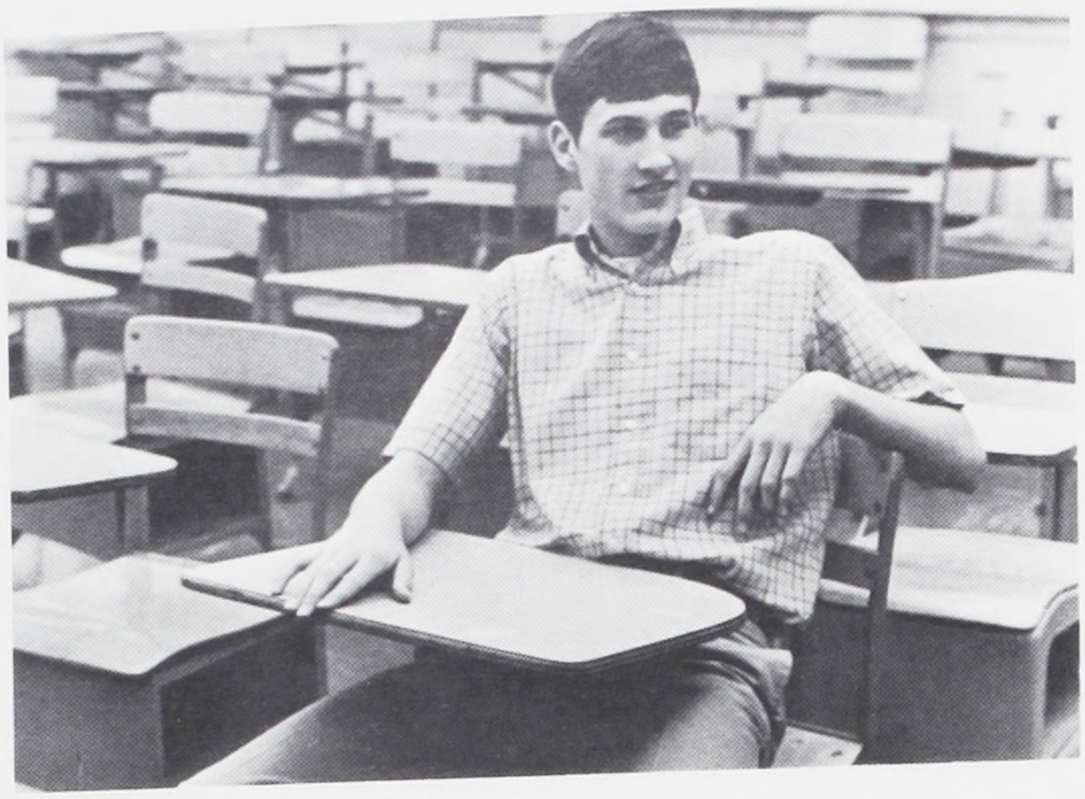
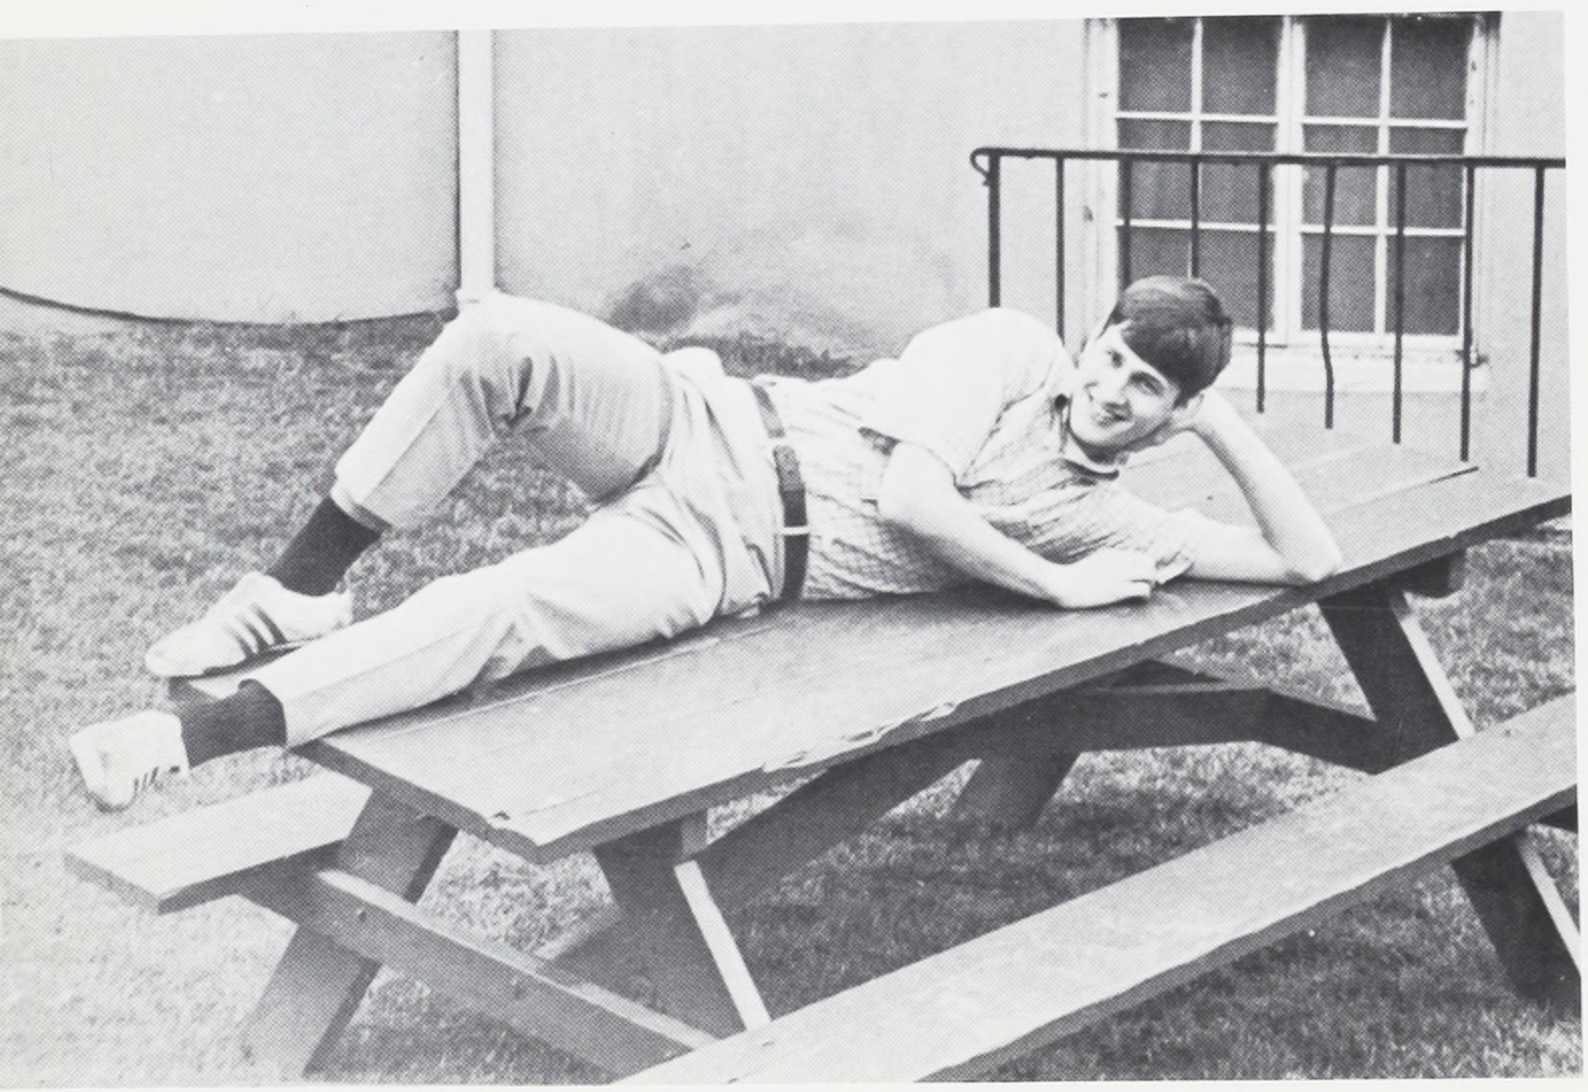
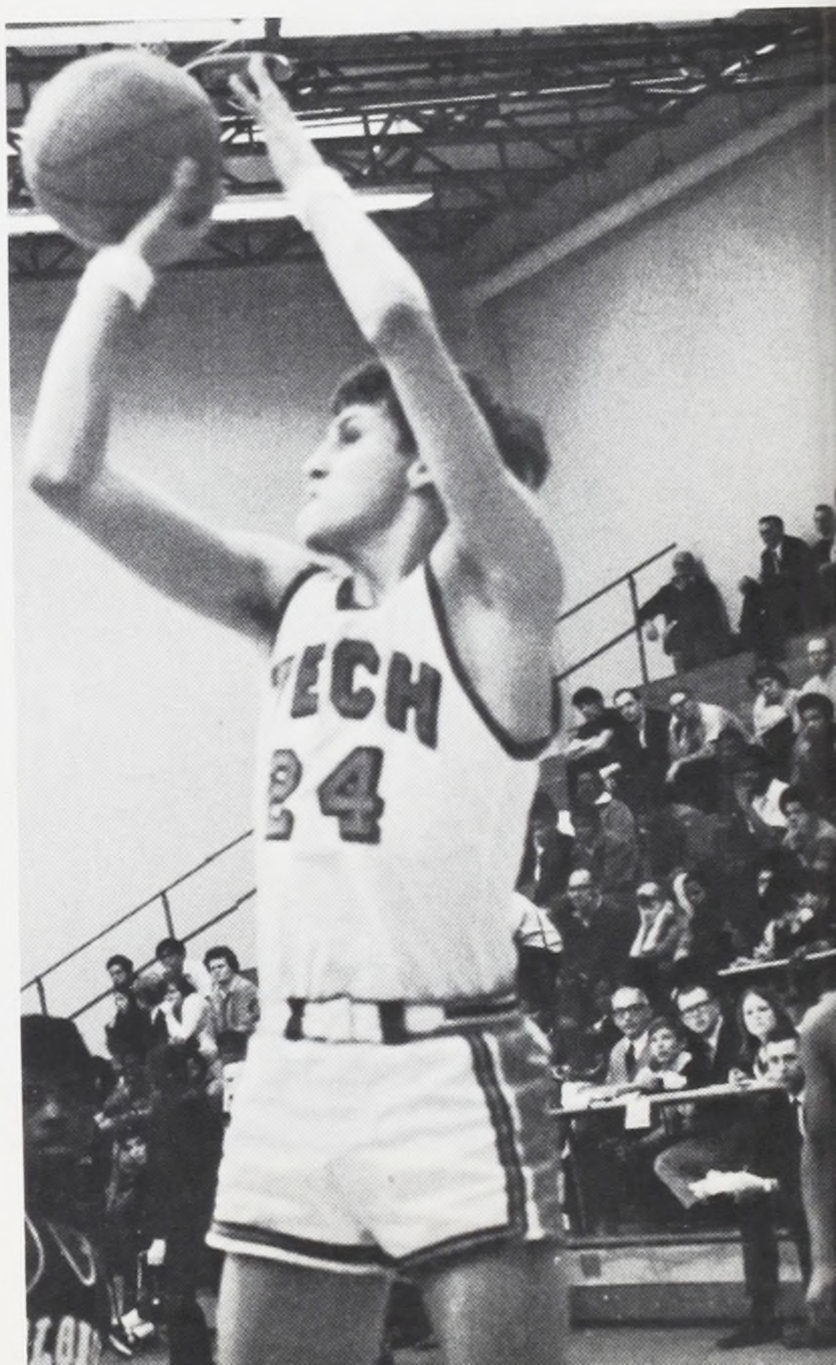
1970-in Action



Mike Hennessey

My four years here at Benson have been very rewarding in many instances. What athletic recognition I have received has come after lots of help from the Benson coaching staff and the administration. As a student I feel that there could have been better programs established and better relationships between administrators and students. The changes in personnel resulted in loss of much personal relationship which had been established.



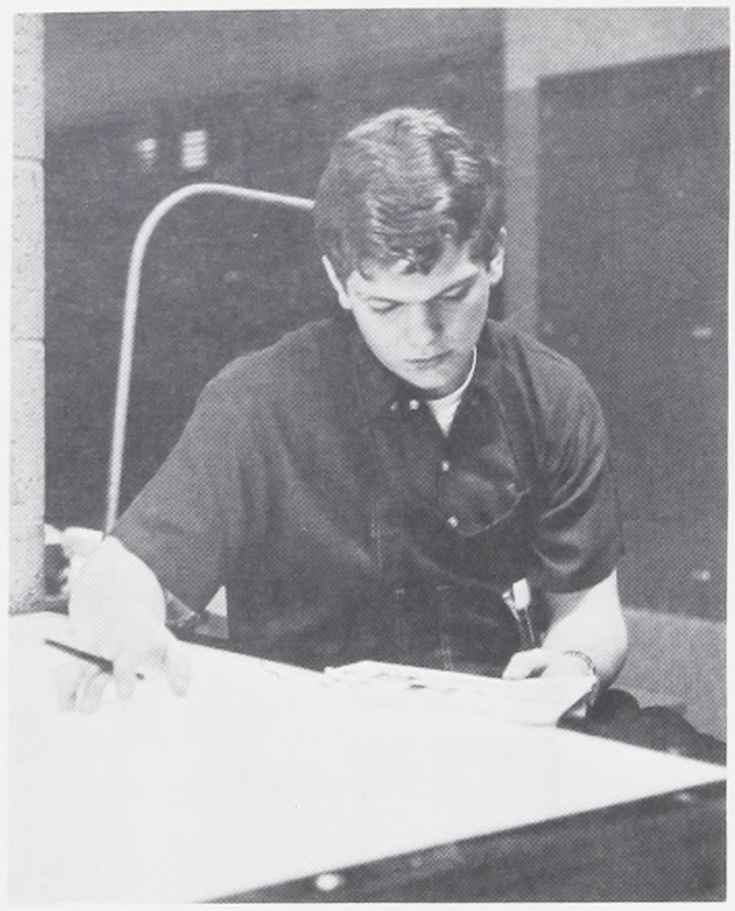


Greg Fleming

As a Senior at Benson, I have had the opportunity over the past four years to observe a number of meek changes. Most of them have been toward the monetary value of the school.

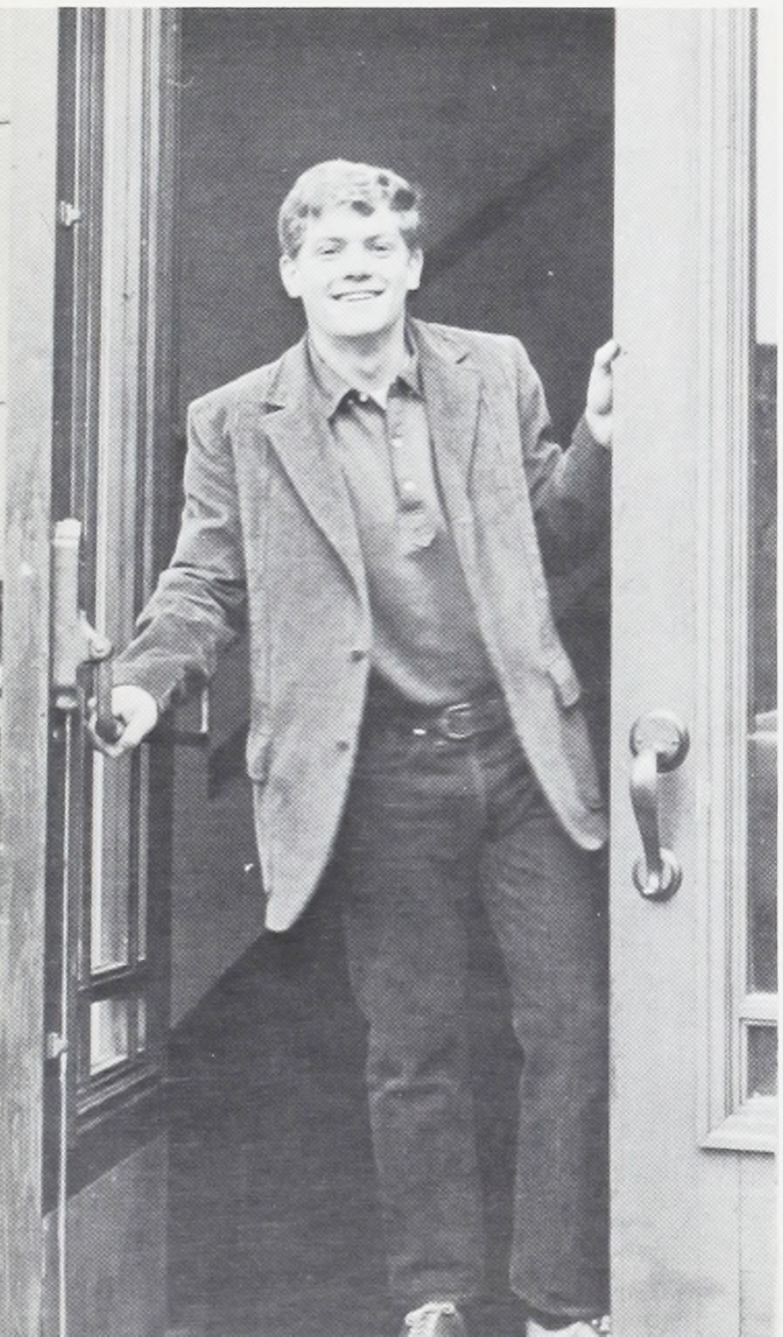
The educational opportunities at Benson are unequal to any other High School in Portland. But, to obtain this education, requires a student to enter an assimilated militaristic atmosphere. I would like to see students enjoy a more personal freedom of speech and dress, such as the teachers and administrators of this school enjoy.

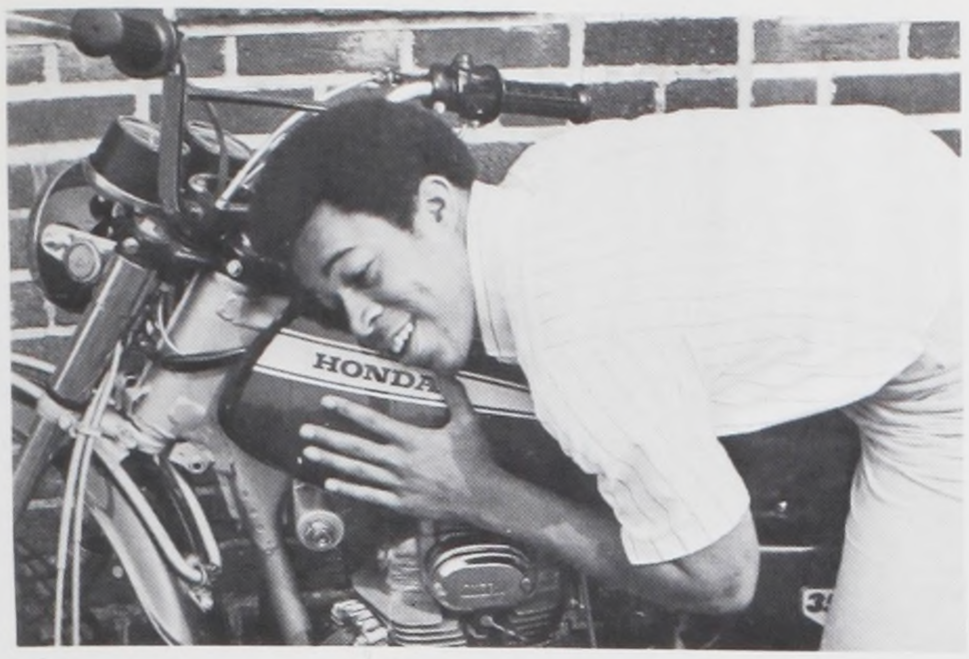
Also, I personally think that the students at Benson should be more encouraged to attend College, than go directly into the trade; as most students do not know what they want to do, for the rest of their lives.



This being my first year at Benson, I have noticed differences between Tech and other high schools I have attended. Both education and discipline are demanded here and I know this will make me a better person for having been a Techman.

Randy Sherrill

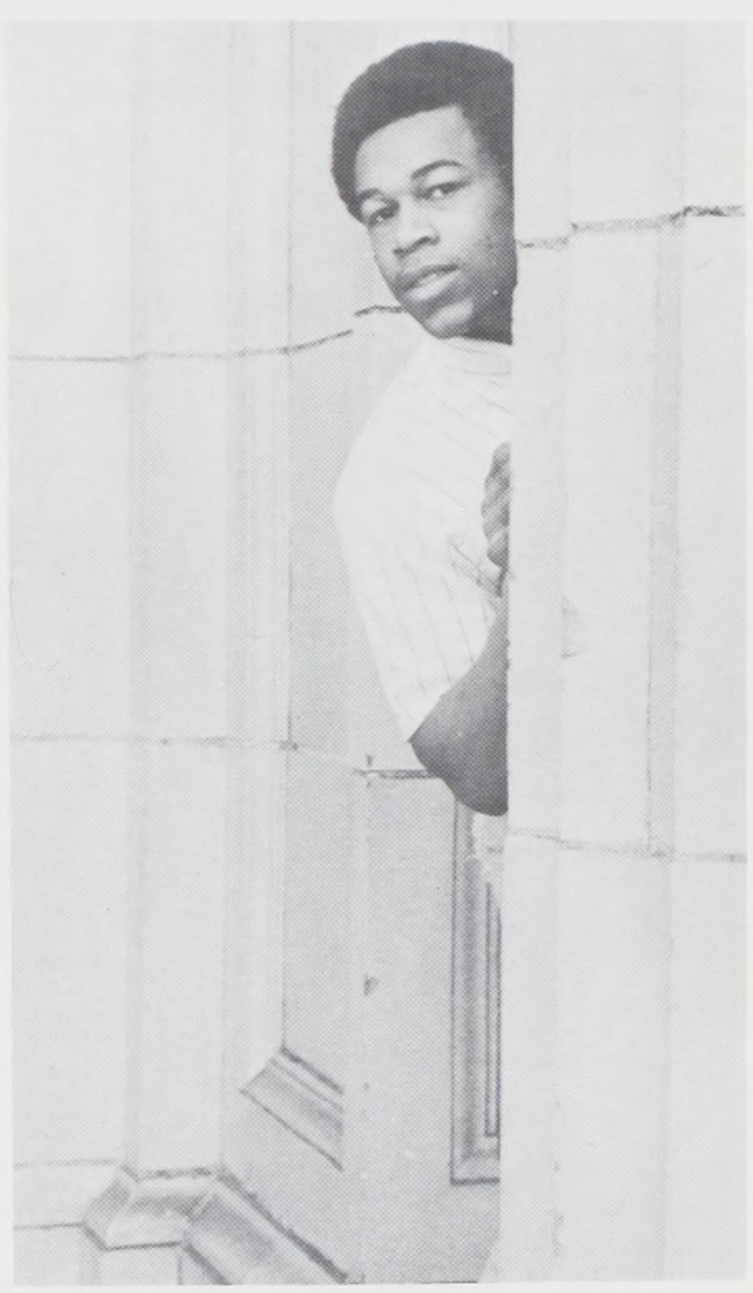


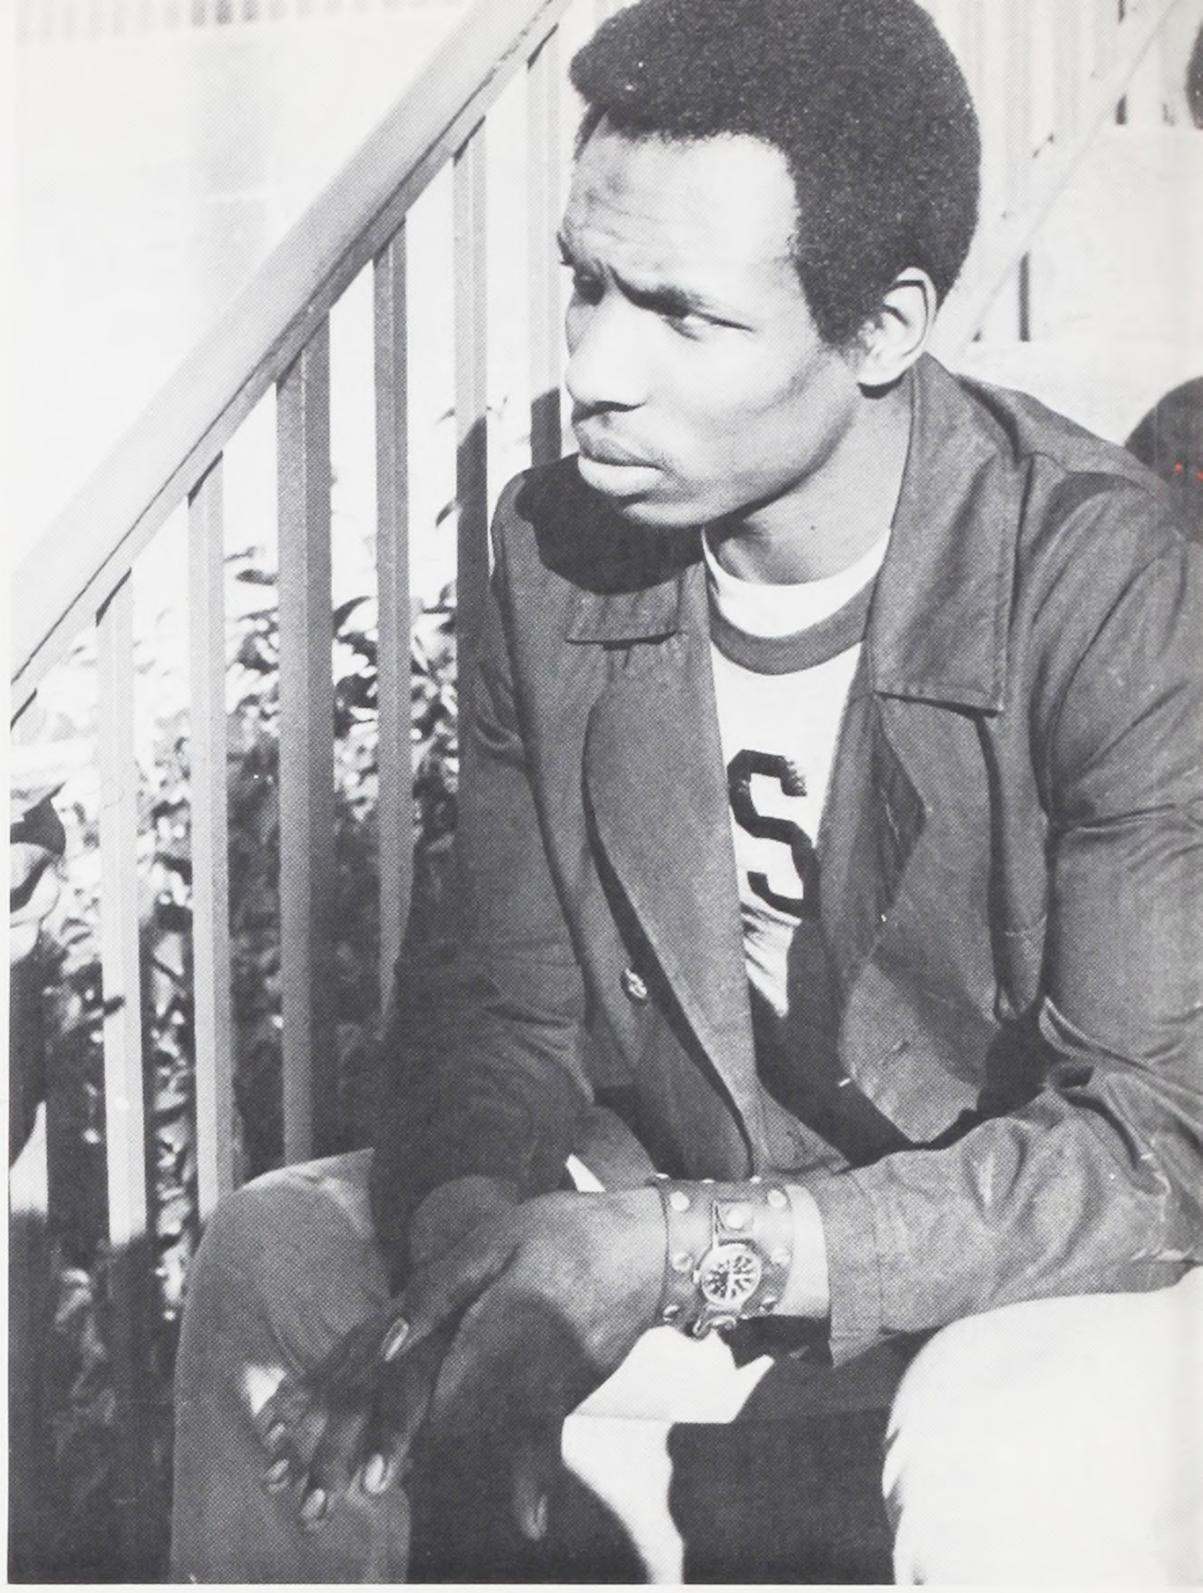


James Thomas

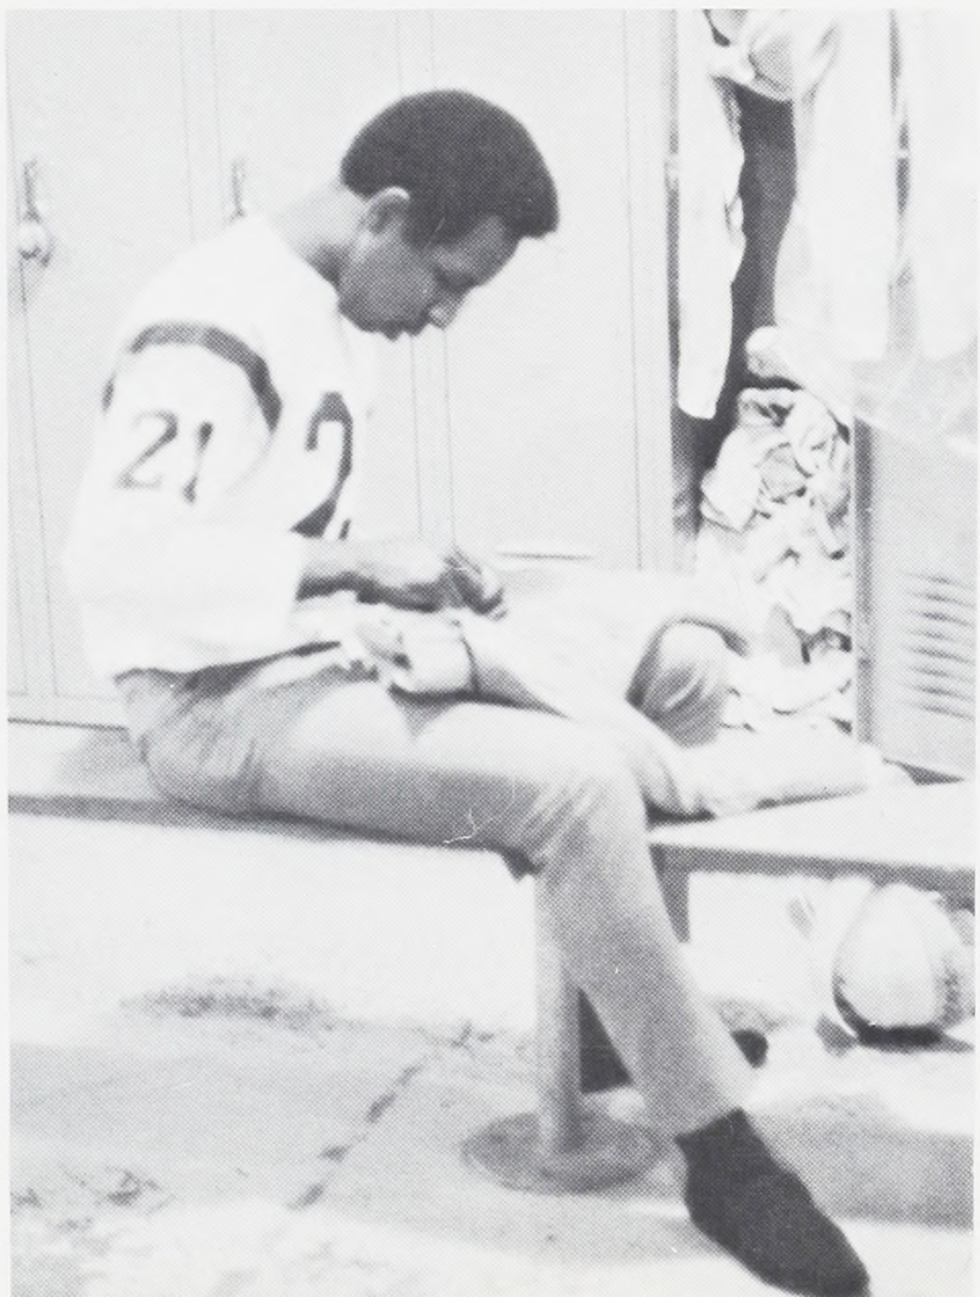
To have been a student at Benson has been an honor, a privilege and a great learning experience for me during the past four years. I have had the honor to letter in football, learn many music skills, and get a start on what I believe to be a great education. I hope that I will in the future turn out to be as fine a citizen as my teachers, my principal, my peers and my parents would like for me to be.

Be Cool!





Greg Henderson



There is no question that Benson has a fine academic and industrial shop program. But school is more than studies, books and term papers. It is a chance to see how things and people really are. What teachers, counsellors and administrators tell you doesn't necessarily apply. . .after one has experienced injustices at the hands of some teachers, counsellors and administrators. I thank Benson for opening my eyes.

Rick Jacoby

I must admit that I have benefitted a great deal from attending this fine technical school. I've probably received a better education from Benson than I would have gotten from any other Portland high school. However, Benson, like all high schools, has it's faults. I believe that the administration should re-think their ideas on several things. I think this has been demonstrated to me by the way my club and some of my friends have been treated, especially during this senior year. One's senior year is supposed to be the best. It is too bad that some of my friends haven't enjoyed it as I have.

Fre're

Fre're club was formed during the 1968-69 school year as an organization of students dedicated to the forwarding of brotherhood between blacks and whites. . .especially at Benson. Under able leadership and progressive philosophy, the group has been a real asset to Tech. The special assembly programs last year and this have done much for race relations in Portland. This year's show, "Doin' it Black", was especially well-received.

Front: Greg Henderson, Jerry Jackson, Jim Noble, Randy Hall, Vernon White, James Thomas, and LaFarest Gay.
