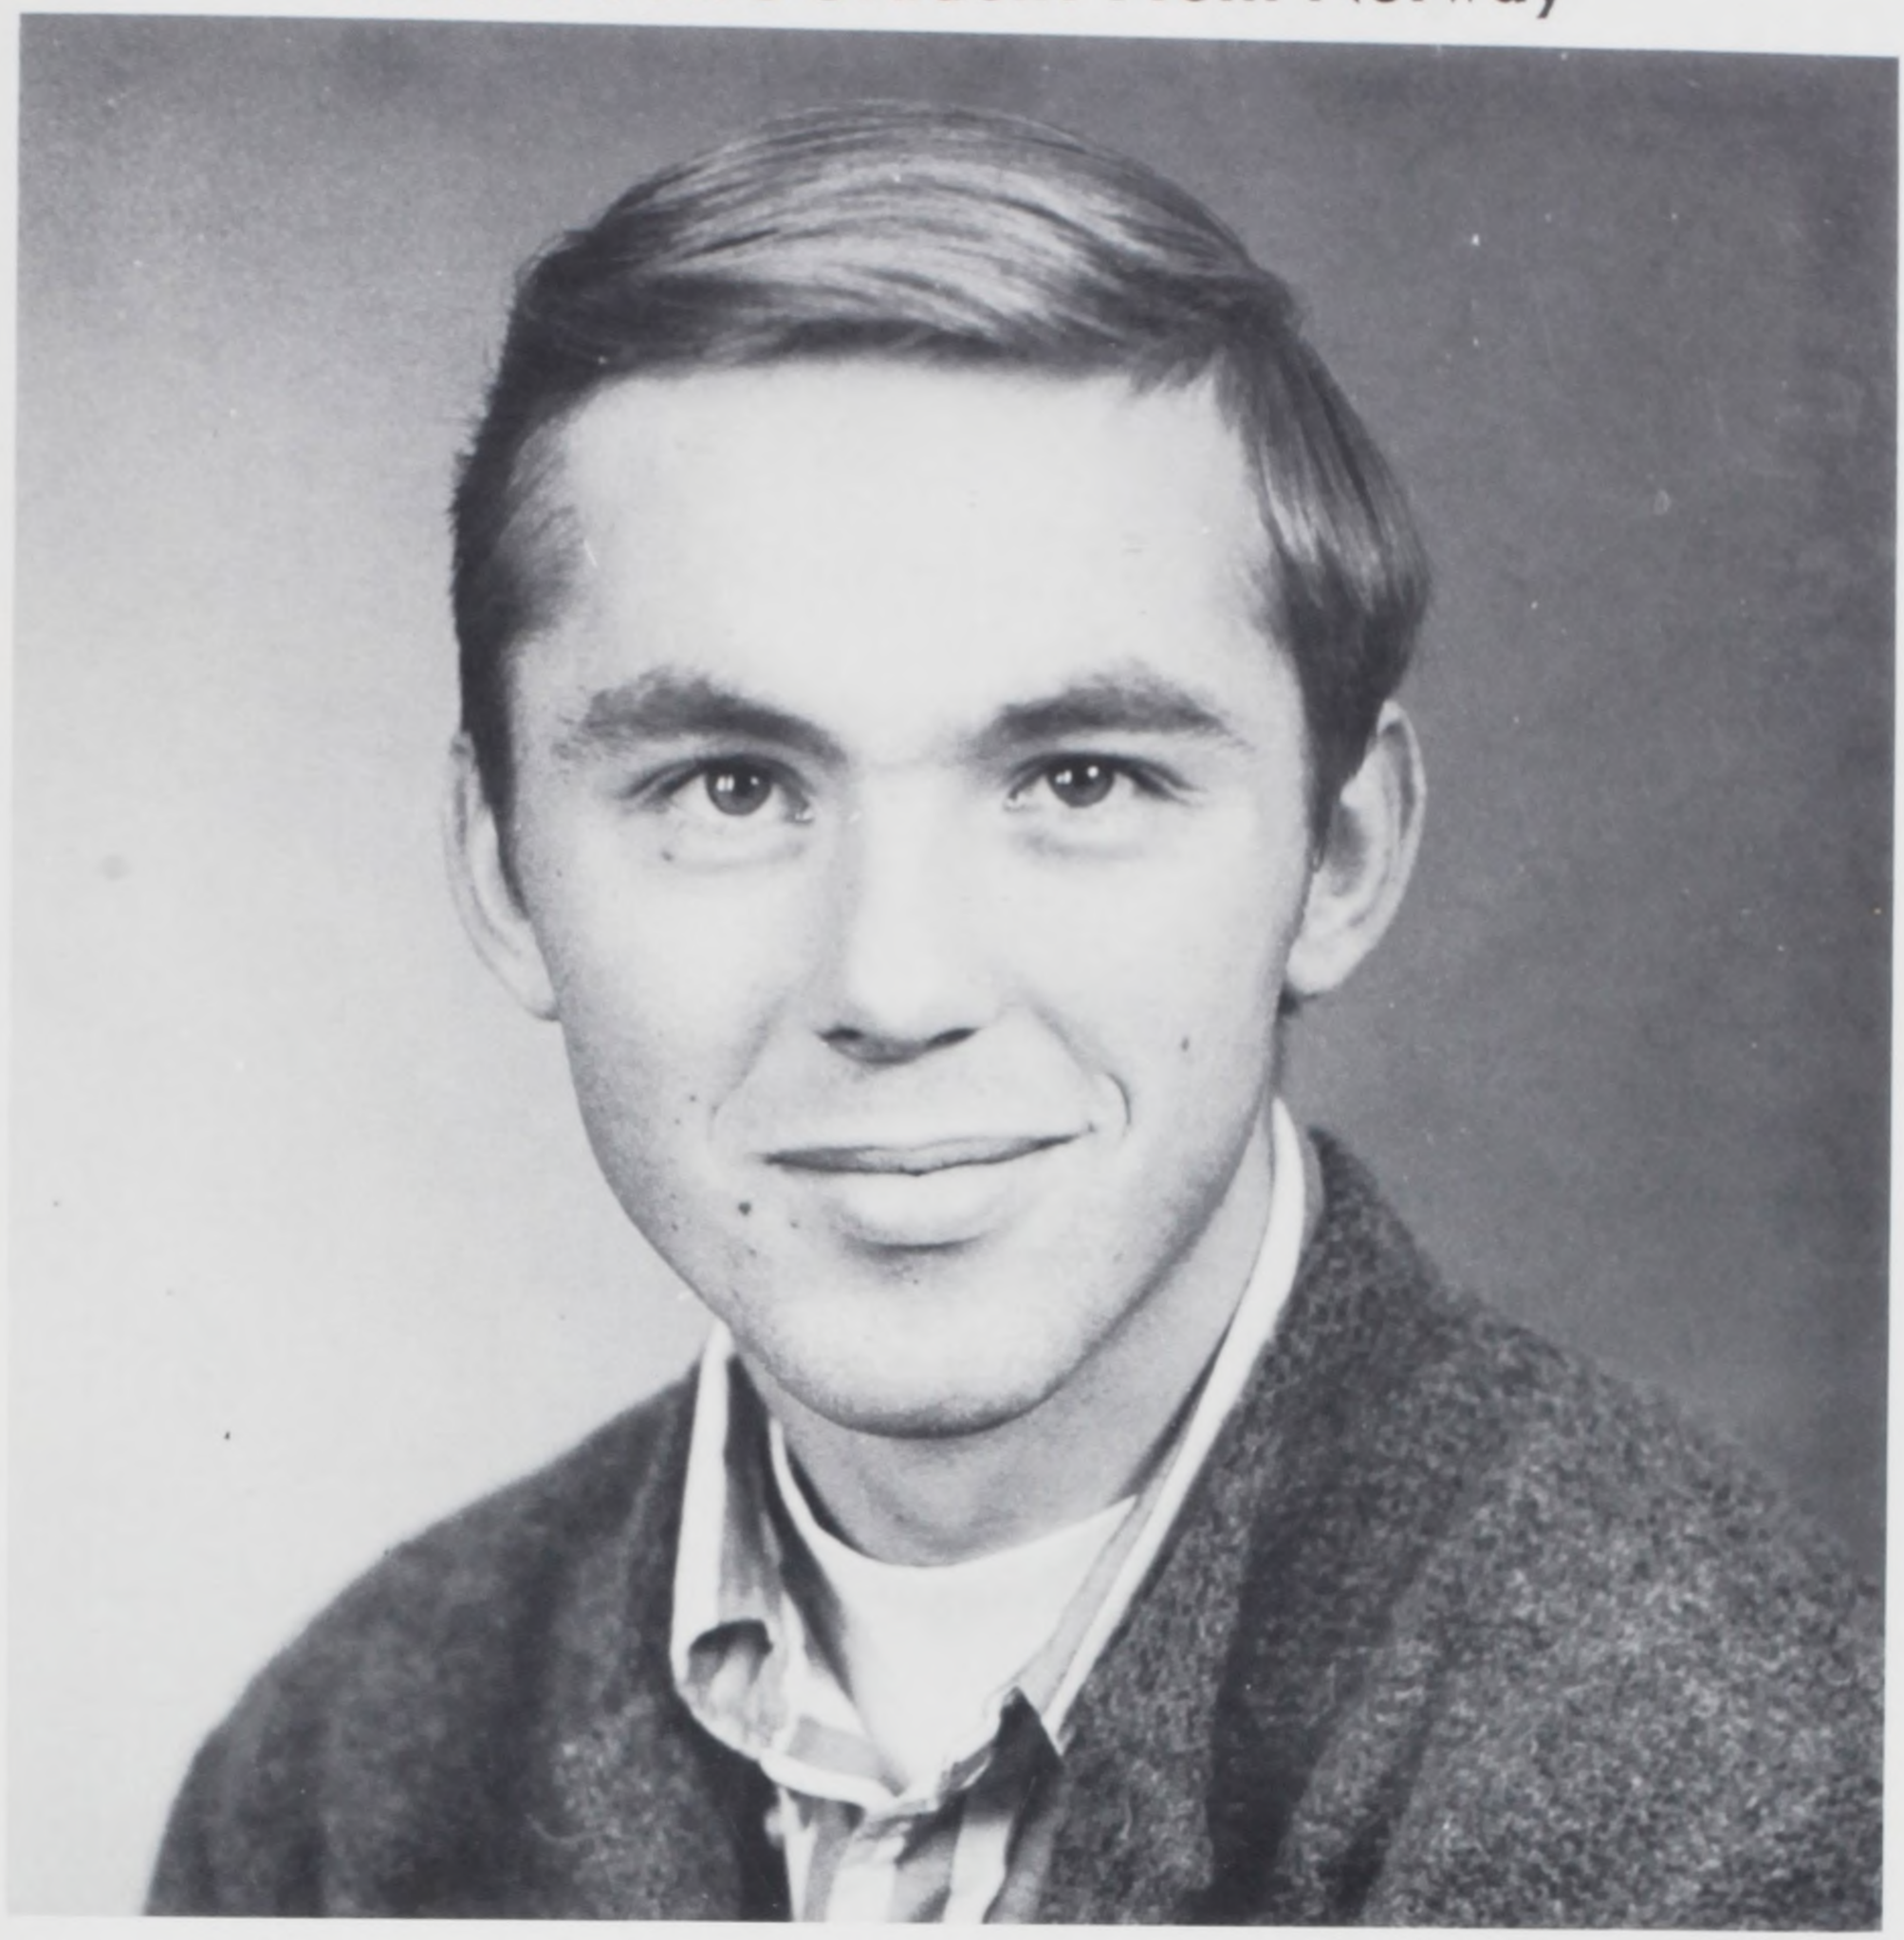
Benson's AFS Student From Norway



Helge Singsaas

April 29, 1966

To the Benson Student Body:

As my year here now quickly is coming towards an end, I can start looking back at what I can frankly say has been one of the most wonderful and valuable experiences of my life. As this year has been coming along, far too fast, I more and more have realized how very fortunate I have been to become the AFS student here at Benson. When over in Norway I first heard that I was going to an all boy's school, being used to a coeducational school at home, was something that made me a little worried . . . How on earth was I to prosper and develop myself with no girls around? However, I had not been at Benson long until I understood aspects about this school (that I realized) that I could rather consider myself privileged in having been enrolled in the Benson student body.

It is sad thinking of the fact that I will be leaving in less than two months, and will have to say farewell to all the great friends I have made here at Benson, students as well as teachers. I want to thank you all for your friendship and for having helped in making this such a wonderful year for me.

Some day, maybe some of you will find an opportunity to come and visit my country, and I certainly hope that you will come and see me and give me a chance to pay back some of my debt to you.

Your friend and AFS classmate,
Helge Sinssaas
(Norway!)

Sports

Athletics is one of the most important of our extra-curricular activities. This activity gives students a chance to build school spirit and to develop their mental and physical beings. Students learn in athletics how to cooperate with others in reaching a common goal and what sportsmanship really means . . . "It isn't whether you win or lose; it's how you played the game" is just as true today as it ever was.

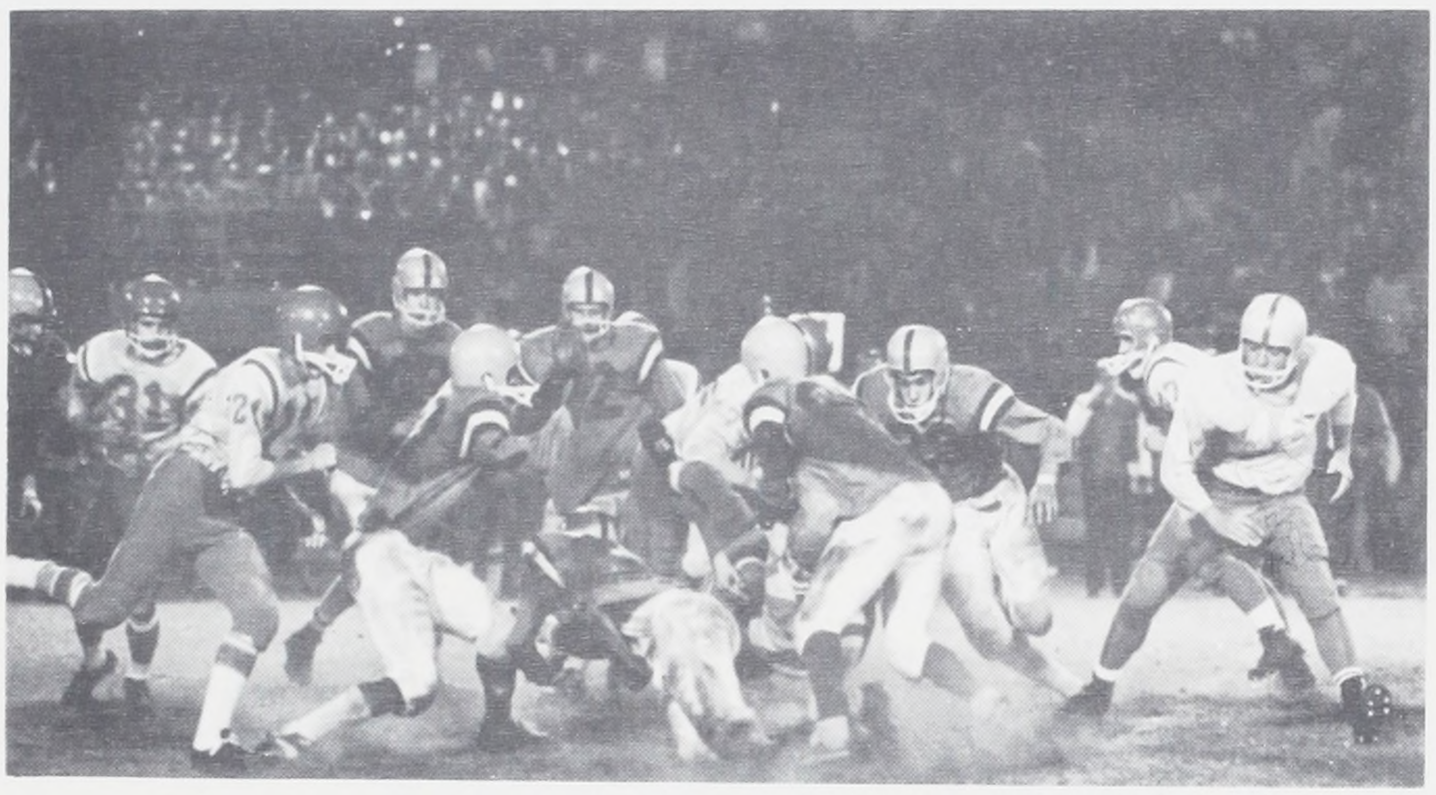
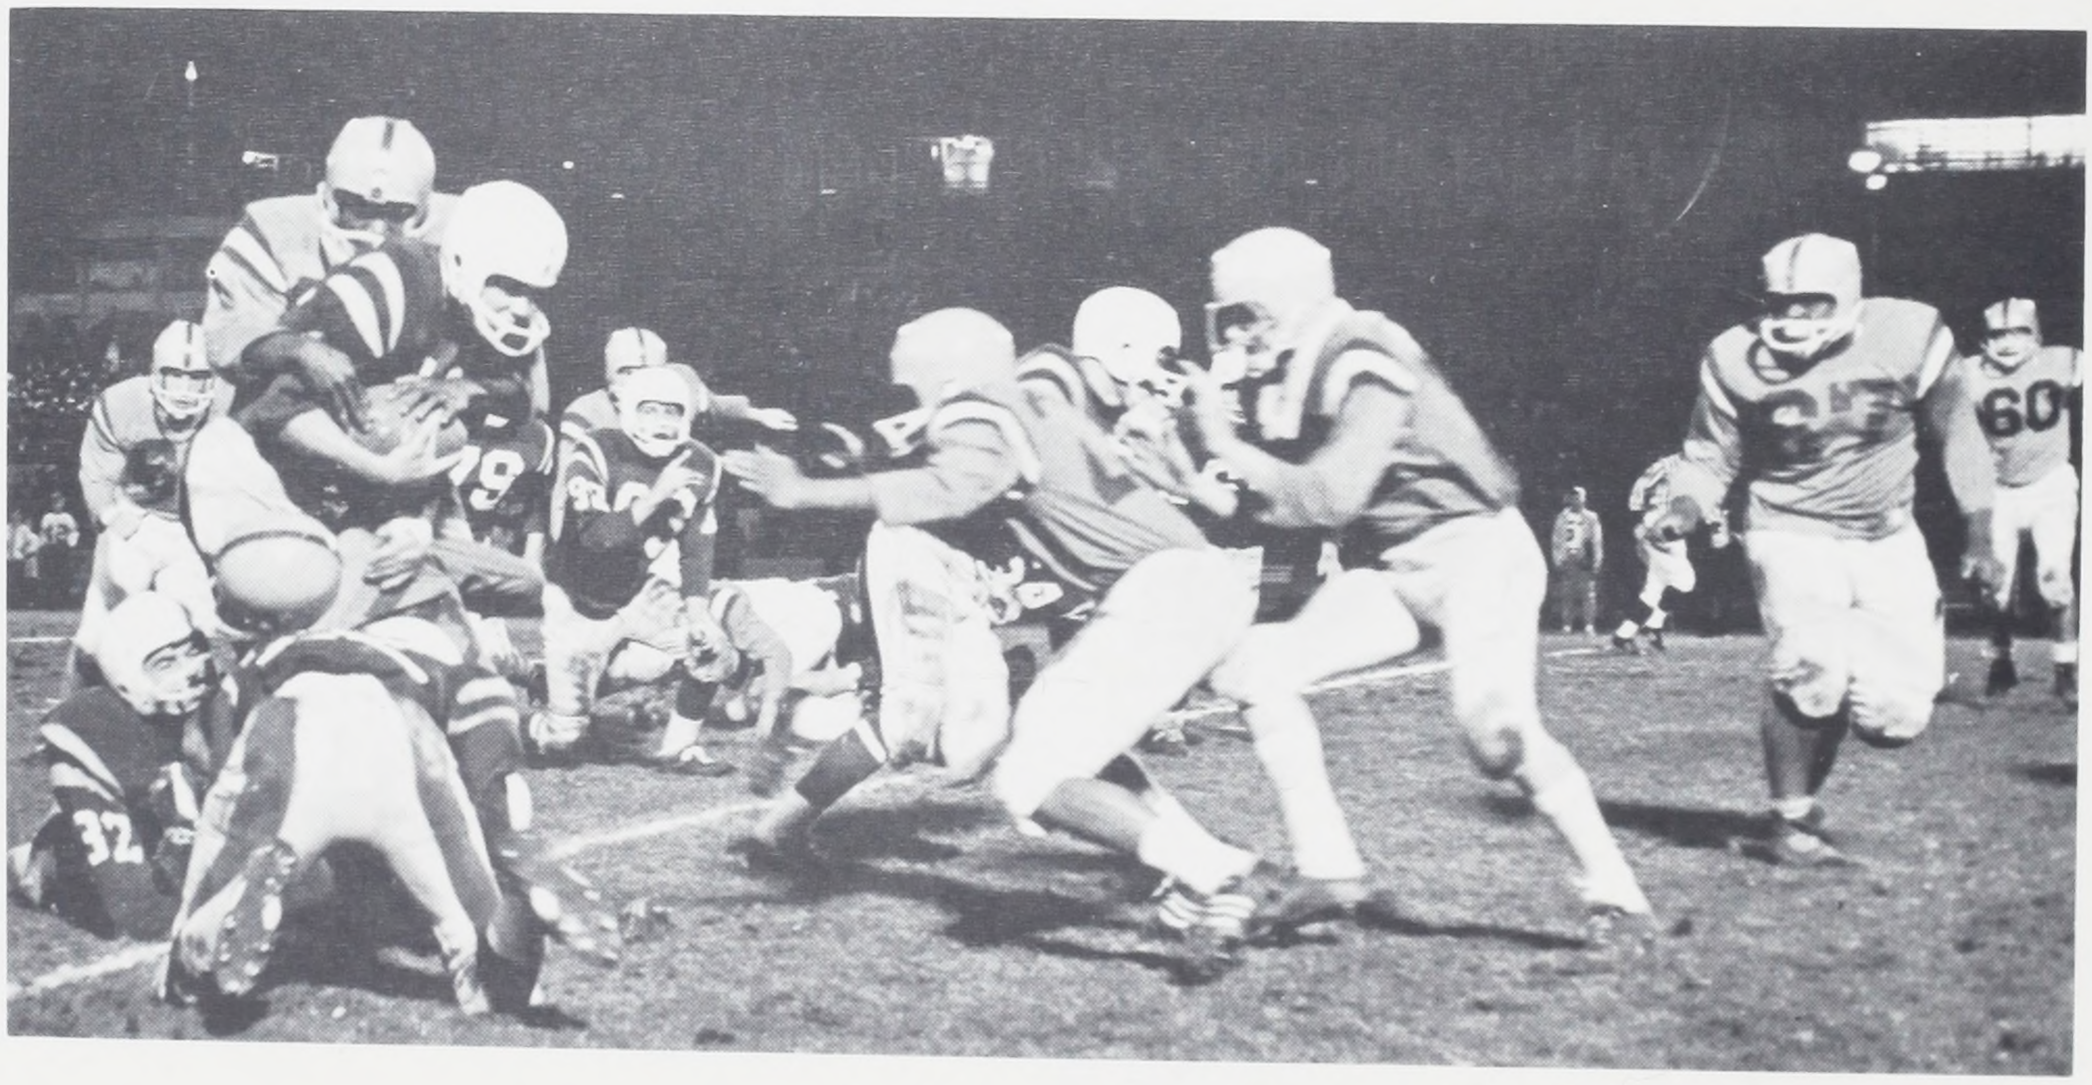
Techman show skill at keeping opponent off balance during Sunset onslaught.

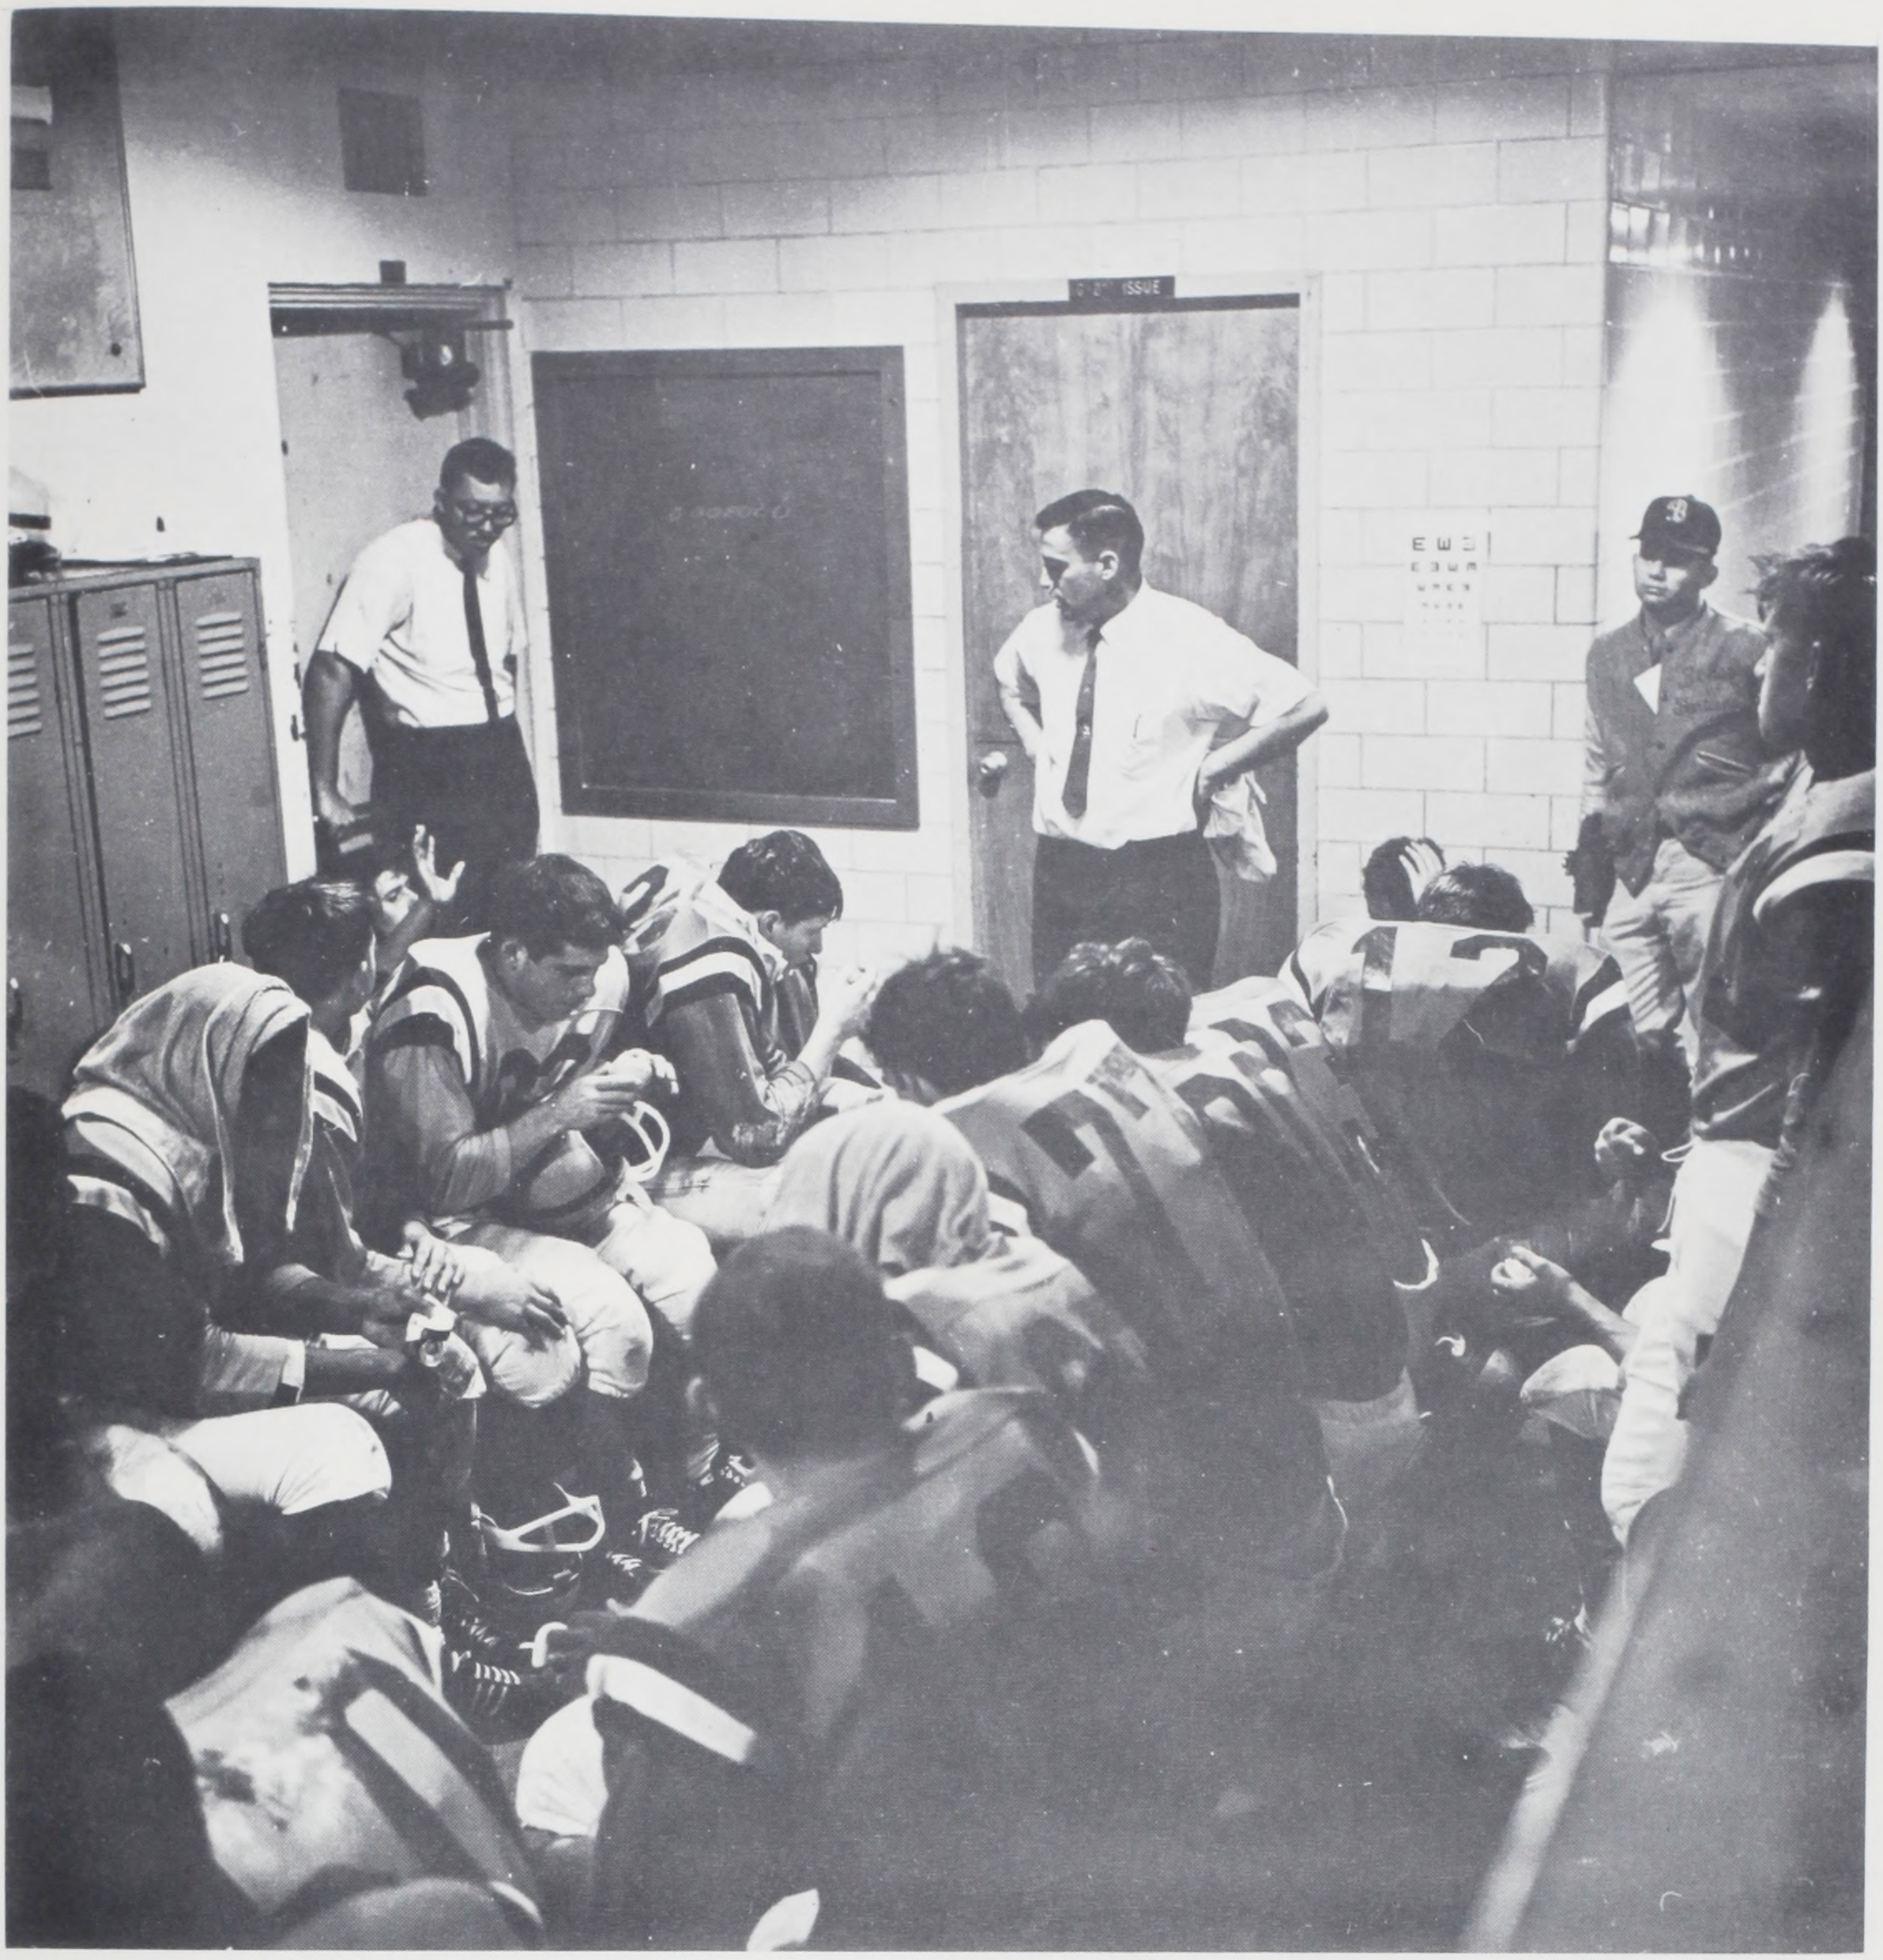


Team captains of this year's varsity football squad were seniors Mike Sweeney and Carle Bowles. The team's regular season co-captain, Ron Warren, was injured during earlier action so Bowles was voted honorary co-captain to complete the season.

Good pursuit by Techmen as each gets a piece of opponent.

Tech Varsity players smother Grantonian opponent during pre-league games.





Head coach Dick Hennessy gives team new spirit at half time.

The 1965 Varsity Football season saw Benson enter the fray as the most inexperienced team in the league from the standpoint of returning lettermen. With only 5 returning lettermen, and not one a regular from the previous season, Benson finished 7th in an 11-team league ahead of Roosevelt, Marshall, Madison and Washington. Benson had wins over Washington and Roosevelt, plus a tie with Cleveland. Although the team showed continued improvement from week to week, the worst defeat came in the last game with Wilson.

Many players received recognition during the season. Carl Bowles and Ted Peck were among the top 20 scorers in the city. Bob Tow was selected first string All City Center. Mike Sweeney made second string All City Guard, and Herm Miles (End), Lance Dickie (Defensive End), and Carl Bowles (Defensive Left Back) made Honorable Mention.

We hope to improve upon our 2 win, 5 loss and 1 tie record next year. The boys know the offense which will enable us to be more versatile next year. The emphasis for '66, however, will be on defense and hitting harder.

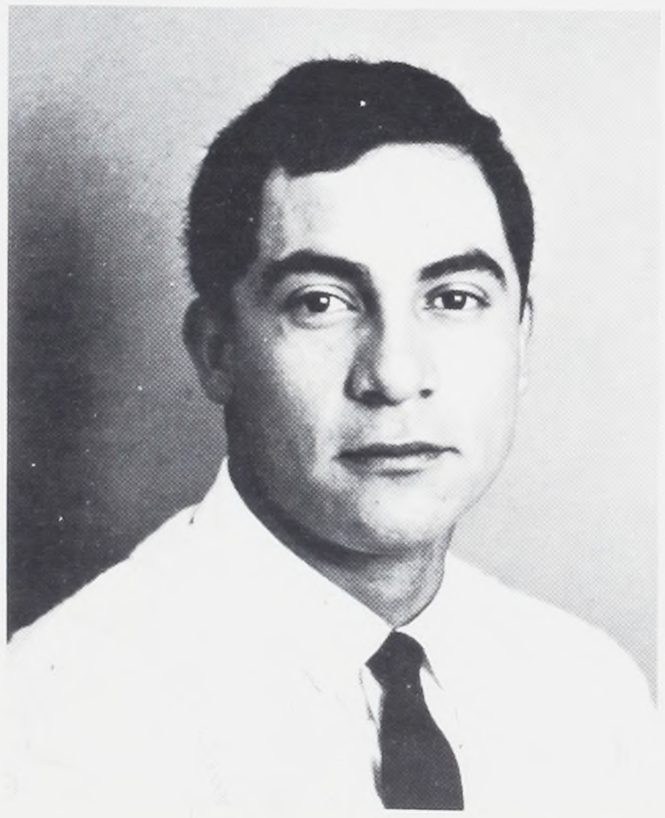
J. V. Techmen sport winning season

J. V. Head Coach
Mike Lopez



Beson's junior varsity football team, strengthened by a strong running and passing game, showed the other teams that they were no easy pushover.

Coach Michael Lopez stated that this was "The first winning season since 1962." Throughout the year, Benson piled up a 4 win, 3 loss record. Their first game was a tough loss to Franklin, 20-7. By hard practice the next week, the JV's pulled out a 12-6 win over Lincoln for their first win of the season. They also handed a loss to Washington by defeating them 18-13. The JV's next game, against Madison, met with some disappointment as the Senators swept by the Techmen 26-13. But hard work prevailed as the Techmen trompeled over Roosevelt 18-13. Benson in the next game faced some tough Generals, and Grant squeaked by 12-6. Benson bagged a 14-13 win over Cleveland to end the season. The fine running and passing was accomplished this year by sophomores Gary Bowles and Kenny Warren, a fine potential for next year's varsity team.

Veteran city and state champion, Gary Onchi, poses in his traditional wrestling stance that has won him his many hard fought titles. Gary Onchi not only distinguished himself as a fine wrestler, but he also placed third in the nation in a nation-wide Judo contest in his specific weight and class. The meet was held in Wisconsin.

This year's varsity wrestling squad, which was led toward completing a very fine season by senior state champion, Gary Onchoi, and senior, Jack Alvord, as co-captains. Led by these two rugged individuals, the varsity wrestling squad "starting thirteen" boasts five returning senior lettermen, four returning junior lettermen, and two starting freshmen grapplers, Cecil Hatchett and Dwight Onchi who in the future hold promise of continuing the tradition of great Tech champions.

Following a successful season last year, this year's wrestling team did equally well, gaining a fourth place berth in the city standings.

After a fairly good season, Coach John Bergan lists his best matmen as follows: David Peters, at 141 pounds, heading the group as number one; Roger Yasui, at 178, follows in second place; at 136 pounds, Mark Skelton is in third position; in fourth is Mark Dirr, at 98 pounds; fifth at 106, is Tom Palmer; Ernie Somera, at 115, ranks sixth; seventh is Dennis Hamilton, at 123 pounds; and Rick Cramer at 130 pounds is in eighth position.

As of February 25, Benson's J. V. team was in fourth place in the city. This was due to the recent loss at the hands of Grant. On the 22 of February Tech defeated Roosevelt and on the following Friday Benson drew a bye.

Dick Hennessy

Benson's freshmen wrestling team, coached by Mr. Dick Hennessy, tallied a total of 52 points and won championship titles in six divisions in the 1966 Freshmen Invitational Wrestling Tournament held in Benson's old gym February 23. Every man on the squad scored with the exception of one who lost on a default caused by a previous injury.

Those who won championships in their respective divisions were Mike Downer, a 90 pounder; Tom Smith, at 110 pounds; Jim Liming at 115; Randy White at 130; Vance Jones at 136; and Danny Smith at 148 pounds.

A surprising factor in Benson's victory over Grant was that they out-scored them by 37 points. The freshman wrestlers walked away from the Generals with a final score of 47-10.

This year's spirit was the best I have ever seen in my four years at Benson. Led by the Senior Class, the whole student body seemed to take school spirit very seriously and did their best to show it. This was very much appreciated by the Rally Squad, and we hope that the type of spirit that was shown will continue to be shown during the years to come.

It's Yeaaaaa Benson as Gary Palmer winds up a "Triple B" at one of the pep assemblies held in the new gym.

What is school spirit? School spirit is the thing that makes some schools great and others just average. School spirit is far more than just coming to all the football and basketball games and cheering as loud as you can for your school. It means being a member of the Benson Student Body, and not just a guy who goes to Benson. It's the BATS, team managers, towel boys, library staff and all of the other vital parts of Benson that usually get no more recognition than a picture in the yearbook with their name mispelled.

It is victory ribbons, maple bars, school service and social clubs, grubby day (which, incidentally is prohibited in **this** school), wearing colored hats at basketball games (which, incidentally, is also prohibited at this school), and a thousand and one other little things which account for school life outside of those sometimes tiring books. And of course, school spirit is the better known parts of the "extra"-curricular, including football players, student body officers and so on. But school spirit is not "extra." It is vital. No matter how many millions of dollars worth of machine shops, electric shops, or aviation shops a school has; no matter how short the principals tell students to wear their hair; and no matter how quiet students are at their assemblies; if there is no pride and spirit in the student body, the school is unmistakably and hopelessly lost.

I've heard it said that the nation that has strength and doesn't use it, loses that strength. The same thing applies to schools and school spirit. To the future men of Benson, I want to say but one thing, don't let Benson get lost!

I'm sure you know what I mean.

Informally,

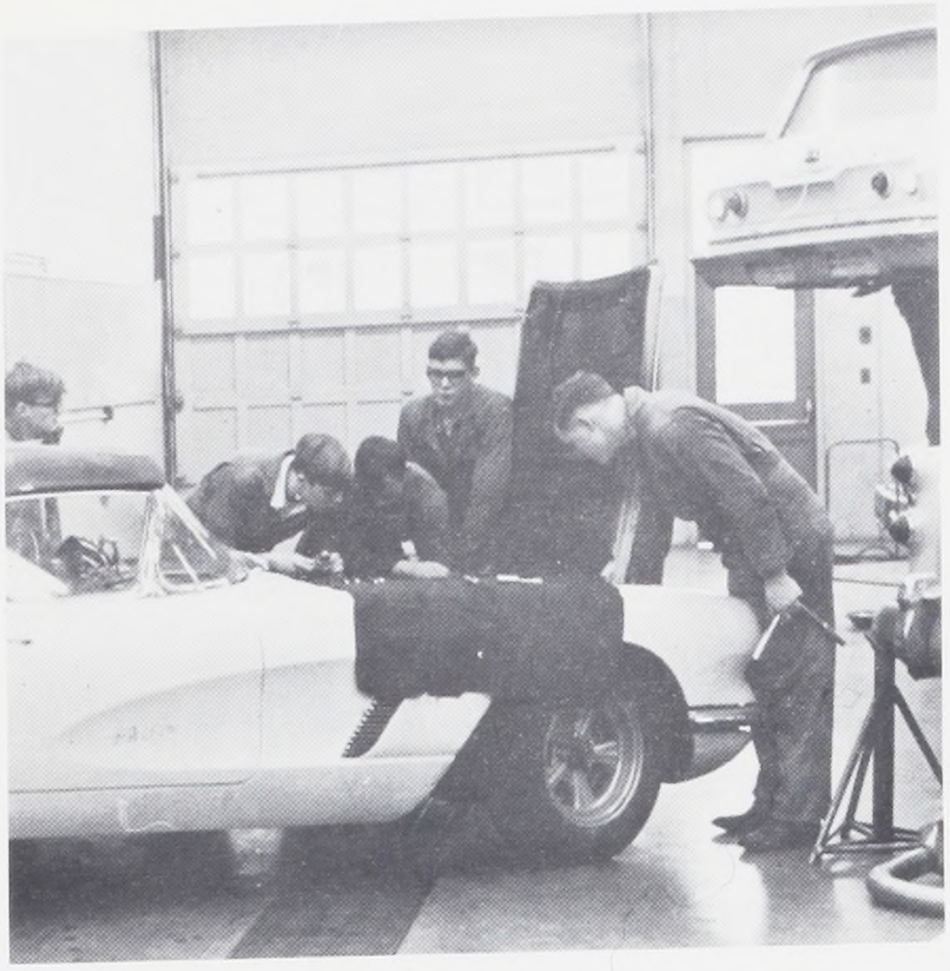
Technical Instruction

The Technical instruction which Benson students get during their four years here is probably the most important education they will receive prior to going out into the world to make their own living. Here, all students get a variety of technical training During the freshman year they get training in Machine, Electric, and Automotive shops. In their second year they receive training in the sequence which best fits their special field of endeavor. Finally, as juniors and seniors they spend the major part of the year in their major shop. Majors are offered in Automotive, Aviation, Building Construction, Drawing, Machine, Electric, Pattern, Foundry, Graphic Arts, and Metal Fabrication.

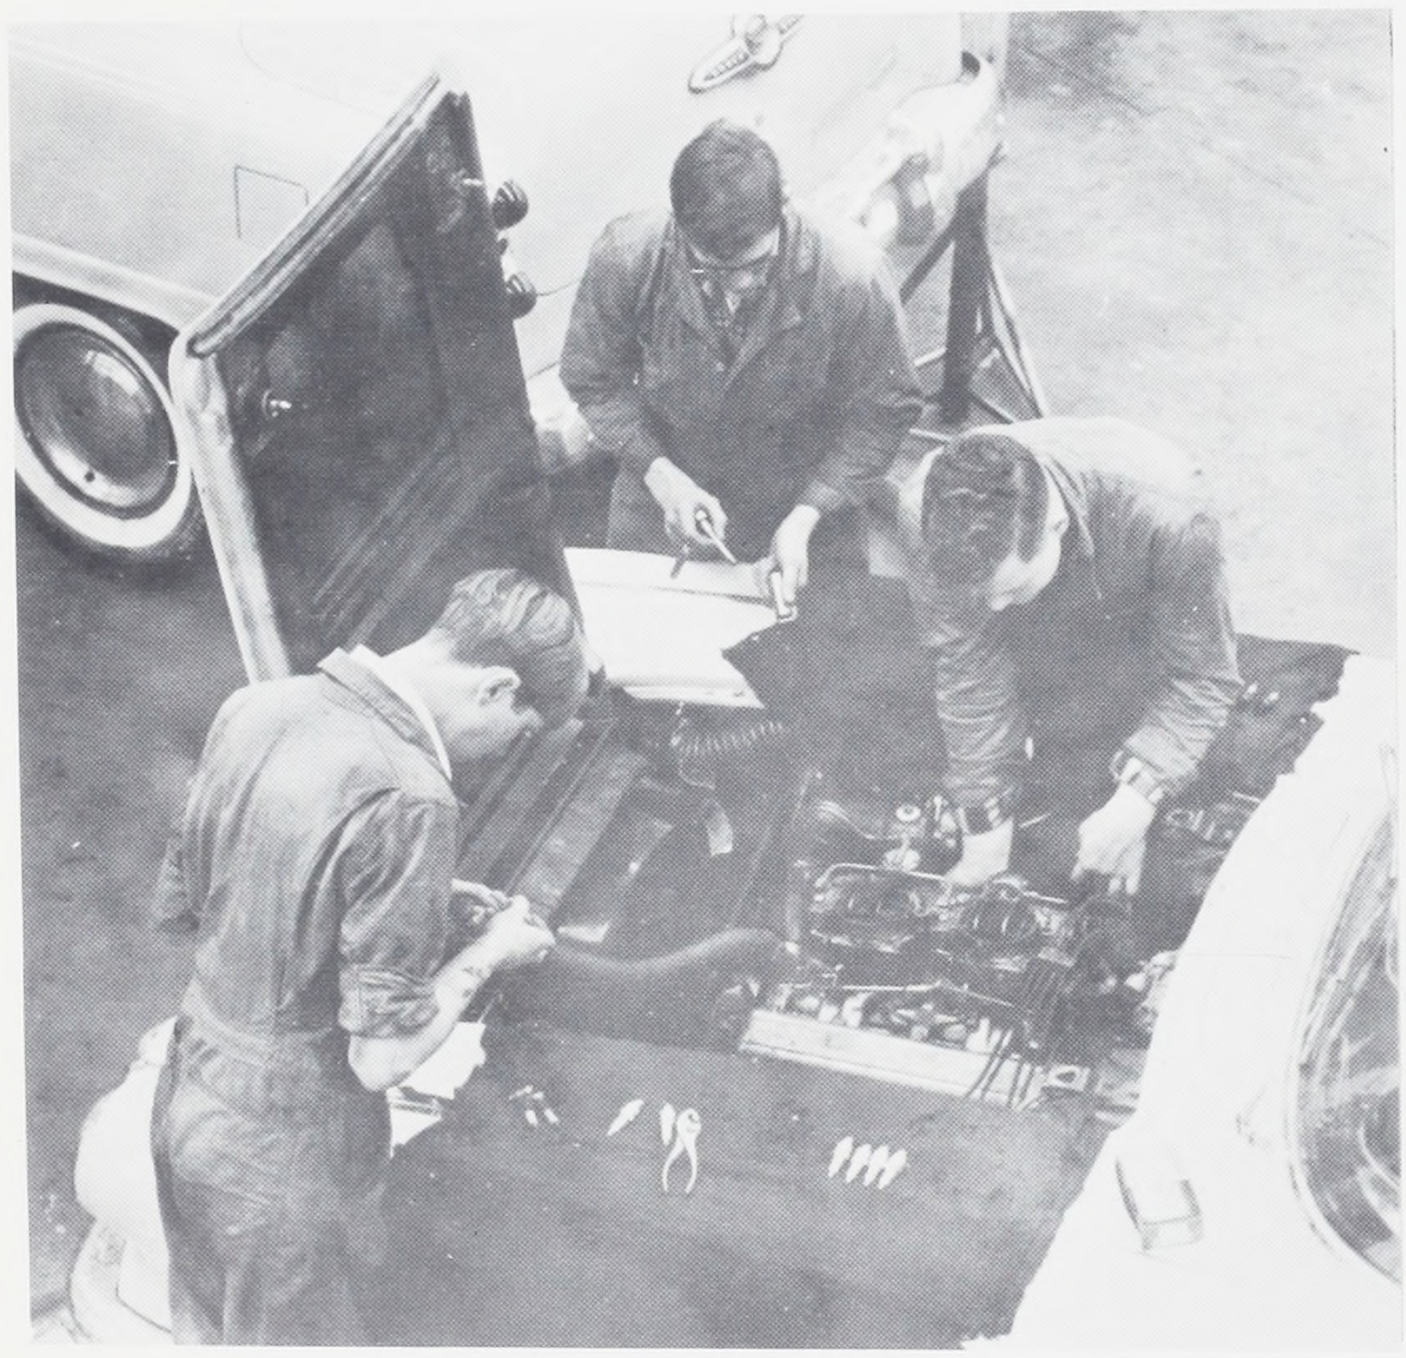
Benson, unlike many schools, prints its own newspaper in its own shop on these modern machines.



Automotive majors check out a Corvette engine.

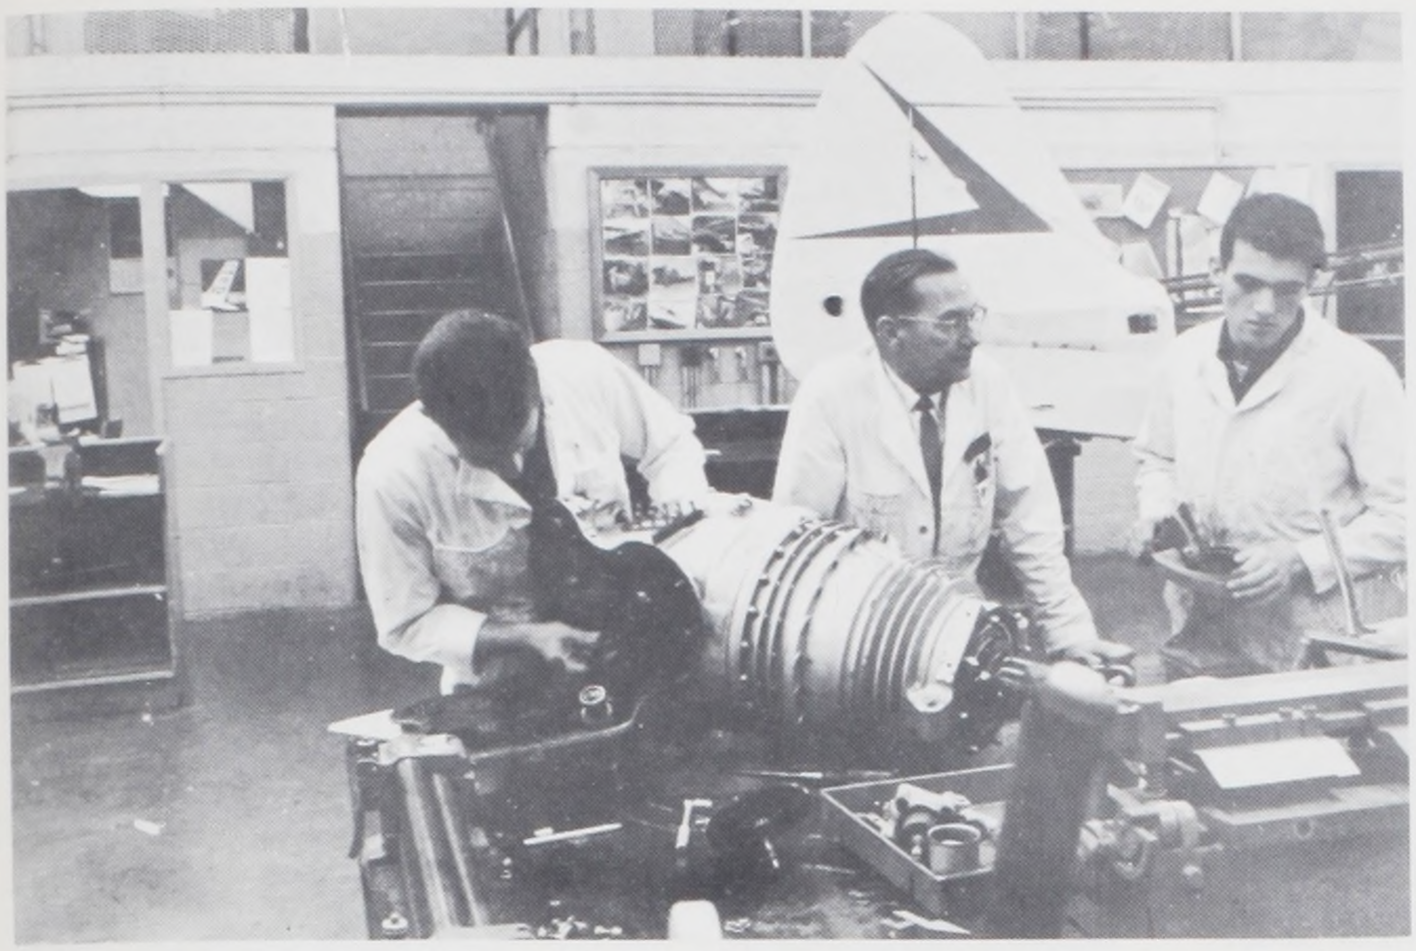
Automotive

While in body shop, majors learn basic body rebuilding and repair. Here a student scrapes excess fill from the dents to make this door almost as good as new.



Below, automotive majors replace spark plugs with surgeon-like care.

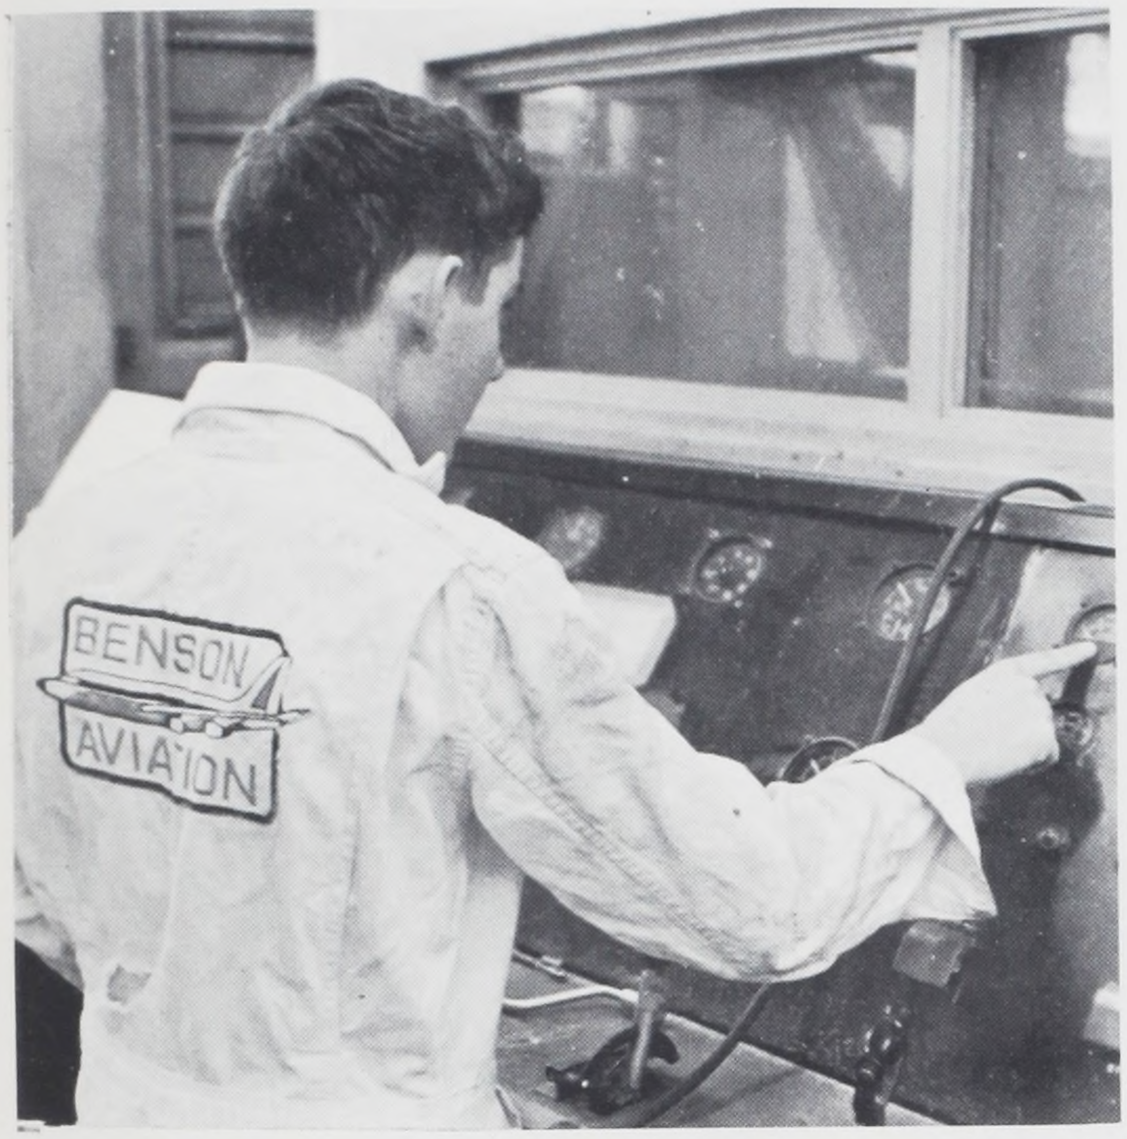
Below, a junior major student works on his 1929 Buick, a restoration job which will take him some time.



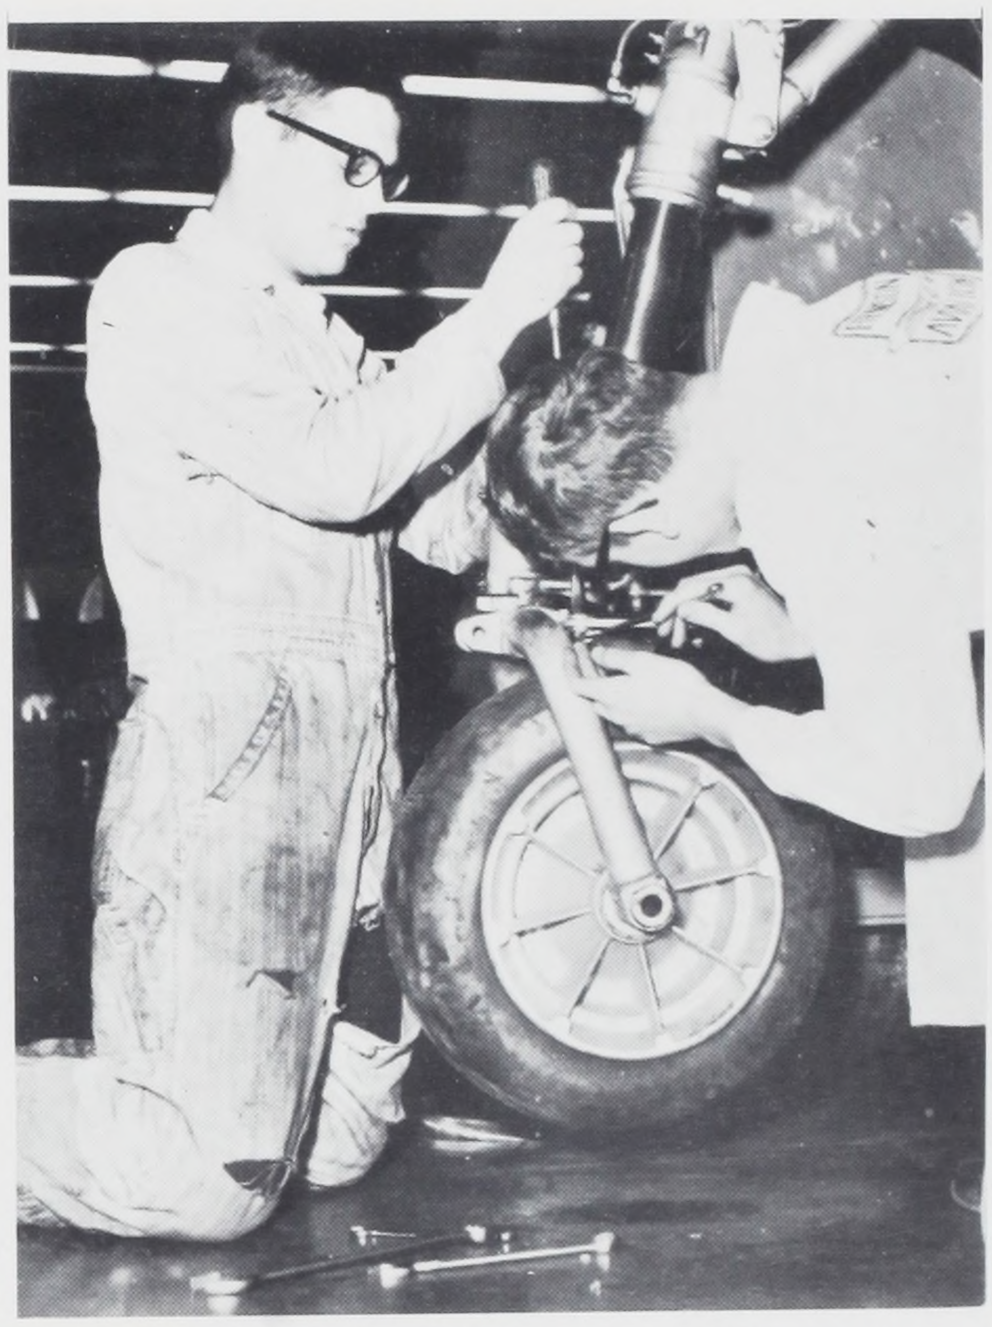
Aviation shop teacher Mr. William Nichols helps these Aviation majors tear down a helicopter transmission.

All Sophomores taking Aviation make model air foils such as the one shown above.

Aviation



Ken Cerotsky works testing a meter on the shop test cell.



Tom Freeman and Brant Wood work on a jet's front landing gear.

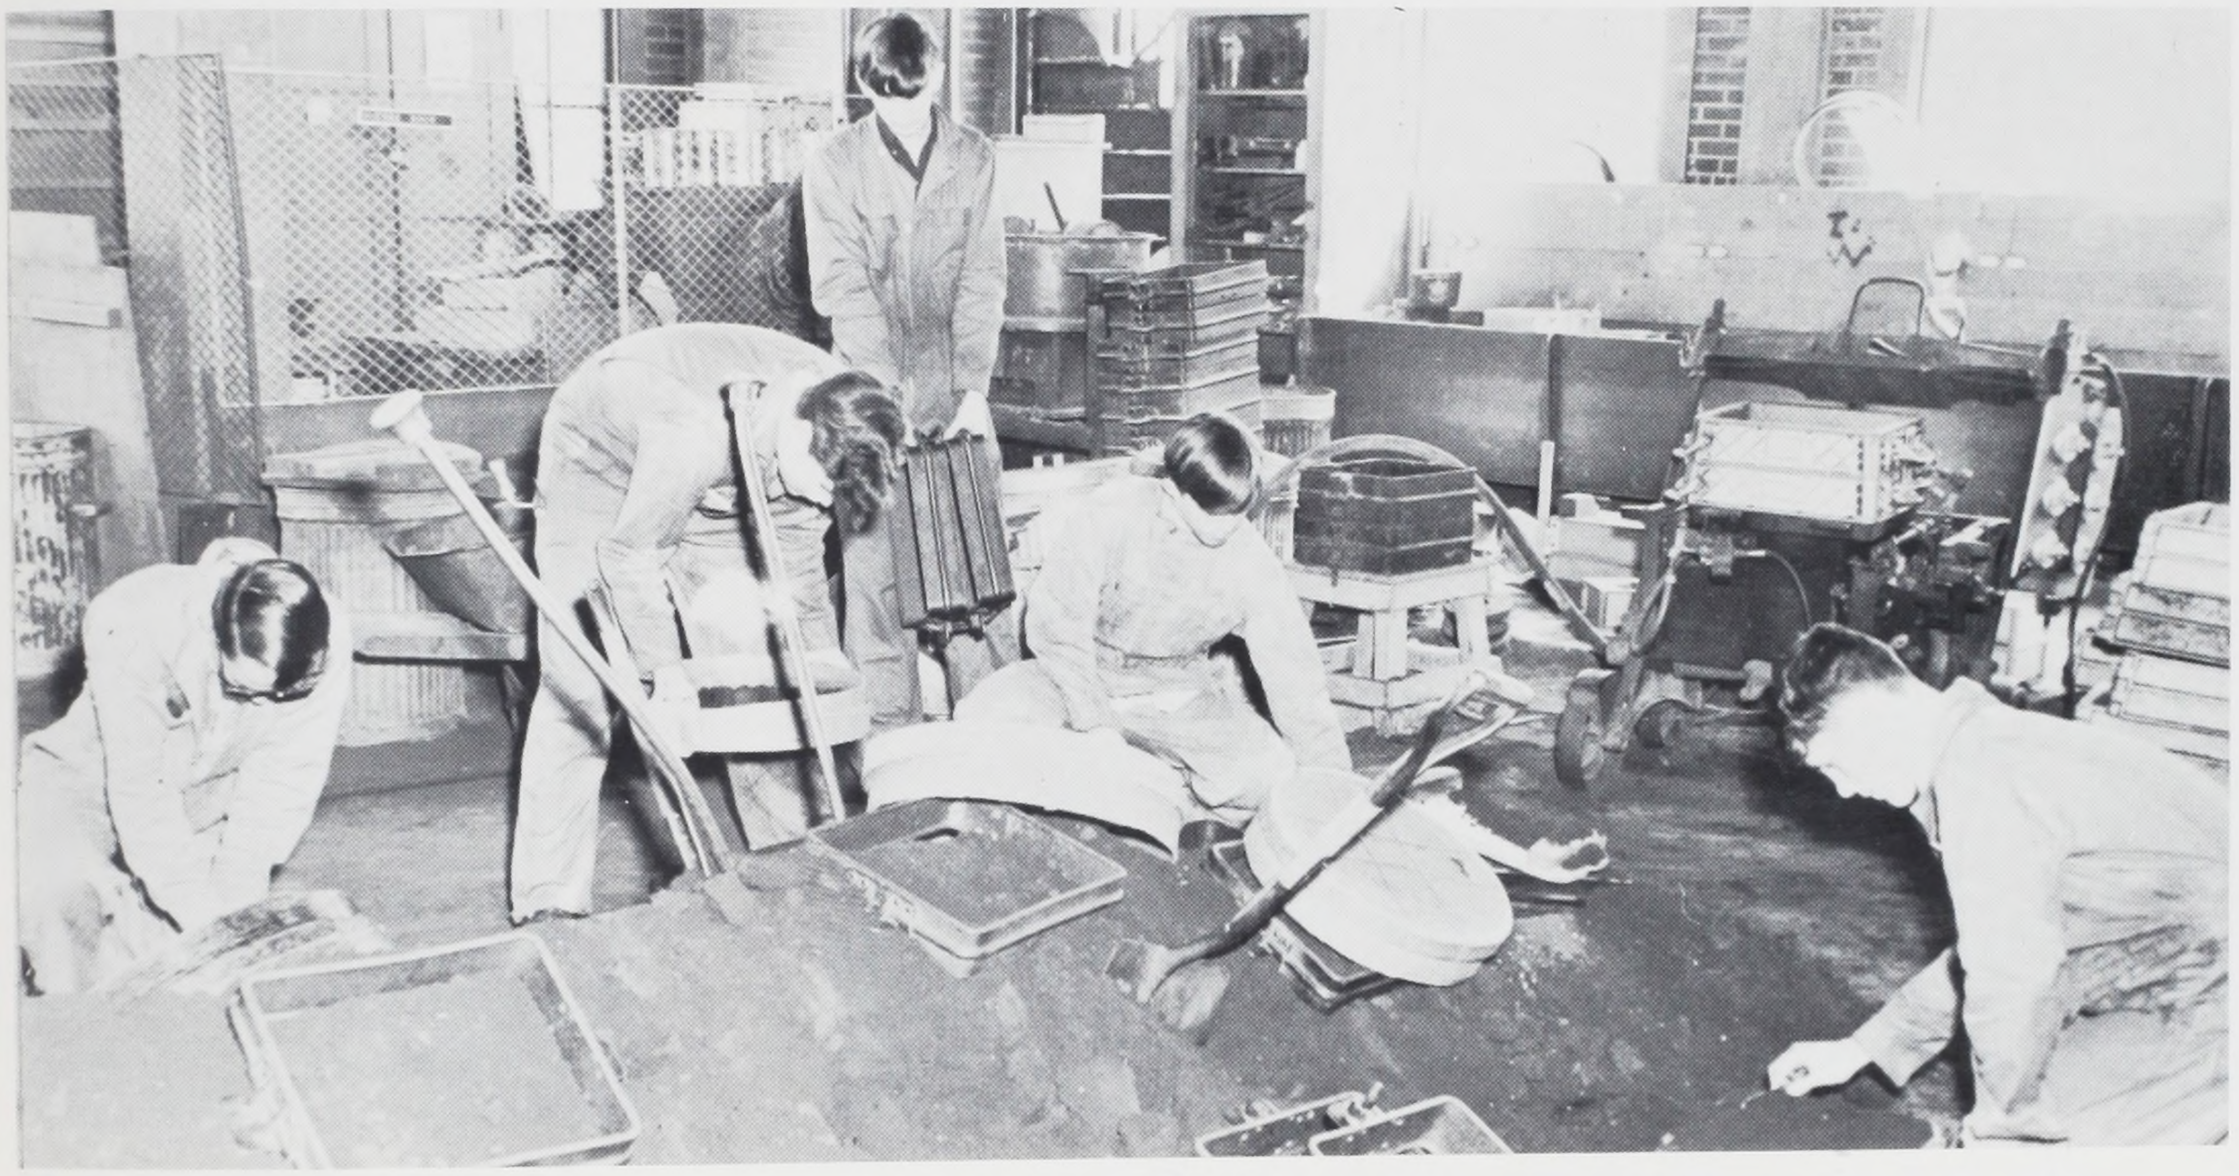
Frank Portwood and Mike McClendon pour molds with molten aluminum.

Foundry

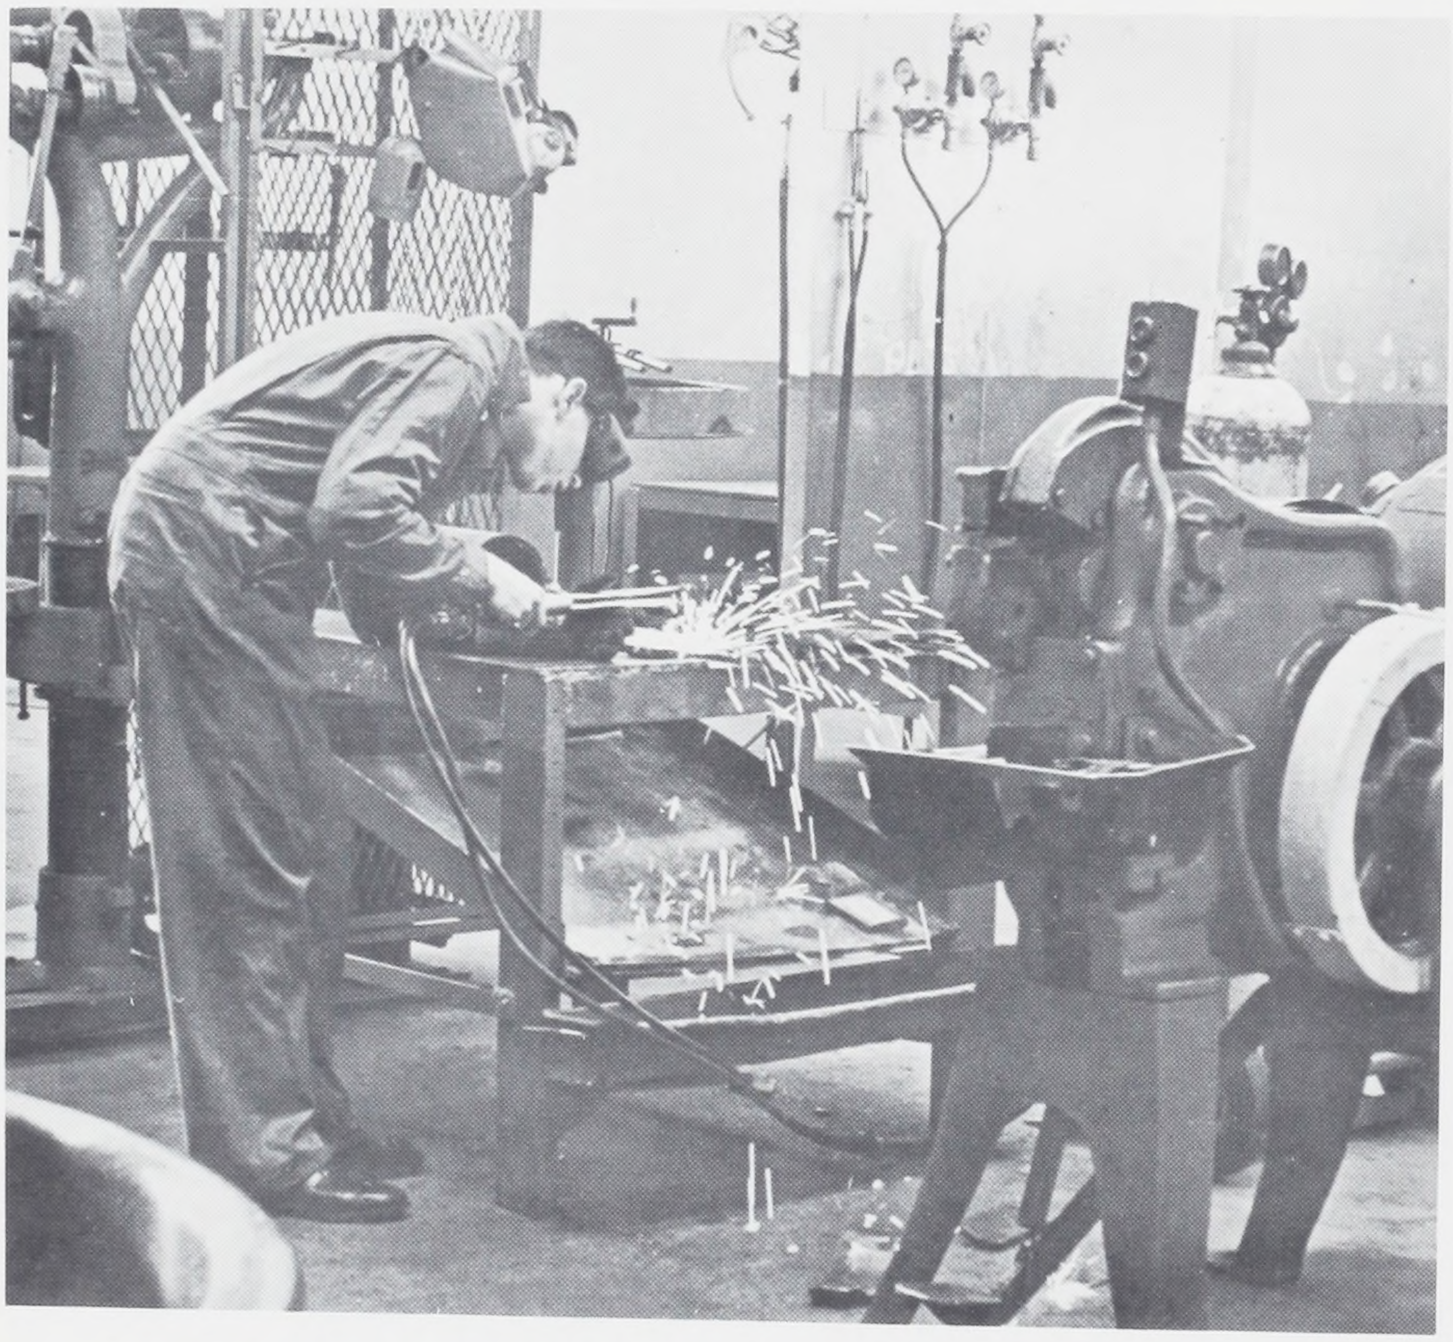
Sophomore students work with sand from the heap. They riddle, ram, walk off, strike off, cope down, slick, cut gates and clean, to make molds.



Sophomore students get practical experience arc-welding pads, liflets and other types of beads.

Welding

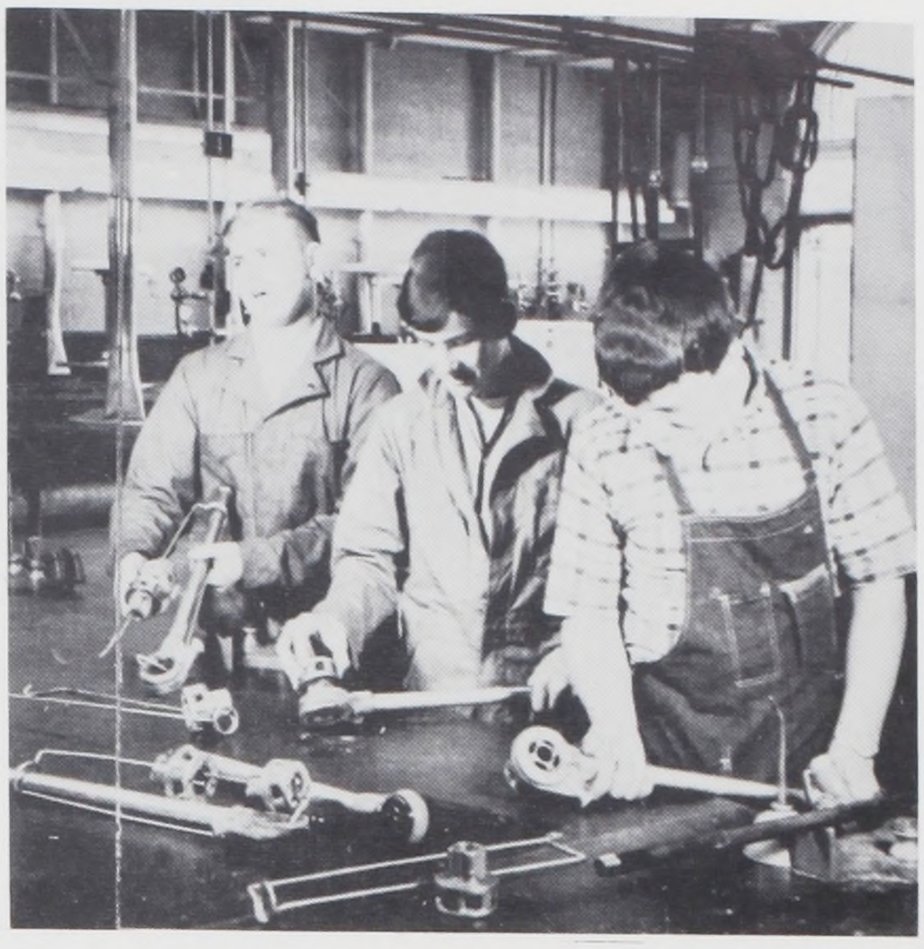
Two students beat and scrape slag from their welds to see if the beads are good.



Here Don Benson cuts some half inch plate metal with the cutting torch.

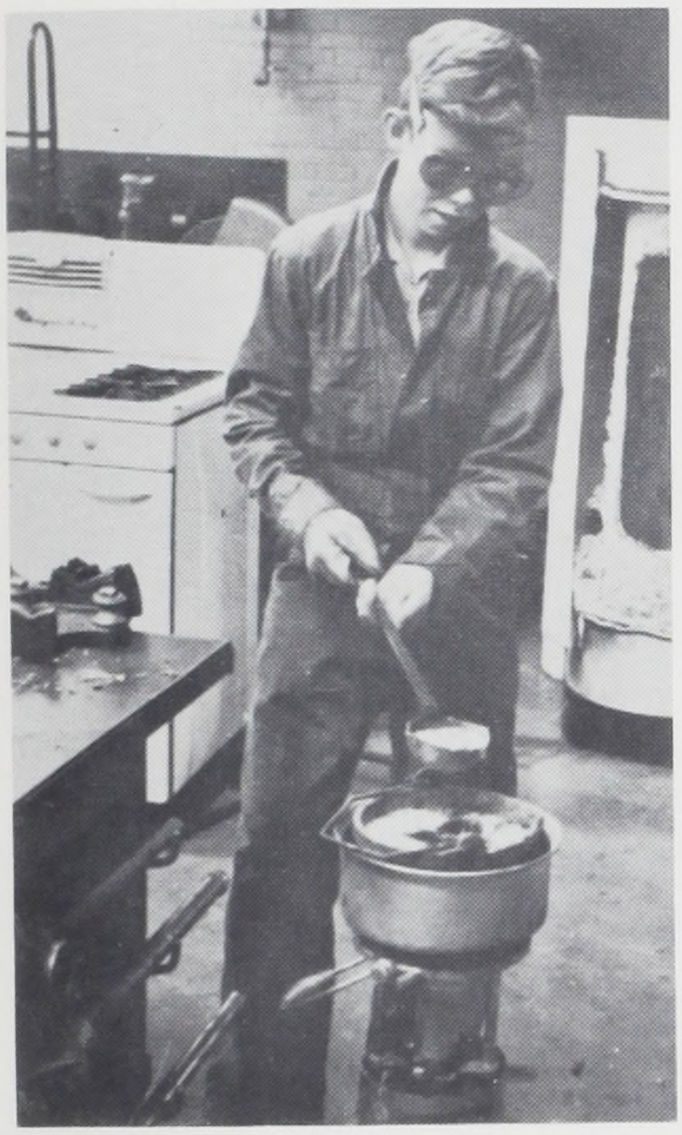
Tom Strope watches the water fry on this hot plate steel he is trying to cool.

Mr. Richard Williams grades students' projects and tells them how not to make the same mistake.

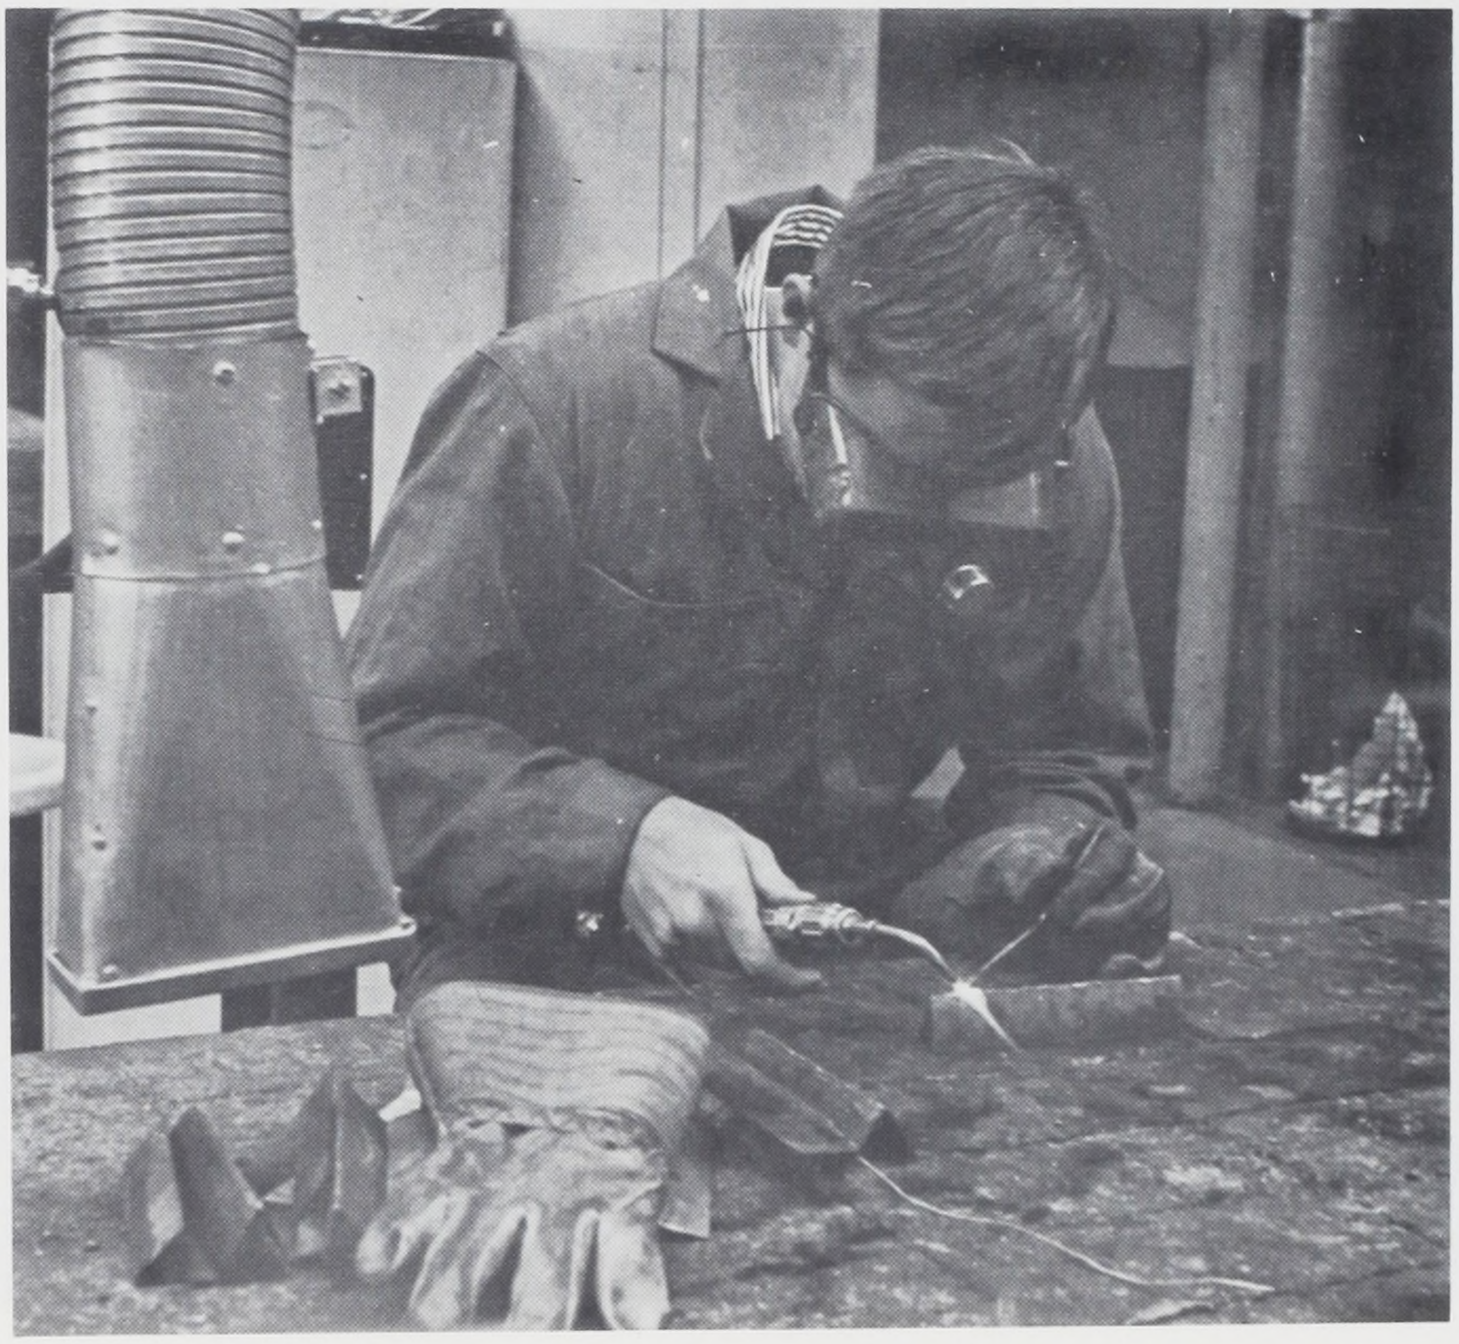


Students learn how to thread pipe with these dies and threading stocks.

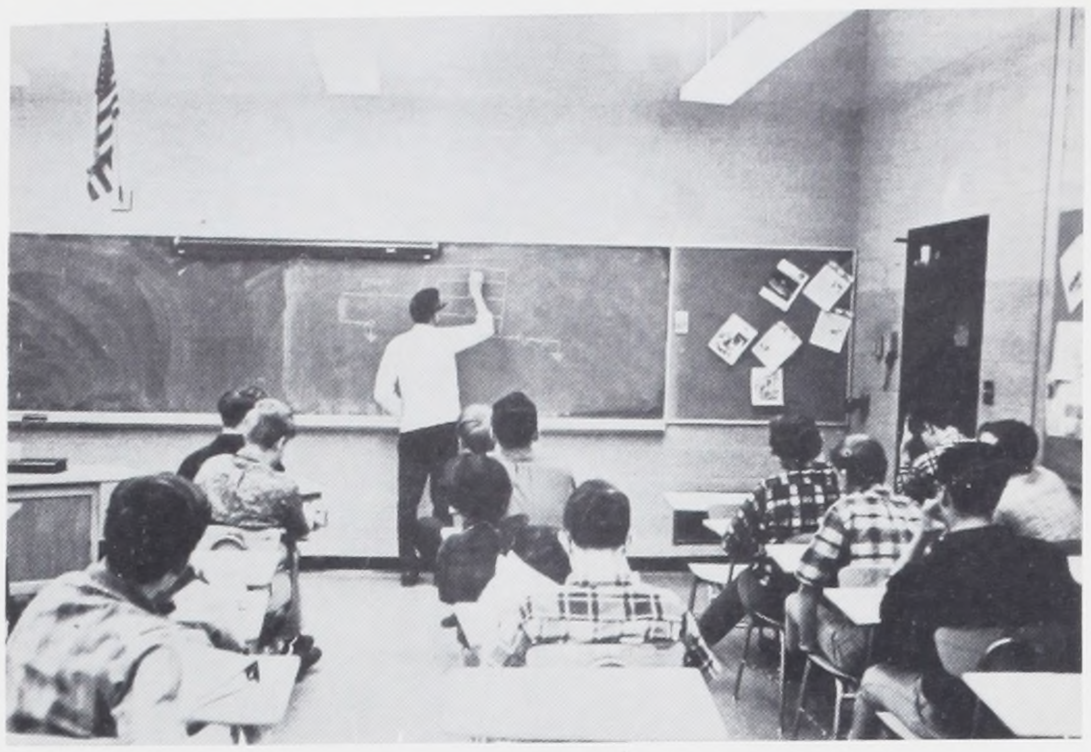
Plumbing



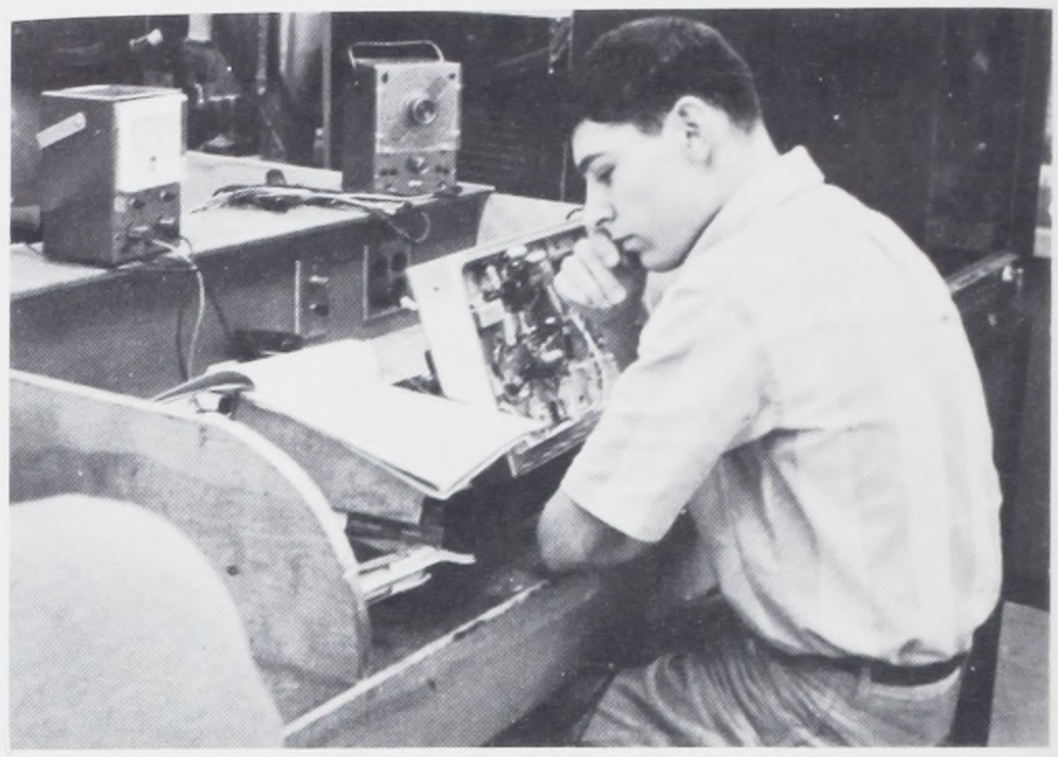
Sophomore students learn how to pour and pack lead around sewer pipe.



All sophomores who take plumbing get welding experience too, for they don't get it in their sequence.

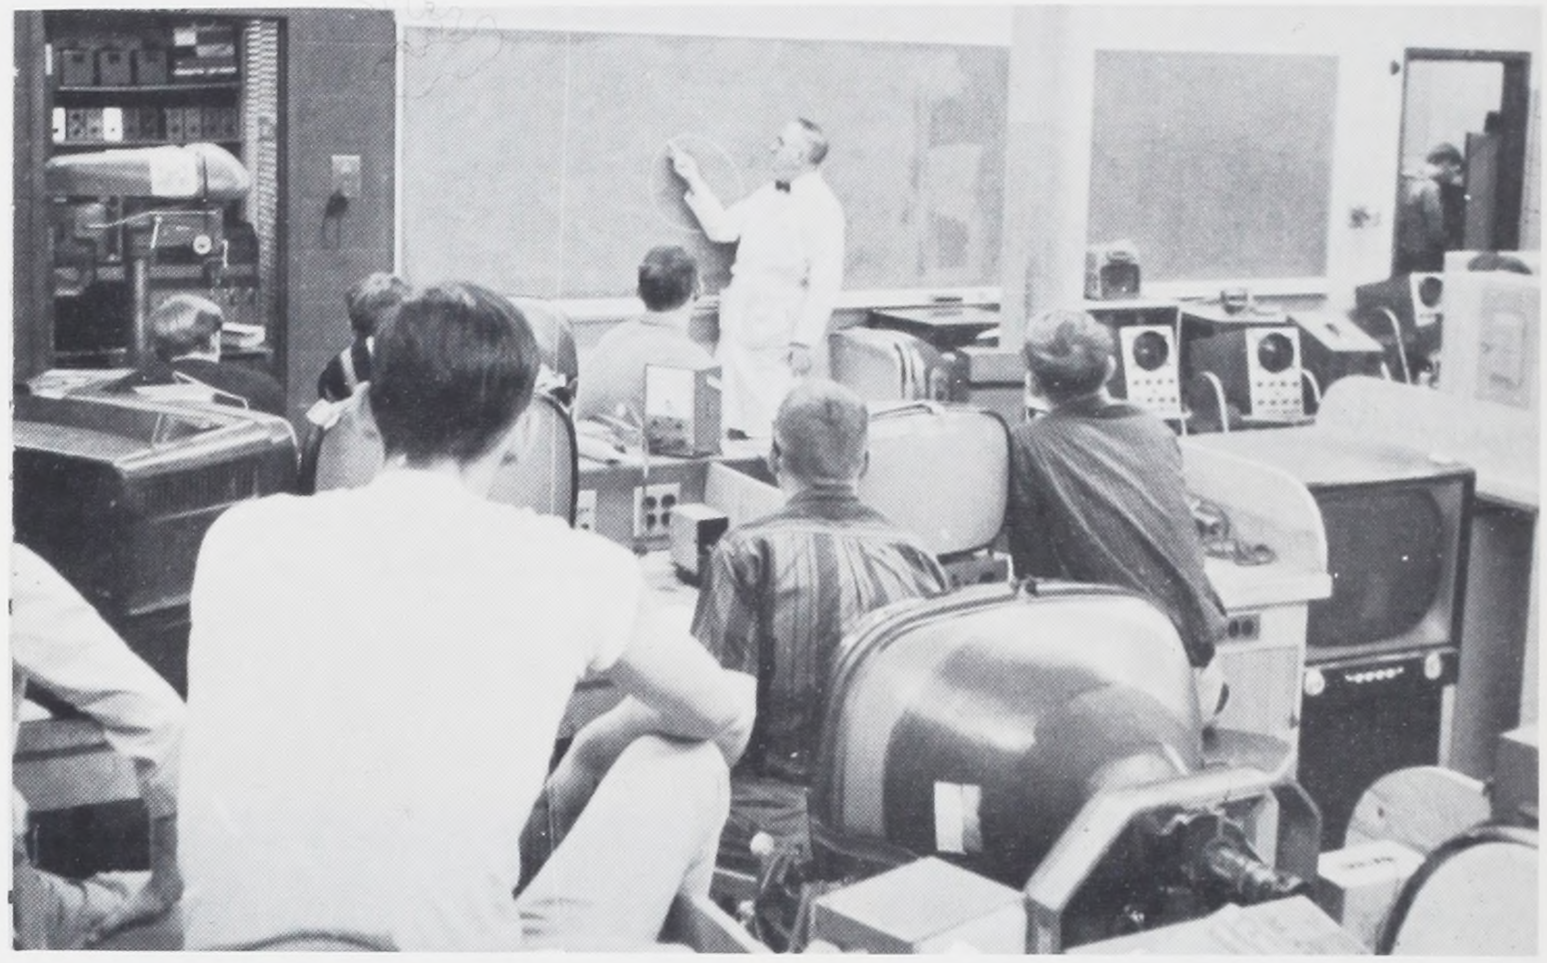


Students taking radio shop take radio theory also. Here the instructor puts a schematic on the board.

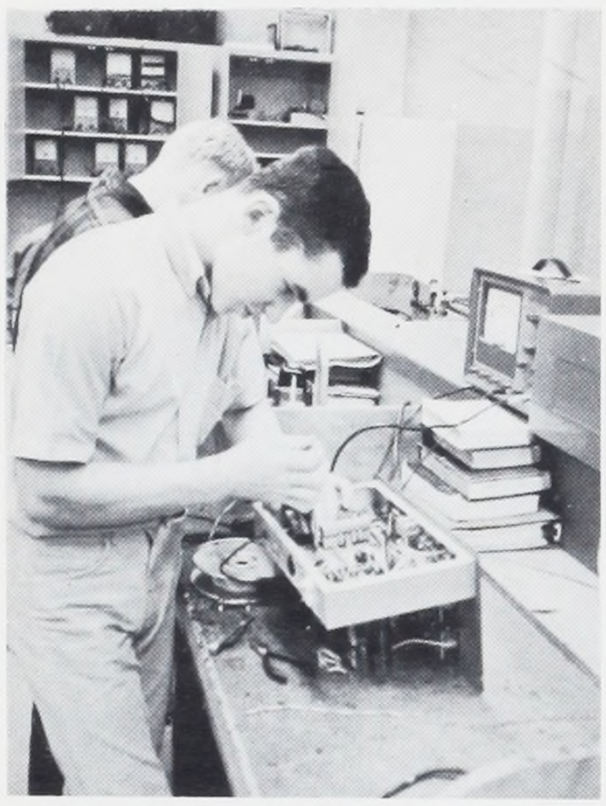


Fred Martin studies a schematic in order to find his way through the wire jungle on his right.

Radio

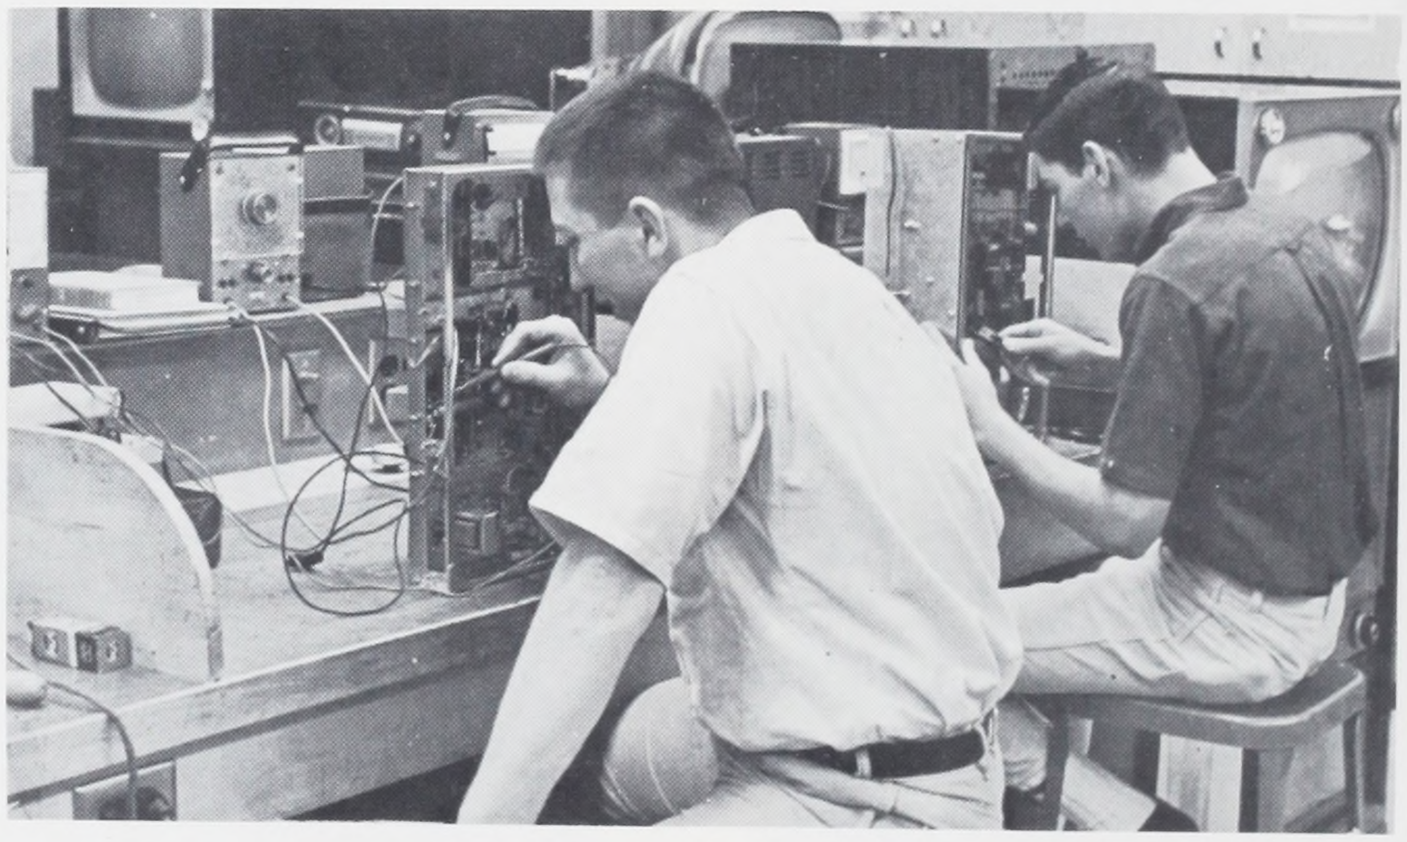


Mr. Nyberg gives a shop talk on transmission of radio signals around this egg-shaped world of ours.



Students may build their own radios, amplifiers and other projects.

Radio students learn how to use the oscilloscope, an important testing device.



Students test circuits for shorts and bad parts before hooking projects up to 110V.

Academic Instruction

Benson offers not only fine technical instruction but also a very good academic program. Benson offers almost all of the academic courses which are offered by other Portland high schools and several which are offered at no other area school. Four years of science, mathematics, and German are offered here to those who intend to go on to college or university. Many other courses are offered for the benefit of those who will go directly into industry, courses with a more immediately practical use such as journalism, publications, speech, science, business education, business law, typing, algebra (3 years), senior mathematics, biology and physics, social studies, engineering problems, chemistry, Art, physical education and health, and music.

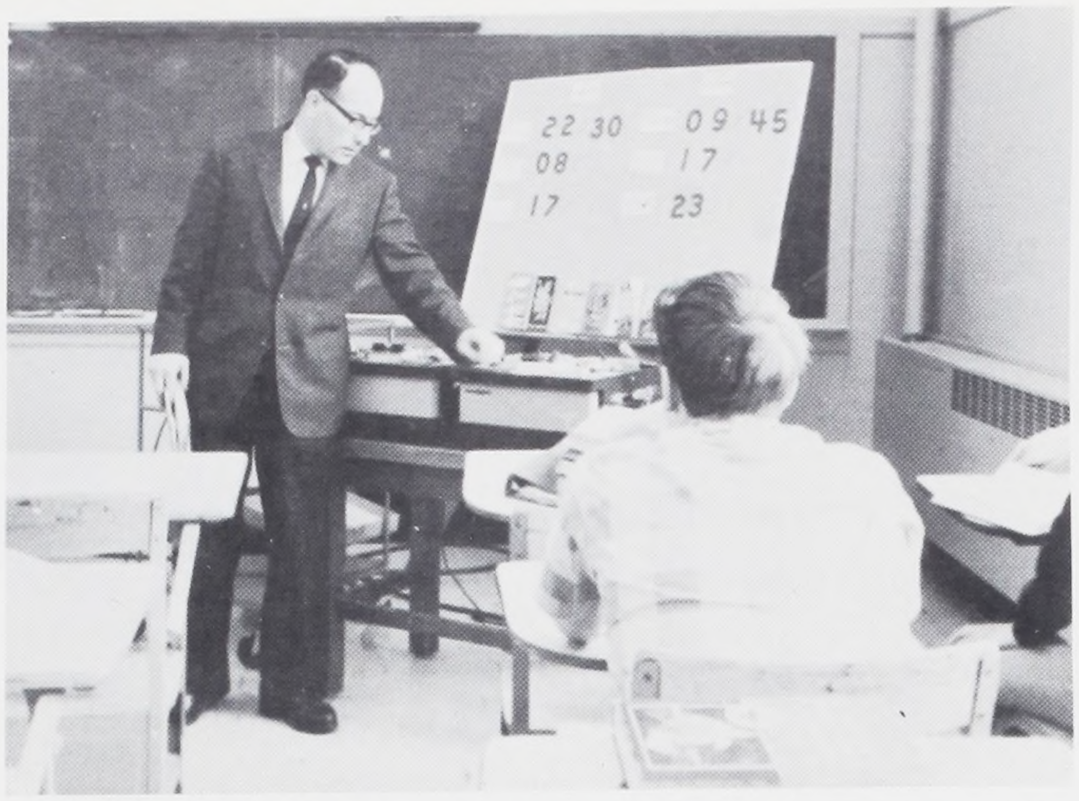
Above, Mr. Reuben Fisher takes time out to help two sophomore students with their physics.

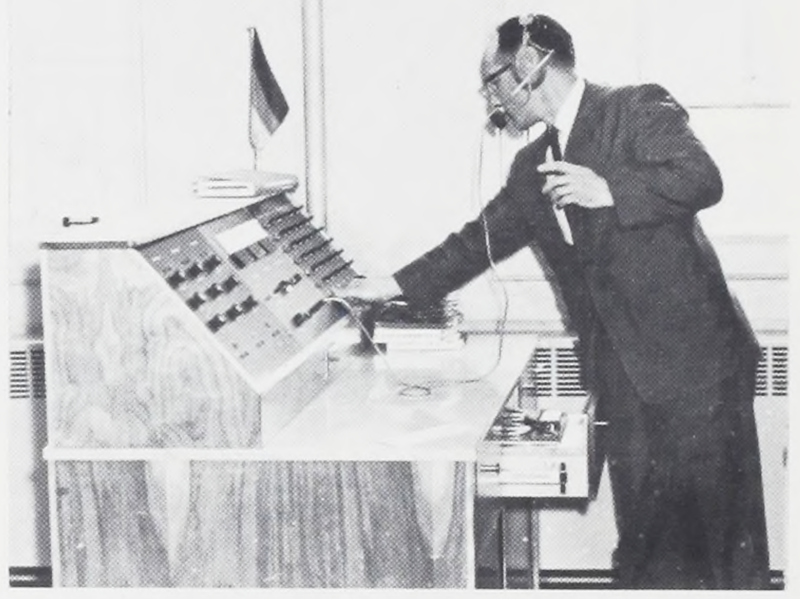


Above, Mr. Veley uses the old way of taking taped lessons with one big tape recorder.

With the new language lab each student gets a head-set and can adjust the volume to his needs

German

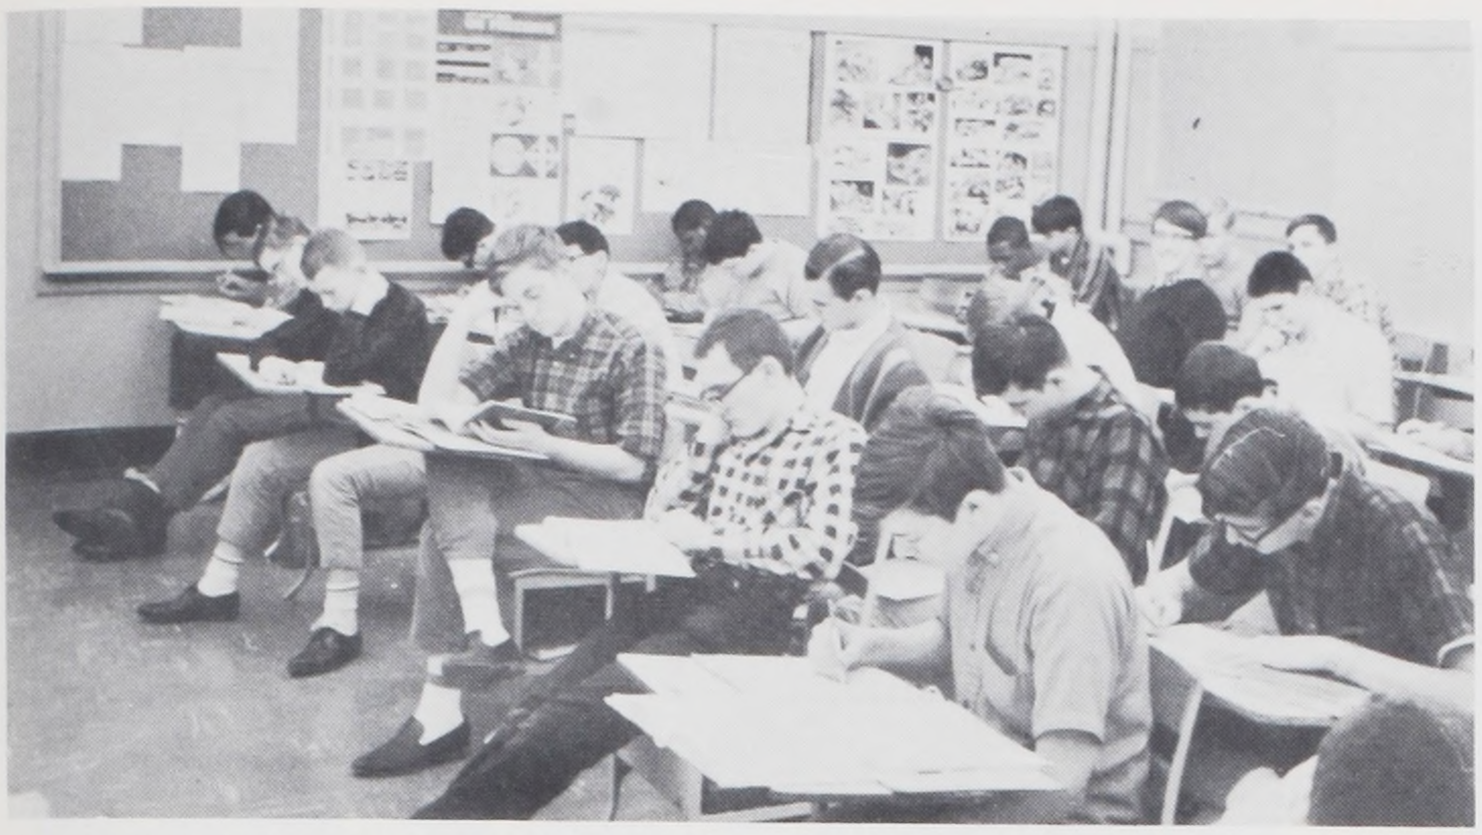
The whole class listens to the tape, then repeats it back into the mike which is on every head set.



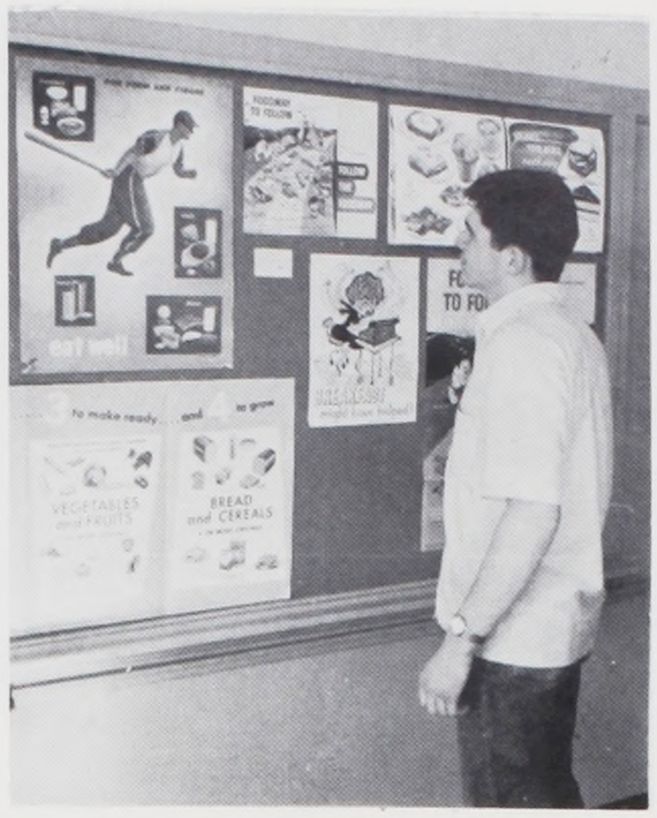
The teacher, Mr. Veley, can listen to the whole class on his head set or he can listen and talk to just one student.

A study of Germany and its customs helps students take interest in the language.

The sentences on the board says, "You should know German," and "Can you tell me what the boy (in the picture) is doing?"

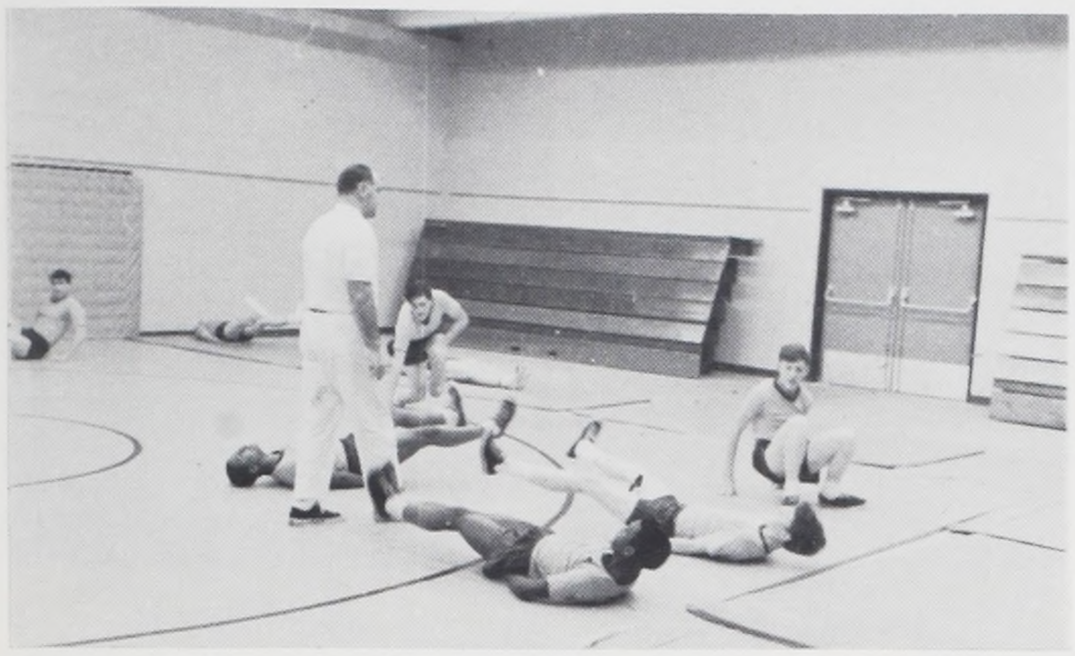


In Health class students study health, first aid, and drivers' education.

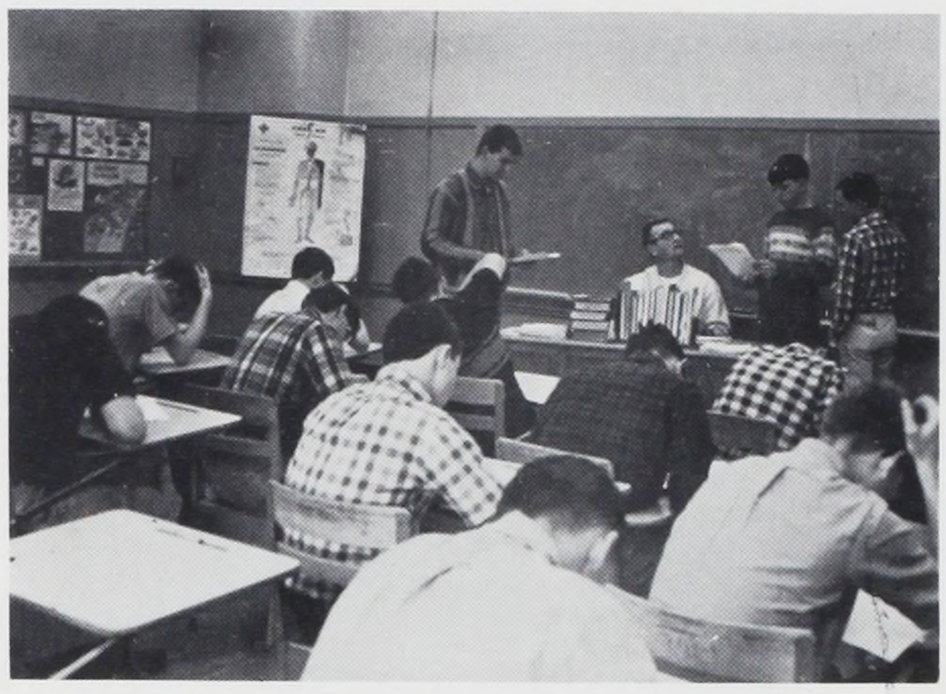


Bruce McPherson looks at health posters.

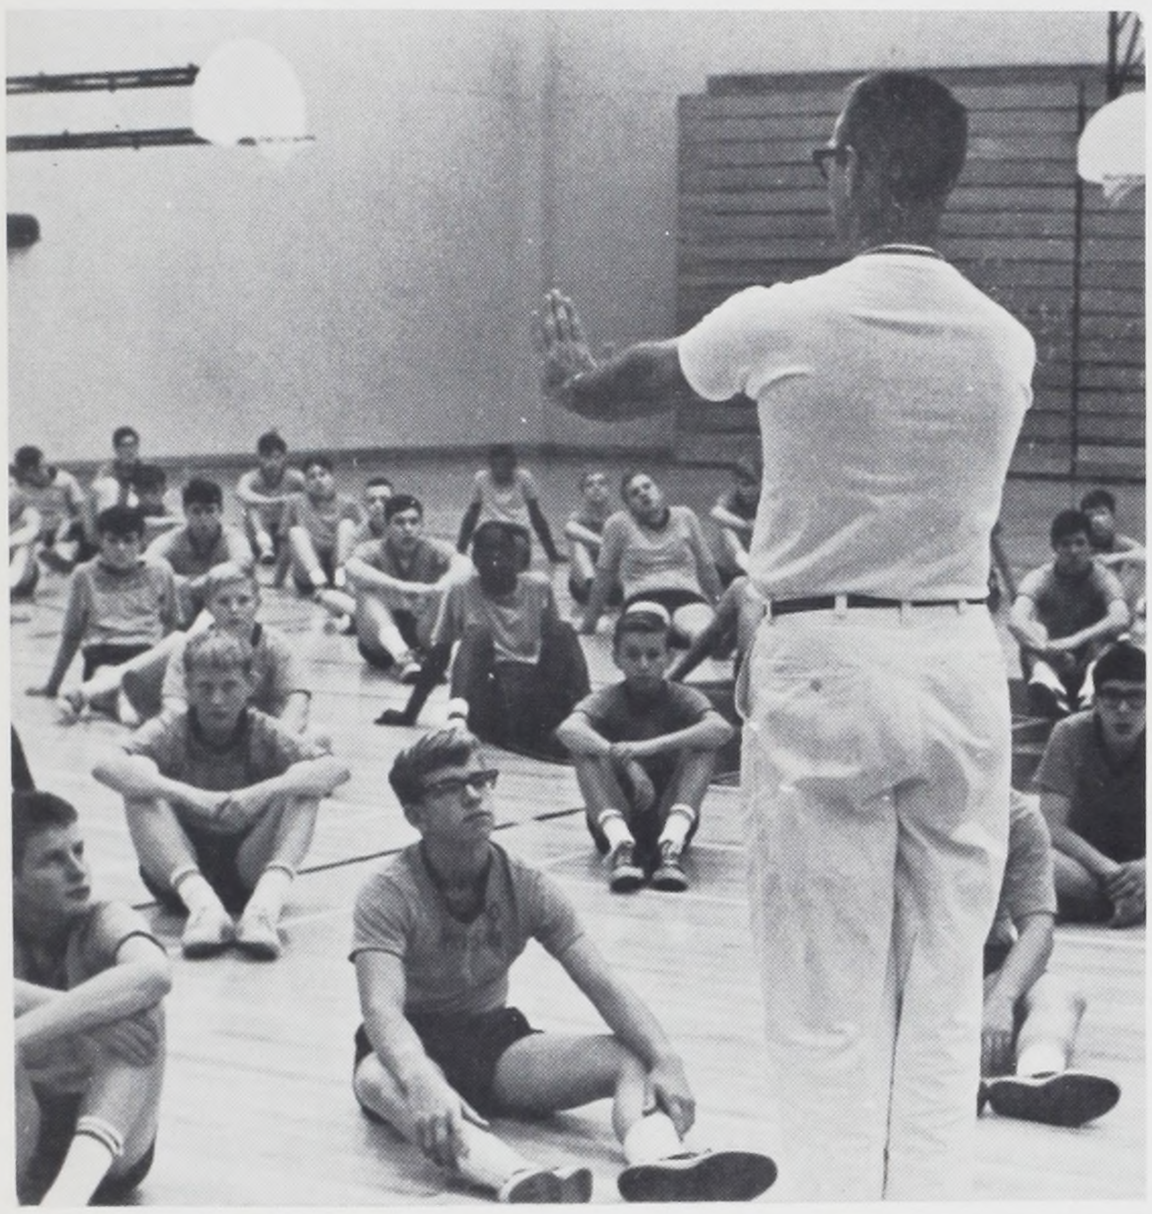
P. E. and Health



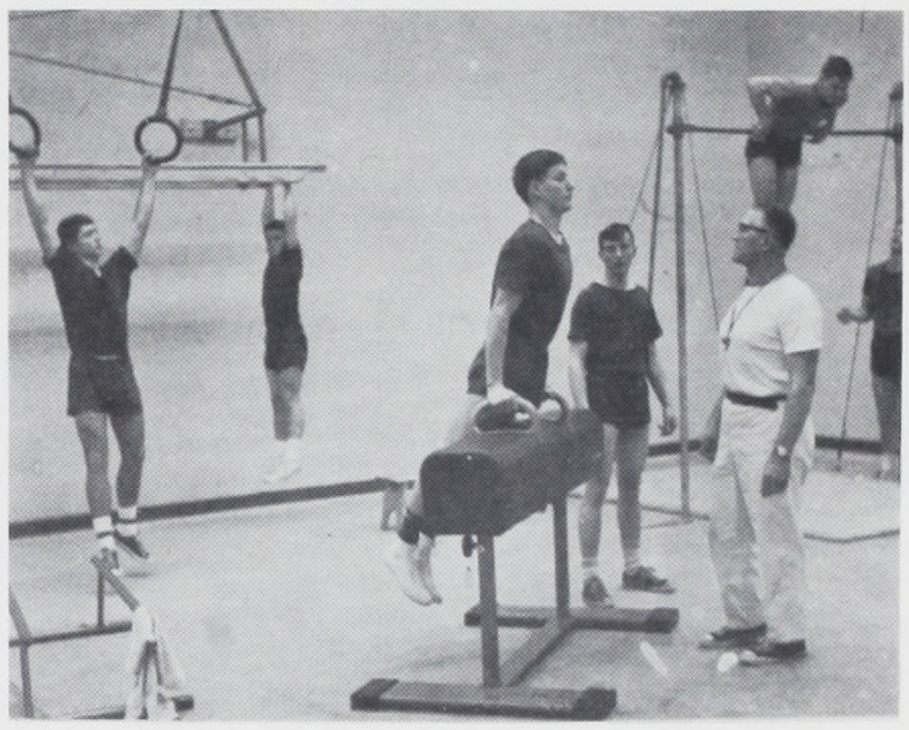
Here in the new gym wrestling room, Mr. Sienko has these sophomores do some leg lifts.



In Health class students discuss questions they have about first aid with their teacher, Mr. Johnson.



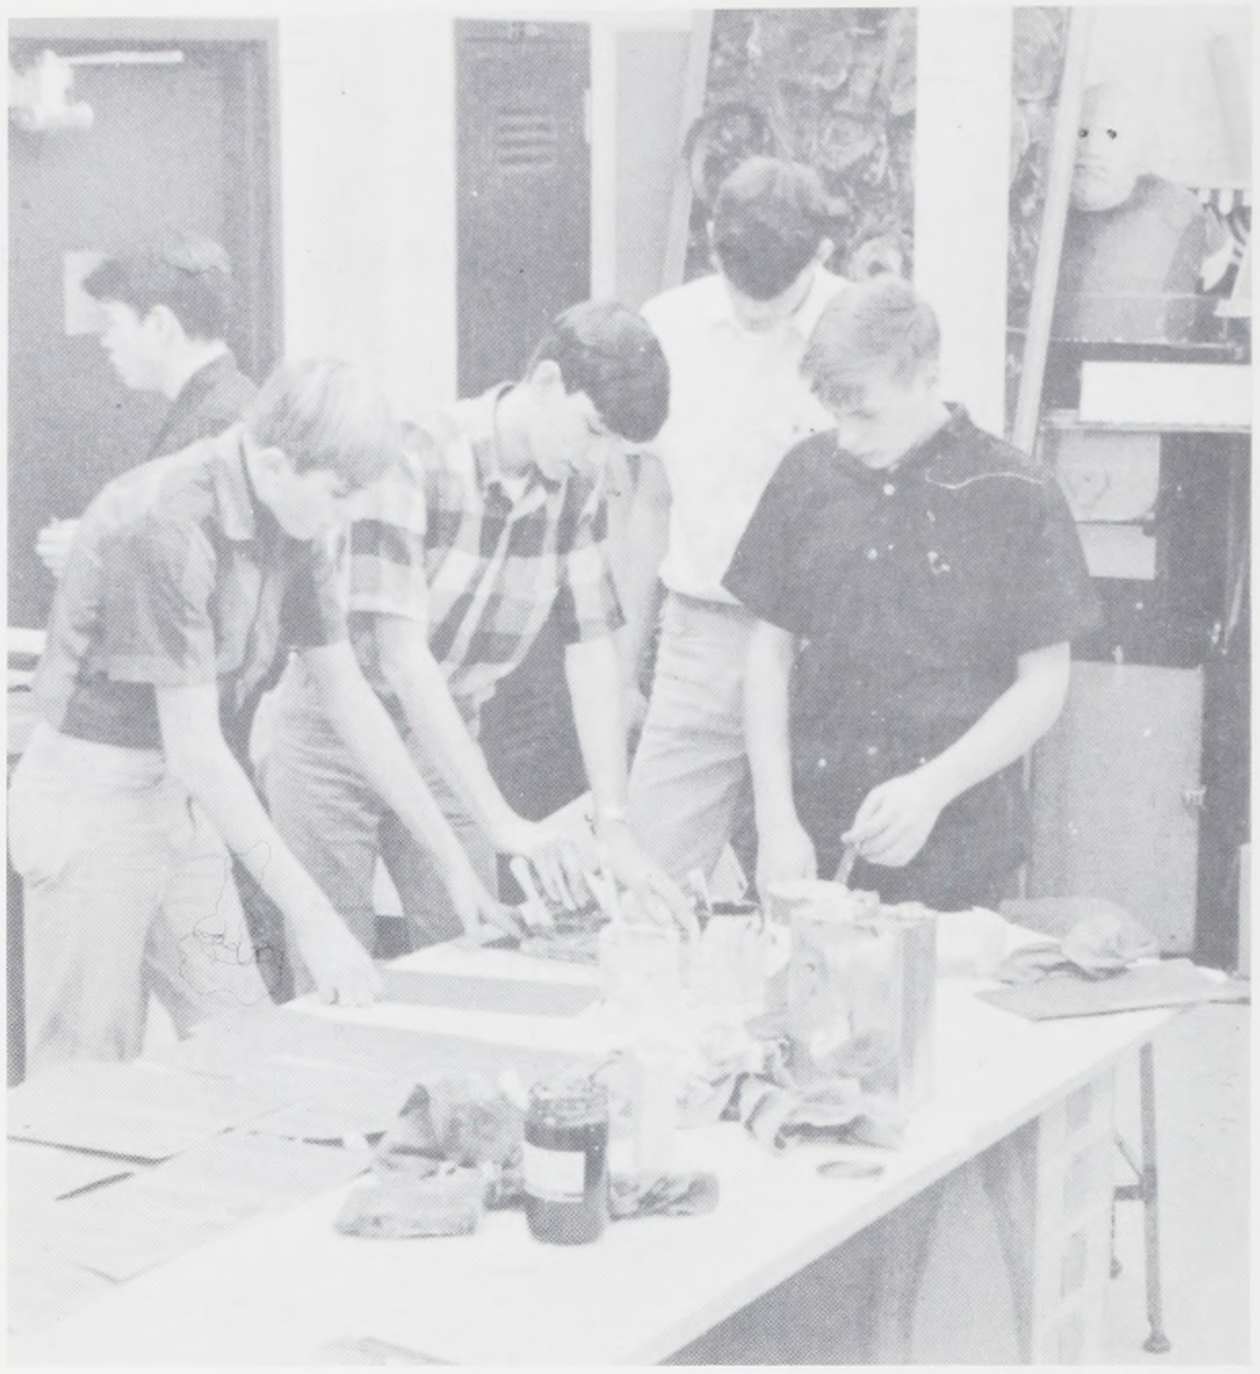
Here Mr. Johnson tells his freshman students how to do push-ups the correct way.



Above, Mr. Mucha keeps an eye on his students while they work with the new gym equipment.

A freshman draws a geometric art figure such as the one shown on this page.

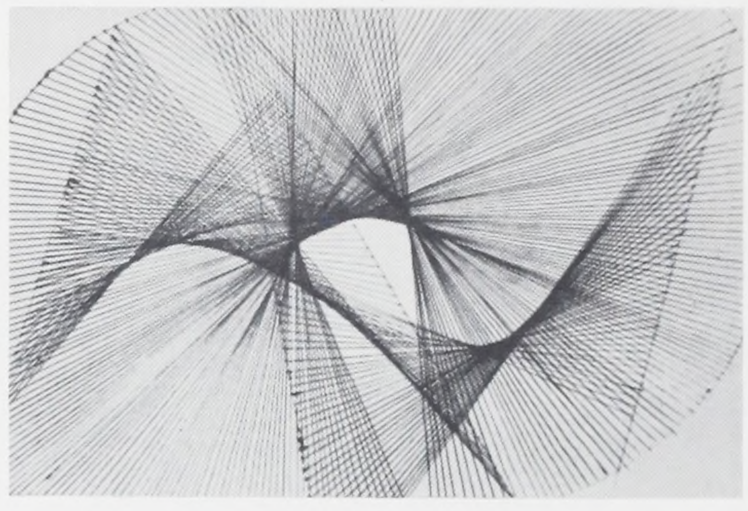
Art



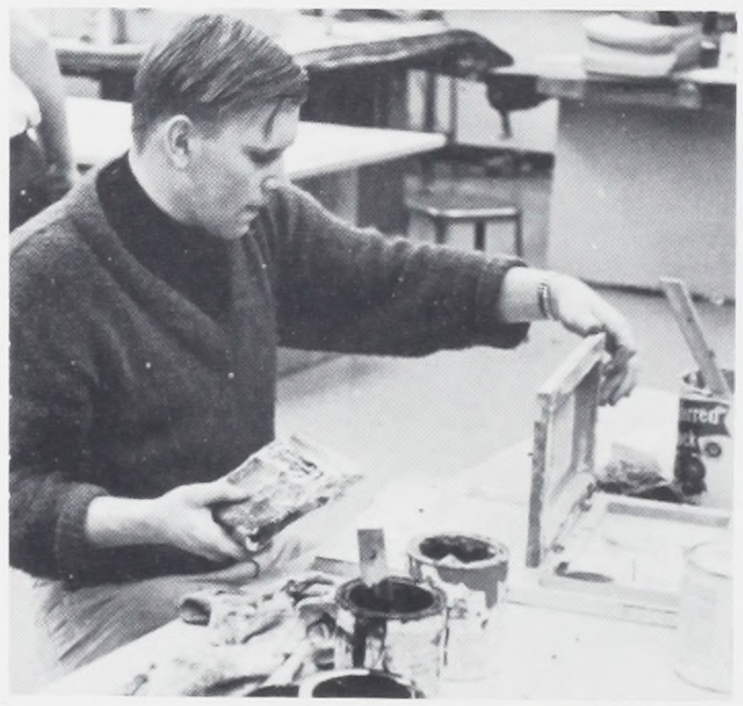
Above, some art students take turns running the silk screen, a form of printing.

Here is a typical class room shot with everyone busily putting their ideas down on paper.

Below are a few of the projects the boys in art made this year.



This is an art figure such as that being drawn by the boy in the upper part of this page.



Here Don Propeck works with the silk screen to make prints for the Tech Show.

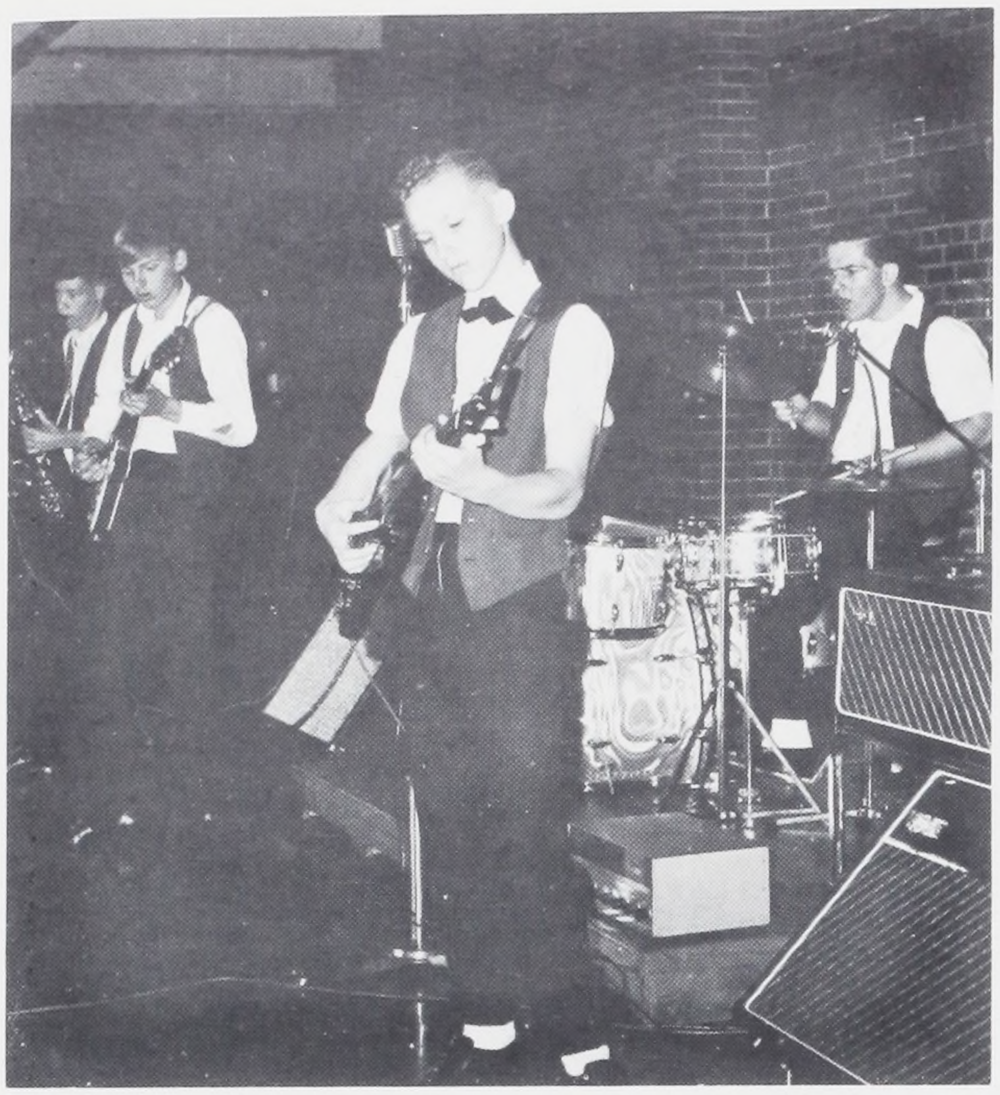
ACTIVITIES

Extra curricular activities are important to Benson's student body. These activities teach students many things which they are unable to pick up in the classroom; such as the social graces which they get from dances, the school spirit which they get from the Tech Show and other organized activities, and the chance to meet with other students with like interests which they get from the various clubs.



And the band wailed on.

Everyone danced the latest dances at the Sock Hop in the gym.

The Doings

Many fine foods were available at the Rustlers Cafe.

The 1966

This is just one of the many games that could have been played for fun and prizes.

The Travelers Three gave a fine performance of folk songs.

49'er Affair

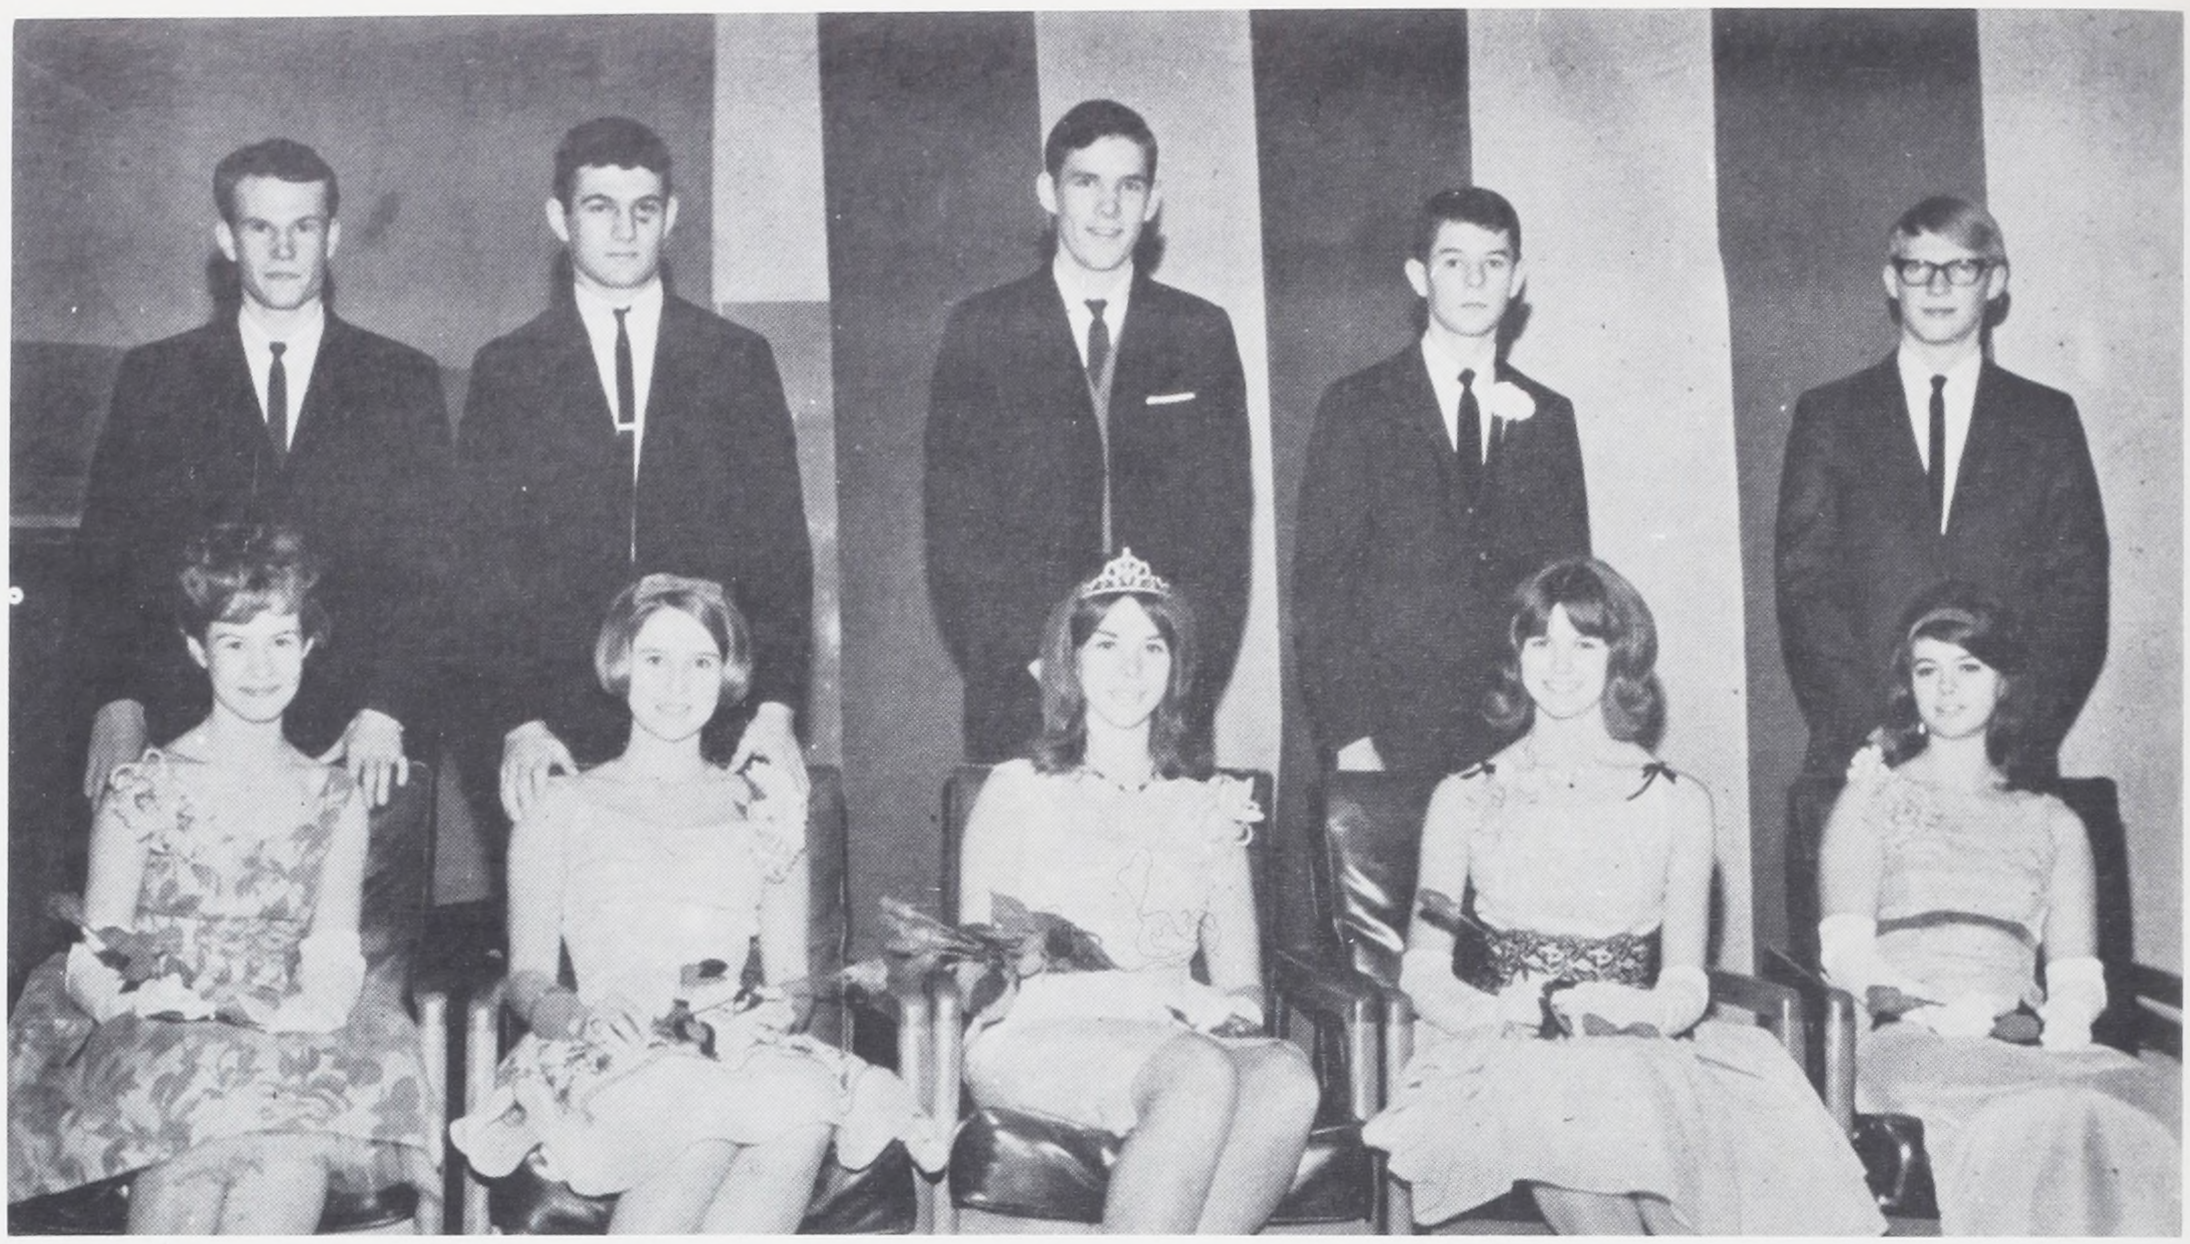
Carl Bowles gives his impression of Noah and the Ark.

The Polka-Dots played several fine polkas during the show.

The Six Pack was one of two teenage combos to play in the stage show.

The Stage Show

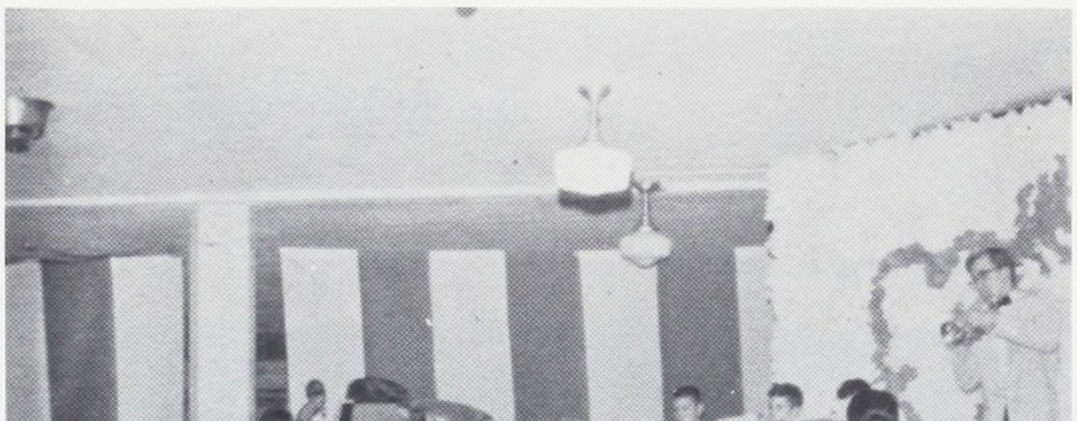
The Benson Ambassadors bellowed out.



The Queen and Her Court: Jackie Windust, Nancy King, Linda Richardson, Cathie Buck, Linda Smock

Sweetheart's Ball

Everyone seemed to be enjoying themselves as the band played on.



The Clackamas High School dance band provided 'swing style' music.

Queen Linda Richardson and Escort Bill Pearson

BENSON ART STUDENTS WELCOME YOU

The Carrilons, a girl vocal group from Franklin High, perform their rendition of "Triple Trio."

Junior choir member John Mullen sings a solo part in his presentation of "Russian Picnic"

Sue Proppe and Judy Gusler go through their respective parts in performing "Lil Abner and Daisy Mae."

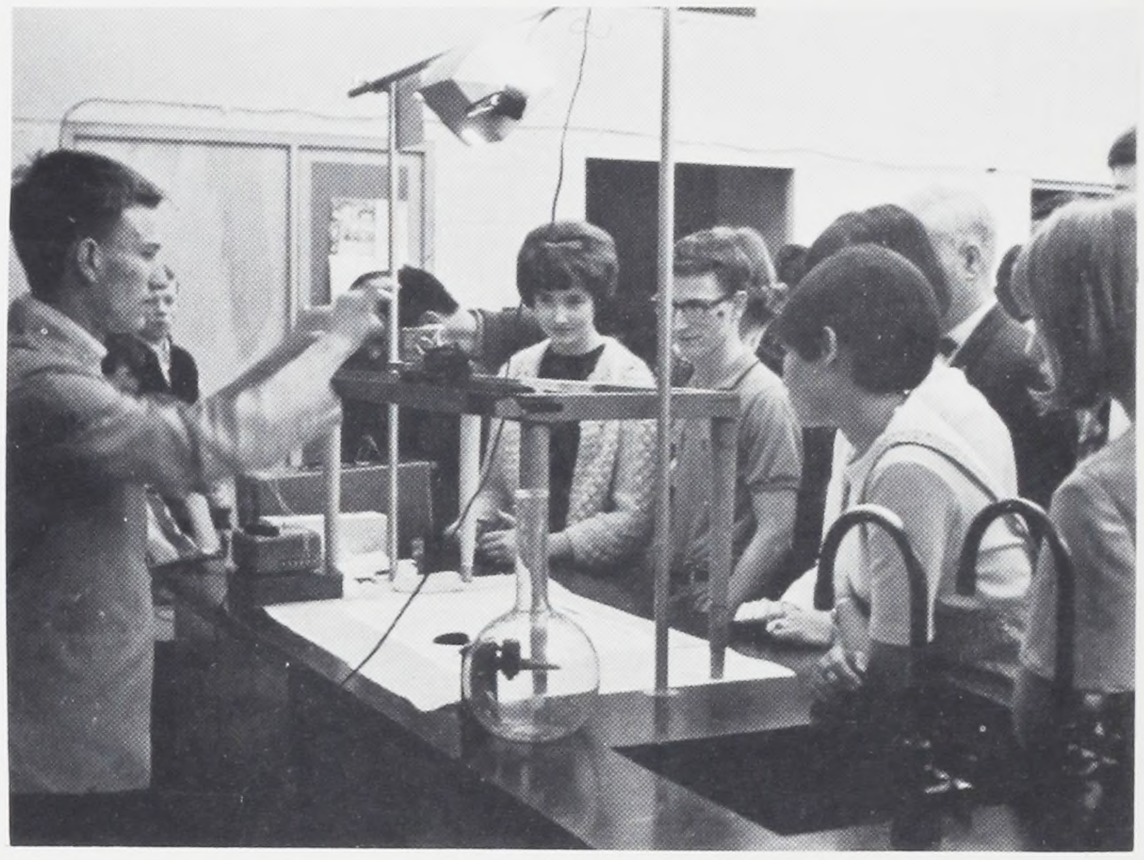
A Jefferson Democrat, Jean Frazer, performs her rendition of "Second Hand Rose."

The 1966 Tech Show

Senior Jim Tucker sings one of his selected folk songs.

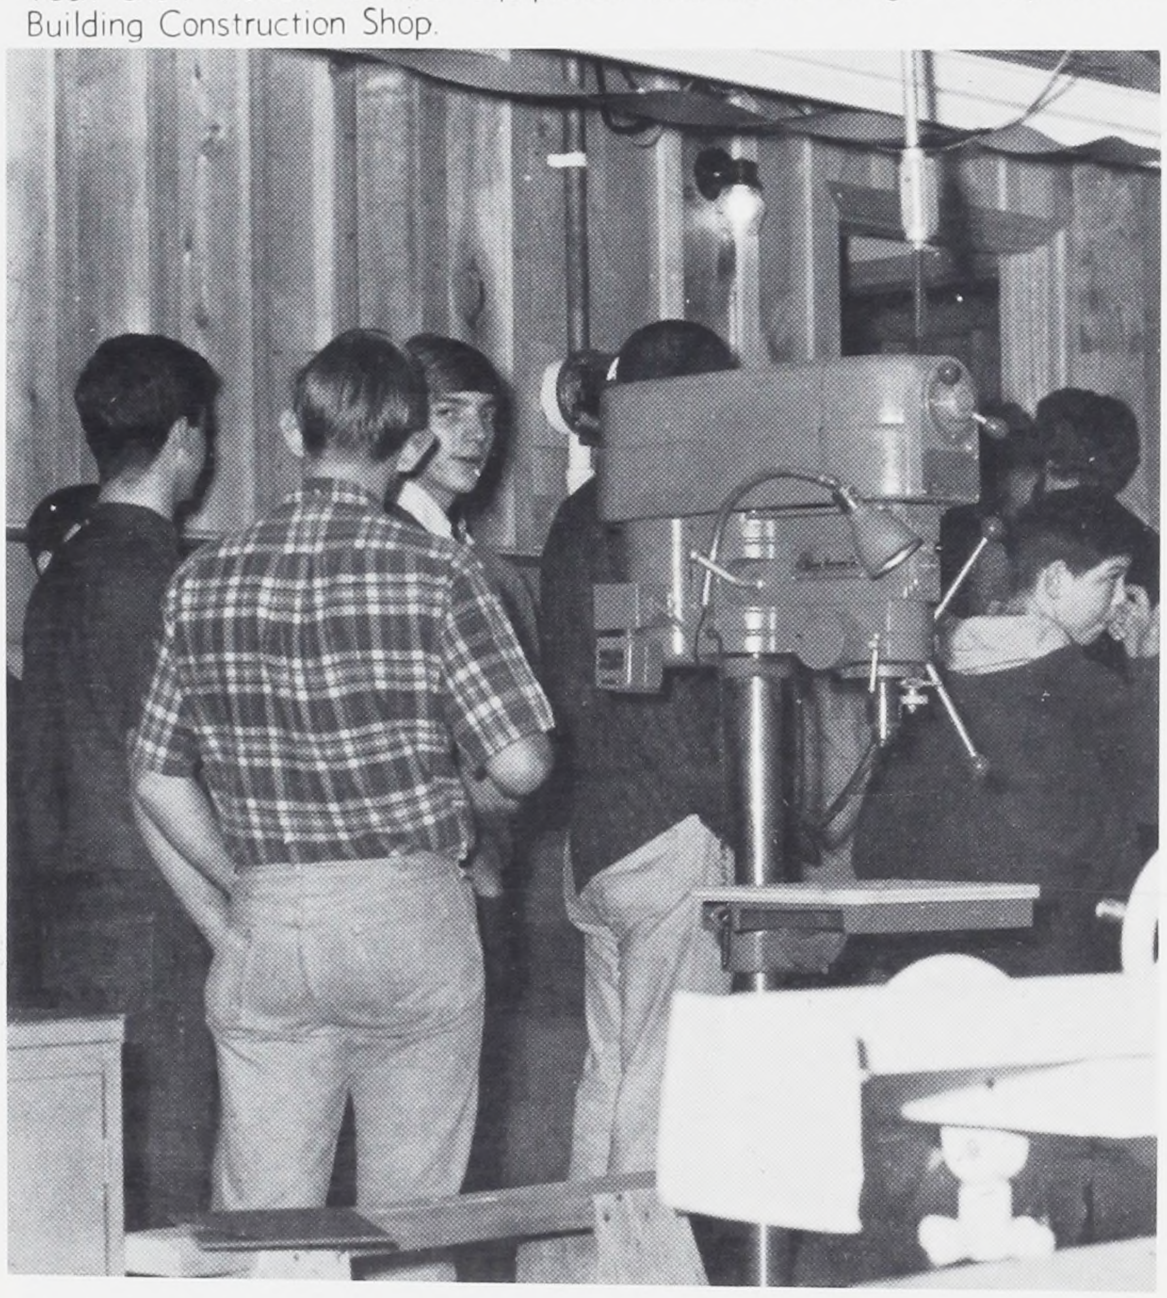
Interested young viewers admire plant vegetation growth experiment in Mrs. Jones' freshmen science class.

Senior science majors make up some liquid oxygen tor interested Tech Show viewers.



Chemistry major goes about conducting an intricate experiment for a captivated audience.

Tech show visitors admire equipment and surroundings in sophomore Building Construction Shop.



Tech Show viewers stand clear as they witness miniature bomb explosion in chemistry.

HONOR SOCIETY

Benson students who have earned an overall grade point average of 3.5 or better are eligible for membership in one of this school's most elite and respected organizations, the Omar Bitner Chapter of the National Honor Society.

Named for one of Benson's principals, the Omar Bitner Chapter was one of the original chapters of the National Honor Society in Portland. Two of its main aims are to create an enthusiasm for scholarship and to develop character and leadership in Benson's students.

KEY CLUB

Key Club is the oldest established social service club at Benson. The club has a long history of community and inter-school service, besides providing members with various social activities.

Key members initiate their service projects early in the year by operating booths at the annual 49er show. Come Christmas Tide, club members along with Portland Kiwanis clubs distribute food baskets to local needy families.

The highlight of the Benson social calendar is the annual Key-sponsored Sweetheart's Ball, at which one lucky Techman's date is chosen to reign as Key Club Sweetheart.

Undergraduates

Benson's 1,500 undergraduates as shown on the ensuing pages are, indeed, the backbone of the school. These gentlemen will one day step up into the honored senior section of the BLUE-PRINT, near the front of the book, and lead the way . . . as they will lead the way to future ranks of undergraduates when they ARE seniors.

These are the boys who the seniors of 1966 leave behind to carry on the fine traditions of Benson Polytechnic, and we have no doubt they will do us proud!

Ads and Index

Advertising is important to any yearbook, for it lowers the cost of the book to the students who purchase it. In the case of the BLUEPRINT, it also shows that industry in the area is interested in our growth and welfare. We thank the people who have advertised in this 1966 BLUEPRINT and ask all of our supporters to give their business to these persons who give their backing to Benson.

Our index is divided by classes for your easy reference. We hope you will find it useful in locating the pages on which you and your friend's photos appear.

Conger Printing Company . . . Portland

HYSTER

Hyster Company is proud of the many Benson Polytechnic School graduates who have become employees since the company was founded here in Portland in 1929. Many of these Benson men are now in key positions at Hyster plants and offices around the world. Such men have made a real contribution to the company's growth and development. Our Portland headquarters extends a cordial invitation to all Benson graduates to investigate the opportunities we have to offer, by contacting Mr. John Londahl, Benson Vocational Guidance Counselor.

If you plan now...

You help yourself and your nation when you continue your technical education in the fields of metallurgy, chemistry, physics or mathematics. These are the occupational fields in which the demand is greater than the supply and where you can find a satisfying, well-paid career—if you plan now.
